Factors that determine whether features specified in Headnote 3, such as textile fabric, will be considered ornamental in a particular case include whether they are in a conspicuous place, and whether they serve primarily a decorative as opposed to a useful function. Colonial Corp. of America v. United States, 62 Cust. Ct. 502, C.D. 3815 (1969). It is the Service's position that the primary purpose served by a manufacturer's identifying label on the outside of apparel is to enhance its appearance, saleability, or prestige. See, for example, ruling 070031 of August 25, 1982. In general, relatively small, rectangular shaped identifying labels containing plain, orderly lettering applied to apparel so as to be visible during normal wear, will not be considered ornamentation: however, anything done to enhance the appearance of the label, and therefore the garment, may result in the label being considered ornamentation. See, for example, ruling 060436 of August 16, 1979.

Here the label is conspicuously placed on the outside front of the jeans, where its primary purpose is decorative. Its non-rectangular shape, "grained" surface textured to imitate leather, and lettering arranged along the sides of the triangle rather than in straight, left-to-right rows, result in a decorative effect outweighing any useful purpose it may serve. The fact that the letters are relatively small and in block form is not alone determinative of the ornamentation issue.

Leather labels held not to be decoratively shaped in rulings 060194, of April 17, 1979, and 802139, of February 8, 1982, and therefore not ornamental, were rectangular, not triangular. Moreover, the label here is not of leather, as counsel for the importer suggests it is, but of textile material. Even if it were leather, since it is in the form of a design, a triangle, cut in outline and superimposed on the fabric, it is an applique. United States v. Hamburger Levine Co., T.D. 34382 (1914). Headnote 3, Schedule 3, specifically mentions applique as a form of nontextile ornamentation.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B2

The jeans and other garments should be classified as ornamented apparel because of the label. Please inform the inquirer of this decision.

David Gantz, Esq.
Oppenheimer, Wolff, Foster, Shepard and Donnelly
1317 F Street, N.W.
Washington, D.C. 20004

Dear Mr. Gantz:

This letter is in response to your submission of April 4, 1986, supplementing a request for the tariff classification of the "Avenue" moonboot that was submitted by Bostrum-Warren, Inc., Customhouse brokers for your client, Hanbee America, Inc.

The sample women's boot in question is navy, grey, and red, about 11 inches high, with an expandable front opening and a zipper. A gummed label on the inside near the top is marked "Snowbird." The boot has a molded cup sole with a sidewall of about 1.75 inches at the toe and about 2.75 inches at the heel. The polyurethane "upper" is stitched to the top of the inside of the cup but ends about 3/4 of an inch above the point where the foot would rest. Thus there is an area in which the side of the foot would be covered only by the cup sole and the lining. A contrasting grey strip about 5/16 of an inch wide encircles the entire sidewall. The bottom of the strip is positioned about 3/8 of an inch above the point where the foot would rest, and the top is just below the point where the polyurethane ends. The bottom edge of the grey strip is attached to a grey toe cap, a grey heel bumper, and a grey "stirrup" that crosses the outsole to reach from the grey strip on one side of the boot to the other. The strip, toe cap, heel bumper, and stirrup are formed in one piece as part of an injection molding process.

The only issue for tariff classification purposes is whether the boot has foxing or a foxing-like band applied or molded at the sole and overlapping the upper. If it does not, it is properly classifiable under item 700.56, Tariff Schedules of the United States (TSUS).

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

34

T.D. 83-116 of May 6, 1983, set out Customs position regarding the proper interpretation of provisions in the tariff schedules pertaining to imported footwear having foxing or a foxing-like band. Foxing is described as a band, separate from the sole and upper, that secures the joint between the sole and upper. No feature of the sample boot fits this description; there is a grey band encircling the boot, but it does not secure the joint between the sole and the upper. As to a foxing-like band, while T.D. 83-116 indicates that something molded to look like a foxing can be a foxing-like band even if it performs no function, it also requires that for a design feature in the form of a band to be considered a foxing-like band, it must be applied or molded at the sole and overlap the upper. Unit-molded footwear will be considered to have a foxing-like band if a vertical overlap of 1/4 inch or more exists from where the upper and the outsole initially meet. A foxing-like band must also encircle or substantially encircle the entire shoe.

The grey strip in question here does encircle the entire boot. However, as indicated above, it is positioned above the point where the foot would rest. Thus it is in fact part of the upper. It does not cover the juncture of the upper and the sole. It does not "overlap the upper." The toe cap, heel bumper, and stirrup are applied or molded at the sole and do overlap the upper. However, taken together, they cover only about 40 percent of the distance around the boot, and this does not, in our opinion, constitute substantial encirclement. The fact that they extend upward and join the grey strip, which is part of the upper, is not sufficient for them to constitute a foxing-like band.

For the foregoing reasons, assuming all other statutory conditions are met, the boot is properly classifiable under item 700.56, TSUS.

Sincerely,

Arthur P. Griffin

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 2809-5-000917

This protest was filed against your decision in the liquidation on June 14, 1985, of entry No. 85-150426-3 dated February 28, 1985.

FACTS:

Certain misses leather casual shoes were classified in liquidation under the provision for other footwear in item 700.95, Tariff Schedules of the United States (TSUS).

The protestant maintains that the shoes are in chief value of leather and should have been classified under the provision for other footwear, of leather for other persons: valued over $2.50 per pair in item 700.45, TSUS.

ISSUE:

Does the documentation provided by the protestant show that the footwear is in chief value of leather?

LAW AND ANALYSIS:

The only evidence regarding component material of chief value submitted by the protestant is the CF-5523, Invoice Details For Footwear. This form states that the shoe is in chief value of plastics. Consequently, classification of the subject footwear under item 700.95, TSUS, was appropriate.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

B6

HOLDING:

The protest should be denied. A copy of this decision should be attached to your Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffer

Andrew P. Vance, Esq.
Barnes, Richardson & Colburn
Attorneys & Counsellors at Law
475 Park Avenue South
New York, New York 10016

Dear Mr. Vance:

In a letter dated February 25, 1986, on behalf of Intepur, a Division of Dart Industries, you inquired as to the tariff classification of ladies' acrylic/nylon knitted gloves manufactured in Taiwan. A sample was submitted for examination.

It is your view that the gloves are properly classifiable under the provision for other knit gloves of man-made fibers, not ornamented, and not made or cut from pre-existing fabrics in item 704.8550, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 15 cents per pound plus 19.7 percent ad valorem.

Additionally, you state a belief that the sample is subject to quota category No. 631-O because the knitted outer shell is not made from pre-existing fabric and the sherpa lining is not produced from pre-existing knit fabric.

An examination of the sample glove shows that the outer shell is made on seamless knitting machine. However, the liner is made from tufted acrylic fibers which are attached to a pre-existing knit textile fabric base. In addition, the fingers of the glove are lined with a pre-cut knit fabric.

In view of the foregoing, it is our position that the glove is "made from pre-existing fabric" and is dutiable at the rate of 15 cents per pound plus 19.7 percent ad valorem under item 704.8525, TSUSA. The applicable textile quota category number is 631-W.

Sincerely,

Harvey B. Fox

Mr. Henry L. Kotkins, Jr.
President
Skyway Luggage Company
Skyway Center
Seattle, Washington 98121-1392

Dear Mr. Kotkins:

Your letter dated January 7, 1986, addressed to our New York office concerning an interpretation of the term "linings" as used in Schedule 7, Part 1, Subpart D, Headnote 3(i), Tariff Schedules of the United States (TSUS), has been referred to this office for a direct reply to you.

The referenced headnote provides that "For the purposes of this subpart — (i) locks and other hardware fittings, frameworks, and linings *** shall be disregarded in determining the component material of chief value in the products."

You ask that we address the following questions regarding our interpretation of the term "linings."

1. Considering the term of art which has long been established in the industry, should any part of the interior of the case be included?

2. If parts of the interior are to be included, is there a distinction between loose linings and linings which are laminated to the back of covering materials?

3. If the value of the included linings exceeds that of any of the outer covering materials, will that be judged as determining principal value?

4. If the linings are non-textile are they excluded or included? (Example: a nylon case, with enough vinyl surface trim and vinyl linings that the chief value is vinyl).

Your questions are directed specifically toward pullman or suitcase type luggage. The components that you are most concerned with are the interior pockets, tie tapes, curtains and any other components found in the interior of a bag.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Our responses to your questions are as follows:

1. No. The term "linings" is defined in Webster's International Dictionary, Third Edition, as "a layer (as of fabric) inserted under usually following the lines of and made temporarily or permanently fast to the principle material of a garment." We would not consider interior pockets, tie tapes or curtains to fall within the above-quoted definition of "linings."

2. Yes. Loose linings are not essential to the character of the principal material. Usually loose linings are sewn in place. However, linings which are laminated to the back or covering materials are not lining the article but rather are backing or supporting the material and would probably not be considered a lining at all. The laminating material is essential to the exterior fabric.

3. Materials found not to be "linings" or an otherwise excluded component will be considered in determining the component material of chief value.

4. A material found to be a "lining" for tariff purposes is excluded regardless of its composition.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Leonard L. Rosenberg, Esq.
Sandler & Travis, P.A.
444 Brickell Avenue
Miami, Florida 33131

Dear Mr. Rosenberg:

This is in response to your letter dated April 14, 1986, which requested reconsideration of a New York ruling letter dated April 7, 1986 (Control No. 817047). In that decision, a garment designed to be worn by females and described as a bath wrap made of terry knit fabric was classified as other women's wearing apparel, not ornamented, of cotton, knit, other, dressing gowns, including bathrobes, beach robes, lounging robes, and similar apparel, under item 384.3410, Tariff Schedules of the United States Annotated (TSUSA), dutiable at the rate of 10.2 percent ad valorem. Articles classifiable under this provision are subject to the import restraints of textile category 350.

The ruling also offered an advisory classification as to a similar garment designed for use by men. A binding ruling as to this garment was not issued because no sample was provided. Accordingly, this reconsideration will not offer an opinion as to the advisory classification provided in the New York ruling.

It is your view that the subject garment, a sample of which is provided, would be most properly classifiable as other women's wearing apparel, not ornamented, of cotton, knit, other, other, under item 384.3497, TSUSA, also dutiable at the rate of 10.2 percent ad valorem, but subject to the import restraints of textile category 359.

The garment is accurately described in the New York decision as being rectangular in shape with a woven terry binding surrounding the sides and bottom and finishing the raw edges of the fabric. The top of the garment is covered by a larger strip of woven terry binding that also covers an elastic waistband. At each end of the binding a velcro strip acts to fasten the wrap. The garment is not ornamented for tariff purposes. It is designed to be worn around the body, extending from below the shoulders to mid-thigh.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

You cite Fairchild's Dictionary of Fashion, 1975, as defining a bath robe as a "wrap-around robe usually with long sleeves, shawl collar, and sash; popular for both sexes in terry cloth or plaid wool or bath robe cloth." You assert that the subject garment does not fall within that category. The New York ruling letter agreed with that assessment in finding that the subject garment was not a robe; however, the issue remains whether the wrap can be considered similar apparel for classification purposes.

You suggest that the principle of ejusdem generis must be applied in this instance, and, pursuant to said principle, the wrap must possess characteristics which are similar or which unite it with the enumerated articles, i.e., bath robes or beach robes. You contend that the wrap does not have the multiplicity of uses of a bath robe or beach robe because it is not generally worn over other articles of clothing, but rather is worn alone.

While the subject garment is not a robe per se as it lacks sleeves and coverage for the shoulders and chest above the breasts, it functions as a beach robe or a bath robe and must be classified as a similar article. We do not agree that the wrap would generally be worn alone. Rather, the wrap, in our view, would commonly be used to cover a bathing suit, protect the wearer from the sun or for drying off after swimming, much as a beach robe. Further, it is comprised of a terry cloth which is generally associated with beach robes or bath robes. Accordingly, we are of the view that the garment has characteristics of a bathrobe or beach robe and must be classified as similar apparel.

The terry bath or beach wrap is classified as other women's wearing apparel, not ornamented, of cotton, knit, other, dressing gowns, including bathrobes, beach robes, lounging robes, and similar apparel, under item 384.3410, TSUSA, dutiable at the rate of 10.2 percent ad valorem. The garments are subject to import restraints under textile category 350. New York ruling 817047 is affirmed.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

UNITED STATES GOVERNMENT

Memorandum

DEPARTMENT OF THE TREASURY
UNITED STATES CUSTOMS SERVICE

078102

DATE: MAY 23 1986

FILE: CLA-2 CO:R:CV:G
078102 JGH

TO : District Director of Customs
Houston, Texas 77052

FROM : Director, Classification and Value Division

SUBJECT: Classification of Ethanol

Your memorandum of April 9, 1986 (CLA-2-H:C:C2 RF), contained certain questions on the implementation of Headquarters memorandum of March 14, 1986 (CLA-2 CO:R:CV:G 077715 JGH), concerning the assessment of item 901.50, TSUS, duties on ethanol. You state that Union Carbide intends to export approximately 1.5 million gallons of ethanol in satisfying its claim of nonfuel use of certain imported ethanol. We agree with your view that such exportation would satisfy the nonfuel use criteria and, therefore, the ethanol in question would not be subject to the item 901.50 duties.

You also ask questions concerning any diversion of the ethanol within the 3 year period.

(1) Where part of a shipment of ethanol has not been withdrawn from bonded warehouse and thus has not been diverted to fuel use, Customs would have no reason to abridge the 3-year statutory period on the part remaining in the warehouse.

(2) Where a warehouse entry is still open but part of the previous withdrawal of the ethanol has been diverted to fuel use, additional duties on the amount diverted should be assessed by billing for the additional duties.

(3) If the importer refuses to respond to a request for supplemental tender, inasmuch as warehouse entries are not liquidated until all the merchandise covered thereby is withdrawn, Customs has no authority to liquidate the entry before such final withdrawal. Customs, however, does have a lien on the merchandise and could, if necessary, refuse its withdrawal until the tender is made. In those situations where the market value of the remaining merchandise does not approach the additional duties billed, you should contact your regional counsel for advice.

In addition you inquire whether submitted declarations from Shell Chemical Co. and Union Carbide concerning the sale of imported ethanol satisfies the nonfuel use standards. Union Carbide states that imported ethanol will be (a) sold for export and exported directly from the U.S. or (b) ultimately consumed (presumably by Union Carbide) in the manufacture of industrial chemicals, in which case Union Carbide would document the disposition of the ethanol. Union Carbide concludes that under no circumstances would the ethanol be used or sold for fuel or fuel purposes. If the

B13

[redacted]

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

ethanol is sold domestically Union Carbide states that it will furnish Customs with "the appropriate documentation." In addition, Union Carbide submitted a list of their ethanol Customers and what it believes the ethanol is used for by these customers.

Shell Chemical Company's statement was to the effect that they market only to industrial users and not to beverage or fuel users. They note that they have no plans to market to fuel users, and in any event, the ethanol imported is derived from ethylene and therefore would not qualify for Federal or State ethanol tax subsidies. Shell asserts that while they have no way of knowing with certainty what their customers do with the ethanol, they have reason for believing the ethanol is marketed as the customers advise, since they are traditional suppliers of ethanol to the industrial market, and are, of course, aware that synthetic ethanol does not qualify for the subsidies. Shell also submitted a list of their customers names.

Our September 25, 1985, instructions to all field officers regarding the declaration required to be filed upon the entry of nonbeverage ethanol (or mixtures containing such ethanol) were intended to emphasize to importers their obligation to substantiate that an exemption from the additional item 901.50 duties applies. If the importer is identified in the declaration as the ultimate user of the ethanol (or mixture), that statement together with a statement that the ethanol (or mixture) will not be used for fuel purposes constitutes a sufficient declaration. If the importer is not identified as the ultimate user, the declaration must identify who the ultimate user will be and must state that the ethanol (or mixture) will not be used for fuel purposes.

The purpose of our instructions was to facilitate Customs' followup in establishing that the importer was entitled to the exemption from the item 901.50 duties claimed upon entry. The instructions permit some discretion by field officers in their application, but it should be borne in mind that the principal reason the instructions were issued -- as stated in the instructions themselves — was the strong suspicion that the prior declaration and followup procedures were not working. Therefore, you may accept from an importer who intends to resell the imported ethanol (or mixture) a declaration which lists all of the potential buyers, provided such buyers are identified in the declaration as the final users of the ethanol (or mixture) and the importer states that the ethanol (or mixture) will not be used for fuel purposes. The importance of the latter statement in every declaration cannot be overstressed, since it emphasizes to the importer his absolute liability should any subsequent diversion to fuel use occur. In our opinion, an importer who intends to resell the ethanol (or mixture) and is unwilling to make the required affirmative statement (opting instead for possible equivocations such as "intend," "traditional," "likely," "will not be sold for," etc. with respect to final use or users), has demonstrated a sufficient uncertainty as to the actual end use of the ethanol (or mixture) to warrant application of the additional item 901.50 duties at the time of entry. The magnitude of the additional item 901.50 duties justifies the requirement for both a strong, unambiguous declaration by the importer at the time of entry to substantiate a claimed exemption as well as the subsequent tender, within 3 years of entry, of equally strong

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B14

078162

and conclusive proof of nonfuel use. It is hoped that the letters you recently mailed to Union Carbide, Shell and any and all other ethanol importers in your district (pursuant to our April telexes to you), have fully apprised them of their obligations.

As to the declaration submitted by Union Carbide (January 27, 1986) and Shell (November 1, 1985), which you furnished for our examination, we find that they do not support an exemption from the additional item 901.50 duties in their present form.

Harvey B. Fox

District Director of Customs
Patrick V. McNamara Building
477 Michigan Avenue
Detroit, Michigan 48226-2568

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 3801-6-000104

This protest was filed against your decision in the liquidation on October 25, 1985, of entry No. 972868 dated September 3, 1985, covering a shipment of automobile weather stripping of rubber produced in Canada.

FACTS:

The Canadian manufacturer describes the instant weather stripping as "extruded rubber sealing strip incorporating a continuous metal carrier and sponge rubber end cap (each end)." The weather stripping was liquidated under the provision for gaskets, of rubber or plastics, in item 773.25, Tariff Schedules of the United States (TSUS). The protestant's broker claims that the weather stripping should be classified under the provision for chassis, bodies (including cabs), and parts of the foregoing motor vehicles, other, other, other, in item 692.32, TSUS.

ISSUE:

Is the weather stripping classifiable as gaskets in item 773.25, TSUS, or as parts of motor vehicles in item 692.32, TSUS?

LAW AND ANALYSIS:

Protestant's broker claims that the weather stripping is more than a gasket and that it is an auto part designed, manufactured and dedicated to use as an auto part classifiable in item 692.32, TSUS. In support of his

C2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

position he offers a written statement from the Canadian shipper that the weather stripping is intended to function as an "inner belt line window sealing strip for General Motors Corporation, C-P-C Division 1988 'W' Car (Coupe Model)." The Canadian shipper allegedly orally informed the broker that the weather stripping has several functions. One function is that of a gasket -- i.e., to function as a seal against weather, wind and noise. Another function claimed by the Canadian shipper is that of keeping the window in place by exerting pressure on the glass. Without the part, the window would be very loose, which would result in rattling when the window was partially rolled up.

The broker further claims that the weather stripping is precisely shaped and dedicated to use on only one particular automobile model and that it has no use other than as an automobile part.

The Detroit import specialist claims that the weather stripping meets the definition of a gasket. She observes that gaskets are usually specially shaped and sized to render them commerically fit for their intended use. She cites General Interpretative Rule 10(ij) in support of her position.

General Interpretative Rule 10(ij) states "a provision for 'parts' of an article covers a product solely or chiefly used as a part of such article, but does not prevail over a specific provision for such article."

The American Heritage Dictionary of the English Language, New College Edition (1976) defines "gasket" as "any of a wide variety of seals or packings used between matched machine parts..." The instant merchandise fits this definition of "gasket." While the weather stripping is evidently

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

L31810

intended to be part of an automobile, it is also a gasket. Under General Interpretative Rule 10(ij), an auto part which is more specifically provided for elsewhere (e.g., as a gasket) is classifiable under the more specific provision. Finally, we do not agree that the weather stripping is more than a gasket because it has two functions. The instant merchandise is described by the Canadian shipper as "weather sealing strip" and on the invoice as "W/Strip." We believe that the primary function of the instant merchandise is weather stripping, which puts the merchandise squarely into item 773.25, TSUS.

HOLDING:

The protest should be denied in full. The weather stripping is classifiable in item 773.25, TSUS. A copy of this letter should be sent to the protestant along with your CF 19 Notice of Action.

Sincerely,

Arthur P. Schaffner

WASHINGTON

078160

REFER TO
CLA-2 CO:R:CV:G
078160 PR

This ruling concerns the textile restraint status of certain towels manufactured in either South Korea or Taiwan.

ISSUE:

The issue presented is whether the subject towels are includable in textile category 363 as other towels or in category 369 as dish towels.

FACTS:

Three towels were submitted as samples. All three are rectangular shaped, approximately 16 by 26 inches, wholly of cotton with a full terry pile on both sides, and all white except for decorative Christmas-style designs printed on one side. Two of them, one with Christmas trees and holly designs and the other with two pictures of Santa Claus and a reindeer (Rudolph) encased in holly wreaths, have small (1 by 7/8 inch) cardboard labels which contain the words "PRINTED KITCHEN TOWEL," plus the fiber content, washing instructions, and country of origin. On the printed side of each of these towels, in two opposite corners, approximately 1 1/4 inches in from the edge are the words "KITCHEN TOWEL" in 3/8 inch letters. The third towel has geese and other Christmas-style designs, but has no labelling on it indicating that it is a kitchen towel. Instead, it is firmly attached to two potholders with matching designs and a cardboard label which states "3 PIECE SET, 1 KITCHEN TOWEL, 2 POT HOLDERS."

We are advised that the subject towels, which are valued over 45 cents each, will be imported either in sets (as represented by the described sample or with matching placemats, two samples of which were furnished),

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

or individually (in which case they would be marked and printed as represented by the first two described sample towels). When imported individually, retailers purchase them with potholders and placemats, and advertise them as kitchen ensembles. Advertisements were submitted showing that at least one large chain store did sell the articles in that manner.

We have been informed by our National Import Specialist that towels with virtually identical designs are being sold as hand towels.

LAW AND ANALYSIS:

Whether the subject towels are classifiable as dish towels, category 369, or as other towels, category 363, depends on the chief use of that class or kind of merchandise to which the imported articles belong. General Headnote 10(e)(i), Tariff Schedules of the United States Annotated (TSUSA). Because of the difficulty of distinguishing between hand towels and dish towels and of determining chief use, it is proper to first look at the article or articles being imported. In this instance, all three samples have designs that are suitable for use in a kitchen and are either printed with the words "KITCHEN TOWEL" in two prominent places or are imported attached to kitchen placemats or potholders. These facts raise a presumption that the towels will be chiefly used in the kitchen. In the absence of any convincing evidence to the contrary, that presumption will govern the classification of the towels.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

HOLDING:

The subject towels are classifiable under the provisions for cotton terry dish towels, in either item 366.2020, TSUSA, if valued not over $1.45 per pound, or item 366.2420, TSUSA, if otherwise, and subject to quota, visa, or export license requirements applicable to category 369.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Dear Mr. Pinkus:

This is in response to your letter of April 15, 1986, which requested our views on the above-noted case. The matter involves the classification of fusible interlining material, i.e. a knit material of man-made fibers (17 percent nylon, 83 percent rayon) which has thermoplastic dots applied thereto. It is your view that the material is classifiable as a coated fabric, which is in contravention of a Customs Ruling Letter issued on an identical product.

Specifically, you question Customs Ruling Letter of January 21, 1983, (Control No. 070229) which held such fabric to be classifiable as knit fabrics of man-made fibers under item 345.50, Tariff Schedules of the United States (TSUS), rather than as knit fabrics, coated or filled with rubber or plastics material, under item 355.82, TSUS. The ruling letter found that the dots of plastic were not visible except under magnification and they did not make the fabric noticeably stiffer. The sample scrutinized in that case was a white fabric.

Be advised that we are in accordance with your views on the matter. The fabrics, including the white fabric, should be uniformly classified as knit fabric ... of textile materials, coated or filled with rubber or plastics material, of man-made fibers, other, under item 355.82, TSUS.

The merchandise in the instant case consists of charcoal, camel, and natural-colored fabrics, in addition to white. You initially discuss classification of the charcoal color fabric citing Bruce Duncan v. United States, 80 Cust. Ct. 46,

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

C9

C.D. 4736 (1978), as controlling precedent. The Bruce Duncan court found dyed and unnapped black fabric, described as a fusible interlining cloth with polyamide dots, as a coated fabric within the meaning of Headnote 2(a), Schedule 3, Part 4, Subpart C, TSUS, since the dots had a visible and significant effect on the fabric. A sample of the fabric which was the subject of the Bruce Duncan case is submitted.

After review of the material, we concur in your view that the dots are visible to the naked eye and that they significantly affect the surface of the fabric. Additionally, the fabric qualifies as a coated fabric pursuant to the test delineated in T.D. 81-219. The test requires that (1) the coating or filling material be separately distinguished from the fabric by the naked eye, (2) the coating or filling material impart a shine, luster or glossy appearance or a dull appearance that is noticeable by a casual examination, or (3) the coating does not cause the fabric to have a pronounced (obvious) appearance of stiffness. The dots which coat the fabric are separately distinguishable by the naked eye and the coating material imparts a shiny appearance to the fabric.

The camel and natural-colored fabrics also clearly are coated fabrics when considered in light of the above-noted test.

Ruling Letter 078161 only considered a white fabric, the color upon which the coating is most difficult to discern. We have had an opportunity to reexamine the fabric and concur in your view that the coating is distinguishable to the naked eye. The fabric, in our view, is coated and meets the test elucidated in T.D. 81-219. Ruling Letter 070229 is modified to reflect the views of this letter.

We also acknowledge that an issue regarding the date of liquidation of a certain entry has been raised. Inasmuch as we concur that the classification issue should be resolved in favor of the importer, the issue of liquidation is now moot.

Sincerely,

John T. Lail

Harvey B. Fox

Mr. Lee Skinkle
Morflex Chemical Company, Inc.
2110 High Point Road
Greensboro, North Carolina 27403

Dear Mr. Skinkle:

Your letter of April 8, 1986, concerns the tariff classification of diethyl phthalate (DEP).

You note that DEP is classifiable in the provision for products chiefly used as plasticizers, in item 409.34, TSUS, and the provision which you characterize as the one for intermediates, item 404.38, TSUS.

It is Customs understanding that there are two grades of DEP: The technical grade which is chiefly used as a plasticizer, and the purified (perfume) grade which is chiefly used as a fixative or solvent in perfume formulations. There is no evidence as you suggest, that Customs has ever considered the perfume grade as an intermediate. In any event, Item 404.38 is not restricted to intermediates.

As to your suggestion that both grades be classified in item 409.34, you will note that item 409.34 covers products chiefly used as plasticizers. Since there is no evidence that the perfume grade of DEP is chiefly used as a plasticizer, it could not be classified in item 409.34, TSUS.

Sincerely,

Arthur P. Schiffl n
Chief, General
Classification Branch

Re: American Hardboard Association v. United States and MacMillan Bloedel, Ltd., Party-in-Interest, Court No. 83-9-01301

Dear Judge DiCarlo:

Attached please find a copy of our administrative decision issued pursuant to your remand order of January 27, 1986, on the above-noted case. The decision finds that certain hardboard lap siding is most properly classifiable as laminated boards, bonded in whole or in part, or impregnated, with synthetic resins, under the provisions of item 245.80, Tariff Schedules of the United States.

Sincerely,

For John T. Fock

[redacted] 12

The following is an administrative decision on the classification of certain imported prefinished hardboard lap siding.

BASIS FOR ADMINISTRATIVE JURISDICTION:

On March 22, 1982, Customs published a notice in the Federal Register (47 FR 12258) acknowledging receipt of a petition from a domestic interested party filed under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516). The notice solicited comments on the merits of the petition. The petition claimed that the proper classification of prefinished hardboard lap siding should be as hardboard, whether or not face finished, other, under the provisions of item 245.30, Tariff Schedules of the United States (TSUS), dutiable at the current rate of 7.5 percent ad valorem. Customs had been classifying this product as building boards, not specially provided for, whether or not face finished: Other boards, of vegetable fibers (including wood fibers), under item 245.90, TSUS, free of duty.

In a ruling dated October 29, 1982, (Control No. 070255), Customs informed the petitioner that the comments solicited by the March 22, 1982, notice had been reviewed, and the petition was denied. The classification of the siding under item 245.90, TSUS, would continue.

In response to Customs action, petitioner filed notice of its intention to contest the decision in accordance with 19 U.S.C. 1516 and section 175.23 of the Customs Regulations (19 CFR 175.23).

By publication of T.D. 83-104 in the Federal Register on May 11, 1983, (48 FR 21231), Customs informed the public of the petitioner's desire to contest the decision, and gave a detailed account of the proceedings to that date together with a full explanation of the reason for denying the petition.

In the subsequent proceeding contesting the classification before the Court of International Trade, American Hardboard Association v. United States and MacMillan Bloedel Ltd., Party-In-Interest, Court No. 83-9-01301, a tariff classification not previously considered was suggested. On January 27, 1986, the Court remanded the case for decision on the correctness of the current tariff classification as opposed to the newly suggested alternative classification under the provisions for Building boards ... : Laminated boards, bonded in whole or in part, or impregnated, with synthetic resins, under item 245.80, TSUS, dutiable at the rate of 1.4 cents per pound plus 2.6 percent ad valorem.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C13

071895

By notice published in the Federal Register on March 11, 1986, the public was informed that Customs was reviewing the tariff classification of the lap siding at the direction of the Court. Comments were solicited. Six comments were received. Two comments, including that submitted by counsel for the American Hardboard Association, supported the alternative classification. The remainder of the comments, including that submitted by counsel on behalf of party-in-interest MacMillan Bloedel Ltd., opposed the alternative classification.

Due to dissatisfaction of some parties with the description of the product in the March 11, 1986, notice, a supplemental notice, soliciting further comments and providing a more complete description of the manufacturing process of the merchandise at issue, was published in the Federal Register on April 15, 1986 (51 FR 12712). Final comments were received by April 25, 1986. One comment was submitted by party-in-interest MacMillan Bloedel in response to that notice.

This decision is now being issued in response to the Court order.

DESCRIPTION OF THE PRODUCT:

The product at issue is a plank of hardboard, 7/16-inch thick and either 9 or 12 inches wide. Approximately one inch from the bottom, a hard plastic locking strip or "spline" is fixed into a groove in the back of each plank. The top edge of each plank is machined to form a groove or "rabbet", which fits the spline into the plank above.

The hardboard plank is manufactured through a wet process whereby wood fibers are combined with water, phenolic resin, wax and alum. This combination is fed onto a moving screen and is called a "wet mat". Compregnite is sprayed onto the surface fibers of the wet mat to stabilize the fibers against moisture.

A newsprint paper face which has been coated with linseed oil is then applied to the wet wood fiber mat. At this point the mat is still approximately 70 percent water. The mat then goes on to the loading elevator and into a press. Through the combination of heat and pressure, the mat is formed into a hardboard plank. The application of the heat and pressure results in the interlocking of the fibers of the newsprint and

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

C14 [redacted]

071895

the wet mat due to the natural binding constituents of the wood fibers in concert with the synthetic resins. The resulting product has improved surface qualities provided by the fine fibers of the newsprint. The planks are prefinished at the time of importation with acrylic latex paint.

ISSUE:

Is the subject product a laminated building board bonded in whole or in part, or impregnated, with synthetic resins so as to be classifiable under item 245.80, TSUS?

DISCUSSION:

Face Finished v. Laminated

Counsel for MacMillan Bloedel (hereinafter MB) initially asserts that the hardboard product is "face finished" rather than "laminated." The TSUS, in Schedule 2, Part 3, Headnote 2, defines the term "face finished" as follows:

> 2. The term "face finished", as applied to the boards and panels provided for in this part, means that one or both surfaces of a panel or board have been treated with creosote or other wood preservatives ... or have been overlaid with paper, fabric, plastics, base metal or other material.

Counsel concludes that, by statutory definition, overlaying a board with paper is face finishing. As such, the afore-described manufacturing process is analagous to face finishing rather than lamination.

We do not concur. There is no basis in the statutory language to conclude that lamination and face finishing are unrelated concepts. Counsel assumes that any board that falls under the definition of face finished cannot also be laminated. The superior heading for both items 245.80 and 245.90, which reads "Building boards, ... , whether or not face finished" suggests otherwise. Building boards are classified under items 245.80 and 245.90, TSUS, without regard to face finishing. Accordingly, a face finished board is not precluded from classification as a laminated board.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D1

078195

Laminated - The Common Meaning

Counsel for MB, in support of the current classification of the instant product as building boards, other, under item 245.90, TSUS, cites the definition of the adjective "laminate" found in Webster's Third New International Dictionary:

> 1. Laminate 1: ... 2: ... made by laminating: composed of layers of firmly united material.

Counsel further notes that, in the same source, the first definition of the adjective "laminate" states "consisting of laminae". "Lamina", the singular form of "laminae", is defined as "a thin plate or scale". The verb "laminate" is defined, by the same source, as "to make by uniting superimposed layers of one or more materials (as by means of an adhesive or bolts)."

Counsel for MB posits that the subject merchandise is not laminated within the above definitions because: (1) it does not consist of laminae because there are no thin plates or scales; (2) it is not made by uniting superimposed layers by means of adhesives or bolts; and (3) it is not composed of layers of firmly united material because there are no visible layers in the merchandise as a finished article.

We do not agree. First, no persuasive reason is forwarded as to why the newspaper layer cannot be considered a thin plate or "lamina" which is superimposed on the wet mat layer during manufacture.

Additionally, counsel reaches conclusions about the common definition of "laminated" without considering the language of item 245.80, TSUS. The provision includes laminated boards bonded in whole or in part (emphasis added) with synthetic resins. The newsprint layer is united to the wet mat with the assistance of the synthetic phenolic resin. We acknowledge that some bonding of the wood fibers would occur without the addition of synthetic resin and compregnite to the wet mat, but the resulting product would not be useable as hardboard. The resins aid in the bonding of the wood fibers

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D2

561819

through the application of heat and pressure. Clearly, the subject board is bonded in part with synthetic resin. A synthetic resin has been held to be the chief binding agent in a product when that resin was combined with layers of cloth and bound together to form a grinding disc. Crown Abrasive Co., Inc. v. United States, 34 Cust. Ct. 347, Abs. 58990 (1955).

Finally, counsel claims that the layers in the finished article must be visible. Although expert testimony is presented to support this claim, there is no basis in the cited definitions for such a conclusion. Visibility of layers is not a condition for the finding of a laminate. Counsel has formulated a legal conclusion which is not present in the lexicographical source.

On the other hand, counsel for the American Hardboard Association (hereinafter AHA) notes the following definition of "laminated":

> ... made by bonding or impregnating superimposed layers (as of paper, wood or fabric) with resin and compressing under heat.

See, Longman Dictionary of the English Language, p. 639, New Standard Dictionary of the English Language, p. 671, Webster's New Collegiate Dictionary, p. 822.

This common definition supports a finding that the subject board is laminated. The layer of paper is bonded, in part by the synthetic resin, with the wet wood fiber mat. Compression under heat results in a laminated product.

Commercial Meaning

Counsel for MB cites the United States Department of Commerce publication Commercial Standard CS251-63: Hardboard, effective February 11, 1963, which describes laminated hardboard as follows:

> Hardboard laminated with an adhesive in multiple plies to obtain greater thickness. These products are used for special purposes where added thickness or two smooth surfaces are desired. Laminated hardboards are available for internal or external use.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078195

From this description, counsel draws the conclusion that to be a laminated hardboard, a product must have multiple plies of finished boards of the same material (such as wood), bonded together with an adhesive (such as glue). Counsel states that the boards are required to be in layers, and they must be in finished form when bonded.

Again, counsel draws conclusions not apparent in the commercial description cited. We concede that the subject hardboard is not laminated to obtain greater thickness; however, it is laminated with the newsprint layer to obtain a smoother surface that can be more easily finished. The commercial definition does not limit the product to include only finished board of the same material bound together with an adhesive. These conditions have been artificially imposed by counsel and have no basis in the common or commercial meaning of the product.

Counsel refers to C.W. McMillin, Your Selection Guide to Bonded Wood Composition Boards, Product Engineering 41 (February 29, 1960), as supporting the notion that the industry, at the time of enactment of the TSUS, considered "laminated building boards" to have three essential components: 1) a structural core; 2) facing materials; and 3) an adhesive. The McMillin source, however, describes a product known as composite board. Counsel does not present evidence to suggest that composite board and laminated board are, in fact, the same product. The McMillin source has limited probative value when considering laminated hardboard.

It should also be noted that advertising literature published by MB notes that the product is manufactured by a process where "an exclusive oil-impregnated overlay is laminated to the hardboard surface under heat and pressure. Counsel insists that the use of the word "laminated" does not reflect the actual commercial meaning of the word. The use of the term attempted to convey the fact that the surface of the board was hard and smooth like boards that actually are laminated. The use of the term "laminated" in this context is dismissed as advertising puffery.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D4

The method of advertising or display of merchandise, while not determinative of classification, does have probative value. See Davis Products, Inc. v. United States, 59 Cust Ct. 226, 230, C.D. 3127 (1967). New York Merchandise Co., Inc. v. United States, 62 Cust. Ct. 38, 44, C.D. 3671 (1969). Montgomery Ward & Co. v. United States, 62 Cust. Ct. 718, 724, C.D. 3853 (1969).

In the instant case, the lamination gives the product an improved surface quality. Mr. Peter Armstrong, MB's Marketing Manager, claims this improved surface to be a competitive advantage. The product undergoes a separate manufacturing step so that the newsprint layer can be added, thereby providing a quality enhancing characteristic not otherwise available in hardboard. Such being the case, it is unreasonable to dismiss MB's advertising as mere puffery.

Expert Testimony

In support of the contention that the merchandise is not laminated, counsel for MB submits the expert testimony of Dr. Lawrence J. Broutman, Professor of Materials Engineering at the Illinois Institute of Technology, Chicago, Illinois. Dr. Broutman is stated to be an expert on laminates and building materials in general.

Dr. Broutman defines a laminate as a structure that consists of (1) dissimilar finished materials that are fused together or bonded by means of an adhesive and that constitute distinct visible layers of comparable thicknesses, or (2) similar finished materials that are bonded together by means of an adhesive that constitute distinct visible layers of comparable thicknesses. He asserts that, to the best of his knowledge, this definition is accepted by the general public and the building industry as well as by scientific and academic communities. He claims that layers must be visually distinguishable either to the unaided eye or microscopically. Sharp, definite boundary lines between layers must exist.

Counsel for AHA points out, and we concur, that Dr. Broutman's expertise is more clearly in the area of plastics. Dr. Broutman does not have extensive experience with wood or hardboard products. His expertise in plastic lamination is unquestioned; however, his inability to define clearly many common terms relating to hardboard and the wood industry colors the value of his expert testimony. See Deposition of Dr. Lawrence J. Broutman, December 3, 1985, at p. 11-14.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078195

Dr. Broutman avers that he derived his definition in an empirical manner, considering the universe of laminates, including those in the wood field, and extracting their common and salient characteristics. His definition places numerous conditions on laminated products that are not evident in any other source. We are of the view that the lack of support for his views from any other source diminishes the probative value of his testimony.

As has been noted, the definitions of "laminate", from lexicographical sources, do not support the conclusion that a laminate must have distinct visible layers of comparable thicknesses. Dr. Broutman has previously testified that he was unaware of any definition of laminate, other than his own, that contains the "comparable thickness" requirement. As counsel for AHA notes, this statement by Dr. Broutman impeaches his claim that his definition is accepted by the general public and building materials industry as well as by the scientific and academic communities.

On page 11 of the submission dated April 25, 1986, counsel for MB attempts to rehabilitate the views forwarded by Dr. Broutman by stating that the key to finding that a product is laminated is the presence of distinct visible layers. While the presence of a sharp boundary will reinforce the conclusion that a product is laminated, it is the layers rather than the boundaries that are important to lamination. This statement is in direct contradiction to a statement made by Dr. Broutman in his original affidavit where he claims that the boundaries must be sharp and distinct. See Affidavit of Dr. Lawrence Broutman, Exhibit X, p. 3.

Accordingly, we are of the view that Dr. Broutman's testimony is of limited probative value and does not serve to enhance the understanding of the definition of "laminated" as it applies to building boards.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078195

Legislative History

Counsel for AHA claims that in order to be classified under item 245.80, TSUS, a product must be building boards that are laminated and are either internally bonded in whole or in part with synthetic resins or impregnated with those resins. Counsel points to the following Tariff Classification Study language in divining the intent of Congress in enacting the 245.80 tariff classification:

> Most hardboard is presently classified in Paragraph 1413. However, if its surface is covered with a laminate of synthetic resin and paper, it is classifiable in Paragraph 1403 as a manufacture of pulp if in chief value of hardboard or in Paragraph 1539(b) if in chief value of the laminate (emphasis added).

U.S. Tariff Commission, Tariff Classification Study; Schedule 2 - Wood and Paper (November 15, 1960) at 64. The subject board is covered with a laminate of synthetic resin and paper. Both paragraphs 1403 and 1539(b) are cited in the Tariff Classification Study as sources for item 245.80, TSUS.

Counsel for MB contests above analysis because it presupposes that the surface of the product is covered with a laminate. In our view, AHA's analysis is based on something greater than supposition. It is made pursuant to the common and commercial meanings of the term "laminate" in that the product is composed of layers bonded together under heat and pressure to form an article that contains a smoother surface than would otherwise be available.

While noting that no legislative history source, including those describing the origins of item 245.80, TSUS, supply a definition of the term "laminated", counsel for MB looks to the legislative history explaining Paragraph 1402 promulgated in the Tariff Act of 1930. Paragraph 1402 provided for "wall board ... not ... laminated by means of an adhesive substance. Counsel cites the legislative history which notes that "Laminated board as known in the industry consists of two or more layers of board combined with an adhesive substance. ... the term 'laminated by means of an adhesive substance' ... is here used to indicate a board produced as a secondary process by combining two or more layers with the employment of an adhesive substance." S. Rep. No. 37, 71st Cong., 1st Sess. 42 (1929).

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

This language indicates that laminated board may be combined from two layers of board; however, in the final analysis the report refers to a laminated board as one produced by combining "layers" rather than layers of board. Counsel for MB concludes that Congress understood a laminated building board to be one that had two or more layers of finished board combined by means of an adhesive substance. Again, we cannot accept the interpretation that a laminated board must be constructed of finished material. The cited language does not support this proposition. Counsel for MB insists that secondary sources be interpreted in a manner which supports the definition of laminate supplied by his expert witness even when such interpretation is not consistent with the clear language of those sources.

Counsel for AHA states that the legislative history of 245.80, TSUS, supersedes that of an "unrelated, now-defunct category adopted thirty years earlier." The Tariff Classification Study does not supersede the legislative history of the Tariff Act of 1930; however, legislative history describing the origins of item 245.80 has significant probative value in determining the type of product Congress intended to be classified thereunder.

Judicial Precedent

Both sides cite F.W. Myers & Co. v. United States, 59 Cust. Ct. 427, C.D. 3180 (1967), as favorable precedent. In F.W. Myers, a building board made of two facing sheets composed of asbestos and cement around a core asphalt impregnated fiber board, with the layers being bonded in part by synthetic resin, was held to be a laminated board. Lamination was not an issue in the case; both plaintiff and defendant conceded that classification of the product was limited to item 245.80 as laminated boards or items 518.41-44 as articles in part of asbestos and hydraulic cement. The case provides no significant instruction on the issue of lamination. No one could disagree that the product qualified as a laminated board under any definition heretofore advocated by either side. Accordingly, we find this case to have little probative value to the issue at hand.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078195

Counsel for MB cites United States v. O.M. Baxter (Inc.), 16 Ct. Cust. App. 257, T.D. 42868 (1928), as supporting the proposition that a laminated product is one composed of laminae or layers. The case confirms the validity of the lexicographical definitions.

Those definitions are further supported by Richard Crittal Radiant Heating Corp. v. United States, 27 Cust. Ct. 193, C.D. 1369 (1951). The court held that partially finished panels used in radiant heating were classifiable as laminated products. The panels were constructed of three layers of resin-bound asbestos with a wood filler. On each side of the center layer was an electrical element. The court found that the verb "to laminate" meant to cover or construct with layers "and this appears to be the sense in which the word 'laminated' is used in the tariff act provision." Richard Crittal, supra, at 195.

In Crown Abrasive Co., Inc. v. United States, supra, the court held that a grinding disc was classifiable as a laminated product. The disc had been formed by the combining under heat and pressure of 20-24 layers of cellulose paper impregnated with phenolic resin and coated with an abrasive. The resulting product was found to be a laminate even though a mere visual examination of the disc would not disclose the laminations.

Counsel for MB attempts to discredit the Crown Abrasive decision by noting that the test used to determine whether the merchandise was laminated involved smashing the disc with a hammer and scrutinizing the resulting debris microscopically. He claims this method of scrutiny would necessarily obscure the layers.

This criticism is misleading. The court noted that "the completeness with which the article was smashed might destroy any evidence of lamination" and dismissed the results of that test. Crown Abrasive, supra, at 348. The court gave weight to the testimony of the expert witness called by the United States (which took the position that the product was not a laminate) who admitted under cross-examination that the layers were not discernible visually.

The finding in Crown Abrasive regarding visibility of layers contradicts the definition of laminate advocated by expert witness Dr. Broutman. As with common and commercial definitions of laminate, judicial precedent provides yet another source that does not square with the expert testimony provided.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Dr. Broutman's definition of laminate requires that the layers all be of finished products. This requirement also does not comport to judicial precedent. In Sommers Plastic Products Co. v. United States, 58 Cust. Ct. 409, C.D. 3002 (1967), the court found that polyvinyl chloride sheeting comprised of a top layer of polyvinyl chloride-type synthetic resin, a middle layer of foamed polyvinyl chloride resin and a backing of rayon fabric was classifiable as a laminated product.

The product was manufactured through a process where the middle layer is baked to a jelly-like consistency and is rolled onto the rayon fabric. Heat and pressure activate the foaming agent and cause the middle layer to expand. The top layer is then applied and is affixed through the further application of heat and pressure. The rayon backing and the top layer of polyvinyl chloride bind because of the middle layer. The result is a laminated product constructed of materials that are not finished.

Counsel for MB claims that the Sommers decision classified the product properly because the two finished layers (the rayon backing and the polyvinyl chloride top layer) were combined by means of a synthetic resin adhesive. However, the Sommers court refers to the foaming synthetic resin as a middle layer. It can be deduced from this reference that a layer need not be in finished form at the time of construction in order for the finished product to be classifiable as a laminate.

Accordingly, we find that judicial precedent contradicts Dr. Broutman's definition of laminate, upon which counsel for MB so heavily relies. Precedent supports the classification of the subject hardboard lap siding as a laminated board.

Administrative Rulings

Counsel for MB cites the following administrative precedent as support for the conclusion that the subject board is not laminated:

1) New York Ruling dated March 8, 1981 (Control No. 800125) - An insulated board consisting of wood fiber board laminated with glass fiber material bonded with a synthetic resin under heat and pressure held classifiable under item 245.80.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D10

076195

2) Customs Ruling Letter of June 1, 1979 (Control No. 060298) - A product comprised of a fiberboard core with a hardboard veneer laminated thereto by means of a synthetic resin held classifiable under item 245.80.

3) T.D. 67-6(4) - A paperboard finished with kraft paper, aluminum foil or fabric was classifiable under item 245.90 as a face finished product.

The first two rulings cited by counsel specifically note the products as being laminated because of the presence of a synthetic resin bond. There is no indication that the product in T.D. 67-6(4) was bonded in whole or in part, or impregnated, with synthetic resin. Without such a bond, classification of the product under item 245.90 is proper. Classification under item 245.80 would then be precluded.

The administrative precedent that counsel for MB cites is not persuasive. We do not concur with counsel's conclusion that the above rulings uphold the definition of lamination involving use of finished products of comparable thicknesses.

Comments Other Than AHA and MB

Four other comments were received. Three of the comments were in support of the 245.90 classification. With one exception, the substance of these comments has been addressed in the general discussion above.

One commenter states that it manufactures hardboard by much the same method as MB. The commenter notes that rather than adding a layer of newsprint to the wet wood fiber mat, it adds a layer of very fine wood fibers over the coarser fibers before the application of heat and pressure. The commenter is of the view that it can be presumed that this hardboard is not laminated. While this is not the issue at bar and the evidence presented is incomplete, it cannot be stated with certainty that the board so manufactured is categorically not a laminated board.

Mr. David C. Pierce
520 Bleeker Avenue
Mamaroneck, N.Y. 10543

Dear Mr. Pierce:

Your letter of April 11, 1986, requests a ruling on the tariff classification of a laser photographic hologram from the Netherlands. The sample you submitted is a circular piece of flat transparent plastic, 0.087 inch thick and approximately 1-1/2 inch in diameter, upon the surface of which has been printed by holography the picture of a sea shell.

Under the principles set forth in Headquarters Ruling Letter 077273, March 10, 1986, this article is classified in item 274.70, Tariff Schedules of the United States (TSUS), the provision for "Photographs, engravings, etchings, lithographs, and wood cuts, and pictorial matter produced by relief or stencil printing process, all the foregoing, whether bound or not bound, and not specially provided for: Printed not over 20 years at the time of importation: Other," dutiable at 3.2 percent ad valorem.

You suggest that this article would have been classified in item 960.50, Appendix to the TSUS, during the effective period of this temporary provision as one of the "similar articles provided for in item 274.50 through 274.70 inchusive...." During the effective period of item 960.50, it provided duty-free entry. We agree that the hologram would have been eligible for classification in item 960.50.

When item 960.50 expired, Customs instructed the ports to permit duty-free entry under bond for this item with liquidation to be extended pending passage of legislation to make this provision part of the permanent tariff.

Proposed legislation has been introduced in the Congress pertaining to this subject. Some legislation would make all formerly 960.50-eligible merchandise duty-free under a permanent tariff provision and would make the application of the duty-free status retroactive to August 11, 1985. We do not wish to speculate about what action the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

Congress might take. If the Congress acts to make the tariff provision permanent and retroactive, goods entered between the time the provision expired and the effective date of the act will be liquidated free with the bond released. If the Congress acts to make some or all of the formerly-free goods dutiable, then Customs will liquidate the appropriate entries by collecting duty against the bond.

Sincerely,

Arthur P. Schaffer

TO : Chief, Commercial Operations, Branch 1

FROM : Director, Classification and Value Division

SUBJECT: Clarification of Internal Advice 69/85 on the Classification of Water Imported by Pipeline - Your Memorandum of March 13, 1986

It is your opinion that there may be a conflict between the decision in ruling 077393 of December 23, 1985, and 072700 of January 20, 1984.

The tariff provisions in issue are item 166.10, TSUS, covering all mineral waters, natural, imitation, or artificial, and item 523.81, TSUS, covering crude mineral subtances.

In the January 1984 decision the water was intended for beverage use and was imported in retail size containers or in bulk, possibly by truck, to be delivered to homes or possibly bottled for table use.

In contrast, the 1985 case dealt with the shipment of water by pipeline to furnish an entire area with water. Since the water was potable it could be used for drinking water, but this was only one of the uses. The purpose was to furnish water for general use. In this sense the pipeline water was no different from a municipal water supply.

Therefore, the distinction to be drawn between the two decisions is whether the water, bottled or not, is primarily intended as a beverage classifiable in item 166.10.

Water intended for all uses, beverage use being only one, is classifiable as a crude mineral substance in item 523.81, TSUS.

Plainsboro, New Jersey 08536

Dear Mr. Radia:

This is to advise you that the classification expressed in ruling letter 807591 of November 21, 1983, is not in accordance with the current views of the Customs Service. That letter is revoked pursuant to section 177.9(d)(1), Customs Regulations.

A mixture of 86.3 percent ethanol and 13.7 percent isopropanol, used as an octane enhancer for motor fuel, is classifiable under the provision for mixtures of two or more organic compounds in item 430.20, TSUS. The rate of duty is 3.9 percent ad valorem but not less than the highest rate applicable to any component compound. The component with the highest rate is ethanol classifiable under item 427.88/901.50 and dutiable at 3 percent ad valorem plus 60 cents per gallon.

Sincerely,

Harvey B. Fox

Mr. Fred Goris
International Department
Fisher-Price
636 Girard Avenue
East Aurora, New York 14052-1885

Dear Mr. Goris:

In your letter dated September 10, 1985, you requested a ruling concerning the tariff classification of a "musical microphone" manufactured in Hong Kong.

You have described the merchandise as a microphone that transmits sound through an FM band on a radio. An examination of the descriptive literature reveals that there are 13 notes present including the numbered black buttons which are sharps and flats. However, the 0 button and the T button expand the scale another 12 notes in each direction into the tenor clef and above the treble clef. Therefore, the scale has a total of 37 notes. This article also contains an integrated circuit which gives it the capability to "play" eight prerecorded tunes and to record and playback other tunes.

You suggest that the musical microphone is properly classifiable under the provision for transmitters in item 685.30, Tariff Schedules of the United States (TSUS) because its musical capabilities are clearly subordinate to its primary function and use as a microphone/transmitter.

Schedule 7, Part 5, Subpart E, Headnote 2, TSUS, provides that "For the purposes of the tariff schedules, a "toy" is any article chiefly used for the amusement of children or adults."

The photograph of the "musical microphone" and the description of its capabilities indicate that it will be chiefly used in the United States for the amusement of children or adults. Also, the product is marked with the name Fisher-Price, a major toy manufacturer.

It is our opinion that the primary design and function of this product is that of a toy musical instrument. We view the microphone feature as subordinate to the musical instrument feature rather than being co-equal with that feature.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

In view of the foregoing, it is our position that the "musical microphone" is classifiable under the provision for toy musical instruments in item 737.60, TSUS, and dutiable at the rate of 7.6 percent ad valorem.

Sincerely,

Arthur P. Schaffner

04 JUN 1986

Mr. Henry L. Kotkins, Jr.
President
Skyway Luggage Company
Skyway Center
Seattle, Washington 98121-1392

Dear Mr. Kotkins:

In a letter dated May 16, 1986, you asked that we reconsider the points raised in your January request to our New York office which were the subject of our letter to you dated May 6, 1986.

We regret that our letter may have caused you some confusion. Our aim was to offer some guidance in the classification of luggage and to answer the somewhat hypothetical questions posed to us. Unfortunately, answers to these types of questions are not always entirely satisfactory particularly, as in this case, when the merchandise involved is the subject of intense interest to both domestic manufacturers and importers.

In an effort to clarify the matter, we offer the following restatement of our position:

(1) interior pockets, tie tapes or curtains are not "linings" for tariff purposes;

(2) loose linings are usually considered "linings" for tariff purposes;

(3) "laminated linings" (i.e., the inside surface of a laminated exterior surface material) are usually not considered "linings" for tariff purposes

(4) materials found not to be "linings" or an otherwise excluded component will be considered in determining the component material of chief value; and

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078318

(5) a material found to be a "lining" for tariff purposes is excluded regardless of its composition.

You state that the Webster's Dictionary definition of linings quoted by us has application to garments and is not relevant to luggage because curtains, loose pockets, tie tapes, etc., do not exist in garments. In the absence of a commonly accepted definition of luggage linings, we are of the opinion that the previously quoted definition of garment linings is analogous and useful.

You assert that on entries of luggage, customs officers have not considered the laminated backing materials when determining component material of chief value. We are not aware that customs offices at any port are considering the laminated backing materials as linings which are to be excluded in component material determinations.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

JUL 22 1982

VES-12-02-CO:R:CD:C
105671 PH

This ruling concerns the tariff classification of the SKI-SURFER, a small engine-powered watercraft.

ISSUE:

What is the tariff classification of the SKI-SURFER, an approximately 9 1/2 foot long reinforced fiberglass engine-powered watercraft?

FACTS:

The inquirer has requested a tariff classification ruling on the SKI-SURFER, a reinforced fiberglass watercraft powered by a twin cylinder two stroke inboard engine with a water jet. The SKI-SURFER is apparently made in Great Britain and we so assume for purposes of this ruling. The craft is 9 feet, 5 inches in length, 3 feet, 1 inch in width, and 2 feet, 1 inch in height and weighs 287 pounds. The specifications for the craft state that it is constructed to provide places for one sitting and one sitting or kneeling passenger. The promotional literature enclosed with the ruling request indicates that the craft is for use in water-skiing and states that it can be ridden "... standing up as a surfboard ... kneeling down as a speedboat, [a]nd carrying a passenger if you wish."

LAW AND ANALYSIS:

Generally, under the Tariff Schedules of the United States (TSUS), a yacht or pleasure boat owned by a resident of the United States or brought into the United States for sale or charter to a resident thereof, is dutiable under item 696.05, TSUS, at the rate of 1.8 percent ad valorem, if valued not over $15,000, or item 696.10, TSUS, at the rate of 3.7 percent ad valorem, if valued over $15,000.

We have ruled that a motorized surfboard, consisting of a streamlined hull, a 10 horsepower two stroke engine, a shrouded propellor, a fuel tank with a reserve tank, and a long surfboard-like surface with two paddles alongside the board, which is operated by means of a pistol grip hand throttle attached by a straining rope and steered by the operator shifting his weight as on a conventional surfboard, is classifiable under item 696.05, TSUS. We also have ruled that a surf-sailer, consisting of a hull of fiberglass shell encasing a foam core, approximately 13 feet long, 27 inches wide, and 7 inches deep, with no "cockpit" or depressions in which to place one's feet while sailing, and which is steered by tilting its mast, adjusting its moveable skeg, and movement of the operator's body weight, is classifiable under item 696.05, TSUS.

105671

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

ED

For tariff classification purposes, we can find no distinction between the above-described two cases and the SKI-SURFER under consideration. Accordingly, the SKI-SURFER is classifiable under item 696.05, TSUS, and dutiable at the rate of 1.8 percent ad valorem, assuming that it is valued at less than $15,000.

HOLDING:

The SKI-SURFER, an approximately 9 1/2 foot long reinforced fiberglass engine-powered watercraft, is classifiable under item 696.05, TSUS, and dutiable at the rate of 1.8 percent ad valorem, assuming that it is valued at less than $15,000.

EFFECT ON OTHER RULINGS:

None.

DEPARTMENT OF THE TREASURY · U. S. CUSTOMS SERVICE CORRESPONDENCE APPROVAL AND CLEARANCE Form 100 (11-15-73)

SEP 16 1983

VES-13-18-CO:R:CD:C
106270 LLB

This ruling concerns certain vessel repair duties assessed pursuant to title 19, United States Code, section 1466.

ISSUE:

Whether numerous items entered on a vessel repair entry are classifiably free items under section 1466(a), and whether one operation in particular is a permanent modification to the hull and fittings of the vessel?

FACTS:

The vessel in question arrived from European ports of call on May 14, 1982, and filed a vessel repair entry citing costly repairs in Bremerhaven, Germany, and Rotterdam, Netherlands. Voluminous invoices were later supplied and an application for relief in outline form was filed which entirely relies upon the confusing and nearly illegible invoices for evidentiary support. A claim of casualty is made in the case of one minor item, and the claim of vessel modification is made in regard to one other. The claim for duty-free entry for the remainder of the foreign operations is made, we assume, on the basis that they be considered classifiably free items under section 1466(a). In the interest of keeping our reply from becoming overlong, following discussion of the statutory basis for assessement of duty and granting of remission, narrative will give way to a chart format wherever possible which provides, of course, the item under consideration, our advised disposition, and citation of authority in support of that position.

106270

LAW AND ANALYSIS:

Title 19, United States Code, section 1466(a), provides in pertinent part for payment of an ad valorem duty of 50 percent of the cost of foreign repairs to a vessel documented under the laws of the United States to engage in the foreign or coastwise trade. Section 1466(d)(1) provides that the Secretary of the Treasury is authorized to remit, or refund such duties if the owner or master of the vessel provides good and sufficient evidence that the vessel was compelled by stress of weather or other casualty to put into such foreign port to make repairs to secure the safety and seaworthiness of the vessel to enable her to reach her port of destination. As previously mentioned, the vast majority of the items to be considered in this case are claimed to be items which do not constitute repairs under section 1466(a).

E10

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

ITEM	CLAIM	RECOMMENDATION	AUTHORITY
Overtime Labor Pay	1466(a)	Dutiable	C.I.E. 970/60
Marking Anchor Chain	1466(a)	Dutiable	C.I.E. 233/60
Routine Inspection not associated with a repair	1466(a)	Free	C.I.E. 429/61
Routine Boiler inspection and cleaning	1466(a)	Free	C.I.E. 233/60
Transportation Costs (If properly segregated)	1466(a)	Free	C.I.E. 204/60
Clearance and Readings and ropeguard necessary to accomplish them (not associated with a repair)	1466(a)	Free	C.I.E. 429/61

A leading case in the interpretation and application of section 1466 is United States v. Admiral Oriental Line et al., T.D. 44359 (1930). That case distinguished between equipment and repairs on one hand and permanent additions to the hull and fittings on the other, the former being subject to duty under section 1466.

The application makes one claim of such non-dutiable modification, this appearing as invoice item number 122/17. We note, however, that a wasted pipe appears to have been replaced, and that a new sight glass was delivered to be carried as a ship's spare under this number. As such, the item would not qualify as a modification to the hull as contemplated by the court in Admiral Oriental, supra.

Also appearing is a claim for remission for alleged stevedore negligence connected with the repairs to certain cargo container stacking frames. The language of the statute is clear and specific in requiring "good and sufficient evidence" of casualty. We have previously ruled that mere bald statements, unsupported by evidence, are insufficient to support grants of remission. (Ruling letter 105812, October 27, 1982). The file contains absolutely no evidence of casualty in regard to this item and so it must be denied.

FOR PUBLICATION

Honorable D. Patrick Ahern
Collector of Customs
Los Angeles, California

Dear Mr. Ahern:

Treasury Decision 54427-H, as amended by Treasury Decision 55461-E, covering the allowance of drawback on, inter alia, steel cleaning machines and steam generators manufactured by Clayton Manufacturing Company, El Monte, California, under section 313(b) Tariff Act of 1930, as amended, with the use of cold rolled steel sheet, is hereby further amended to cover the said products manufactured by the company under section 313(b) of the tariff act with the use of steel tubing, iron tubing (pipe), and electric motors.

There are enclosed, approved, copies of the manufacturer's drawback statements subscribed to on September 10, 1959, and November 7, 1961, requesting the foregoing action and containing the manufacturer's proposals as to procedures it will follow and records it will keep. Such records shall include those prescribed in section 22.5(a)(1) through (6) of the Customs Regulations.

The quantity of imported steel tubing and iron tubing of the required kind and quality which may be designated as the basis for the allowance of drawback hereunder shall not exceed a quantity thereof equivalent to the quantity of such tubing of the same kind and quality as that designated which was used in the manufacture of the exported articles as shown by an abstract of the manufacturing records which shall be filed with the drawback entry.

The quantity of imported electric motors of the required kind and quality which may be designated as the basis for the allowance of drawback hereunder shall not exceed a quantity thereof equivalent to the quantity of the electric motors of the same kind and quality as that designated which appears in the exported articles as shown by an abstract of the manufacturing records which shall be filed with the drawback entry.

The Company has expressed its understanding and agreement that the pipe, boiler tube and electric motors which it will use in manufacture of the articles for exportation with benefit of drawback will be so similar in quality to the imported merchandise designated as the basis for drawback, that the pipe and motors used, if they

E13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

275836

had been imported would have been subject to the same amount of duty as was paid on the imported pipe and motors.

The company further expresses its cognizance of and states its full understanding of the conditions prescribed in the rate of drawback upon which Treasury Decision 54427-H was predicated and further agrees not to claim drawback in any case where the material used in manufacture would have paid less duty, if imported, than the material designated except for such factors as fluctuations in market value.

However, section 313(b) of the tariff act provides in part that:

> If imported duty-paid merchandise of the same kind and quality are used in the manufacture or production of articles there shall be allowed upon the exportation of any such articles...an amount of drawback equal to that which would have been allowed had the merchandise used therein been imported.

Although the company's plan of operation complies with the "same kind and quality" requirements of section 313(b) its drawback statement shows that such benefits may be claimed in disregard of the fact that paragraph 326 of the tariff act which covers steel and iron pipes provides for varying rates of duty in accordance with the diameter and thickness of such pipe. Accordingly, in order to avoid the possibility of overpayment the company shall be required to furnish in writing prior to liquidation of any drawback claims under this authorization the following statement:

> We understand, that drawback cannot be allowed under section 313(b) of the tariff act, as amended, in an amount greater than would be allowable had the merchandise used in manufacture of the exported articles been imported. Accordingly, it is understood and agreed that we will not designate imported steel and iron tubing on which a greater amount of duty was paid than would have been paid on the tubing "used" in manufacture of the articles on which drawback is claimed.

This rate is being issued also with the understanding that the company will designate and use electric motors of the same model number in its manufacture of articles for exportation with benefit of drawback.

Drawback may be allowed hereunder, upon compliance with the law and regulations, on the articles covered hereby which are manufactured and exported on and after May 28, 1959. Exportation shall be made within 5 years after importation of the imported merchandise.

E14

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Your attention is invited to the provisions of section 22.13(a) of the Customs Regulations which require the completion of drawback claims within 3 years after exportation. In this regard the file shows that an application involving the exportation of the foregoing products was filed with the collector of customs on May 28, 1959, whereby coverage was sought under the drawback law on such articles manufactured and exported on the above date. The Bureau received the application and supplemental statement on October 2, 1961. In view of the time required to consider this matter and issue this amendment the period prescribed in section 22.13(a) of the regulations is extended for six months as to the articles manufactured hereunder between May 28, 1959, and November 29, 1959.

Sincerely yours,

(Signed) W. E. HIGMAN

Deputy Commissioner

Enclosure 32292

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

[redacted]

938572

NOV 18 1981

CLA-2 CO:R:CV:G
542638 TLL

District Director of Customs
Dallas/Fort Worth, Texas 75261

Dear Sir:

This is in reply to your memorandum dated October 9, 1981, asking for confirmation of your interpretation of TAA #25.

Your office requests advice as to whether or not a variance increase from standard material cost constitutes a material assist adjustment within the meaning of the Trade Agreements Act of 1979 (TAA).

The parent firm in the United States sells component parts to its subsidiaries in the foreign country at standard costs for the purpose of assembling integrated circuits. The assembled devices are sold by the subsidiary to the parent at prices based upon the standard cost plus a profit.

The parent discovers that at the end of the accounting period that there is a price variance from the standard, i.e., the actual cost of the material exceeds the standards.

Although the TAA states that material assists are one of the adjustments that we are permitted to add to the price paid or payable in forming transaction value, TAA #25 indicates that, if the transfer prices are established in accordance with generally accepted accounting principles, they may be accepted as statutory transaction value.

In this instance, there is no question that this importer's standard costs are based upon the use of generally accepted accounting principles and that much of the price variance was caused by unusual fluctuation in the price of gold.

Based upon TAA #25 it is your belief that a variance increase from the standard cost of materials is not a material assist because it is not a cost (not a part of standard cost) within the meaning of the TAA. Therefore, it should not be added to the transfer for formation of transaction value or for comparison with a test value to see if they closely approximate each other. Such variances should be ignored, and the transfer price accepted as transaction value, unless they are significantly and consistently in favor of the importer.

542638

F2

This is to verify your belief that a variance increase from the standard cost of materials is not to be treated as an assist "within the meaning of the TAA." Simply stated, there is no authority under the TAA to do otherwise. Therefore, such variances should be ignored and the transfer price accepted as transaction value as specified in TAA #25.

Sincerely,

(Signed) Irving W. Smith, Jr.
Harvey B. Fox
Director, Classification
and Value Division

DEPARTMENT OF THE TREASURY · U S CUSTOMS SERVICE CORRESPONDENCE APPROVAL AND CLEARANCE Form 100 (11-15-73)

MAY 6 1983

CLA-2 CO:R:CV:V
542999 TLL

542999

Dear Sir:

Re: Application for Further Review of Protest 3001-2-000234

The above-captioned protest and application for further review were filed against your decision in the subject protest.

FACTS:

Section 10.41a(e) of the Customs Regulations requires that a consumption entry must be filed for containers diverted from international traffic, and that all import duties and import taxes due on the container or instrument at the rate or rates in effect and in its condition on the date of such diversion or withdrawal must be paid. The protestant has diverted a number of such containers, filing entries which are the subject of this protest. The district director has appraised the subject containers on the basis of a 10 year depreciation schedule while protestant is arguing that the merchandise should be depreciated over only 7 years. Protestant argues that based on a 1978 ruling, and the emphasis on generally accepted accounting principles set forth in the Trade Agreements Act of 1979 (TAA), we must accept the 7 year depreciation schedule. The 1978 ruling pertaining to a penalty case permitted depreciation of containers over a 7 year period.

F4

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Your office has taken the position that neither the 7 year depreciation period nor the 5 year accelerated depreciation period provides a suitable value for appraisement purposes, even though they may be perfectly acceptable for tax purposes. The 10 year depreciation schedule was used because it closely approximated the market value of similar containers as reflected by the prices in actual sales transactions.

542999

ISSUE:

Has the imported merchandise been appraised correctly?

DISCUSSION OF LAW:

In reviewing the submitted file, we wish to point out that the 1978 ruling was in regard to the settlement of a particular penalty claim and is not relevant for the matter under consideration, that is, the appraisement of imported merchandise. Furthermore, since section 402 of the Tariff Act of 1930, as amended, has been amended by the TAA, we would not be bound by that decision in any event. Further, while the emphasis on generally accepted accounting principles (GAAP) set forth in the TAA is essential to the operation of that law, it does not constitute a separate basis of appraisement for imported merchandise; that is, while we must accept information in the form submitted when it is submitted in accordance with GAAP, Customs does not have to appraise imported merchandise on the basis of that information simply because it conforms to GAAP.

In a submission dated April 15, 1983, counsel for the protestant has presented two additional arguments in support of a seven year depreciation schedule. The first of these is that there is very little market for new or used 35 foot containers and that in the absence of an appreciable market, the use of a 7 or 5 year depreciation schedule is a reasonable

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

542999

method of appraisement. Secondly, the argument is also presented that section 402(f)(2) of the TAA precludes appraisement at the higher of two alternative values.

In response to these arguments, we are of the opinion that the state of the container market is not necessarily determinative of the appropriate basis of depreciation to be used in the appraisement of containers under the TAA. Customs has a clear obligation to appraise imported merchandise regardless of the market for the imported merchandise (see section 500 of the Tariff Act of 1930, as amended by the Trade Agreements Act of 1979). The fact that there may have been a glut in the container leasing industry would not change this obligation.

The argument based on 402(f) that we may not appraise at the higher of two alternate values would, if adopted, lead to the conclusion that all differences of opinion between Customs and the importer would have to be resolved in the importer's favor. The law obviously does not require this result. What 402(f)(2) does is to preclude appraisements based on situations similar to section 402a of the Tariff Act of 1930, that is, foreign value or export value whichever was higher.

We cannot say that your office acted incorrectly in depreciating the containers over 10 years instead of the requested 7 years. Therefore, you are directed to deny this protest.

Sincerely,

[redacted] (Signed) Harvey B. Fox

Mr. Ralph C. Meola
Corporate Transportation Manager
Rhone-Poulenc Inc.
P.O. Box 125
Black Horse Lane
Monmouth Junctio New Jersey 08852

Dear Mr. Meola:

This is in response to your letter of April 23, 1985, in which you request a clarification of the amendment to section 152.103(a)(5) of the Customs Regulations (T.D. 84-235), concerning the dutiability of foreign inland freight charges. You state that you have a copy of the February 7, 1985, telex to all field offices which contained interim instructions regarding the implementation of T.D. 84-235.

You ask whether foreign inland freight charges are dutiable under circumstances in which: (1) the terms of shipment are CIF from a related supplier, (2) the charges are separately itemized and claimed and; (3) the amount of freight is both appropriate and reasonable. You have enclosed a copy of a commercial invoice from a related foreign supplier which separately lists the amount of foreign inland freight charges included in the CIF price. You inquire as to whether a document of this type can be used as the basis for excluding foreign inland freight from the price actually paid or payable.

The commercial invoice that you have submitted is not, in itself, sufficient to establish that the foreign inland freight charges reflected thereon are non-dutiable charges. As the February 7, 1985, telex states, it is necessary for the importer to submit a "through bill of lading" (a contract, waybill or invoice) issued by a carrier or forwarder which indicates that that one carrier or forwarder was in sole control of the shipment from the place of manufacture through the interior point of port of exportation to the place where the merchandise enters the Customs territory of the United States. In other words, for the foreign inland freight to be non-dutiable under the circumstances you have described, it would be necessary for a

543534

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

through bill of lading to be furnished which indicates that one carrier or forwarder was responsible for both the foreign inland freight and the ocean freight.

Sincerely,

Rufus Jarman, Esq.
Barnes, Richardson & Colburn
475 Park Avenue South
New York, New York 10016

Dear Mr. Jarman:

Your letter of April 5, 1985, requested a ruling with respect to the country of origin marking requirements of certain copper alloy blanks as well as a determination as to whether contacts produced from such blanks may be claimed as American components for purposes of item 807.00, Tariff Schedules of the United States (TSUS), if they are exported from and reimported into the United States after assembly.

You describe the instant merchandise as copper alloy blanks, which have been manufactured to appropriate size and shape. The blanks are dedicated to use in the production of contacts which serve to transmit electrical impulses from one electrical device to another. Subsequent to their importation, the blanks are electroplated with precious metals and undergo a number of heating, soaking, and rinsing operations. The extent of this processing and the amount of precious metal that is added depends upon the end use of the electrical contact involved. You state that some of these contacts are sold to original equipment manufacturers, distributors and military departments, while others are used as components in the production of electrical connectors.

You argue that the processing of the merchandise in the United States renders them products of the United States for purposes of item 807, TSUS. In addition, you argue that ITT Cannon is the ultimate purchaser of the imported blanks so that pursuant to section 304 of the Tariff Act of 1930, the contacts made from the blanks need not be marked if sold in the United States. As you know, with respect to each of these issues, the dispositive question is whether the processing of the blanks into contacts constitutes a substantial transformation into a new or different article of commerce having a new name, character or use.

You emphasize that 1) the processing involves a high degree of quality control and expense; 2) that electroplating is essential to render the merchandise suitable for use as electrical contacts; and 3) the amount of electroplating determines the precise use to which the merchandise will ultimately be put.

We have carefully considered the arguments presented in your submission and are unable to agree that a substantial transformation takes place. Firstly, it is significant to observe that the blanks as imported are manufactured to size and shape and are dedicated to use as contacts. Secondly, the blanks could in fact operate as contacts for a period of time, before oxidation would impede their efficiency. Thus it is our view that the electroplating and related operations, while necessary to complete the blanks for commercial use, are more properly considered in the nature of finishing operations on the imported articles, rather than creating a new or different article of commerce. In this regard, we also observe that while the contacts may be used in a variety of different industries, their basic function is the same, to transmit electrical current. Accordingly, we do not view the fact that a single type of blank may be used in a variety of different industries as dispositive.

Finally, we note that in Headquarters Letter, 063117, dated June 28, 1979, involving very similar merchandise, the Customs Service expressed the view that no substantial transformation had occurred. For all of the foregoing reasons, we hold that no substantial transformation is present. Therefore, we conclude 1) that the contacts will not qualify as American components for purposes of item 807 upon reimportation; and 2) that since ITT Cannon is not the ultimate purchaser of the imported blanks, packages containing completed contacts must be marked with the country of origin of the blanks if they are sold in the United States.

Sincerely,

Harvey B. Fox

[redacted]

16 APR 1982

652806

ENF 4-02.2 CO:R:E:C
652806 LR

Dear Sir:

This is in reference to your letter dated October 1, 1981, which forwarded the petition for relief submitted by counsel on behalf of [redacted] in connection with Penalty Case Nos. 78-4701-02425 (Case A) and 79-4701-58814 (Case B).

Case A involves the seizure of 20,873 pieces of men's and women's wearing apparel domestically valued at $192,486 which was entered at J.F.K. Airport under cover of Immediate Delivery No. 8176917 on September 13, 1978. Case B involves a claim for monetary penalty in the amount of $21,670 in connection with the importation of 18,024 pieces of men's shirts entered at J.F.K. Airport under cover of Consumption Entry No. K533433 on August 28, 1978. The merchandise was seized and the claim was assessed pursuant to title 19, United States Code, section 1592 (19 U.S.C. 1592) and 19 U.S.C. 1592, as amended by P.L. 95-410, respectively, because the documents submitted upon entry allegedly contained the material false statement that Dubai was the country of origin when in fact it was India. If, as alleged, the merchandise was made in India, it was subject to quota restrictions and would not have been permitted entry into the commerce of the United States.

The seized merchandise was released on November 6, 1978, and was re-exported upon deposit of a letter of credit in the amount of $32,000.

Petitioner requests remission and in the alternative mitigation of the claim for forfeiture and the monetary penalty based on its primary contention that it never intended to defraud or violate any statutes or regulations. In particular, petitioner maintains that it is not aware that Dubai is not the country of manufacture, that it has always had good relations with Customs, that it knew that quotas for Indian garments similar to the garments in issue were subject to reopening, that there has been no loss of revenue or other adverse effect on the Government, and that it has already been financially penalized.

Before addressing petitioner's claims, we will discuss whether there was a material falsity on the entry documents, an essential element of the alleged violation.

Material Falsity

Under the provisions of 19 U.S.C. 1592, any person who enters or attempts to enter merchandise into the commerce of the United States by means of any document which is material and false may be subject to penalty. As indicated above, the instant penalties are based on the allegation that petitioner's statements on the entry documents with regard to country of origin constituted material falsities. There can be no question that petitioner's statements in this regard were material since they directly affected whether the merchandise

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

[redacted]

could be entered into the commerce of the United States. At the time of these two importations, the subject merchandise if manufactured in India was subject to quota restrictions and would not be permitted entry. If, as stated, Dubai was the country of origin, there were no such quota restrictions. Furthermore, we believe that petitioner's statements that Dubai is the country of origin are false. Although there is evidence in the record which supports a determination that either India or Dubai is the true country of origin, the preponderance of the evidence supports the former conclusion.

The evidence supporting the conclusion that Dubai is not the country of origin consists of the following.

The Customs Import Specialist responsible for handling this line of merchandise has indicated that there are no facilities in Dubai for the manufacture of the imported garments. He further reports that the only two importations on record which had ever shown this type commodity having been made in Dubai are the ones involved in these penalty cases. The record further shows that petitioner had previously imported all of its garments from India. In fact, it is reported that a comparison of a shirt allegedly made in Dubai with a shirt made in India revealed that they are absolutely identical and were no doubt produced by the same manufacturer. It is also significant that a close inspection of the garments revealed that underneath the present labels showing "Made in Dubai" were stitches from previously removed labels, indicative of the fact that these labels may have been substituted for previous labels. Also, despite the fact that petitioner imported close to 40,000 garments, the record indicates that there was virtually no contact between petitioner and [redacted] the alleged Dubai manufacturer. The only correspondence presented is a letter of introduction by [redacted] stating that it was aware that petitioner had a quota problem on deliveries from India and that it could manufacture and export garments as per petitioner's specifications and models and a purchase order dated June 15, 1978, for the purchase of 20 different items from the Dubai firm. There is no other written communications regarding the means by which orders were placed or any communications involving specific manufacturing requirements.

In addition to the letter of introduction and the purchase order referred to above, the evidence in the record which supports the opposite conclusion, i.e. that Dubai is the country of origin, consists of a certificate of origin issued by the Dubai Chamber of Commerce and Industry stating that the goods in question "are of fabrics of Indian Origin and garments manufactured in Dubai." Petitioner has also presented proof of payment to [redacted] for one of the shipments.

Upon consideration of the above, we believe that the evidence of record supporting the conclusion that Dubai is not the true country of origin of the subject merchandise is more credible and probable than evidence to the contrary. The statements of the Import Specialist that there are no facilities in Dubai for the manufacture of the imported garments are especially persuasive. Also, the absence of communication between petitioner and the alleged Dubai manufacturer is significant. Accordingly, we find that petitioner's statements that Dubai is the country of origin constitute material falsities.

652806

[redacted] RELEASED TO THE PUBLIC

652806

Degree of Culpability

The claim for $21,670 (Case B) was based on the preliminary determination that the violation occurred as a result of gross negligence. No preliminary determination has been made with respect to Case A.

For the reasons set forth below, we find that there is insufficient evidence to support either a finding of fraud or gross negligence.

Although it has been established that petitioner's statement regarding country of origin was false, there is no evidence that petitioner had actual knowledge of the true facts, a prerequisite for either a finding of fraud or gross negligence.* Although it is possible that petitioner knew that India was the country of origin and was involved in a scheme to avoid quota restrictions, the record contains no evidence of such knowledge or involvement. It is also possible that petitioner was totally unaware that [redacted] was making misrepresentations to him regarding the country of manufacture. Indeed, the documents presented by petitioner are consistent with the latter interpretation.

After reviewing the record, we are of the opinion that the material falsities were a result of negligence on the part of petitioner. Although petitioner may not have been aware of the fact that the garments were manufactured in India, such lack of knowledge was the result of its failure to use due care is ascertaining the true facts. In view of the fact that petitioner was in the business of importing garments from India and that during the time in question such garments were subject to quota restrictions, we believe that it had an affirmative obligation to verify that the imported garments were not in fact manufactured in India. In these circumstances, petitioner's total reliance on letter of introduction by the Dubai firm was misplaced. Accordingly, petitioner's request for total remission of the penalties is denied.*

Mitigating Factors

As mitigating factors petitioner claims that it has no previous violations, that there has been no loss of revenue or other adverse effect on the Government, and that it has already been financially penalized.

The record supports petitioner's claim of no prior Customs violations. We find this to be a mitigating factor.

Although petitioner is correct in its assertions that there has been no loss of revenue in this case, we cannot consider this to be a mitigating factor. By its very nature, a quota violation usually results in no loss of

*Under the mitigation guidelines, a finding of gross negligence is also proper if it can be established that petitioner acted with a wanton disregard for the relevant facts. Although the record clearly establishes that petitioner failed to use due care to ascertain what the true country of origin was, there is insufficient evidence showing a wanton disregard for the facts.

*In light of our finding that there is insufficient evidence of fraud, petitioner's claim that it knew that quotas for Indian garments similar to the [redacted] garments in issue were subject to reopening is irrelevant.

F14

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

revenue. However, it is potentially a very serious violation in that it may result in prohibited merchandise entering the commerce of the United States. Indeed, in this case one of the shipments did enter the commerce of the United States.

With regard to petitioner's claim that it has already been financially penalized, it claims that substantial business was lost because it was unable to fill orders, that costs have been incurred and will be generated in the search for new suppliers, and that money was spent to repack the merchandise for removal from its warehouse area to Customs custody and to reexport the goods back to Dubai. Although there is nothing in the record contradicting these claims, we decline to grant further mitigation on this basis. As indicated above, we believe that petitioner's conduct contributed to the violations in this case and as a result it should bear the resulting financial burdens.

652806

Conclusion

In light of our findings of negligence and one mitigating factor, the forfeiture is remitted upon payment of $10,266 and the penalty claim is mitigated to $8,668. Upon such payment, the letter of credit should be returned to petitioner.

Please notify petitioner, through counsel, of this decision enclosing a copy of this letter therewith.

Sincerely,

(Signed) [illegible]

THIS DOCUMENT [illegible] RELEASED TO THE PUBLIC

DEPARTMENT OF THE TREASURY - U. S. CUSTOMS SERVICE CORRESPONDENCE APPROVAL AND CLEARANCE Form 100 (11-15-73)

11 AUG 1982

EWF 4-02.2 CO:R:E:C
653016 LR

Dear Sir:

This is in response to your memorandum dated June 9, 1982, which forwarded the petition submitted by counsel on behalf of [redacted] (Philadelphia District Case No. 81-1101-50644).

A claim for $147,277.28 was assessed against petitioner for an alleged violation of title 19, United States Code, section 1592. That statute authorizes the imposition of a penalty against a person who negligently enters merchandise into the commerce of the United States by means of any document which is material and false. In this case, during the period from December 20, 1974, through April 4, 1978, petitioner allegedly negligently entered steel bars into the commerce of the United States pursuant to false invoices. The invoices were false in that they described the merchandise as "shaft forgings for gear boxes" when in fact they were alloyed bars of steel. As a result of the false description, the merchandise was erroneously classified under the provision for parts of gear boxes in item 680.45, Tariff Schedules of the United States (TSUS), rather than under the provision for alloy steel bars in item 608.52, TSUS. There is a reported loss of revenue of $73,638.94 resulting from the misdescription, of which $49,444.84 is an actual loss and $24,194.10 is a potential loss.

In the petition for relief, petitioner requests cancellation or substantial mitigation of the penalty based on two basic claims: first, that the description on the Special Customs Invoice (SCI) was not false; and second, that the company was not negligent.

Petitioner claims that the description of the merchandise on the SCI, "shaft forgings for gear boxes", was not false because each of the imported articles was made by the forging process, the merchandise has the characteristic of a shaft forging both in its imported condition and in its condition as further manufactured, and the merchandise was in fact imported for use as parts of gear boxes. Although petitioner admits that the merchandise consisted of bars of steel rather than parts of a gear box in its condition as imported, it points to the fact that after further processing by [redacted] the ultimate purchaser, the merchandise was to be used either as a shaft in a gear box or as a finished gear. In either case, petitioner states that the imported merchandise in its final form is parts of gear boxes.

The Customs Service does not dispute petitioner's claims that the imported merchandise was made by a forging process or that it would eventually be used for parts of gear boxes. Nonetheless, we disagree with petitioner's conclusion

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

that its description of the imported merchandise as shaft forgings for gear boxes was not false within the meaning of title 19, United States Code, section 1592. Merchandise is classified according to its condition at the time of importation. As such, the importer is required by statute to provide Customs with a detailed description of the goods in their imported condition, including the name by which each item is known in the country of production or exportation, in order that Customs may properly classify the merchandise. See Title 19, United States Code, section 1481(a)(3).

In this case, the imported merchandise consisted of round forged steel bars made to specific lengths and diameters for [redacted] Although the merchandise was described on the purchase orders as rough turned forged bars and on the commercial invoice as round steel, petitioner chose to describe it on the SCI's as shaft forgings for gear boxes in accordance with its ultimate use. We believe that this description did not satisfy the requirements imposed by title 19, United States Code, section 1481(a)(3). Petitioner's description created the erroneous impression that the imported merchandise consisted of gear box parts (i.e. shaft forgings) rather than steel bars which would subsequently be made into shaft forgings and gears. We find that petitioner's description was false in that it failed to furnish the description of the merchandise which is required by the statute and which would enable Customs to properly classify it.

Petitioner also claims that it did not act negligently in the preparation of its documents. Petitioner contends that through its employee, [redacted] it did all that could be reasonably expected in order to ascertain its obligations under the classification statutes: 1) it learned the uses to which the merchandise would be used after entry; 2) it consulted with Customs in a consistent manner to determine the classification of the merchandise sold to [redacted] 3) it proffered a TSUS item number identifying a use consistent with the use of the imported merchandise; and 4) it answered the communications from Customs promptly and thoroughly and in such detail as to allow the Customs officer to make a reasonable classification decision. An affidavit from [redacted] attesting to these claims has been submitted.

There is nothing in the record which refutes petitioner's claims concerning its alleged actions taken in connection with the subject entries. However, we disagree with petitioner's conclusion that the company was not negligent in the preparation of the entry documents. As stated above, an importer is required to provide a detailed description of the imported merchandise on the invoices submitted upon entry. Absent a complete description, the Customs Service cannot properly classify the merchandise. In cases such as this, where an importer chooses to adopt the language of a particular TSUS item number as its description of the merchandise rather than the description on the purchase orders or commercial invoices, we believe a prudent importer should first check with a Customs expert to insure that its legal determination regarding classification is proper. Contrary to petitioner's understanding, merchandise is not classified according to its ultimate use. We find that petitioner was negligent in the preparation of the SCI's in that it failed to use due care either in reporting the requisite facts on the invoices, i.e., that the merchandise consisted of steel bars, or in ascertaining its legal obligations.

Upon review of the record, we also find that two mitigating factors are present in this case: cooperation in the investigation and prior good record.

[redacted]

Dear [redacted]

This is in reply to your letters of November 23, 1977 and January 31, 1978, concerning the country of origin marking requirements for imported cotter pins. As you indicate, the Customs Service has ruled in CIE 719/67 that cotter pins up to 3/16 of an inch in diameter are excepted from individual marking to indicate the country of origin. You inquire whether cotter pins 3/16 of an inch in diameter and larger are required to be individually marked.

The Customs Service is of the opinion that die stamping appears to be the only feasible method of marking that would survive the handling and distribution process to remain visible until sale to the ultimate purchaser. You suggest that to so mark the cotter pins would damage the structure and strength of the pins since the marking would weaken the pins depending on the length of the pin that would be engaged in a particular use. In certain critical applications, die stamping would detrimentally affect the quality and utility of the cotter pins, creating substantial risk of possible harm.

Accordingly, pursuant to 19 U.S.C. 1304(a)(3)(B), cotter pins of all diameters are excepted from the individual marking requirements since it appears that they cannot be marked prior to shipment to the United States without injury.

[redacted]

Dear [redacted]

This is in reference to your letter of July 3, 1978, concerning the marking of country of origin of pressure sensitive tapes which your firm imports from Italy and distributes in the United States. You ask if it is necessary for country of origin marking to appear on each core of inner rolls if the individual boxes in which you sell the items bear the origin marking. Your firm sells to the wholesale trade for resale to industrial users and you say the minimum quantity that would be resold to industrial users is one box with individual rolls of tape enclosed.

19 U.S.C. 1304, the "marking statute," provides that all articles of foreign origin imported into the United States must be legibly and conspicuously marked to indicate the country of origin to an ultimate purchaser in the United States, with certain exceptions. 19 U.S.C. 1304(a)(3)(D) authorizes an exception from individual marking if the marking of the container in which an article is imported will reasonably indicate the origin of the article to the ultimate purchaser.

If the "industrial users" do not resell the pressure sensitive tapes but employ the items in their business, the firms may be deemed to be the ultimate purchasers and the marking of the individual boxes will suffice to indicate origin marking. If, however, there is any possibility that the "industrial users" resell the pressure sensitive tapes for retail use, the purchaser at retail is the ultimate purchaser and the inner cores of the rolls must indicate the country of origin marking.

JUN 30 1982

MAR-2-05 CO:R:E:E
719593 FBO

Dear [redacted]

This is in response to your letter of May 27, 1982, concerning the country of origin marking designations for the Republic of Ireland. You state that the United Kingdom Descriptions Department objected to the use of the marking designations "MADE IN IRELAND" or "IRELAND" for goods made in the Republic of Ireland. It is their position that this would lead to the assumption that the goods were manufactured in Northern Ireland and not in the Republic of Ireland.

We note your submission from two American editions of the Webster Dictionary stating that the Island of Ireland is divided between the Republic of Ireland and Northern Ireland. The Republic of Ireland is referred to interchangeably as Ireland or Eire. The latter designation "EIRE" is the Irish word for Ireland and the proper country name. According to the Embassy of Ireland, Ireland is a bi-lingual country as set out in the basic law which is its Constitution.

The use of Ireland and Eire properly identifies the Republic of Ireland and satisfies the country of origin marking requirements for section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), copy enclosed. Since this matter involes the Republic of Ireland, you may wish to bring your problem to their attention as well.

Sincerely,

(Signed)

Donald W. Lewis
Director, Entry Procedures
and Penalties Division

Dear [redacted]

This is in reference to your letter of November 19, 1982, concerning the marking of certain contact lens material which one of your clients might wish to import into the United States after intermediate processing in Mexico.

You say that your client contemplates sending the basic acrylic material to Mexico in the form of "buttons" or "blanks. In Mexico, the "button" or "blank" would be subjected to a series of grinding and polishing operations which produce a hard, brittle lens. This lens would then be shipped back to your client in the United States, which would further process the lens into a useable soft contact lens by a hydration process and certain other steps.

One of the questions presented was whether the hard lens returned from Mexico would have to be marked as to the country of origin on the lens itself. We are of the opinion that the hard lens itself could not reasonably be marked to indicate the country of origin, or could not be marked without injury. Accordingly, the hard lenses returned from Mexico may be excepted from individual marking to indicate the country of origin under either 19 U.S.C 1304(a)(3)(A), as articles incapable of being marked, or under 19 U.S.C. 1304 (a)(3)(b), as articles that cannot be marked prior to shipment to the United States without injury.

Sincerely,

(S[illegible] LEWIS

This ruling concerns the country of origin marking requirements of certain wood carvings.

ISSUE:

Whether the proposed label for wood carvings meets the country of origin marking requirements of 19 U.S.C. 1304.

FACTS:

Presently, the importer is importing various wood carvings which are sold to gift shops throughout the nation. Each item is marked "Made in Phillipines." The importer is the designer of the items and the items are made to their specifications. The importer now seeks approval of a new label which will read "Designs by Noveltex - Miami Inc." and under this "MADE IN THE PHILLIPINES."

LAW AND ANALYSIS:

Section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), provides generally that all articles of foreign origin imported into the United States must be legibly and conspicuously marked to indicate the English name of the country of origin to an ultimate purchaser in the United States.

Section 134.46 of the Customs Regulations states that in any case in which the words "United States," or "American," the letters "U.S.A.," any variation of such words or letters, or the name of any city of locality in the United States, or the name of any foreign country or locality other

G11

than the country or locality in which the article was manufactured or produced, appear on an imported article or its container, there shall appear, legible and permanently, in close proximity to such words, letters or name, and in at least a comparable size, the name of the country of origin preceded by "Made in," "Product of," or other words of similar meaning.

The suggested label with "Made in the Phillipines" right under "Designs By NOVELTEX-Miami Inc." meets the requirements of Section 134.46 of the Customs Regulations.

HOLDING:

The proposed label for wood carvings meets the requirements of 19 U.S.C. 1304.

This ruling concerns the country of origin marking requirements of [redacted] cosmetic packages.

ISSUE:

Whether the marking described below meets the country of origin marking requirements of 19 U.S.C. 1304.

FACTS:

An importer wishes to import various size cosmetics from Japan that bear the trademark [redacted] on the front of the individual package of cosmetics. On the back side, there is a detailed description of the ingredients and underneath is approximately the same lettering "Made in Japan Dist. By [redacted] Under this, there are various other descriptions in a variety of languages and finally the three cities "New York, Paris, London." The importer wishes to know if Customs will accept this marking.

LAW AND ANALYSIS:

Section 304 of the Tariff Act of 1930, as amended, (19 U.S.C. 1304), provides generally that all articles of foreign origin imported into the United States must be legibly and conspicuously marked to indicate the

613

[redacted]

Dear [redacted]

This is in reply to your letter of June 1, 1984, requesting approval for a proposed country of origin marking of sweet meats from West Germany.

The wrappers of the subject imported sweet meats will indicate the address of the manufacturer and no other address. The address that does appear will indicate "West Germany" as part of the address. You inquire whether this marking will satisfy the country of origin marking requirements.

Section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), requires that, unless excepted, every article of foreign origin or its container must be legibly, permanently and conspicuously marked to indicate the English name of the country of origin to an ultimate purchaser in the United States.

In this case, the product wrapping (container) will reach the ultimate purchaser in the United States. The wrapping will contain the country of origin, West Germany, as part of the foreign manufacturer's address. This country of origin appears to be legible, permanent and conspicuous. It is not lost in the foreign street address, but rather appears on a separate line.

We believe that the subject marking reasonably indicates the country of origin to an ultimate purchaser in the United States. We therefore find such marking to satisfy the requirements of 19 U.S.C. 1304.

Sincerely,

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

DECISION ON DISPUTED CLAIM OF INFRINGEMENT

DATE: MAY 12 1986

REFER TO

CONTROL NO:
CPR-2 CO:R:E:E 729393 km

YOUR REF :
Case No. 85-518612-4

TO:
District Director of Customs
P.O. Box 2112
San Juan, Puerto Rico 00903

COPYRIGHT OWNER: J. Shin Company, Inc.
COPYRIGHT REGISTRATION NO: VA 139-107 and VA 139-106
DATE OF FIRST PUBLICATION: September 1, 1980

PROTECTED ARTICLE (description):

"ICE CREAM DOLLS (GIRL)" and "ICE CREAM DOLLS (BOY)" (Customs Issuance 84-03). Dolls of various heights composed of a soft sculpture and fabric design of toddler children with a plastic ice cream cone on a string around the neck.

IMPORTED ARTICLE (description):

792 dozen "CUTIE KIDS" dolls, little boy and girl dolls approximately 6-7 inches with soft plastic molded faces and hard plastic bodies. The dolls have yarn hair.

DIFFERENCES AND SIMILARITIES NOTED:

The "CUTIE KIDS" dolls appears to be substantially similar, if not identical, to the "ICE CREAM DOLLS" except that they do not have ice cream cones around their necks. The contour of the "CUTIE KIDS" face and hands is nearly identical to that of the "ICE CREAM DOLLS." Their clothing, which includes dresses and bonnets for the girls and coveralls and hats for the boys, is similar to that of the "ICE CREAM DOLLS." Even the clothing color for the little girl, pink, is the same. Except for the lack of the ice cream cone, the only other difference between the goods, is in the feet. Rather than the shapeless feet of the "ICE CREAM DOLLS," the imported items have molded five-toed feet with shoes.

SUBSTANTIAL SIMILARITY TEST: Whether an ordinary observer who is not attempting to discover disparities between two articles would be disposed to overlook them and regard their aesthetic appeal as the same; Peter Pan Fabrics, Inc. v. Martin Weiner Corp., 274 F.2d 487 (1960). Whether an average lay observer would recognize the alleged copy as having been appropriated from the copyrighted work; Ideal Toy Corp. v. Fab-Lu Ltd., 360 F.2d 1022 (1966). There must have been access to the copyrighted work, as well as substantial similarity not only of the general ideas but the expression of those ideas as well.

DECISION: [X] Infringing - Imported articles subject to seizure, forfeiture and destruction; return to country of export may be permitted by district director if satisfied that importer had no reasonable grounds for believing that his acts constituted a violation of law; bond of copyright owner (if any) returned. (17 U.S.C. 602(b), 603(c); 19 CFR 133.42, 133.44)

[ ] Non-infringing - Imported articles and bond of copyright owner (if any) released to importer.

TMK-3 CO:R:E:E
729427 SO

This ruling concerns the applicability of the prohibitions set forth in section 42 of the Act of July 5, 1946 (commonly referred to as the Lanham Act, 60 Stat. 440; 15 U.S.C. 1124), against the importation into the United States of goods bearing infringing marks and names, and in 19 U.S.C. 1526(e) against any such merchandise bearing a counterfeit mark (within the meaning of 15 U.S.C. 1127) imported into the United States in violation of the provisions of 15 U.S.C. 1124.

ISSUE:

Would the importation of handbags and luggage bearing a mark suspected of copying the "DESIGN" trademark of Louis Vuitton S.A., a French corporation, applied without authorization of the trademark owner, constitute trademark infringement?

FACTS:

The Area Director of Customs, New York Seaport, requested internal advice as to whether handbags and luggage constructed of dark brown PVC material bearing a design consisting of a repeating pattern using the letter "V," an inverted letter V," a four pointed star similar in structure to the Knights of Malta, and a line of fleur-de-lis designs are confusingly similar to the protected "DESIGN" trademark of Louis Vuitton, which may be described as the letters "L" and "V" superiposed over each other and surrounded by a fleur-de-lis type design. The Vuitton trademark registration is protected by Customs for pocketbooks, handbags, luggage and other items. The Custom House Broker for the importer submitted a memo to our New York office denying that the imported articles infringed the Louis Vuitton trademark, but failed to furnish his reason(s) for reaching that conclusion. A sample handbag was submitted.

LAW AND ANALYSIS:

Section 42 of the Act of July 5, 1946 (commonly referred to as the Lanham Act, 60 Stat. 440, 15 U.S.C. 1124) prohibits the importation into the United States of merchandise which shall copy or simulate a registered trademark of any foreign manufacturer or trader who is entitled under the provisions of a treaty, convention, declaration, or agreement between the

A6

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

United States and any foreign country to advantages afforded by law to citizens of the United States in respect to trademarks, provided, a copy of such trademark registration is filed with the Secretary of the Treasury and recorded in the manner provided by regulations (19 CFR 133.1 - 133.7). A "counterfeit" trademark is defined as a spurious trademark which is identical with or substantially indistinguishable from a registered trademark (19 CFR 133.23a).

Infringement of federally registered marks is governed by the test of whether defendant's use of a similar mark is likely to cause confusion, or to cause mistake, or to deceive. When comparing conflicting marks to determine whether or not they are confusingly similar, it is important to consider the impression the marks as a whole create on the average reasonably prudent purchaser.

Upon comparison of the suspected infringing mark with the Vuitton trademark, we note that the two marks are strikingly similar in appearance. The only differences noted are the absence of the letter "L" superimposed over the letter "V" (or the inverted "V") and minor differences in the shape of some of the figures that make up the fleur-de-lis pattern. We are of the opinion that the ordinary purchaser at retail is likely to be confused by the similarities in the mark that appears on the imported articles and the protected "DESIGN" trademark of Louis Vuitton. However, we are of the opinion that the differences noted above preclude a finding of a "counterfeit" trademark violation, noting the strict manner in which the term "counterfeit" is defined in the law and regulations.

The Vuitton "DESIGN" trademark has been in continuous use since 1905. Consequently, this highly distinctive trademark is strongly associated with the Vuitton business and its reputation for quality products. It appears to us that the importer of the handbags and luggage bearing the suspected infringing mark in question is a latecomer in the industry. In these situations, any doubts regarding the likelihood of confusion should be resolved in favor of the prior user of the mark. The theory behind this is that the newcomer's field of selection of a mark is not so limited as to require the adoption of a mark likely to cause confusion.

In this regard, we note the decision of the Court of Appeals, Ninth Circuit, in the case of Vuitton et Fils S.A. v. J. Young Enterprises, Inc. 212 USPQ 85 (1981), quoted in part below:

> "Vuitton, of course, cannot have a monopoly in producing luggage which has an aesthetically pleasing design or color, but it has created one specific pleasing design, which has been registered as its trademark and which is

A7

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

729427

uniquely associated with its line of goods. If it appears that the trademark has secured a secondary meaning in the market place due to its long use and favorable acceptance, Vuitton should be protected in the use of that mark. On the record it appears that Young, as the imitator, is appropriating Vuitton's reputation in the marketplace for Young's own purpose and gain. Nothing prevents Young from constructing or manufacturing its own similar line of luggage with its own unique trademark, and marketing that line without confusing the public about the origin and manufacturer of the goods."

729427

HOLDING:

Entry into the United States of handbags and luggage (described above) bearing marks which are confusingly similar to the registered "DESIGN" trademark of Louis Vuitton is prohibited. Articles detained or seized may be released to the importer if any of the circumstances set forth in sections 133.21(c) or 133.51(b) of the Customs Regulations (19 CFR 133.21(c), 133.51(b)) are applicable.

Jack D. Mlawski, Esq.
Barnes, Richardson and Colburn
475 Park Avenue South
New York, New York 10016

Dear Mr. Mlawski:

This is in response to your letter of March 6, 1986, on behalf of Trinity Paper & Plastics Corporation, requesting a binding ruling on the country of origin marking requirements applicable to certain disposable plastic bags, to be imported in bulk from Brazil and/or Taiwan. The bags will be sold in marked containers to grocery stores, drug stores and other retail outlets for use in packaging items at the check out counters. You referred to our telephone conversation of February 11, 1986, and asked for confirmation of our informal opinion, that C.S.D. 79-380 would apply under the above facts.

C.S.D. 79-380 concerns the country of orign marking requirements applicable to polyethylene bags and their containers made in Mexico. The importers of those bags intended to use them for packaging their products for sale. We are of the opinion that 19 CFR 134.24(c)(1), the regulation cited in C.S.D. 79-380, quoted below, also applies where there is an intervening sale by the importer of the bags to third parties (the food and drug store chains) who will use the disposable bags to package goods sold at retail. In this situation, the retail outlets are considered to be the "ultimate purchasers" for purposes of meeting the requirements of 19 U.S.C. 1304(a)(3)(D).

> "(c) Imported to be filled- (1) If unmarked. When disposable containers and holders are imported by firms who will fill or package them with various products which they sell, these persons of firms are the "ultimate purchasers" of these containers or holders and they may be excepted from individual marking pursuant to 19 U.S.C. 1304(a)(3)(D). The outside wrappings or packages containing the containers shall be clearly marked to indicate the country of origin."

Sincerely,

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

DEPARTMENT OF THE TREASURY

U.S. CUSTOMS SERVICE

WASHINGTON

MAY 23 1986

REFER TO
MAR-2-05 CO:R:E:E
729434 SO

William F. Joffroy, Jr., President
William F. Joffroy, Inc.
Post Office Box 698
Nogales, Arizona 85628-0698

Dear Mr. Joffroy:

This is in response to your letter of March 13, 1986, on behalf of Graphic Creations, Inc. of Tucson, Arizona, concerning the country of origin marking requirements applicable to glass ornaments and glass articles which your client intends to import from Mexico. The ornaments and articles in question will be imported in semi-finished condition for further processing at the Graphic Creations plant in Tucson. Article No. 1 is a "Hummingbird," No. 2 is a "Bluebird on Oval Back," No. 3 is a "Cardinal on Frosted Base," and No. 4 is a "Jewel Box With Flower." Samples were submitted. When imported, the individual articles will not be marked.

19 U.S.C. 1304 provides, in general, that all articles of foreign origin imported into the United States must be legibly and conspicuously marked to indicate the English name of the country of origin to an ultimate purchaser in the United States. Section 134.35 of the Customs Regulations (19 CFR 134.35) provides that articles used in the United States in manufacture which results in articles having a name, character, or use differing from that of the imported articles, will be within the principle of the decision in the case of United States v. Gibson-Thomsen Co., Inc., 27 C.C.P.A. 267 (C.A.D. 98). Under this principle, the manufacturer in the United States who converts or combines the imported article into a different article will be considered to the the "ultimate purchaser" for purposes of meeting the general requirement of 19 U.S.C. 1304(a) that all articles of foreign origin must be legibly and conspicuously marked to indicate the country of origin to an ultimate purchaser in the United States. The imported articles would be exempted from marking in this situation. However, the outermost containers of the imported articles shall be marked with the country of origin.

You are claiming that the marking exception set forth in Section 134.35 of the Customs Regulations (19 CFR 134.35) for articles used in the United States in manufacture which results in articles having a name, character, or use differing from

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

A10

that of the imported article, applies to article No. 4. Your letter outlines the additional processing which the semifinished jewel box (Article No. 4) undergoes in the United States. These operations are: (1) cut mirror bottom, (2) print mirror, (3) lead mirror, (4) attach the sides to the bottom, (5) cut a 4" octogon lid from clear glass, (6) sandblast a 1/4" border around the lid, (7) lead the lid, (8) add a hinge and two lead stops to the lid, (9) attach flower to lid, (10) plate box, (11) plate lid, and (12) attach lid to box.

We are of the opinion that the additional processing of Article No. 4 referred to above, to be performed by Graphic Creations, Inc., in the United States, amounts to a substantial transformation of the imported article by a process of manufacture which results in articles having a name, character and use differing from that of the imported articles. Accordingly, article No. 4 may be excepted from individual marking pursuant to 19 CFR 134.1(d) and 134.35, so long as the containers in which they are imported are legibly and conspicuously marked to indicate the country of origin, and Customs officers at the port of entry are satisfied that the articles will be used only in the manufacture of finished jewel boxes and not otherwise sold. There would be no need to mark "Made in Mexico" or "Product of Mexico" on the retail boxes for the jewel boxes.

You are not claiming the marking exception set forth in Section 134.35 for articles No. 1, 2, & 3. These articles are all cleaned and chrome plated in the United States. Hooks or suction cups are added. The articles would have to undergo more substantial processing to qualify for the Section 134.35 exemption. However, you are claiming the exceptions in Section 134.32(d) & (g) of the Customs Regulations (19 CFR 134.32(d)(g)) for the articles. These exceptions are granted in cases where the marking of the container will reasonably indicate the origin of an article and where the mark would necessarily be obliterated, destroyed or permanently concealed in the processing.

You stated that the cartons in which the unfinished articles will arrive in the United States will be marked "Assembled in Mexico." You also plan to use the mark "Assembled in Mexico" in letters of comparable size and in close proximity to the Tuscon, Arizona, address of your client, on the retail boxes in which the finished articles will be packed for distribution. Without further information concerning the source of the component parts of each article, we cannot approve the marking "Assembled in Mexico" for use on either package. We note that Section 134.46 of the Customs Regulations (19 CFR 134.46) provides that in cases where the name of any city or locality in the U.S. other than the locality in which the article was manufactured or produced appears on an imported article or its container, there shall appear, legibly and permanently, in close proximity to such name, and in at least a comparable size, the name of the country of origin preceded by "Made in," "Product of," or other words of similar meaning.

729434

A11

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

We are also of the opinion that the marking exception in 19 U.S.C. 1304(a)(3)(G) and 19 CFR 134.32(g) would be applicable to articles No. 1, 2, and 3, because any mark placed on them prior to importation would be obliterated or destroyed in the finishing operations to be performed by Graphic Creations, Inc., in the U.S. The retail packages for the finished articles shall be marked to indicate Mexico as the country of origin.

Accordingly, all four glass articles may be excepted from individual marking pursuant to 19 U.S.C. 1304(a)(3)(D), and 19 CFR 134.32(d) if the outermost containers in which they are imported are legibly an conspicuously marked to indicate the country of origin and Customs officers at the port of entry are satisfied that they will reach the ultimate purchasers in the United States (Graphic Creations, Inc., for article No. 4, and the retail purchasers for articles No. 1, 2, and 3) in packages which are marked with the country of origin in the manner described above. Your client should be prepared to furnish statements or affidavits to this effect for each entry of articles for which exceptions to individual country of origin marking are requested.

Sincerely,

Steven I. Pinter
Chief, Entry, Licensing and
Restricted Merchandise Branch

DEPARTMENT OF THE TREASURY

U.S. CUSTOMS SERVICE

WASHINGTON

MAY 27 1986

REFER TO

MAR-3 CO:R:E:E
729451 LR

James S. O'Kelly, Esq.
Barnes, Richardson & Colburn
475 Park Avenue South
New York. N.Y. 10016

Dear Mr. O'Kelly:

This is in response to your letter dated March 26, 1986, on behalf of one of your clients, requesting a ruling on the country-of-origin marking requirements of imported temples and fronts for use in the manufacture of prescription eyewear. A sample temple and front along with a finished pair of eyeglasses produced by your client was submitted.

You indicate that your client imports temples and fronts made in the Republic of South Korea directly from the manufacturer in bulk containers. Following importation, your client ships the temples and fronts to one of their prescription laboratories for use in the production of complete eyewear systems. According to your submission, the frame parts account for approximately 19 percent of the total cost to produce the prescription eyewear and that by far, the more exacting and costly steps are associated with the production, inspection, cleaning and control of the prescription lens. You believe that the imported temples and fronts are exempt from individual marking under section 304(a)(3)(H) of the Tariff Act of 1930, as amended, because they are substantially transformed by your client after importation, and become an integral part of a different article of commerce, namely, prescription eyewear.

Section 304 of the Tariff Act of 1930, as amended, generally requires that all foreign articles imported into the United States be marked to indicate the country of origin to the ultimate purchaser. Section 304(a)(3)(H) provides that articles may be excepted from individual marking requirements if an ultimate purchaser, by reason of the character of such article or by reason of the circumstances of its importation, must necessarily know the country of origin of such article even though it is not marked to indicate its origin. Such an exception would be applicable in this case only if your client, and not the consumer, is the ultimate purchaser of the frames.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

A13

Customs has consistently required that imported frames be individually marked with the country of origin where both components (fronts and temples) are imported in a finished condition for assembly in the United States into finished frames; the rationale being that the assembly of the finished frame components does not substantially them into a new and different article of commerce. In such circumstances, the consumer, and not the importer/assembler, is the ultimate purchaser. See Ruling Nos. 728504 and 709266. (That prescription lenses would be made for these frames after importation appears to be implicit in these decisions).

In previous rulings in which Customs held that imported frames were exempt from individual marking, the frames themselves were subject to further processing in the United States before sale to the consumer. (For example, in C.S.D. 80-43, one of rulings you cite, the imported frames were subject to an elaborate dyeing process. In Ruling No. 709551, the imported frames were, among other things, plated to make them resistant to tarnishing). Frames are also exempt from individual marking where a foreign frame component (temple or front) is combined after importation with the other frame component (temple or front) of domestic origin. See 728504. In such circumstances the imported frame component is substantially transformed after importation into an integral component of the finished frame.

In this case, we are of the opinion that the consumer, and not your client, is the ultimate purchaser of the frames. First, both the fronts and temples are imported in a finished condition for assembly in the United States. As indicated above, the assembly of the finished foreign frame components in the United States does not substantially transform them into a new and different article of commerce; nor does the addition of the prescription lens. We believe that the consumer purchasing prescription eyeglasses is in effect purchasing two separate items, the frames and the prescription lens. The consumer generally makes a decision to purchase a particular frame from a display counter after trying it on for fit and styling. Only after the initial decision is made on the frame is it sent to the lab for the addition of the prescription lens. The decision to purchase a particular frame is made separate and apart from the processing involved in the addition of the prescription lens. In view of these circumstances, we find that the consumer is the ultimate purchaser of the frames and is entitled to be informed of its country of origin.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

728451

A14

In accordance with the above considerations, we find that the imported temples and fronts must be individually marked with their country of origin. If the temples and fronts are produced in the same country and are imported together for assembly into a complete frame, we will permit the marking "Frame (country of origin)" on only one of the components.

Sincerely,

Steven I. Pinter

EFFECTIVE DATE: APR 25

EXPIRES: INDEFINITE

SUBJECT: "TEN DOLLAR DEFENSE"

REFERENCES: Telex dated March 14, 1986, signed by Donald Lewis, Director, Entry Procedures and Penalties Division

1. PURPOSE

To reiterate and clarify procedures for handling suspected infringing goods where a copyright certificate of registration for those goods is issued and presented after they have been seized or detained.

2. INFORMATION

Goods believed to be, or suspected of, infringing recorded copyrights have been released upon the importer's presentation of a copyright certificate of registration issued by the U.S. Copyright Office after their seizure (133.42, C.R.) or detention (133.43). This action has sometimes been referred to as the "TEN DOLLAR DEFENSE."

To prevent the circumvention of the copyright laws and the Customs regulations, Customs will not consider a certificate of registration of a claim to copyright to constitute irrefutable prima facie evidence of a copyright validity, when suspicious facts and circumstances indicate piratical copying or a suspicion of piratical copying.

3. ACTION

Customs will not automatically release suspected infringing goods upon presentation of a certificate of copyright registration issued after detention or seizure. Rather, when the goods are clearly piratical or clearly suspect, the procedures provided in section 133.42 or 133.43, as appropriate, will be followed.

Mr. Jim Scully
Haggar Apparel Company
6113 Lemmon Avenue
Dallas, Texas 75209

Dear Mr. Scully:

This is in response to your letter of April 15, 1986. You have submitted samples of suit jackets and slacks from Haggar and from one of Haggar's competitors, and have asked whether both companies have complied with country of origin marking requirements. Specifically, you have asked whether the labels which appear on each of the articles meet the requirement of 19 U.S.C. 1304 that they be marked in a conspicuous place.

The Haggar garments consist of a pair of blue seersucker slacks and a brown tweed suit jacket. The slacks bear a white label made from natural or synthetic film which is sewn upon the garment and contain the words "Assembled in Mexico of USA Components" in black print approximately 1/12 of an inch in height. These words are located at the bottom of the label about 1/3 of an inch beneath the fabric content. The label is located approximately 1 inch to the left of the Haggar brand label on the rear portion of the waistband.

The Haggar suit jacket bears a fabric label with the words, "Made in Brazil," sewn on the inside center of the neck midway between the shoulder seams. The lettering is in yellow upon a black background and is approximately 1/4 of an inch in height. Another fabric label is sewn over the inside right breast pocket directly beneath the brand label. This marking appears in yellow lettering approximately 1/10 of an inch in size and is directly beneath larger sized lettering regarding the fabric content.

The competitor's garments consist of a pair of grey slacks and a grey jacket. The slacks bear a natural or synthetic fiber label which reads "Assembled in Mexico of Components Made in U.S.A." in black lettering approximately 1/16 of an inch in size. The marking appears along side of, and in the same size as, the lettering regarding fiber content of the garment. The label is located on the inside seam of the lining on the left pocket, approximately 1 inch below the inside waistband.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B3

The competitor's suit jacket bears a label with lettering similar in content, size and location as that on the slacks. The label is sewn onto the inside center of the neck midway between the shoulder seams. However, this label is located behind and beneath the brand label. The marking label extends down vertically from the neck whereas the brand label is positioned horizontally across the neck so that only about half of the marking label is visible. The rest of the marking label is obscured by the brand label. Another brand label appears on the inside right breast pocket. However, no other country of origin marking label is present on the jacket.

Section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), requires that every article of foreign origin (or its container) imported into the United States shall be marked in a conspicuous place as legibly, indelibly, and permanently as the nature of the article (or container) will permit, in such a manner as to indicate to the ultimate purchaser the English name of the country of origin of the article. See 19 CFR 134.11. The marking must be conspicuous enough so that the ultimate purchaser will be able to find the marking easily and read it without strain. (19 CFR 134.41). The marking must not be covered or obscured and must be visible without disassembling, removing, or changing any parts.

Customs has provided specific marking requirements with respect to certain garments. We have held that shirts, blouses, and sweaters must be marked by means of a fabric label or label made from natural or synthetic film sewn or otherwise permanently affixed on the inside center of the neck midway between the shoulder seams or in that immediate area. (T.D. 54640 (6)). Customs has also allowed this label to be located on coats and suits over or below the inside breast pocket in close proximity to the brand name label, (ORR Ruling 638-69), or on the inner facing of the coat near the fastening devices and brand name label. (L.D. 79-0470).

Customs has also ruled that marking of trouser, jeans and slacks should be made by means of a permanent label affixed in a conspicuous location on the garments, such as the inside of the waistband, and that paper labels sewn or otherwise attached to the garments would not be acceptable. (T.D. 71-264(3)).

We are of the opinion that neither the competitor's slacks nor its suit jackets meet the country of origin marking requirements. The label on the slacks does not comply with Customs

729494

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B4

requirements that it be located on the waistband or other conspicuous place. The label appears inches beneath the waistband and far removed from the waistband's center seam and the brand name label. The lettering is miniscule by comparison with the competitor's brand name label, and the country of origin is lost in other wording regarding the material content and lot number contained thereon. The suit jacket also fails to meet the requirement that marking be conspicuous to the ultimate purchaser. Although the label appears on the inside neck portion of the garment, the country of origin marking is entirely obscured by the brand name label which sits directly in front and on top of it. This label would not be visible to the ultimate purchaser without lifting the brand name label or otherwise removing it. In each case, the marking of the slacks and the jacket would not readily be seen by the ultimate purchaser upon casual inspection at the time of sale.

It appears that both the Haggar slacks and suit jacket, however, do meet Customs marking requirements. The label on the slacks appears on the upper portion of the waistband in close proximity to the brand name label. On the jacket, the country of origin marking label appears in two locations, upon the inside center neck portion and upon the inside pocket directly beneath the brand name label, in large yellow lettering. In both cases, the marking is conspicuously placed so that it would be read easily by the ultimate purchaser without strain.

This Office does not issue decisions or rulings interpreting FTC guidelines. Therefore, we cannot address the question of whether the submitted samples meet the requirements and guidelines under the FTC. It appears, however, that the FTC requirements generally comport with those of Customs regarding placement of labels on jackets and with the general requirement of conspicuousness. For more specific information, we suggest that you call or write to the Federal Trade Commission directly.

Sincerely,

Steven I. Pinter

WASHINGTON

COUNTRY OF ORIGIN MARKING RULING
(SUBSTANTIAL TRANSFORMATION)

DATE: MAY - 1 1986

REFER TO
CONTROL NUMBER: 729499

YOUR REF: Letter 4/14/1986

TO: Richard H. Young
Metek Tool
212 Andover Road
Billerica, Mass 01821

IMPORTED ARTICLE: Outer housing or shell for adjustable socket (Metek Grip Socket). The article is a specially designed "adjustable" steel socket shell fitting a standard drive ratchet.

FURTHER MANUFACTURING OR PROCESSING PERFORMED IN THE UNITED STATES:

After importation the shell is combined with six grooved steel pins which are held in place by a plastic retainer ring. The pins are loosely held and are free to tilt and roll so they can fit any shaped nut to which the socket is applied. If the pins are worn or damaged, they can be easily replaced using a needle nose plier. The most significant component of the finished tool is the imported shell. The assembly operation is simple.

APPLICABLE LAW AND CUSTOMS INTERPRETATION: Section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), generally requires that every article of foreign origin or its container be marked legibly, permanently, and conspicuously to indicate the name of the country of origin to an ultimate purchaser in the United States. If an imported article will be used in manufacture in the United States, the U.S. manufacturer may be the "ultimate purchaser" if he subjects the imported article to a process which results in a substantial transformation of the article. In such case, the imported article is exempt from marking. A substantial transformation occurs when the further manufacturing transforms the imported article into an article having a name, character, or use different from the imported article. If, however, the manufacturing process is merely a minor one which leaves the identity of the imported article intact, there is no substantial transformation and the imported article is not exempt from country of origin marking. See U.S. v. Gibson-Thomsen Co.,Inc., 27 C.C.P.A. 267, C.A.D. 98 (1940); Sections 134.1(d) and 134.35, Customs Regulations. Although each case must be decided on its own facts, the following examples are illustrative of Customs interpretation: No substantial transformation found where further processing in the United States included: combination without further manufacture of imported ax handles with ax heads of U.S. origin; encoding of admission information on the magnetic strip of imported printed admission tickets; attachment of porcelain socket and base to zinc lampholder casting; attachment of handle to screwdriver blade-ratchet assembly; purification and heating of imported raw honey and blending with domestic honey to produce processed honey; and, silk-screening applied to imported shirts. In each case, Customs determined that the further processing did not result in an article with a new name character, or use. Substantial transformation was found where further processing included: grinding and polishing of unfinished forgings to produce scissors; tooling and threading operations performed on imported nut blanks to produce free spinning, vibration resistant locknut; canning process involving processing for preservation and consumption; and, cutting, sewing, and finishing of piece goods to make finished goods. In each case, Customs determined that the further processing resulted in an article with a new name, character, or use.

DETERMINATION:

X No Substantial Transformation: The process(es) described above do not result in a substantial transformation of the imported article. Therefore, the imported article must be legibly, permanently and conspicuously marked to indicate its foreign country of origin.

____ Substantial Transformation: The process(es) described above results in a substantial transformation of the imported article. Therefore, the imported article is exempt from individual marking provided the container in which it is imported is legibly and conspicuously marked with the country of origin, and Customs officers at the port of entry are satisfied that the article will reach the ultimate purchaser (processor) in the original marked containers unopened, and that the article will be manufactured as described above and not otherwise sold.

Mr. Rolando A. Perez
Vice President
Gator Industries, Inc.
1000 South East 8th Street
Hialeah, Florida 33010

Dear Mr Perez:

This is in response to your letter dated February 12, 1986, regarding country of origin marking requirements for imported unlasted plastic footwear uppers. Your letter has been forwarded by the Chief of the Commercial Operations Branch at the New York Seaport to our office for a ruling. Specifically, you are concerned that the presence of a design of an American flag on the items may be in violation of section 304 of the Tariff Act of 1930, as amended (19 CFR 1304).

Samples of the items have been forwarded to us for examination. The items have no lower portion and are completely exposed at the bottom. The word "Fitness" appears in colored print of red or blue alongside a design of a U.S flag on both sides of the instep portion.

In the United States, the items will be affixed with an injection molded rubber/plastic sole to form a completed athletic shoe.

It is our opinion that the imported unlasted plastic footwear uppers would not be required to be marked with the country of origin. The items have no separate function or identity apart from the completed athletic sport shoe. The shoe uppers cannot be utilized without the addition of the shoe sole. During U.S. processing, the items undergo a transformation which is so substantial that the imported items lose their identity and become part of a new and different product, a shoe.

Therefore, the imported items are exempt from the individual marking requirements of section 1304 (19 U.S.C. 1304) provided the container in which it is imported is legibly and conspicuously marked with the country of origin, and Customs officers at

Mr. James A. Williamson, Jr.
Executive Vice President
Jaw Manufacturing Co.
P.O. Box 213
Reading, Pennsylvania 19603

Dear Mr. Williamson:

This is in response to your letter dated April 25, 1986, regarding the application of country of origin marking requirements to three hand tools imported as component parts and/or in their partially finished forms.

ISSUE:

Whether components for impact drivers and partially finished screw extractor bodies and ball-joint or tie rod separator forgings, imported from Japan and further processed in the United States, may be excepted from the country of origin marking requirements of 19 U.S.C. 1304. The finished products must be marked unless the domestic processing described herein substantially changes the foreign products.

FACTS:

Jaw Manufacturing Company imports from Japan partially finished parts for three types of hand tools: impact drivers, screw extractors, and ball-joint or tie rod separators. The importer has stated that the domestic processing, described below, represents approximately 50 percent of the cost of each item.

Impact Drivers

1. The Imported Items

The imported items consist of the impact driver outer body, the inner body, and the bit holder. The outer body is a hollow metal cylinder approximately 4 and 1/2 inches in length and 1 inch in diameter. The inner body is a smaller metal cylinder about 2 inches in length and 3/4 inch in diameter, the outer wall of which is cut in a V-shape. A square shaped nodule is present

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

at one end. The bit holder is yet a smaller metal cylinder which is square shaped at one end and pentagon shaped at the other. The items are imported in their machined and polished forms.

2. The Domestic Process

In the U.S., the outer body and bit holder are marked with safety instructions and identifying logos or numbers, heat treated, blackened, and/or plated for rust and stress resistance. The inner body is greased and the outer body is reamed, if necessary, so that the inner body can fit securely inside.

The imported parts are then assembled with other U.S. made parts in the following manner: a U.S. made inner spring and the imported inner body are placed inside the imported outer body. A U.S. made holding pin is inserted inside the outer body to hold the inner spring and inner body in place. The V-cut of the inner body is checked for specification compliance. A retainer ring, made in the U.S., is affixed to the outside of the outer body and then a U.S. made retainer spring is inserted inside the bit holder. This unit is then attached to the squared end of the inner body. Finally, the completed impact driver is placed in a plastic pouch for sale.

729516

Screw Extractor

1. The Imported Items

The imported items are screw extractor bodies which are machined on one end. The items are made of metal and range in size to fit drill sizes of 1/8 of an inch to 3/8 of an inch.

2. The Domestic Process

In the U.S., the imported items are stamped with identifying names, part numbers, and/or a safety warning. The items are heat treated and blackened or plated. Finally, the items are tested for size, buffed, and placed in a plastic pouch for sale. No further domestic processing takes place.

Ball Joint or Tie Rod Separator

1. The Imported Items

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B10

The imported items are metal forgings for two types of knurled separators, tie rod separators and ball joint separators. The tie rod separator forgings measure approximately 3/4 of an inch between the forks and 3/4 of an inch in diameter at the handle. Its total length is approximately 13 inches. The ball joint separator forgings are slightly shorter in total length, and have a 15/16 inch opening between the forks and a larger diameter (1 inch) handle.

2. The Domestic Process

In the U.S., the fork tines are ground and polished, stamped with safety warning and identifying marks, heat treated, and zinc plated. The finished separators are then packaged for sale. No further domestic processing takes place.

LAW AND ANALYSIS:

Section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), provides that all articles of foreign origin, or their containers imported into the U.S. shall be marked in a conspicuous place with the English name of their country of origin to indicate to an ultimate purchaser in the U.S. the country of origin of the article. Section 134.1(d) of the Customs Regulations describes the "ultimate purchaser" as generally "the last person in the United States who will receive the article in the form in which it was imported." Examples of the "ultimate purchaser" are provided. (19 CFR 134.1(d)). "If an imported article will be used in manufacture, the manufacturer may be the 'ultimate purchaser' if he subjects the imported article to a process which results in a substantial transformation of the article..." (19 CFR 134.1(d)(1)). A "substantial transformation" is said to occur when, as a result of the process performed on an item, it is changed into a new and different article of commerce with a new name, character, or use. If, however, the domestic processing involves only minor adjustments on virtually completed items, substantial transformation is not deemed to take place.

HOLDING:

It is our opinion that the imported items are not substantially transformed by the further processing in the United States. The final identity and character of the finished tools are established by the manufacturing operations performed in Japan. Although the further processing in the United States is

729516

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B11

essential to finishing the imported items, the processing results in neither a loss of identity nor a new and different product having a new name, character or use.

Accordingly, the imported impact driver parts, screw extractor bodies and knurled separator forgings must be individually marked with the country of origin.

Sincerely,

Steven I. Pinter
Chief, Entry, Licensing and
Restricted Merchandise Branch

DEPARTMENT OF THE TREASURY

U.S. CUSTOMS SERVICE

WASHINGTON

MAY 28 1986

REFER TO

MAR 2-05 CO:R:E:E
729518 km

Area Director of Customs
New York Seaport
6 World Trade Center
New York, New York 10048

Dear Sir:

This is in response to a request dated April 21, 1986, from the Chief, Commercial Operation Branch 3, for a ruling concerning the special marking requirements applicable to imported "antique" clocks that are 35 to 85 years old.

Headnote 4, Part 2E, Schedule 7, TSUS provides special marking requirements for the dials, movements and cases of watches, clocks and timing apparatus. Customs' position regarding country of origin marking requirements for timing apparatus has been to apply the special marking provisions of Schedule 7, notwithstanding the marking exception for articles produced more than 20 years prior to their importation into the U.S. found in Section 304(a)(3)(I) of the Tariff Act of 1930, as amended (19 U.S.C. 1304). The statutory special marking provisions have been determined to be mandatory and cannot be waived. (See Legal Determination 3541-03, 707243 JB, reiterated in 707074 JB). However, deviation from the plain meaning of statutory provisions may be justified under certain circumstances. Such an instance arises where fidelity to a statute's literal terms will produce an absurd result.

The application of the special marking requirements of the Tariff Schedules to old or "antique" watches, clocks and other timing apparatus, would produce an absurd result. The special watch and clock provisions, enacted in 1909, were intended to protect U.S. made watches and clocks from competing foreign made items suspected of unfair trade practices such as mislabeling of the country of origin, mislabeling of the manufacturer, and misrepresenting the number of jewels in the watch movements. The domestic watch and clock manufacturers, for whose benefit the provisions were enacted and the trade problems against which they were to be protected, are no longer in

B13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

existence to the same level and degree today. Moreover, antique or old timing apparatus were clearly not the "competing" foreign made items contemplated in the statute when it was enacted and are even less so today. It is reasonable to assume that the umbrella of protection was intended for newly manufactured watches and clocks, and was not meant to encompass old or antique watches and clocks.

The special marking required under the Tariff Schedules would cause injury and a decrease in value to the items. Furthermore, much of the information required in these complicated marking provisions, such as the name of the manufacturer or purchaser of the watch, clock cases and movements may be difficult, in fact impossible, to locate.

It is our opinion that the application of the special marking provisions of Headnote 4, Part 2E, Schedule 7 to imported clocks which are 35 to 85 years old would not be a reasonable exercise of administrative enforcement of those provisions. Please note that a bill has been introduced in the U.S. Senate to repeal Headnote 4, Part 2E, Schedule 7, TSUS. A copy of this bill, S. 854, is attached for your perusal.

Accordingly, original examples of complete watches, clocks, and timing apparatus whose manufacture has long been discontinued and whose primary commercial value is derived from being regarded as antiques or as items with similar intrinsic value and not primarily bought and sold as utilitarian timepieces, may be excepted from the special marking requirements provided in Schedule 7.

Sincerely,

Steven I. Pinter
Chief, Entry, Licensing and
Restricted Merchandise Branch

MAR-3 CO:R:E:E
729523 LR

Lauren R. Howard, Esq.
Collier, Shannon, Rill & Scott
1055 Thomas Jefferson Street, NW.
Washington, D.C. 20007

Dear Ms. Howard:

This is in response to your letter dated April 2, 1986, on behalf of the National Juice Products Association, which raises an issue relating to compliance with C.S.D. 85-47. Specifically, you ask the Customs Service to authorize processors to mark their retail products to indicate that they "may contain concentrate from Florida and/or Brazil" as opposed to stating more categorically that the product "contains a blend of Florida and Brazilian concentrate". You request that this variation be permitted in addition to the above categorical statement which we have already approved. See Ruling No. 729410, March 19, 1986. Alternatively, you ask that Customs permit the statement: "contains Florida concentrate and may contain concentrate imported from Brazil".

In your opinion the approved statement "contains a blend of Florida and Brazilian concentrate" might pose a problem if a processor had only Florida concentrate available to it for an extended (although finite) period of time; the processor might be charged with misbranding under the Food, Drug & Cosmetic Act if it used this existing packaging, which on its face suggests the presence of both Florida and Brazilian concentrates. You indicate that the only apparent alternatives for the processor would be to ensure that at least a miniscule amount of Brazilian concentrate were added to each retail product or to maintain duplicate labeling inventories.

Although the purpose of our March 19, 1986, ruling permitting alternative markings was to facilitate compliance with C.S.D. 85-47, it was not our purpose to ensure that in every case juice processors would be able to utilize one standardized label. In some instances, such as the situation you raise, this simply may not be possible. In considering alternative marking proposals, Customs must weigh the extent of the deviation from the statutory requirements, the degree of accuracy that is sacrificed as a result of the deviation, and the extent to which the deviation will facilitate compliance with the marking statute. For example, Customs approved the "major supplier rule" (allowing processors to list only their major suppliers of

cl

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

foreign manufacturing concentrate) because such method of marking has the overwhelming advantage of eliminating the need for the processors to have numerous labels on hand to be used when there are slight changes in their sources of supply. Customs recognized that such an advantage outweighed the certain degree of accuracy that would necessarily have to be sacrificed by listing only the processor's major sources of supply. In addition, the marking of the major foreign sources of the imported product did not, in our opinion, deviate too far from the statutory requirement of informing the ultimate purchaser of the country of origin.

In our opinion, the "may contain" language you suggest is too far a deviation from the statutory requirement of section 304 of the Tariff Act of 1930, as amended, to inform the ultimate purchaser of the country of origin. While the "may contain" statement is technically more accurate than the categorical statement, it does not actually inform the ultimate purchaser of the country of origin; it merely indicates the possibility that a product may be of foreign origin. We believe that approval of the "may contain" language would render the country-of-origin marking nugatory. If processors are concerned that they might be subject to penalties for misbranding if they used a standardized label indicating the presence of foreign concentrate for retail orange juice products which might in fact contain only domestic-origin concentrate, then they should maintain duplicate labels. Those processors that are ever in a position to use solely domestic concentrate will probably do this anyway.

Finally, we would like to clarify a misunderstanding regarding our approval of the marking "contains a blend of Florida and Brazilian concentrate". In our March 19 ruling we stated that we have no objection to showing that the orange juice is a blend of domestic and imported concentrate, if that in fact is the case. You indicate that this formulation would appear available to processors using any amount of domestic concentrate, just as the marking requirement is, in accordance with C.S.D. 85-47, applicable to retail orange juice products containing any amount of imported manufacturing concentrate. We would agree with your conclusion only in situations where the processor chooses to list all foreign sources of concentrate (and not just his major foreign sources). However, if a processor chooses to

729523

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

c2

to adopt the "major supplier" rule and lists only his major foreign sources, it is our position that the Florida content may be indicated only if Florida is similarly a major supplier of concentrate to that processor.

Sincerely,

Donald W. Lewis
Director, Entry Procedures
and Penalties Division

U.S. CUSTOMS SERVICE

WASHINGTON, D.C. 20229

MAY 13 1986

REFER TO
ENT-1 CO:R:E:E
729532 JL

Mr. Rick Endresen
Vice President
Exports Inc.
5930 Sixth Avenue South
Seattle, Washington 98108

Dear Mr. Endresen:

This refers to your letter of February 13, 1986, concerning the withdrawal of liquor for use by fishing vessels under Section 10.59, Customs Regulations.

You ask if liquor withdrawn duty-free for use by eligible United States fishing vessels may be given away as gifts to foreign processing vessels which are located outside the 3-mile limit. You note that foreign flag processing vessels are not allowed into the territory of the United States and this serves as a guarantee that the alcoholic beverages will be consumed outside the country.

Legal Determination No. 80-0198, case No. 712953/713478 dated September 15, 1980, held that it was permissable for a supply vessel to withdraw duty-free vessel supplies for use by foreign flag fishing vessels located on the high seas, provided that the vessels on the high seas were engaged in a proper class of trade, that is, they would be eligible to withdraw the vessel supplies free of duty under 19 U.S.C. 1309 in their own right. The ruling also directed that it was necessary that the District Director of Customs be informed for which vessel the supplies were being withdrawn at the time of withdrawal. This is necessary for Customs to determine that the vessels on the high seas are entitled under 19 U.S.C. 1309 to receive the supplies.

Accordingly, it is our opinion that the withdrawal of duty-free liquor by a qualified U.S. fishing vessel for presentation to foreign flag processing vessels on the high seas is permissable provided the recipient vessels are qualified under 19 U.S.C. 1309.

Sincerely,

Steven I. Pinter

DEPARTMENT OF THE TREASURY

U.S. CUSTOMS SERVICE

WASHINGTON

MAY 22 1986

REFER TO
CPR-3 CO:R:E:E
729541 SO

This ruling concerns whether or not a sample "Sunshine Girls" doll is an infringing importation pursuant to Sec. 602 of the Copyright Revision Act of 1976 (17 U.S.C. 602).

ISSUE:

Would the importation of "Sunshine Girls" dolls, manufactured in China, infringe the copyright registration of Hallmark Cards, Inc., (NO. VA 173-401 of December 5, 1984) for "RAINBOW BRITE DOLL." This copyright has been recorded with the Customs Service for import protection.

FACTS:

The U.S. Customs Service District Office detained a shipment of "Sunshine Girls" dolls on suspicion of piratical copying pursuant to Section 133.43 of the Customs Regulations (19 CFR 133.43). The importer denied copying. Mattel, Inc., the exclusive U.S. licensee of the copyright owner, posted the bond required by Section 133.43 along with a legal brief on the infringement question, and the entire file was sent to Customs Headquarters for a decision as to whether the imported doll infringes the copyright protected "RAINBOW BRITE DOLL."

The RAINBOW BRITE product line has been extensively advertised and promoted (over $34 million in advertising) for the past 2 years. The "Sunshine Girls" doll appeared on the marketplace recently. Each doll is wearing a brightly colored dress with a short skirt and short sleeves. Although both dolls use intense colors in their dress, their costumes are different. The hair of both dolls is constructed of brightly colored yarn (yellow and orange), and is tied with a brightly colored ribbon. Both heads are essentially of the same size, width and height. Both faces are rounded with pouchy cheeks, wide open eyes, high narrow eyebrows, button noses, protruding ears, and small lips cracking a slight smile.

LAW AND ANALYSIS:

The basic test for determining whether there has been an infringement of a copyright is whether substantial similarity exists between two works. The appropriate test for determining whether substantial similarity is present is whether an average

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

cb

lay observer would recognize the alleged copy as having been appropriated from the copyrighted work, Ideal Toy Corp. v. Fab-Lu Ltd., 360 F.2d 1022 (1966). Another statement of the test is whether an ordinary observer who is not attempting to discover disparities between two articles would be disposed to overlook them and regard their aesthetic appeal as the same, Peter Pan Fabrics, Inc. v. Martin Weiner Corp., 274 F.2d 487 (1960). The substantial similarity test was developed in order to bar a potential infringer from producing a supposedly new and different work by deliberately making trivial or insignificant variations in specific features of the copyrighted work.

Two steps are involved in the test for infringement. There must be access to the copyrighted work and substantial similarity not only of the general ideas but the expression of those ideas as well. Hallmark Cards, Inc. obtained its copyright registration for the "RAINBOW BRITE DOLL" on December 5, 1984. It is apparant that the party that made the "Sunshine Girls" dolls in China had ample opportunity to view the copyrighted work. Even without direct evidence of access to the copyrighted work, the substantial similarity between the works may be so striking as to preclude the possibility that the works were arrived at independently.

Section 602(b) of the Copyright Law (17 U.S.C. 602(b)) provides that, "In a case where the making of the copies or phonorecords would have constituted an infringement of copyright if this title had been applicable, their importation is prohibited." Section 603(c) of the Copyright Law (17 U.S.C. 603(c)) provides that, "Articles imported in violation of the importation prohibitions of this title are subject to seizure and forfeiture in the same manner as property imported in violation of the Customs revenue laws. Forfeited articles shall be destroyed as directed by the Secretary of the Treasury or the court, as the case may be; however, the articles may be returned to the country of export whenever it is shown to the satisfaction of the Secretary of the Treasury that the importer has no reasonble grounds for believing that his or her acts constituted a violation of law."

We compared the imported doll with the copyright protected work. Our comparison leaves no doubt that the head of the "Sunshine Girls" doll is a substantial copy of the head of the "RAINBOW BRITE DOLL." The degree of similarity is so striking that one might conclude from the shape of the heads and the facial features that the "Sunshine Girls" doll is an exact mold copy. We consider the differences in the clothing to be insignificant. It is well know that different forms of clothing are made for dolls. The ordinary observer might assume that the Chinese import is a "RAINBOW BRITE DOLL" dressed in an evening dress. The minor differences in the construction of the body

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

729541

C7

and in the costume that we noted, appear to us to constitute a deliberate attempt to make minor variations in the appearance of the imported item while preserving a similar aesthetic appeal to the ordinary observer.

In view of the extensive media exposure (over $34 millon in advertising) and the substantial sales volume (18 million units and $179 million in sales) it is inconceivable that a doll manufacturer or distributor in China would not be familiar with and have access to the RAINBOW BRITE dolls. Furthermore, the substantial similarity of the head of the imported doll to the head of the "RAINBOW BRITE DOLL" rules out coincidence and independent creation.

HOLDING:

We are of the opinion that the imported article would be prohibited entry into the United States as infringing on the rights of the copyright owner. The imported merchandise is subject to seizure and forfeiture (17 U.S.C. 603). However, the district director of Customs may allow the return of the imported articles to the country of export, whenever he is satisfied (usually upon consideration of a petition in remission of seizure and forfeiture submitted pursuant to 19 CFR 133.51(a)) that the importer had no reasonable grounds for believing that his act (of importing the infringing dolls) constituted a violation of law. The bond of the copyright owner shall be returned. Copies of this decision may be furnished to all interested parties.

Steven I. Pinter
Chief, Entry, Licensing and
Restricted Merchandise Branch

UNITED STATES GOVERNMENT

Memorandum

DEPARTMENT OF THE TREASURY
UNITED STATES CUSTOMS SERVICE

DATE: 27 1986

FILE: ENT-1 CO:R:E:E
729542 JL

TO : All Regional Commissioners and
District Directors of Customs

FROM : Acting Assistant Commissioner
Office of Commercial Operations

SUBJECT: Informal Entry Procedures, Legal Determination 79-0514

Legal Determination 79-0514 (Headquarters ruling 710677, dated November 14, 1979) dealt with the informal entry of farmers' importations under items 813.30 and 813.31, T.S.U.S. The ruling held that importations of farm equipment qualified as "personal effects" of farmers which could be entered under the importer's baggage declaration. The ruling has been misinterpreted in some respects and in other respects did not adequately discuss certain issues raised in the inquiry.

You will be governed by the following when handling accompanying importations by all travelers, including importations of farm equipment or other articles for use in farm businesses. Any portions of Legal Determination 79-0514 which conflict with this memorandum are hereby overruled.

1. Eligibility of importations under items 813.30 or 813.31 TSUS. - The tourist exemptions for merchandise purchased abroad are <u>not</u> available unless the purchases were "acquired as an incident of the foreign journey." The courts have clearly stated that articles ordered prior to the foreign journey do not qualify and, further, when the primary purpose of the journey is to make the purchase, the purchase does not qualify for the exemption.

2. Informal entries and baggage declarations - If the merchandise does not qualify for the tourist exemption, the traveler shall be required to file an informal entry or a formal entry, depending upon the value of the importation. In no case do such importations qualify for entry on the importer's baggage declaration.

3. Other situations - In those cases in which the purchases qualify for informal entry but there is good reason to require a formal entry, do so under the authority of section 143.22, Customs Regulations.

9

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

An example would be farm equipment classifiable as free of duty but subject to an actual use provision under which a certification is to be given by the importer.

4. Purchases by or for corporate or business organizations- Importations made by U.S. residents for business or corporate organizations do not qualify for the personal exemption. These are commercial importations and either informal or formal entries shall be required. However, the privilege of employees reimporting professional equipment and tools of trade owned by their employers which have been taken out of the U.S. for their use abroad is still in effect.

5. Use of the baggage declaration by commercial travelers- The provisions allowing the use of baggage declarations for commercial travelers' samples is to be continued as provided for in the Customs Regulations.

U.S. CUSTOMS SERVICE

WASHINGTON, D.C. 20229

MAY 27 1986

REFER TO
ENT-1 CO:R:E:E
729561 JL

Mr. James E. Nolan, Director
Office of Foreign Missions
Department of State
Washington, D.C. 20520

Dear Mr. Nolan:

This refers to your request for reimbursement of duty paid on accompanied items which arrived in the United States in the mails from Sweden for Mr. Goran Segerlund, a World Bank official assigned to duty in Washington, D.C.

On December 2, 1985, Customs authorized free entry for Mr. Segerlund's sailboat. It is claimed that when the sailboat was unpacked after arrival in the United States, three items were missing. The request for reimbursement is for duties said to have been paid upon the importation of replacements for the missing items.

Mr. Segerlund's sailboat was accorded free entry pursuant to section 148.87(a), Customs Regulations, as baggage and effects authorized under item 820.30, Tariff Schedules of the United States. The term "baggage and effects" is defined in section 148.81(b), Customs Regulations, as including "all articles which were in the possession of a person abroad, and are being imported in connection with his arrival, ..." It is our opinion that the replacement parts were not imported in connection with the arrival of Mr. Segerlund and, obviously, were not in his possession abroad. Therefore, they do not qualify as baggage and effects. Accordingly, your request for reimbursement of duty paid is hereby denied.

Sincerely,

Steven I. Pinter
Chief, Entry, Licensing and
Restricted Merchandise Branch

[redacted]

Dear [redacted]

In your letter of September 15, 1982, you requested the tariff classification for asphalt emulsions from Venezuela.

Four samples have been tested and have the following compositions:

(1) "Emul-Vial" (Anionic Asphalt Emulsion)

a) pure asphaltum	50%
b) red resin vinsol	0.75%
c) sodium hydroxide	0.125%
d) water	49% (approx.)

(2) "Emul-Acid" (Cationic Asphaltic Emulsion "CL60")

a) pure asphaltum	60%
b) tetramine-hydrogenated bait	.7 - 1%
c) hydrochloric acid	.6 - .8%
d) water	38% (approx.)

(3) "Emul-Nova" (Argilloid Asphaltic Emulsion Anionic Type "AM 50")

a) asphaltic cement	50%
b) red resin vinsol	0.75%
c) sodium hydroxide	0.125%
d) bentonite clay	5%
e) water	44% (approx.)

(4) "Nova-Glass-Kote" (Fibrose Asphaltic Argilloid Emulsion of the Anionic Type)

a) asphaltic cement	50%
b) red resin vinsol	0.75%
c) sodium hydroxide	0.125%
d) bentonite clay	5%
e) asbestos fibers	5%
f) water	39% (approx.)

These emulsions are used for roof coverings, street pavements, automobile undercoating, and as rust preventive coating.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C12

Natural asphalt occurs as lakes, as mixtures or emulsions with sand, clay or water. Petroleum asphalt is derived from crude oil and is marketed as cements and fluxes, emulsions, cutbacks, and road oil.

Emulsions (1), (2), and (3), having in addition to asphalt and water, only surface active agents to assist in solubility, are classifiable under the provisions for asphaltum, bitumen, and limestone-rock asphalt in item 521.11, Tariff Schedules of the United States, and are free of duty.

Emulsion (4) having in addition to asphalt, water, and surface active agents, asbestos fibers, is classified as follows: When in chief value asbestos fiber, would be classified as articles not specially provided for of asbestos under item 518.51, Tariff Schedules of the United States (TSUS), dutiable at the rate of 2.3 percent ad valorem. When in chief value of asphalt, would be classified as undecorated mineral substances and articles of mineral substances not specially provided for under item 523.91, TSUS, dutiable at the rate of 6.2 percent ad valorem.

Articles classifiable under items 518.51 and 523.91, TSUS, which are the products of Venezuela, are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Sincerely,

John J. Martuge
Area Director

[redacted]

Dear [redacted]

In a letter dated November 2, 1982, you inquired on behalf of your client, [redacted], as to the dutiable status of various chemical mixtures manufactured in Canada and used in the metals processing industry.

A previous request was administratively closed due to insufficient information regarding the chemical components used in these mixtures.

On November 8, 1982 you were advised by telephone that some problem still existed regarding this latest inquiry. In particular, the terms non-ionic surfactant, anionic surfactant and organic acid were not capable of being classified. You were advised again on December 7, 1982 regarding the necessity for this information. On December 15, 1982 we received a letter advising us as to the identity of the non-ionic surfactant and the organic acid. The anionic surfactant was identified as an alkylate hydrophobe which is not sufficient to classify.

The products designated Chem Cote 200, Rust Proofing Compound TB-293, Galvanized Coating TB 342-1, rust inhibitor TB 275, and Zinc Prep are formulated preparations containing a benzenoid surfactant (octylphenoxypolyethoxy ethanol). All of the above are classifiable under the provisions for benzenoid mixtures in item 413.51, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 17.5 percent ad valorem, but not less than the highest rate applicable to any component material. None of the components have a higher rate at this time.

The products designated Liquid-Alk Rust Proofer TB-61-L, Spiral Wash-1(decarb), Carbon X-100, Carbon X-200 and Chem Cote 300 are formulated preparations that contain a surfactant that may be benzenoid derived. When these products are composed in part of a benzenoid surfactant, they are classified under the provisions for benzenoid mixtures in item 413.51, TSUS, and dutiable at the rate of 17.5 percent ad valorem, but not less than the highest rate of duty applicable to any component material. None of the component materials have a higher rate at the present time.

C14

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

If the latter products do not contain a benzenoid derived surfactant they cannot be classified because the term alkylate hydrophobe indicated in your letter of December 15, 1982 is not a chemical abstract name that can be classified.

Graintrol, a solution of sodium nitrite, is classifiable in item 421.14, TSUS, and is dutiable at the rate of 15.1 percent ad valorem.

Chem Rinse 20-1, containing chromic acid and phosphoric acid; Black Knight, containing muriatic acid, antimony oxide and ferric oxide; Rust Proofing Compound TB-61, containing sodium nitrite and sodium carbonate are mixtures of two or more inorganic compounds and are classifiable in item 423.96, TSUS, and are dutiable at the rate of 2.5 percent ad valorem.

Chem Spray H.D., containing sodium hydroxide, sodium gluconate, sodium nitrite, sodium carbonate and sodium hexametaphosphate, is a mixture classifiable in item 432.25, TSUS, and dutiable at the rate of 4.4 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate of duty appears to be sodium nitrite classifiable in item 421.14, TSUS, and dutiable at the rate of 15.1 percent ad valorem.

Your inquiry does not provide sufficient information for us to issue a ruling letter on the wire drawing soap lubes. Requests for classification rulings regarding chemical and chemical mixtures should contain a complete chemical abstract name for each compound contained in each mixture. If possible a sample should be submitted for each mixture.

This ruling is being issued under the provision of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R 177.1 (a)(1)].

Sincerely,

John J. Martuge

[redacted]

Dear [redacted]

In your letters of November 10, 1982 and January 10, 1983, you requested the tariff classification for essence cocoa concentrate and oleoresin vanilla from Mexico.

Based upon the information submitted and our analysis, both products are non-benzenoid solutions of aromatic or odoriferous substances, not containing alcohol, which are used as flavoring extracts.

Essence cocoa concentrate and oleoresin vanilla are classifiable under the provision for flavoring extracts, and fruit flavors, essences, esters, and oils, all the foregoing, not containing alcohol, in item 450.20, Tariff Schedules of the United States, and is dutiable at the rate of 6 percent ad valorem.

Articles classifiable under item 450.20, TSUS which are the products of Mexico are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Sincerely,

John J. Martuge

[redacted]

Dear [redacted]

In your letter of November 19, 1982, you requested the tariff classification for four products made in France. The products, with the trade name of Petrogil, are said to be used to manufacture oil based drilling muds.

Petrogil F54, an emulsifier, is composed of amino ethyl-1-heptadecenyl-2-imidazoline, diethalinetriame and olic acid. It is classified under the provisi for non-benzenoid surface-active agents in item 465.95, Tariff edules of the United States (TSUS), and is dutiable at the rate of 4 percent ad valorem.

Petrogil SIV, a viscousifier, is composed of aluminum stearate and calcium carbonate. It is classified under the provision for non-benzenoid mixtures in item 432.25, TSUS, and is dutiable at the rate of 5.2 percent ad valorem. The rate of duty is taken from item 490.32, TSUS, based on the aluminum stearate content in the mixture.

Petrogil RF3, a filtrate reducer, is composed of fatty acids, tall oil, polyphenol and diisopropylbenzene. It is classified under the provision for benzenoid mixtures in item 407.16, TSUS, and is dutiable at 1.1 cents per pound plus 17.3 percent ad valorem. The rate of duty is taken from item 402.36, TSUS, based on the diisopropylbenzene content in the mixture.

Petrogil A46, a wetting agent, is composed of dodecylbenzenesulfonate, isobutanol and diisopropylbenzene. It is classified under the provision for benzenoid wetting agents in item 409.30, TSUS, and is dutiable at the rate of 12.5 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

[redacted]

Dear [redacted]

In a letter dated October 7, 1982, you inquired on behalf of [redacted] as to the dutiable status of 46 concrete admixtures manufactured in Canada. You submitted samples of four of the products, and technical information for all of them.

The products named Lubrilith 1, Lubrilith L, 1P, Lubrilith L, 2P, Lubrilith L, 3P, Lubrilith L, 4P, Lubrilith L, 5P, Mastermix 10, Mastermix 30, Mastermix 60, Mastermix 90, Mastermix 250, and Lubrilith are concrete additive mixtures composed in part of benzenoid surface active agents. Functionally, these products are wetting agents and dispersants. They are classifiable under the provision for...wetting agents, dispersants...in item 409.30, Tariff Schedules of the United States (TSUS) and dutiable at the rate of 12.5 percent ad valorem.

As to MB-HC-N, Pozzolith 100-N, Pozzolith 100-R, Pozzolith 100-HE, Pozzolith 122-N, Pozzolith 122-HE, Pozzolith 200-N, Pozzolith 200-N (LL-819), Pozzolith 200-R, Pozzolith 300-N, Pozzolith 322-N, Pozzolith 344-N, Pozzolith 768, Pozzolith 133-N, Pozzolith 355-N, MBL-82, MBL-84 and MBL-83, these products are all mixtures consisting in part of triethanolamine and calcium chloride. Accordingly, these products are classifiable under the provision for mixtures, not specially provided for, in item 432.25, TSUS, and dutiable at the rate of 4.4 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be the triethanolamine, which is classifiable under item 425.12, TSUS, and dutiable at the rate of 11.3 percent ad valorem.

The products Mastermix 1, Admixture - LA-10, Pozzolith 300-R, Pozzolith 322-R, Pozzolith 748 and LA-10 are also classifiable under the provision for mixtures, not specially provided for, in item 432.25, TSUS, dutiable at the rate of 4.4 percent ad valorem but not less than the highest rate applicable to any component material. None of the component rates are higher.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

JAN 31 1983

The Pozzolith 100-XR, Pozzolith 122-R and 200-XR are aqueous solutions of hydrolyzed starch, and are provided for under dextrine and soluble or chemically treated starches, in item 493.30, dutiable at the rate of 0.81 cent per pound.

MBL-80 is an aqueous solution of calcium lignin sulfonate. Accordingly, it is classifiable under the provision for lignin sulfonic acid and its salts in item 465.92, TSUS, dutiable at the rate of 2.5 percent ad valorem.

MB-HC is an aqueous solution of sodium glucoheptonate. This chemical is a sodium salt of an organic acid and classifiable as a sodium salt, other, in item 427.04, TSUS, and dutiable at the rate of 4.4 percent ad valorem.

Products MB-VR(12%), MB-VR(20%), MB-AE 10 I, MB-AE 20, and MB-AE 10 are mixtures provided for in item 432.25, TSUS, and dutiable at the rate of 4.4 percent ad valorem but not less than the highest rate applicable to any of the components. None of the components have a higher rate.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

[redacted]

Dear [redacted]

In your letter of December 20, 1982, you inquired as to the dutiable status of a diazepam pharmaceutical preparation in ampoule form manufactured in Sweden.

You state that in the subject preparation, the active ingredient, diazepam, constitutes only a minor quantity of the product and is not the ingredient of chief value. Therefore, you feel that the preparation is classifiable in item 412.36 of the tariff. In addition, you advise that your company manufactures the diazepam in the United States and supplies it to the foreign vendor who blends it with ingredients of foreign origin. The finished preparation is packed in ampoules and exported to the United States.

Diazepam is a benzenoid drug that is used as a tranquilizer. In the subject preparation it is put up in its usual dosage amount (for injection purposes) and the other ingredients act as diluents and carriers to enhance its efficacy.

Diazepam is listed in the Chemical Appendix to the Tariff Schedules by its Chemical Abstract Service number. Therefore, regardless of its form diazepam is classifiable under the provision for...tranquilizers..., other, in item 412.35, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 30.5 percent ad valorem. There is no reduction in duty allowed since a new and different product is being made in Sweden from the exported product.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Sincerely,

John J. Martuge

Dear [redacted]

In a letter dated December 21, 1982, you inquired as to the dutiable status of emulsion splitter AR-52 produced in West Germany.

In your letter you indicate that the product is composed of lauryl pyridium bisulfate and water. It will be used as an intermediate in the manufacture of an oil separation or splitting agent.

Technical literature indicates that lauryl pyridium bisulfate is derived from a benzenoid product and can be used as a germicide, detergent and emulsion breaker.

Emulsion splitter AR-52 is classifiable under the provision for benzenoid products chiefly used as detergents, wetting agents, emulsifiers, dispersants, or foaming agents in item 409.30, Tariff Schedules of the United States, and dutiable at the rate of 12.5 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

[redacted]

Dear [redacted]

In your letter of January 4, 1983, you requested the tariff classification for a Bake a Craft stained glass kit from Hong Kong.

The kit consists of a zinc alloy metal frame, variously colored polystyrene plastic crystals and a plastic suction cup packaged in a cardboard and plastic blister pack.

The frame is available in a variety of shapes and sizes and forms the outline of animals, flowers or other objects. When the kit is used, the spaces in the frame are filled with the plastic crystals and the frame is baked in an oven. The baking melts the plastic into a continuous sheet within the outlined spaces within the frame. This process results in a decorative scene which simulates a stained glass window. The plastic suction cup is used for hanging the stained glass design on windows or mirrors.

The frame is classifiable under the provision for articles of zinc, not coated or plated with precious metal in item 657.80, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 7.6 percent ad valorem.

The polystyrene plastic crystals are classifiable under the provision for plastic materials, other, thermoplastic resins, polystyrene resins...in item 408.84, TSUS, and dutiable at the rate of 0.9 cent per pound plus 9.2 percent ad valorem.

The plastic suction cup is classifiable under the provision for articles not specially provided for, of rubber or plastics, other, other in item 774.55, TSUS, and is dutiable at the rate of 6.9 percent ad valorem.

Articles classifiable under items 657.80, 408.84 and 774.55, TSUS, which are the products of Hong Kong are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

Mr. Tadao Arai
11625 Montana Ave. #124
Los Angeles, California 90049

Dear Mr. Arai:

In a letter dated December 30, 1982, you inquired as to the dutiable status of eight flushed bases manufactured in Japan.

The eight flushed bases described in your letter consist of benzenoid toners in a vehicle. The vehicle consists of rosin-modified phenolic resin, iso phthalic alkid resin or modified iso phthalic alkid resin, linseed oil and a solvent. According to your letter these products will be used to manufacture offset and heatset printing inks.

Flushed bases are classifiable under the provision for benzenoid toners in item 410.34, Tariff Schedules of the United States, and dutiable at the rate of 16 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Sincerely,

John J. Martuge
Area Director
New York Seaport

[redacted]

Dear [redacted]

In a letter dated January 7, 1983, you inquired as to the dutiable status of the chemical Interox DHBP-45-1C/G manufactured in West Germany. You submitted technical literature relative to this product.

The technical information indicates that the Interox DHBP-45-1C/G, in liquid form, and without inert carriers, is 2,5-dimethylhexane 2,5-di-t-butyl peroxide. It is possible that this chemical may be derived from benzenoid sources. However, in a letter to this office dated December 16, 1982, you asserted that this product is not derived from benzenoid sources. Accordingly, a non-benzenoid derived 2,5-dimethylhexane 2,5-di-t-butyl peroxide is classifiable under the provision for other organic compounds, other, in item 429.95, Tariff Schedules of the United States. The rate of duty is ~~4.4 percent~~ ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Sincerely,

John J. Martuge
Area Director
New York Seaport

Mr. Roberto Garza-Gongora
J.O. Alvarez, Inc.
Tex-Mex Industrial Park
1 Ramos Rd
P.O. Box 1434
Laredo, Texas 78042

Dear Mr. Garza-Gongora:

In a letter dated January 25, 1983, on behalf of your client, Mason Chemical Co., of Chicago, Il., you inquired as to the dutiable status of Maquat SC 18-25% manufactured in Mexico.

Maquat SC 18-25% is N,N-dimethyl-N-octadecyl benzenemethanaminium chloride. It is used as a substantive conditioning, softening and anti-static agent in cream rinse products for the hair.

Maquat SC 18-25% is classifiable under the provision for benzenoid quaternary ammonium salts in item 405.48, Tariff Schedules of the United States, and dutiable at the rate of 8.7 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Sincerely,

John J. Martuge
Area Director

805147

[redacted]

Dear [redacted]

In a letter dated February 1, 1983, you inquired as to the dutiable status of hexane manufactured in Belgium.

Your submitted information states that hexane is composed of less than 50 percent normal hexane with the balance being various C_5 through C_8 hydrocarbons. The typical analysis of the C_5 through C_8 hydrocarbons states that the percentage by weight varies from a minimum of 44.765 percent to a maximum of 56.258 percent.

Accordingly, since the amount of C_5 through C_8 hydrocarbons varies between less than 50 percent and more than 50 percent, the percentage of normal hexane must also vary. Therefore the amount of normal hexane and its classification must be determined on a case by case basis.

Hexane containing by weight not over 50 percent of any single hydrocarbon compound is classifiable under the provision for mixtures of hydrocarbons not specially provided for, derived wholly from petroleum, shale oil, natural gas, or combinations thereof, in liquid form, in item 475.65, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 0.25 cent per gallon.

Hexane containing by weight over 50 percent of any single hydrocarbons compound is classifiable under the provision for mixtures that are in whole or in part of hydrocarbons derived in whole or in part from petroleum, shale oil, or natural gas, in item 430.10, TSUS, and dutiable at the rate of 5 percent ad valorem, but not less than the highest rate applicable to any component compound. The highest rate applicable to any component compound is 5 percent ad valorem.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

D13

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Sincerely,

John J. Martuge

[redacted]

Dear [redacted]

Your letter of January 31, 1983 concerns the dutiable status of cresolphthalein complexon (sodium salt form), glycyl-glycine and L-malic acid. All are products of Switzerland.

Cresolphthalein complexon, an indicator color, is classified under the provision for other benzenoid colors in item 410.20, Tariff Schedules of the United States (TSUS). The rate of duty is 21 percent ad valorem.

Glycyl-glycine is classified under the provision for other nitrogenous compounds in item 425.52, TSUS. The rate of duty is 7.9 percent ad valorem.

L-malic acid can be produced from natural sources, such as apple juice, and also from synthetic sources which may or may not be of benzenoid origin. L-malic acid which is produced from natural sources or from non-benzenoid synthetic sources is classified under the provision for other organic acids in item 425.99, TSUS. The rate is 5.1 percent ad valorem. L-malic acid which is produced from synthetic benzenoid sources is classified under the provision for other products which are obtained, derived or manufactured in whole or in part from a benzenoid product in item 407.05, TSUS. The rate is 1.7 cents per pound plus 16.8 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1 (a)(1)].

Sincerely

John J. Martuge

Dear [redacted]

Your letter of January 10, 1984 concerns the dutiable status of toners, developers and coated laminates from the People's Republic of China. Two different samples of each product were furnished.

Both toners are described as consisting of non-nylon thermoplastics, natural rosin, carbon black and nigrosine dye. The developers consist of 5 percent of the above described toners, plus high purity iron powder. Although your letter claims no benzenoid dyes are used, nigrosine is in fact a benzenoid dye.

The coated laminated belts are used with copying machines as photoreceptor material. The samples indicate that the material consists of mylar-aluminum laminate, approximately 10 inches wide, that is wound around the cylinder of a copying machine. The reflected light from the original is focused on a positively charged photosensitive medium (photoreceptor), which causes the neutralization of the positive areas corresponding to the blank areas of the original.

The toners and developers are classified under the provision for benzenoid colors in item 410.22, Tariff Schedules of the United States (TSUS). The rate of duty is 15 percent ad valorem.

The coated laminated belts (photoceptors) are classifiable under the provision for parts of office machines not specially provided for, other, in item 676.52, TSUS, and dutiable at the rate of 4.5 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Sincerely,

John S. Martuge
Area Director
New York Seaport

Dear [redacted]

In a letter dated January 19, 1984, you inquired as to the dutiable status of Oncol 10 percent granular produced in Japan.

Oncol 10 percent granular is an artificially mixed benzenoid insecticide that is used to control a number of economically important insects. It will be imported as a 10 percent granular formulation. In the tariff, products of this type fall under the general heading for benzenoid pesticides.

Oncol 10 percent granular is classifiable under the provision for "Pesticides: Other: Other" in item 408.38, Tariff Schedules of the United States, and dutiable at the rate of 0.8 cent per pound plus 9.7 percent ad valorem.

Merchandise of this type is generally subject to the regulations of the Environmental Protection Agency. You may contact them at 401 M Street, S.W., Washington, D.C. 20460, telephone number (202) 382-2090.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

JUL 05 1984

REFER TO

CLA-2-05:S:COM:N2:226-122
808737

[redacted]

Dear [redacted]

Your letters of February 2, 1984, and February 15, 1984, requested this office to issue a ruling on the tariff classification of various industrial products, including admixtures, which, when mixed on site in the United States with varying proportions of portland cement, sand and water, impart particular properties to the finished concrete. These products are manufactured in Canada.

Your letter of February 2, 1984, divides the products into two groups designated A and B. Group A categorizes products identified as Gemcrete, Gemcrete Slurry, Gempatch, Gembond, Gemite Fibrous Grout and Sure Flo. It has come to the attention of this office that shipments of the products belonging to Group A have been entered through various ports, including Detroit and Buffalo, and that there has been some disagreement regarding the laboratory analysis and classification of at least one of these products. Under the pertinent Customs Regulations, this office is precluded from ruling on a request concerning the tariff status of merchandise which is the subject of a pending or completed Customs transaction. In a recent telephone conversation, you were advised by National Import Specialist Arlene Arszulowicz that the matter regarding the tariff classification of the products listed in Group A should be resolved by advising your customers to apply to the appropriate Import Specialist at the port at which the merchandise was entered and having jurisdiction over the transaction in question, who will process this matter under the procedures provided for in Part 177, Customs Regulations (19 C.F.R. 177.11).

The products listed in Group B are identified as Thermoshield I, Thermoshield II, Gemite Metal Lath Coating, Gemseal, Gemcoat, Gemite Stucco, Primer 410, Primer 510 and Primer 550. You were advised by telephone that the technical literature and breakdown of component materials submitted are not sufficient for this office to issue a ruling. Requests for rulings must be submitted in accordance with Part 177, Customs Regulations. Your request for a classification ruling should include samples of each product, along with the Chemical Abstract Service (CAS)

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

E10

name and number of each component in each product. In particular, you should supply the CAS name for the hydrocarbon absorbed on a clay shown as a component of Thermoshield I, Thermoshield II, Gemite Metal Lath Coating, Gembond Part B, and Gemite Stucco, and the CAS name for each component of the acrylic emulsion shown as a component of Thermoshield II and Gemcoat Part B (Gembond). The information should be detailed and specific. You stated in a recent telephone conversation that some of the individual components used in your products are purchased from various chemical companies and that the information may be confidential in nature. Since the information required must be detailed and specific, you may advise your suppliers that any proprietary information submitted to this office will be handled in a confidential manner.

Based on the information submitted, Thermoshield I is a mixture containing four percent of a benzenoid wetting agent. It is probably classifiable under the provision for benzenoid mixtures in item 413.51, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 15.6 percent ad valorem, but not less than the highest rate applicable to any component material. Without knowing the identity of the hydrocarbon, the highest rate at this time is 15.6 percent ad valorem.

Thermoshield II, Gemite Metal Lath Coating, Gemcoat, and Gemite Stucco are products which contain unidentified component(s). The absence of the necessary information, as stated above, precludes this office from issuing a ruling. Further, we cannot state a probable tariff classification for these products since there is a wide range of tariff provisions which may be applicable depending upon the identity of the unknown component(s).

If you require further assistance regarding the requirements of Part 177, Customs Regulations, please contact A. Arszulowicz, National Import Specialist, telephone number (212) 466-5796.

This portion of this letter is for information only, issued under the provisions of Section 177.1(d)(2) of the Customs Regulations (19 C.F.R. 177.1(d)(2)).

Gemseal is a product described in the literature as a mixture of additives in dry form which, when mixed on site in the United States with portland cement, sand and water, forms a hydraulic cement based, fiber-reinforced material specifically formulated for waterproofing, concrete block surface bonding and as a sealer in mining applications. The submitted component material description states that Gemseal is composed of hydrated lime, calcium stearate, sodium nitrate, methyl cellulose and glass fibers. Gemseal is classifiable under the provision for mixtures, not specially provided for, in item 432.25, TSUS, and dutiable at the rate of 4.2 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be calcium stearate, classifiable under item 490.32, TSUS, and dutiable at the rate of 4.9 percent ad valorem.

808737

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

E11

Primer 410, Primer 510 and Primer 550 are all stated to be acrylic emulsions. Accordingly, these products are classifiable under the provision for synthetic plastics materials, acrylic and methacrylic acid resins, other, in item 445.05, TSUS, and dutiable at the rate of 8.6 percent ad valorem.

This portion of this letter is a ruling issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Sincerely,

John J. Martuge
Area Director
New York Seaport

Dear [redacted]

In a letter dated June 4, 1984, you inquired as to the dutiable status of Kortacids and Ketjen Lube 115, 135, and 165 manufactured in The Netherlands.

According to your letter the usual method for manufacturing Ketjen Lube is with the use of benzenoid derived compounds. However, you are now attempting to produce these products without the use of these compounds and would like to know what the rate of duty would be if made with non-benzenoid derived compounds.

Kortacids are classifiable under the provision for organic acids, other in item 425.9940, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 4.9 percent ad valorem.

Ketjen Lube 115, 135, and 165, when made without the use of benzenoid chemicals are classifiable under the provision for esters of monohydric alcohols, other in item 428.7260, TSUSA, and dutiable at the rate of 4.2 percent ad valorem.

Ketjen Lube 115 and 135 made with benzenoid derived maleic anhydride and Ketjen Lube 165 made with benzenoid derived fumaric acid are classified under the provision for other products which are derived from benzenoid sources in item 407.0700, TSUSA. The rate of duty is 13.5 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Sincerely,

John J. Martuge

In a letter dated June 1, 1984, you inquired as to the dutiable status of Javel bleach tablets manufactured in Belgium.

The sample you submitted was analyzed by our laboratory and was determined to contain sodium chlorite and adipic acid. Adipic acid can be benzenoid derived. The literature attached indicates that the product is used as a household bleach.

Javel bleach tablets when made with adipic acid which is benzenoid derived is classifiable under the provision for mixtures containing compounds which are benzenoid derived in item 407.1610, Tariff Schedules of the United States Annotated, and dutiable at the rate of 1.7¢ per pound plus 13.6 percent ad valorem.

Javel bleach tablets when made with adipic acid which is not benzenoid derived is classifiable under the provision for mixtures not specially provided for in item 432.2500, Tariff Schedules of the United States Annotated, and dutiable at the rate of 4.2 percent ad valorem but not less than the highest duty applicable to any component material. The component material with the highest rate is the adipic acid which is classifiable in item 425.9960, TSUSA, and is dutiable at the rate of 4.9 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Sincerely,

John J. Martuge
Area Director
New York Seaport

[redacted]

Dear [redacted]

In a letter dated June 21, 1984, you inquired on behalf of your client, [redacted], as to the dutiable status of a Hydroceel Unit manufactured in Canada.

According to the literature submitted with your inquiry, the product is a tube of polyvinyl chloride approximately three feet long and 1½ inches in diameter. It is sealed at both ends but is punctured along its surface. The tube contains calcium silicate. The tube is used in pianos and other similar applications to minimize moisture. It also acts to absorb moisture when moisture content is too high.

Based on this information, the Hydroceel Unit is classifiable under the provision for non-enumerated articles in item 799.0000, Tariff Schedules of the United States, and dutiable at the rate of 4.2 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Sincerely,

John J. Martuge
Area Director
New York Seaport

Dear [redacted]

Your letter of June 22, 1984 concerns the dutiable status of a product of Japan which you describe as toluene di-isocyanate e-caprolactum polymer.

This product which you state is used in the manufacture of polyurethane films is classifiable under the provision for benzenoid heterocyclic compounds other in item 406.4200, Tariff Schedules of the United States Annotated. The rate of duty is 13.5 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

[redacted]

Dear [redacted]

In a letter dated July 6, 1984, you inquired as to the dutiable status of 3-heptan-2-1, 6-(ethylthio) manufactured in Japan.

According to your letter you believe the compound indicated above is classifiable in item 429.6020 as a sulfur compound. 3-heptane-2-1, 6-(ethylthio) is a compound with two functional groups. It has a sulfur functional group and a ketone functional group. Headnote 1, Subpart D, Part 2, Schedule 4 states: "... Any organic compound which is described in more than one functional group is classifiable in the first group in which it is described."

Ketones appear before sulfur compounds.

Therefore, 3-heptan-2-1, 6-(ethylthio) is classifiable under the provision for ketones in item 427.6430, Tariff Schedules of the United States Annotated, and dutiable at the rate of 4 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Sincerely,

John J. Martuge

Dear [redacted]

In a letter dated July 9, 1984, you inquired as to the dutiable status of a mouse, roach, and fly trap manufactured in Canada.

The inquirer advises that these traps will be used in bakeries, restraurants, etcetera. Also supplied is the following breakdown by value:

	Glue	Cardboard	Plastic
Roach Trap	20%	80%	--
Mouse Trap	60%	40%	--
Fly Trap	30%	50%	20%

The roach and fly traps, in chief value of cardboard, are classifiable under the provisions for other articles of pulp, of papier-mache, of paper, of paperboard, or of any combination thereof, not specially provided for, in item 256.9080, Tariff Schedules of the United States Annotated, and dutiable at the rate of 6.5 percent ad valorem.

The mouse trap, in chief value of glue, is classifiable under the provision for articles not specially provided for: of gelatin, glue, or combinations thereof in item 792.1040, (TSUSA) and dutiable at the rate of 4.9 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Sincerely,

John J. Martuge

Dear [redacted]

In your letter of November 2, 1984, you requested the tariff classification of a child's toothbrush, a plastic rinse tumbler, and a plastic holder for the tumbler from Hong Kong.

Toothbrushes are classifiable under the provision for toothbrushes in item 750.4040, Tariff Schedules of the United States, Annotated (TSUSA), and dutiable at the rate of 0.27 cent each plus 5.3 percent ad valorem. Effective January 1, 1985, the rate of duty will be 0.25 cent each plus 4.7 percent ad valorem.

The plastic rinse tumbler with plastic holder are classifiable under the provision for household articles not specially provided for, of rubber or plastics, in item 772.1500, TSUSA, and dutiable at the rate of 5.3 percent ad valorem. Effective January 1, 1985, the rate of duty will be 4.7 percent ad valorem.

Articles classifiable under item 772.1500, TSUSA, which are the products of Hong Kong are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. DEC 1 1984

[redacted]

Dear [redacted]

In your letter dated November 12, 1984, you inquired about the dutiable status of a product known as "Simpliflos" from the Republic of South Africa.

A blister packed sample and the manufacturer's component material cost breakdown were submitted with your inquiry. The furnished breakdown indicates the Simpliflos dental flosser is in chief value of plastic. The flosser consists of a molded blue acrylonitrile styrene copolymer plastic dispenser, the cylindrical handle of which contains a 68.5 meter supply of nylon dental floss. The dispenser is not refillable, and may be used anywhere by anyone as an aid to proper dental hygiene.

It measures 6-1/4 inches long, including a 3 inch handle that can be rotated either to hold the floss taut, or to allow the user to thread it through and across the arms of a one by one inch U-shaped head portion having a stainless steel cutter at its base. The dispenser is hand held by the user while flossing, after which the used floss is cut and discarded. The dispenser measures 1/2 inch wide at its base, tapers to 3/4 inch at the center and then narrows to 1/4 inch at the tip.

Please be advised that each blister packed dental flosser unit should be legibly, permanently and conspicuously marked to indicate the country of origin.

The Simpliflos dental flosser is classifiable under the provision for articles not specially provided for, of rubber or plastics, other, other, in item 774.55[illegible] Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 6.5 percent ad valorem. Effective January 1, 1985, the rate will be 6.1 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Mr. Ellis Newman
Ellis Newman Enterprises
116 Atkinson Road
Rockville, Centre, NY 11570

Dear Mr. Newman:

In your letter dated November 13, 1984, which was received by this office on December 11, 1984, you inquired about the dutiable status of Can-Am Crystals from Canada.

Can-Am Crystals are a granular mixture composed of 85 percent by weight cane sugar and 15 percent by weight dextrose. This product is destined to be sold at the retail level for household use and will be imported in 2 kilogram (4.4 pound) bags. A photo of the retail package was included with you inquiry.

Can-Am Crystals are classifiable under the provision for edible preparations, not specially provided for, in item 183.0500, Tariff Schedules of the United States, and dutiable at the rate of 10 percent ad valorem. Since this product will be packaged for retail sale at the time of importation it is not restricted under the current quota restraint system on sugar and sugar containing products.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(i)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Sincerely,

John J. Martuge

Ms. Karla R. Armenti
Kluber Lubrication Corp.
Grenier Industrial Airpark
Manchester, N.H. 03103

Dear Ms. Armenti:

In a letter dated November 28, 1984, you requested the dutiable status of five samples of lubricants which are manufactured in West Germany.

The submitted samples are identified as follows:

1. Isoflex Super LDS 18
2. Staburags NBU 30
3. Staburags NBU 30G
4. Staburags NBU 4 Altemps
5. Syntheso XOL 12

Isoflex Super LDS 18, a yellowish-brown grease, is a mixture in part of mineral oil (approximately 10 percent by weight), fatty acid salts, an organic ester of a monohydric alcohol and a small amount of a benzenoid antioxidant.

Staburags NBU 30, a yellow grease, contains over 50 percent mineral oil and over 10 percent by weight of a salt of a fatty acid.

Staburags NBU 30G, a black grease, contains less than 50 percent of a mineral oil and over 10 percent by weight of a salt of a fatty acid. Information you submitted indicates that it also contains a benzenoid antioxidant.

Staburags NBU 4 Altemps, a creamish grease, contains over 50 percent mineral oil and over 10 percent by weight of a salt of a fatty acid.

Syntheso XOL 12, a pale yellow liquid, is a mixture composed in part of a fatty acid ester, benzotriazole and a barium salt. Your information states that the product also contains a benzenoid surfactant and an alkyl cresol.

Staburags NBU 30 and Staburags NBU 4 Altemps would both be classified under the provision for greases containing over 10 percent by weight of the salts of fatty acids in item 475.6000, Tariff Schedules of the United States Annotated (TSUSA), at the rate of 0.7 cent per

65

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

pound plus 6.8 percent ad valorem.

Syntheso XOL 12 is classified under the provision for mixtures in part of a benzenoid chemical in item 413.5100, TSUSA. The rate of duty is 13.7 percent ad valorem but not less than the highest rate applicable to any component material. Based on benzotriazole, which is dutiable under item 406.3900, TSUSA, the rate of duty is 1.7 cents per pound plus 16.2 percent ad valorem.

Isoflex Super LDS 18 and Staburags NBU 30G are classified under the provision for mixtures in part of a benzenoid chemical in item 407.1610, TSUSA, at the rate of 1.7 cents per pound plus 13.6 percent ad valorem but not less than the highest rate applicable to any component material. Since the benzenoid components have not been fully identified the applicable rate cannot be determined.

This ruling is being issued under the provision of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Sincerely,

John J. Martuge

Kanematsu-Gosho (U.S.A) Inc.
One World Trade Center, Suite 4811
New York, NY 10048

Dear Mr. Spatarella:

In your letter of December 26, 1984, you requested the dutiable status of eight "Schreck" brand cleaning agents from Japan.

"Schreck" 100KG and 101KG are aqueous mixtures consisting in part of non-benzenoid organic compounds, including an organo-silicon compound and mono and tri ethanolamine. Both products are classified under the provision for mixtures, not specially provided for in item 432.2500, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 4 percent ad valorem, but not less than the highest rate applicable to any component material. The highest rate applicable is for mono and tri ethanolamine classified under the provision for nitrogenous compounds in item 425.1200, TSUSA, and dutiable at the rate of 11.3 percent ad valorem.

"Schreck" 201 is an aqueous solution containing a non-benzenoid organic acid (phosphoric type). It is classified under the provision for other organic acids, in item 425.9960, TSUSA, and dutiable at the rate of 4.7 percent ad valorem.

"Schreck" 301 and 305 are mixtures in aqueous solutions consisting in part of non-ionic benzenoid surface active agents. They are classified under the provision for benzenoid surface active agents in item 409.3060, TSUSA. "Schreck" 501 is a mixture in an aqueous solution consisting in part of an ionic benzenoid surface active agent. It is classifiable under the provision for benzenoid surface active agents in item 409.3080, TSUSA. "Schreck" 301, 305 and 501 are dutiable at the rate of 10.1 percent ad valorem.

"Schreck" 500KG is a mixture in an aqueous solution. It is stated that it contains sodium benzoate. It is classified under the provision for benzenoid mixtures in item 413.5100, TSUSA, and dutiable at the rate of 13.7 percent ad valorem, but not less than the highest rate applicable to any component material. No component has a higher rate.

"Schreck" 600A, KG is a mixture composed essentially of ethers of polyhydric alcohols (ethylene glycol and propylene glycol). It is classifiable under the provision for other mixtures of two or more organic compounds in item 430.2040, TSUSA. It is dutiable at the rate of 4.1 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate is ethylene glycol classified in item 428.3400, TSUSA, dutiable at the rate of 12.4 percent ad valorem. G7

Dear Mr. Chang:

In your letter dated January 24, 1985, you inquired about the dutiable status of aerosol type silicone spray's, TSM 6801, TSM 6811, YGS 6007 from Japan.

According to your letter these products contains polyalkylsiloxane, silicon dioxide, chlorotrifluoroethane, dichlorotrifluoroethane. They are used in the release of molds used in spinning nylon and polyester fibers.

The products described above are classifiable under the provision for mixtures, not specifically provided for in item 432.25, Tariff Schedules of the United States, and dutiable at the rate of 4 percent ad valorem, but not less than the highest rate applicable to any component material. No component has a higher rate.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If the ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Sincerely,

John J. Martuge
Area Director
New York Seaport

1100 Kirk Street
Elk Grove, Ill. 60007

Dear Mr. Szymanski:

In your letter dated January 30, 1985, you inquired about the dutiable status of disopyramide phosphate from England.

Disopyramide phosphate, your tradename "Norface", is classifiable under the provision for other benzenoid cardiovascular drugs, not pro~~vided for~~ in the Chemical Appendix to the Tariff Schedules in item 412.1200 Tariff Schedules of the United States, and dutiable at the rate of 8 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Mr. John A. van Raalte
Gerard Monney International (U.S.A.)
P.O. Box 2036
Princeton, NJ 08540

Dear Mr. van Raalte:

Your letter of February 8, 1985 concerns the dutiable status of carbonated and non-carbonated mineral water from France.

Carbonated mineral water and non-carbonated mineral water are classifiable under the provision for all mineral waters, natural, imitation, or artificial in item 166.1000, Tariff Schedules of the United States Annotated. The rate of duty is 1.5 cents per gallon.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time the merchandise is imported. If a ruling letter is received after the filing of such docments, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Baltimore, MD 21202

Dear Mr. Wood:

In your letter dated February 12, 1985, you inquired about the dutiable status of Tipp-Ex Solvent Thinner from West Germany.

According to your letter this product is used to thin Tipp-Ex liquid correction fluid.

Tipp-Ex Solvent is classifiable under the provision for mixtures which are in part hydrocarbon and derived from petroleum, not specially provided for in item 432.1000, Tariff Schedules of the United States Annotated, and dutiable at the rate of 5 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be trichloroethane classifiable under item 429.4700, Tariff Schedules of the United States Annotated, and dutiable at the rate of 18 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Dear Mr. Wang:

In your letter dated February 4, 1985, you inquired about the dutiable status of sixteen pigments from Taiwan.

The following pigments are classified under the provision for other benzenoid toners in item 410.3200, Tariff Schedules of the United States Annotated, (TSUSA), and are dutiable at the rate of 22.8 percent ad valorem:

Pigment Red	53:1
Pigment Red	48:1
Pigment Red	48:2
Pigment Red	57:1
Pigment Red	22
Pigment Orange	16
Pigment Orange	13
Pigment Yellow	12
Pigment Yellow	13
Pigment Yellow	14
Pigment Yellow	55
Pigment Green	7
Pigment Blue	15:1 (chlorinated)
Pigment Blue	15:3

Pigment Red 48:3 is provided for by name in item 410.2800, TSUSA, and is dutiable at the rate of 11.3 percent ad valorem.

Pigment Blue 15 and the unchlorinated form of Pigment Blue 15:1 are classified under the provision for other benzenoid toners in item 410.3400, TSUSA, and are dutiable at the rate of 15 percent ad valorem.

The rates furnished in this letter apply only to importations of the pigments. If you want to know the tariff status of pigment prepartions you must furnish composition and use information for each.

Dear Mr. Odden:

In your letter of March 11, 1985 on behalf of Daminco, Inc., 977 Pantera Drive, Mississauga, Ontario L4W 2W6, you asked for information about the tariff status of a product trade-named Dadex MGC, from Canada.

Based on the information contained in your inquiry, Dadex MGC is monoglyceride citrate, a reaction product of a fatty monoglyceride (obtained from refined safflower oil) and citric acid. Accordingly, Dadex MGC is classifiable under the provision for fatty substances of animal or vegetable origin: not sulfonated or sulfated: fatty-acid esters, ethers, and ether-esters of polyhydric alcohols: other, in item 465.1000, Tariff Schedules of the United States Annotated. The rate of duty is 1.2 cents per pound and 5.3 percent ad valorem.

This ruling is being issued under the provision of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of appropriate Customs officer handling the transaction.

Dear Ms. Zirkle:

In your letter dated March 11, 1983, you inquired about the dutiable status of pilocarpine hydrochloride and tetrahydrozaline hydrochloride in bulk powder forms from Italy.

Pilocarpine hydrochloride is a non-benzenoid cholinergic (ophthalmic), alkaloid drug, which will be used in the formulation of sterile ophthalmic solutions.

Pilocarpine hydrochloride is classifiable under the provision for non-benzenoid synthetic, alkaloids in item 437.2080, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 4 percent ad valorem.

Tetrahydrozaline hydrochloride is a benzenoid adrenergic drug which will also be used in the formulation of sterile ophthalmic solutions.

Tetrahydrozaline hydrochloride is classifiable under the provision for benzenoid imidazoline derivatives, provided for in the chemical Appendix to the Tariff Schedules in item 411.0800, TSUSA, and dutiable at the rate of 7.1 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Dear Ms. Hannah:

In a letter of March 26, 1985, written on behalf of your client, Kentak Information System, Incorporated, you asked about the dutiable status of a dry imaging powder from Japan.

The technical data, submitted with your letter, indicates that the product, which is used with photocopiers, consists, of a toner and a developer. The toner is composed of a styrene butadiene copolymer, carbon black, an azoic dye and silica. The developer is composed of a styrene butadiene copolymer, carbon black, an azoic dye, silica and a metallic based carrier.

The toner and developer described above are classifiable under the provision for other benzenoid colors, dyes, stains and related products in item 410.2200, Tariff Schedules of the United States Annotated. The rate of duty is 15 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. New York, New York 10036

Dear Mr. Schutzman:

On April 4, 1985, this office received technical information and "dumbbell" specimens with respect to a tariff classification ruling for TOSO-CSM TS 320, a chlorosulphonated polyethylene product manufactured in Japan. This information was submitted in response to our letter of January 31, 1984 which, among other things, stated that we could not issue a ruling for the TOSO-CSM TS 320 due to insufficient information.

Our laboratory has completed its testing of the product, and the results indicate that TOSO-CSM TS 320 meets the tariff definition of synthetic rubber. Accordingly, this product is classifiable under the provision for synthetic rubber in item 446.1557, Tariff Schedules of the United States Annotated, dutiable at the rate of 0.8 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Halsey Import Corporation
51 Halsey Street
Newark, New Jersey 07102

Dear Mr. Temkin:

In your letter of April 17, 1985, you requested the tariff classification of a plastic air freshener device from Taiwan. A sample of the fragrance container was submitted with your request.

The air freshener consists of an inner plastic container filled with a liquid fragrance and an outer cover in an attractive soft tone finish. The outer cover has slotted openings and is designed to rotate over the inner container to an open or closed position. The air freshener is approximately 4 inches in height and 2-1/2 inches in diameter. You state in your letter that the article is in chief value of plastics.

The air freshener is classifiable under the provision for household articles not specially provided for, of rubber or plastics, in item 772.1500, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 4.7 percent ad valorem.

Articles classfiable under item 772.1500, TSUSA, which are the products of Taiwan are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Ms. Linda J. Rodriguez
Performance Trading
343 East Jefferson Boulevard
Los Angeles, CA 90011

Dear Ms. Rodriguez:

In your letter dated April 17, 1985, which was received on May 1, 1985, you inquired about the dutiable status of a soap dispenser and soap refills from Korea.

Samples accompanied your letter and have been retained by this office. The dispenser is a box-like plastic container, approximately 8¼ inches tall, 2-3/4 inches wide, and 3 inches deep, filled with a packet containing 1000 rectangular-shaped soap "leaves". The leaves are dispensed, one at a time, through a slot in the front of the container by pushing a lever on the bottom. The product has two pressure sensitive strips on the back, for mounting it to a wall, and a clear plastic window just above the slot, to indicate when the supply of soap leaves is low. The soap refill box contains 1000 soap leaves. The refill package and the soap contained within the dispenser are separately classified.

The dispenser is classifiable under the provision for articles not specially provided for, of rubber or plastics... other... other, in item 774.5595, Tariff Schedules of the United States Annotated, (TSUSA) and dutiable at the rate of 6.1 percent ad valorem.

However, your inquiry does not provide enough information for us to give a classification ruling on the soap leaves. Your request for a classification ruling should include a complete list of all the ingredients in the soap; the full chemical name of each component should be provided. In addition, your request should indicate the value per pound of the soap.

In your letter, you express the opinion that the soap should be classified in item 466.5595, TSUSA. Since there is no item 466.5595 in the Tariff Schedules, we assume that you intended to indicate item 466.1500, TSUSA. This provision would be correct only under the circumstances described below.

If the soap contains salts of fatty acids obtained from natural oils, fats and greases, and if the value of the soap is over 20 cents per pound, it would probably be classifiable under the provision for toilet soap: valued over 20 cents per pound, in item 466.1500, TSUSA, and would be dutiable at the rate of 0.5 cents per pound plus 4 percent ad valorem. The rate of duty for merchandise classifiable in item 466.1500 is temporarily reduced to 0.4 cents per pound plus 2.8 percent ad valorem under item 947.26.

A13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

If the soap contains salts of fatty acids obtained from natural oils, fats and greases, and if the value of the soap is not over 20 cents per pound, it would probably be classifiable under the provision for toilet soap: valued not over 20 cents per pound, in item 466.1000, TSUSA, and would be dutiable at the rate of 0.3 cents per pound plus 3.3 percent ad valorem.

Merchandise classifiable in items 466.1500, 466.1000 and 774.5595, TSUSA, which is produced is South Korea would be duty free under the Generalized System of Preferences upon compliance with all applicable regulations.

With respect to the dispenser, this is a ruling letter issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)). For the balance of the merchandise, this is an information letter issued under the provisions of Section 177.1(d)(2) of the Customs Regulations (19 C.F.R. 177.1(d)(2)).

If you require further assistance regarding the requirements of Part 177, Customs Regulations, please contact Mr. Jacob Bunin, National Import Specialist Assistant, telephone number (212) 466-5742.

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Sincerely,

John J. Martuge

Dear Mrs. Van Doorn:

In your letter dated April 12, 1985, you inquired about the dutiable status of a mixture of methylvalinonitril and toluene from the Netherlands.

A mixture of methylvalinonitril and toluene is classifiable under the provision for mixtures, not specifically provided for in item 432.1000, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 5 percent ad valorem, but not less than the highest rate applicable to any component material. No component has a higher rate.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Sincerely,

John J. Martuge
Area Director
New York Seaport

P.S. Please find included, a copy of our letter to you regarding a previous inquiry on different products.

Mr. Mark N. Wood
Inter-Trade Associates
8991 Yellow Brick Road
Baltimore, Maryland 21237

Dear Mr. Wood:

In your letter dated April 25, 1985, you inquired about the dutiable status of Tipp-Ex liquid correction fluid from West Germany. A sample was submitted.

Tipp-Ex liquid correction fluid contains titanium dioxide, polyacrylic resin, polyphosphate and water. It is sold for retail in a small plastic container which has a brush applicator attached to the inside of its cap. Tipp-Ex is used as a "white-out" to correct typographical errors.

Tipp-Ex liquid correction fluid is classifiable under the provision for synthetic plastics materials, acrylic and methacrylic acid resins, other, in item 445.0520, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 7.8 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Mrs. A. Lumpkin
J. F. Lumpkin, Custom House Broker
P.O. Box 4189
North Little Rock, AR 72116

Dear Mrs. Lumpkin:

In your letter dated May 5, 1985, on behalf of your client, Strong Manufacturing Company, you inquired about the dutiable status of Neopor from West Germany. According to the manufacturer this product is used to make cellular concrete.

Based on information contained in the manufacturer's letter as to the chemical components in this product, Neopor is classifiable under the provision for mixtures, not specifically provided for in item 432.25, Tariff Schedules of the United States, and dutiable at the rate of 4 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be butylene glycol classifiable under item 428.30, Tariff Schedules of the United States, and dutiable at the rate of 11.5 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Mr. G. Barberio, C.A., Comptroller
Devoe-Holbein (Canada) Inc.
175 Bouchard Blvd.
Dorval, Quebec H9S 1A9 Canada

Dear Mr. Barberio:

In your letter dated May 10, 1985, you inquired about the dutiable status of various chemical mixtures from Canada.

According to your inquiry these products are all used in the recovery of toxic heavy metals from waste solutions.

Vitrokele 566 products are classifiable under the provision for mixtures, not specifically provided for in item 432.25, Tariff Schedules of the United States, and dutiable at the rate of 4.1 percent ad valorem, but not less than the highest rate applicable to any component material. No component has a higher rate.

Vitrokele 524, 553 and 592 products are classifiable under the provision for mixtures, not specifically provided for in item 432.25, Tariff Schedules of the United States, and dutiable at the rate of 4.1 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be 3-aminopropyltriethoxysilane classifiable under item 425.5290, Tariff Schedules of the United States Annotated, and dutiable at the rate of 7.9 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Mr. Ken Thom
General Manager
Chemac Industries, Inc.
9-368 Industrial Avenue
Kelowna, British Columbia
Canada V1Y 7E8

Dear Mr. Thom:

In a letter dated May 7, 1985, you inquired about the tariff classification of Quick-N-Easy Deodorant manufactured in Canada.

Quick-N-Easy Deodorant is packaged in a plastic envelope which contains 28 ml. The contents of the envelope are designed to combat undesirable odors when splashed on the carpet of a car.

The breakdown of ingredients which you submitted indicates that this product contains a perfume oil, isopropyl alcohol, water and a surfactant. Only a very small amount of surfactant (.05 percent) is present in the product.

Quick-N-Easy Deodorant is classifiable under the provision for aromatic or odoriferous substances containing no alcohol or not over 10 percent alcohol by weight: artificial mixtures in item 460.8520, Tariff Schedules of the United States Annotated, and is dutiable at the rate of 5.5 cents per pound plus 4.6 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Sincerely,

John J. Martuge

Mr. G.E. Tonkin
Customs/Market Access Officer
USA Marketing Division
Department of External Affairs
125 Sussex Drive
Ottawa, Ontario K1A 0G2
Canada

Dear Mr. Tonkin:

In your letter dated May 7, 1985, on behalf of Polybrand Inc., Brantford, Ontario, you inquired about the dutiable status of rigid polyurethane foam products from Canada.

A sample of unfaced polyurethane insulation board accompanied your letter, and has been retained by this office. The sample is made of an expanded plastic material which, when compressed, does not return to its original shape. Your letter refers to four product lines made from this type of plastic: large buns or blocks, ready for fabrication, board in standard and special sizes, pre-cut parts and shapes, made to specification, and pipe covering, for nominal pipe size 1/2 inch to 44 inches.

The buns, blocks, board, and pipe coverings are classifiable under the provisions for expanded, foamed, or sponge rubber or plastics, and articles not specially provided for wholly or almost wholly of such rubber or plastics: not flexible, in item 770.3000, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 6.1 percent ad valorem.

However, your inquiry does not provide enough information for us to give a classification ruling on the pre-cut parts and shapes. Your request for a classification ruling should include a description of these products. Indicate where they will be used and what they will be used for.

Based upon the information you submitted, the pre-cut parts and shapes would probably be classified under the provision for expanded, foamed, or sponge rubber or plastics, and articles not specially provided for wholly or almost wholly of such rubber or plastics: not flexible, in item 770.3000, TSUSA, with duty at the rate of 6.1 percent ad valorem.

B6

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

With respect to the buns, blocks, board, and pipe coverings, this is a ruling letter issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1). For the balance of the merchandise, this is an information letter issued under the provisions of Section 177.1(d)(2) of the Customs Regulations (19 C.F.R. 177.1(d)(2)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Soil Seal Corporation
1111 W. Sixth Street
Los Angeles, California 90017

Dear Mr. Pope:

In your letter dated May 7, 1985, you inquired about the dutiable status of Soil Seal Concentrate from West Germany.

Soil Seal Concentrate is a surface erosion control and dust abatement product composed of an acrylic emulsion polymer, including additives.

The Soil Seal Concentrate is classifiable under the provision for synthetic plastics materials: acrylic and methacrylic acid resins, other, in item 445.0520, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 7.8 percent ad valorem.

Regarding your request for the tariff classification of your product under the Brussels Tariff Nomenclature (BTN), the United States Customs Service is not authorized to render tariff classifications under the BTN. To obtain such information, please contact the consulate or embassy of the country to which you contemplate exporting the Soil Seal Concentrate.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Mr. W. Buehrer
Traffic Manager
Toyomenka (America) Inc.
Alcoa Building, One Maritime Plaza
San Francisco, CA 94111

Dear Mr. Buehrer:

In your letter dated May 13, 1985, you inquired about the dutiable status of crude toluene from Japan.

The specifications in your letter have been examined and discussed with the technical staff of the New York Customs Laboratory. It is our opinion that the product you call crude toluene is not toluene following parameters set up by the Customs Service.

This conclusion is based on the fact that the distillation range indicated in you inquiry does not meet those of the ASTM and is therefore not a recognized grade of toluene (industrial and nitration).

For these reasons we believe the product you call crude toluene is classifiable under the provision for mixtures, not specifically provided for in item 432.10, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 5 percent ad valorem, but not less than the highest rate applicable to any component material. No component has a higher rate.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Tampa, Florida 33606

Dear Mr. Marriott:

In your letter of May 17, 1985, you inquired about the dutiable status of four effervescent tablet products containing vitamins from West Germany. The products, their composition and classifications are as follows:

Multivitamins with minerals and aspartame is composed of citric acid, sodium bicarbonate, sorbitol, tricalciumphosphate, magnesium carbonate, iron saccharade, natural colors, natural and artificial flavors, aspartame, vitamins A, thiamin, B6, niacin, pantothenic acid, biotin, C, D, E (d-alpha tocopherol), and vitamins B_2, B_{12}, and folic acid which are benzenoid derived.

Aspirin with Vitamin C is composed of sodium bicarbonate, citric acid, acetyl salicylic acid and vitamin C.

Both the multivitamin with minerals and aspartame and aspirin with vitamin C are classifiable under the provision for other benzenoid drugs in item 412.7000, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 6.9 percent ad valorem.

Vitamin C is composed of citric acid, sodium bicarbonate, sorbitol, vitamin E (d-alpha tocopherol), natural flavors, natural colors and aspartame.

Vitamin E is composed of citric acid, sodium bicarbonate, sorbital, vitamin E (d-alpha tocopherol), natural flavors, natural colors and aspartame.

Both the vitamin C and E tablets are classifiable under the provision for non-benzenoid vitamins in item 438.0100,TSUSA,... tablets ..., and dutiable at the rate of 3.3 percent ad valorem.

? Probably Benzenoid

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Mr. L. L. Barnhart
Transportation Department
Hercules Incorporated
Hercules Plaza
Wilmington, Delaware 19894

Dear Mr. Barnhart:

In your letter dated May 10, 1985, you inquired about the dutiable status of a byproduct stream from West Germany. According to your letter this commodity is a byproduct of the production of nylon 66 and that you believe it to be classifiable in item 425.5290, Tariff Schedules of the United States Annotated.

Item 425.5290, TSUSA, provides for single compounds. The product you describe in you inquiry contains bis-hexamethylenetriamine, hexamethylenediamine and other amines as well as sodium hydroxide. It is our opinion that this product is more accurately described as a mixture.

As such this mixture, when produced from non benzenoid sources, is classifiable under the provision for mixtures, not specially provided for in item 432.25, Tariff Schedules of the United States, and dutiable at the rate of 4 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be bis-hexamethylenetriamine classifiable under item 425.5290, Tariff Schedules of the United States Annotated, and dutiable at the rate of 7.9 percent ad valorem.

When produced from benzenoid sources this product is classifiable under the provision for mixtures in whole or in part of any product provided for in Schedule 4, part 1, subpart B, Tariff Schedules of the United States Annotated, in item 407.1610, TSUSA. The rate of duty is 1.7 cents per pound plus 13.6 percent ad valorem but not less than the highest rate applicable to any component material. Based on the hexamethylenediamine which is provided for by name in item 406.9200, TSUSA, the rate of duty would be 20.8 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Gowan Company
P.O. Box 5696
Yuma, AZ 85364

Dear Mr. Maehling:

In your letter dated May 21, 1985, you inquired about the dutiable status of cupric hydroxide w.p. (wettable powder) from France.

Cupric hydroxide w.p. is an agriculture fungicide formulation containing 85.55 percent cupric hydroxide, 3.0 percent sodium naphthalene formaldehyde condensate, 3.0 percent sodium diisopropyl naphthalene sulphonate, 2.0 percent hydrated silica, and 6.45 percent kaolinite clay. Sodium naphthalene formaldehyde condensate and sodium diisopropyl naphthalene sulphonate are benzenoid anionic surfactants (dispersants).

Cupric hydroxide w.p., is classifiable under the provision for benzenoid mixtures in item 413.5100, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 13.7 percent ad valorem, but not less than the highest rate applicable to any component material. In this case, none of the component materials have a rate higher than 13.7 percent.

This ruling is being issued under the provision of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Mr. E. J. Zaccone, President
The Forum Group
152 Cedar Drive
Old Tappan, NJ 07675

Dear Mr. Zaccone:

In your letter dated May 24, 1985, you inquired about the dutiable status of various cosmetic products from Korea or Taiwan.

Nail polish correcting pens containing elthyl alcohol, butyl acetate, ethyl acetate, amyl acetate and ispropyl myristate are classifiable under the provision for mixtures, not specifically provided for in item 432.25, Tariff Schedules of the United States, and dutiable at the rate of 4 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be butyl acetate classifiable under item 428.52, Tariff Schedules of the United States, and dutiable at the rate of 15.9 percent ad valorem.

Facial cleansing pads of manmade fibers are classifiable under the provision for non-woven fabrics of manmade fiber in item 355.25, Tariff Schedules of the United States. The rate of duty is 4 percent ad valorem.

The United States currently has bilateral agreements and consultation mechanisms with many countries throughout the world, under which the importation of textiles and products thereof are controlled.

To administer these agreements, textile products are grouped under category numbers used in monitoring shipments. The category designations are derived from the item numbers under which the merchandise is classified in the Tariff Schedules of the United States Annotated (TSUSA).

Facial cleaning pads of manmade fibers fall within textile category designation 669. As a product of Korea or Taiwan this merchandise is presently subject to visa requirements based upon international textile trade agreements.

Due to the changeable nature of these agreements you are advised to contact your local Customs office prior to importation of this merchandise to determine the current status of any import restraints or requirements.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

3

Import restraints are administered by the U.S. Customs Service under directives of the Committee for the Implementation of Textile Agreements, U.S. Department of Commerce, Washington, D.C. 20230. Further advice or information pertaining to those agreements may be obtained from the Chairman of that committee.

An empty cylindrical, purse type, atomizer in chief value of plastic is classifiable under the provision for articles not specially provided for, of plastic, other, other in item 774.5595, Tariff Schedules of the United States Annotated, and dutiable at the rate of 6.1 percent ad valorem.

Articles classifiable under item 432.25, TSUS, which are the products of Korea or Taiwan are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

Articles classifiable under item 774.5595, TSUS, which are the products of Korea are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Yuma, Arizona 85364

Dear Mr. Maehling:

In your letter dated June 3, 1985, you inquired about the dutiable status of non-benzenoid derived malathion from Italy.

Malathion produced from non-benzenoid sources is classifiable under the provision for esters of a marohydric alcohol in item 428.7250, Tariff Schedules of the United States Annotated, and dutiable at the rate of 4 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If a ruling letter is received after the filing of such documents, it should be brought to the attention of the appropriate Customs officer handling the transaction.

Sincerely,

John J. Martuge
Area Director
New York Seaport

Mr. David Nakamura, President
Dana Enterprises International, Inc.
1440 S. Saratoga-Sunnyvale Road
San Jose, CA 95129

Dear Mr. Nakamura:

In your letter of May 30, 1985, you asked for information about the tariff status of a "Pacifier" from Japan.

The product is a plastic artificial cigarette with holder containing small pellets permeated with "natural peppermint oil", "peppermint oil", "spearmint oil" and "L-menthol". It is to be used as a pacifier for people who have stopped smoking.

Your inquiry does not contain enough information for us to issue a tariff classification ruling. Requests for rulings must be submitted in accordance with Part 177, Customs Regulations. Your request for a classification ruling should include a manufacturer's chemical process flow chart showing exactly how and from what source the L-menthol was made.

Based upon the information you submitted, the "Pacifier" would probably be classified under the provision for other benzenoid drugs in item 412.7000, Tariff Schedules of the United States, with duty at the rate of 6.9 percent ad valorem.

If you require further assistance regarding the requirements of Part 177, Customs Regulations, please contact National Import Specialist Cornelius Reilly, telephone number (212) 466-5770.

This is an information letter, issued under the provisions of Section 177.1(d)(2) of the Customs Regulations [19 C.F.R. 177.1(d)(2)].

This merchandise may be subject to the regulations of the Food and Drug Administration. You may contact them at 5600 Fishers Lane, Rockville, Maryland 20857, telephone (202) 443-3380.

Sincerely,

John J. Martuge

Mr. Patrick J. Corboy
Austin Chemical Company, Inc.
8410 West Bryn Mawr Avenue
Chicago, IL 60631-3434

Dear Mr. Corboy:

In your letter of July 9, 1985, received in this office on July 31, 1985, you furnish additional information on the egg phosphatidyl choline you intend to import from Japan. You have requested a tariff classification ruling for this material, which you contend should be classified as a drug.

The technical information you have submitted indicates that the egg phosphatidyl choline can be used as a liposome to encapsulate drugs for controlled release, contrast media for diagnostic imaging and reagents for use in laboratory tests. It appears that the most imminent commercial potential for the liposomes is the encapsulation of diagnostic agents and encapsulation of drugs.

For a substance to be classified under the provision for crude drugs, advanced, in item 439.30, it must meet the definition of Headnote 2, Part 3 of Schedule 4, which states, in part: For the purposes of the tariff schedules, the term "drugs" means those substances whether natural or synthetic, having therapeutic or medicinal properties and chiefly used as medicine or as ingredients in medicine.

The egg phosphatidyl choline does not fall within the tariff schedule definition of drugs since it does not have therapeutic or medicinal properties. It is a surface active agent that is used as an emulsifier, and is chemically a fatty acid ester of a polyhydric alcohol.

Therefore, the egg phosphatidyl choline is classifiable under the provision for fatty substances of animal origin, not sulfonated or sulfated, fatty acid-esters, ethers, and ether-esters of polyhydric alcohol, other, in item 465.1000, Tariff Schedules of the United States Annotated. The rate of duty is 1.2 cents per pound, plus 5.3 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

520 Madison Avenue
New York, NY 10022

Dear Mr. Deahl:

In your letter dated August 1, 1985, you inquired about the dutiable status of MA-1 Catalyst from Japan.

According to your inquiry, the product is a homogenous mixture of vanadium pentoxide, silicon dioxide, chromium trioxide and boron trioxide, and is in chief value of the vanadium pentoxide.

Based on this information, MA-1 Catalyst is classifiable under the provision for mixtures of two or more inorganic compounds in chief value of vanadium compounds, in item 423.94, Tariff Schedules of the United States, and dutiable at the rate of 9.6 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Dear Mr. Winkle:

In your letter dated August 8, 1985, you inquired about the dutiable status of a pesticide from West Germany.

According to your letter the product will be used as a water treatment in cooling towers.

A mixture of 5-chloro-2-methyl-4-isothiazolin-3-one and 2-methyl-4-isothiazolin-3-one with water is classifiable under the provision for mixtures of two or more organic compounds in item 430.20, Tariff Schedules of the United States, and dutiable at the rate of 4.1 percent ad valorem, but not less than the highest rate applicable to any component compound. The highest rate applicable is for 2-methyl-4-isothiazolin-3-one classifiable under the provision for nitrogenous compounds, other, in item 425.52, Tariff Schedules of the United States, and dutiable at the rate of 7.9 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Mr. Oswaldo Anez
Aliflor Corp.
6055 Northwest 82 Ave.
Miami, Florida 33166

Dear Mr. Anez:

In your letter dated August 23, 1985, you inquired about the dutiable status of Aliflor porous ceramic growing medium from Venezuela.

Aliflor, in the shape of a pebble, is man made from clay. Fired at a temperature of 2000° F, it turns into a ceramic, forming thousands of tiny air pockets having the ability to initiate capillary action, supplying stored water to plant roots. Aliflor's high water absorption supplies water to roots on demand while maintaining excellent root aeration. When mixed with soil, Aliflor prevents compactions, promotes drainage, and prevents root rot. It's low thermal conductivity inhibits rapid soil temperature fluctuations.

For tariff purposes the term "fertilizer" is not limited to materials defined as such in scientific journals but has been held to include any substance that increases the productivity of the soil. According, Aliflor ceramic growing medium, (pebbles), is classifiable under the provision for other substances used chiefly for fertilizers in item 480.8095, Tariff Schedules of the United States, and is free of duty.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. 3661 West Ox Road
Fairfax, Va. 22033

Dear Mr. King:

In your letter dated September 17, 1985, you inquired about the dutiable status of OKO tire sealant from the United Kingdom.

According to your letter this product is introduced into the tire through the valve stem. It is said to contain synthetic fibers, monoethylene glycol, sodium nitrite and a di minimus amount of dichlorophen.

Based on the information, OKO tire sealant is classifiable under the provision for mixtures, not specifically provided for in item 432.25, Tariff Schedules of the United States, and dutiable at the rate of 4 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be the synthetic fibers classifiable under item 389.6270, Tariff Schedules of the United States Annotated, and dutiable at the rate of 8 cents per pound plus 11 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Tarrytown, New York 10591

Dear Ms. Cavorti:

In your letter dated July 8, 1985 and received by this office on September 30, 1985, you inquired regarding the tariff classification of two chemicals produced in Spain, I.S. ricinoleate and sitosteryl complex. Your ruling request included a sample of each product. These samples have been analyzed by the U.S. Customs Laboratory.

The I.S. ricinoleate is isostearyl ricinoleate, a non-benzenoid fatty ester, not sulfonated or sulfated. This product was derived from castor oil. I.S. ricinoleate is classifiable under the provision for fatty substances, not sulfonated or sulfated, and not specially provided for: esters of vegetable origin: other, in item 490.9400, Tariff Schedules of the United States Annotated (TSUSA), and is dutiable at the rate of 4 percent ad valorem.

The sitosteryl complex is beta sitosterol acetate, a carboxylic acid ester of a monohydric alcohol. It is classifiable under the provision for esters of monohydric alcohols and organic or inorganic acids (except hydrogen sulfide and hydrogen halide acids): other, in item 428.7250, TSUSA, and is dutiable at the rate of 4 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Please be advised that a copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. Mr. John Boni
Director
Wind Trading
Via Zen. 35 - P.O. Box 73
48023 Marina di Ravenna
Italy

Dear Mr. Boni:

In your letter dated October 31, 1985, you inquired about the dutiable status of an enduro safety jacket and a mo-tex overall from Italy. Samples of each article were submitted and are being returned as you requested.

The enduro jacket is a woven jacket of man-made fibers with a zippered front opening that also has snap fasteners. This jacket has one large breast pocket which is velcro-closed and two snap-fastened pockets below the waistline. At the waist level on each side are velcro straps fitted through "D" rings which can tighten the jacket around the waist. On the bottom edge of the jacket, directly under the straps, several inches of elastic are sewn into this hem. A circular metal piece with holes in it is fastened under each armhole. The long sleeves have ribbed knit cuffs.

In addition, this garment has a removable pad that extends from the bottom of the neck to cover the deltoid muscle. This pad is made of two layers of high density open cell foam which is in turn stitched to a hard piece of molded plastic. Velcro is used to hold these pads in place over each shoulder. Pads of the same materials but shaped to cover the ulna in the forearm as well as the elbow fit into velcro-closed pockets present in each sleeve.

This jacket shows special design for enduro racing. Furthermore, the pads previously described which form an entirety with the jacket, provide a very substantial protection against the hazards of enduro racing. Enduro racing is one of the forms of competitive motorcycle racing and is, for Customs purposes, a sport.

Accordingly, the enduro jacket is properly classifiable under the provision for sport, athletic, gymnastic or playground equipment, not specially provided for, in item 735.2058, Tariff Schedules of the United States Annotated, (TSUSA) and is dutiable at the rate of 5.04 percent ad valorem.

D8

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Sample number 2 is a man's full length coverall featuring a zippered front opening, 2 slash pockets below the waistline with leather trim, 2 leather patch pockets in the chest area, a leather front yoke, sleeves of leather and textile and a leather collar. You indicate that the component of chief value is the leather.

Assuming the leather is in chief value and the textile weighs over 50 percent of the weight of the article, the coverall is classifiable under the provision for other wearing apparel not specially provided for, of leather, in item 791.7484, TSUSA, and dutiable at the rate of 6 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Ms. Laura Cobb
Assistant Buyer
ERO Industries, Inc.
5940 W. Touhy Avenue
Chicago, Illinois 60648

Dear Ms. Cobb:

In your letter dated December 4, 1985, you inquired about the dutiable status of a polypropylene webbed strap for use with a knee board from Taiwan.

Your submitted sample is a 2 inch wide woven strap that is 50-1/2 inches long. One end of this strap has a 1-1/4 inch deep loop. Starting 5 inches from this end, 21-1/4 inches of foam padding covered with a knit fabric are sewn securely onto one side of the strap and overlap the other side. The other side of the strap has a 14-1/2 inch long strip of male velcro starting 14 inches from the strap end with the 1-1/4 inch loop. On the same side that has the male velcro, a 14-7/8 inch strip of female velcro is securely sewn. The space between the male and female velcro is 4-1/2 inches. The other end of the female velcro overlaps the seam of a 3-5/8 inch loop at the opposite end of the strap.

When this strap is used with the knee board, the 1-1/4 inch loop is permanently attached to a bracket on one side of the knee board. The free end of the strap is inserted through another bracket on the other side of the board. The strap is then folded back toward the permanently mounted side. Since the velcro strips are on top, when the strap is folded, they can be adjusted to accommodate users of different sizes. The foam faces down towards the board and somewhat cushions the user. The user rides the board in a kneeling position so that the strap passes over the user's thighs. Both hands are free to grasp a tow rope pulled by a boat. The strap holds the user securely to the board while the user is being pulled, but releases quickly in the event of an accident such as the board flipping over.

Riding the knee board is a sport or athletic activity. This strap is dedicated to use on the knee board. Furthermore, the sole use of this strap is with the knee board. In addition, the knee board could not be used without the knee strap because the user would be pulled off the board. Consequently, this strap functions as an integral constituent part of the knee board.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D10

Articles classifiable under item 705.8300, TSUSA, which are the products of Macau and Taiwan are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If the entry documents have already been filed, this ruling should be brought to the attention of the appropriate Customs officer handling the transaction.

Dear Mr. Simon:

In your letter dated January 3, 1986, on behalf of your client, Impulse Ltd., you inquired about the dutiable status of a time machine racer from Hong Kong.

The time machine racer is a toy car, approximately 5-1/4 inches long and 1-1/2 inches high, with a friction operated motor. In the hood of the car is a stop-watch module which measures the length of time, in seconds and fractions of a second, it takes for the car to reach a certain point. The timing mechanism starts when the car is released and stops when the front bumper strikes a solid object such as a wall.

The time machine racer is classifiable under the provision for toys, not specially provided for, having a friction or weight operated motor, in item 737.9515, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 8.3 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If the entry documents have already been filed, this ruling should be brought to the attention of the appropriate Customs officer handling the transaction.

Dear Mr. Simon:

In your letter of January 9, 1986, you requested, on behalf of your client, Impulse, Ltd., the dutiable status of an article called "Butterfly Magic." The country of origin is not known.

Butterfly Magic consists of a large multicolored plastic butterfly, a doll about six inches high, a comb for the doll's hair, a paper pull-apart story and several plastic accessories such as a scepter.

The butterfly figure can be removed from its small stand. The doll can be placed on the back of the butterfly or it can be played with separately. The child, playing with the doll, butterfly, and accessories, can read the story which is relevant to them.

The various components are separately classifiable. The butterfly figure is classifiable under the provision for other toy figures of animate objects in item 737.40, Tariff Schedules of the United States (TSUS).

The doll is classifiable under the provision for other dolls, and parts of dolls including doll clothing, in item 737.24, TSUS.

The toy accessories, such as the scepter, are classifiable under the provision for toys, and parts of toys, not specially provided for in item 737.95, TSUS. The colorfully decorated comb, the toothed portion of which measures about 1-1/2 inches by less than one inch, is also classifiable in 737.95, TSUS, as a toy acccessory, chiefly used for amusement. Headnote 1 of Schedule 7, part 5, subpart E of the Tariff Schedules noted.

The duty rate for the above articles is determined by the country of origin. Articles classifiable under items 737.40 and 737.95, TSUS, which are products of most favored nations, are dutiable at the rate of 8.3 percent ad valorem. Articles classifiable under tiem 737.24, TSUS, which are products of most favored nations, are dutiable at the rate of 12.7 percent ad valorem. Products of certain Communist controlled nations are dutiable at the rate of 70 percent ad valorem. Products of

D13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

certain developing countries may be entitled to duty concessions. A complete listing of countries may be found in General Headnote 3, Tariff Schedules of the United States (19 U.S.C. 1202).

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Sincerely,

John J. Martuge

Mr. Jeff A. Murray
Air Import Manager
Gar International
140 Main Street
El Segundo, Ca 90245

Dear Mr. Murray:

In your letter dated January 6, 1985, on behalf of Allergan Pharmaceuticals, you inquired about the dutiable status of levobunolol hydrochloride from the Netherlands.

Levobunolol hydrochloride is a benzenoid anti-adrenergic, beta-blocker drug. Scientific literature indicates that it has beta-sympatholytic activity.

Levobunolol hydrochloride is classifiable under the provision for benzenoid autonomic drugs, other, in item 412.0400, Tariff Schedules of the United States Annotated, and dutiable at the rate of 8.2 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

This product may be subject to the regulations of the Food and Drug Administration. You may contact them at 5600 Fishers Lane, Rockville, Maryland 20857, telephone number (202) 443-3380.

Sincerely,

John J. Martuge

Mr. Nick Kato
Manager - Chemicals
Amsak Corporation
41 Orchard Street
P.O. Box 517
Ramsey, NJ 07446

Dear Mr. Kato:

In your letter of January 6, 1986, you requested the tariff classification of "Kycizer 4" (ortho/para Toluene sulfonamide) from the Republic of Korea.

"Kycizer 4" is a benzenoid derived mixture of toluene sulfonamide in a ratio of 40 percent ortho and 60 percent para.

"Kycizer 4" is classifiable under the provision for benzenoid products chiefly used as plasticizers in item 409.3450, Tariff Schedules of the United States Annotated, and dutiable at the rate of 0.3 cent per pound plus 17.7 percent ad valorem.

Articles classifiable under item 409.3450, TSUSA, which are the products of the Republic of Korea are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents at the time this merchandise is imported If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

This merchandise may be subject to the regulations of the Environmental Protection Agency, Office of Pesticides and Toxic Substances. You may contact them at 401 M. Street, S.W., Washington, D.C. 20460, telephone number (800) 424-9085.

Ms. Peggy McAvoy
F.W. Myers & Co. Inc.
RFD., Wellesley Island
Alexandria Bay, New York 13607

Dear Ms. McAvoy:

In your letter dated January 10, 1986, you inquired on behalf of Insul/Crete Co., Inc. of Ontario, Canada, about the dutiable status of an Insul/Crete Exterior Insulation System from Canada. You submitted descriptive literature and samples of some of the products which comprise the System.

The modifier for cement has been analyzed by our laboratory as an aqueous suspension of polybutyl acrylate, a non-benzenoid acrylic acid resin. This resin is classifiable under the provision for synthetic plastics material, acrylic and methacrylic acid resins, other, in item 445.0520, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 7.1 percent ad valorem.

The laboratory analysis indicates that Flex Float Finish material is an aqueous suspension of gravel and polybutylacrylate. It is a non-benzenoid acrylic acid resin, classifiable under the provision for synthetic plastics material, acrylic and methacrylic acid resins, other, in item 445.0520, TSUSA, and dutiable at the rate of 7.1 percent ad valorem.

The fiberglass reinforcing mesh is an open, leno woven textile fabric of man-made glass fiber yarns. The mesh is approximately 1/4 inch square, and has been lightly coated with an acrylic plastic substance which helps stabilize the mesh, protects the glass yarns from the alkalinity in the cement, and imparts a noticeable stiffness to the fabric. The fiberglass reinforcing mesh is classifiable under the provision for woven fabrics, of man-made fibers, coated with less than 70 percent by weight of rubber or plastics materials, in item 355.8220, TSUSA, and dutiable at the rate of 2 cents a pound, plus 9.6 percent ad valorem.

The chopped fiberglass strands, 1/2 inch long, are added to the base coat material, sand and cement to impart strength to the base coat. The strands are treated for protection against alkalinity. The fiberglass strands are classifiable under the provision for glass in bulk, in item 540.7100, TSUSA, and dutiable at the rate of 6.8 percent ad valorem.

E3

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

The zink (zinc) control joints are used in construction of the exterior insulation system employing stucco. The joints are 10 feet in length, are placed in intervals of no more than 20 lineal feet, and are used to prevent cracking in the panel that is normally associated with stucco. The zinc joints are classifiable as articles of zinc, not coated or plated with precious metal, in item 657.8000, TSUSA, and dutiable at the rate of 6.2 percent ad valorem.

The iron or steel wire screen-like control joints, used in construction of the exterior insulation system employing stucco, are classifiable under the provision for articles of iron or steel, not coated or plated with precious metal: other articles, in item 657.2590, dutiable at the rate of 6.2 percent ad valorem.

The nylon or other plastic screws trade-named Fastacks, as well as individual plastic washers, are classifiable under the provision for articles not specially provided for, of rubber or plastics, other in item 774.5595, TSUSA, and dutiable at the rate of 5.7 percent ad valorem.

The rigid vinyl trim beads, in lengths of ten feet, and having slots, are classifiable under the provision for articles not specially provided for, of rubber or plastics, other, in item 774.5595, TSUSA, and dutiable at the rate of 5.7 percent ad valorem. If this trim does not have slots, it is classifiable under the provision for film, strips....and other profile shapes...of plastics...other, other, in item 771.5500, TSUSA. The rate of duty for this unslotted trim is 6.3 percent ad valorem.

The articles trade-named Fas'ners are nylon or other plastic expandable anchor shells with threaded nails which are used to permanently secure Styrofoam Rigid Insulation Board to substrates. The nails have slotted heads and have unthreaded, sharply pointed, tapered ends.

The Fas'ners, consisting of the plastic expandable anchor shell and threaded nail, constitute an entirety for tariff purposes when imported together, and are classifiable according to the component material of chief value. Thus, if the Fas'ners are in chief value of iron or steel, they are classifiable under the provision for other articles of iron or steel, not coated or plated with precious metal, in item 657.2590, TSUSA, dutiable at the rate of 6.2 percent ad valorem. If the Fas'ners are in chief value of the plastic, they are classifiable under the provision for articles not specially provided for, of rubber or plastics, other, in item 774.5595, TSUSA, dutiable at the rate of 5.7 percent ad valorem.

Ms. Dorothy D. Negard
Dorell Imports
Lakeview Drive
RFD 2 Box 186
Yorktown Hgts., NY 10598

Dear Ms. Negard:

In your letter of January 14, 1986, you requested the tariff classification of various gloves and mittens from Norway. Noting that the descriptive literature shows different gloves from the samples you submitted, we can only reply to the classification of the samples, which are being returned as you requested.

Style 82 is a cross-country ski glove with unlined nappa leather palm and fingers. The back of the hand and thumb are made of a ribbed knit nylon/cotton fabric. Open mesh fourchettes extend from the inner side of the index finger to the inner side of the little finger. Leather reinforcement is sewn over the inside seam of the thumb as well as the side seam and outside seam of the index finger. A one inch wide elastic strap with a velcro closure secures this glove around the wrist.

Style 82A is identical to style 82 except for 2 features. In the first place, style 82A has leather fourchettes. Secondly, this glove has a thin layer of foam insulation bonded to a 100% merino wool knit lining that is used underneath the fabric areas of this glove. Nevertheless, this glove is still lightweight and the back of the hand is still of a breathable material.

Style 82B is similar to style 82A except for the fact that style 82B is completely lined with a thin layer of knit pile 100% merino wool fabric. The character of this lining is such that this glove, also, is lightweight with a breathable back.

Style 102A is a winter bicycle glove with nappa leather palm and fingers. The back of the hand and thumb along with the fourchettes use a knit nylon/cotton fabric. The palm is padded on the outside and covered with leather. Leather reinforcement is sewn over the inside seam of the thumb as well as the side seam and outside seam of the index finger. This glove is lined with the same material in the same area as style 82A. You state that this glove also has a Goretex interlining. A one inch wide elastic strap with a velcro closure secures this glove around the wrist.

E6

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

You describe style 83 as a roller ski glove. This glove has a leather palm and fingers. The back of the hand and the thumb as well as the fourchettes are made of an open mesh fabric. A piece of leather that is roughly "T" shaped is sewn over the mesh so that the top of the "T" is across the knuckles. The bottom of the stem of the leather "T" holds the female portion of the velcro closure that secures the one inch wide elastic strap wrist-tightener. In addition, leather reinforcement is sewn over the inside seam of the thumb as well as the side seam and outside seam of the index finger.

The sport of roller skiing is practiced in the summer, generally over the same slopes that are used for alpine skiing in winter. Roller skis, however, permit the participant to progress down the grass covered slopes in a manner similar to an alpine skier. Since this glove is unlined, the leather palm would provide a good grip for the roller skier. The mesh back provides the greater ventilation needed for a summer sport. The "T" on the back of the hand not only helps the glove to retain its shape so the palm cannot bunch up and cause blisters, but also protects the user's hand from abrasion in the event of a fall. The leather reinforcement on the index finger and thumb protect these seams from wear or splitting resulting from the use of the poles. Based on the cumulation of these features, style 83 shows design for use in the sport of roller skiing.

816902

You describe style 87B as a mountain hiking sport mitten. This mitten has a goat leather palm and thumb with a woven man-made fabric back and an applied woven man-made cuff. The wrist is elasticized and has a hook and clasp. This mitten is boa lined, except for the applied cuff. This mitten has no features which show design for use in sports to distinguish it from traditional winter gloves worn for warmth.

You describe style 88B as a sport hiking mitten. This mitten has a goat leather palm and thumb, man-made fabric back, leather reinforcement over the inner side seam, velcro closed elastic strap, and is fully lined. A textile label on the elastic strap ornaments this mitten. This mitten has no features which show design for use in sports to distinguish it from traditional winter gloves worn for warmth.

Style 90D, described in your brochure as a ski glove, is an all goat leather glove that is also fully lined. This glove has a 4 inch gauntlet with elastic gathers on one side and a zipper closure on the back to hold it closely around the wrist. Leather reinforcement is sewn across the palm. A hook and clasp is placed toward the end of the gauntlet.

Style 92D, described in your brochure as a ski glove, is an all goat leather, fully lined mitten with leather reinforcement across the palm. This mitten has a 4 inch gauntlet with elastic gathers and a

E7

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

zipper closure in the side seam to hold it closely around the wrist. A hook and clasp is placed toward the end of the gauntlet.

In the case of Stonewall Trading Company v. United States, 64 Cust. Ct. 482, C.D. 4023 (1970), the Customs Court held that certain vinyl gloves were properly classifiable under the provision for other ski equipment, in item 734.97, TSUS (now item 735.06, TSUS). These gloves were found to have the following characteristic:

1. a hook and clasp to hold the gloves together;

2. an extra piece of vinyl stitched along the thumb portion to meet the stress caused by the flexing of the knuckles when the skier grasps the ski pole;

3. an extra piece of red colored vinyl with padding reinforcement and inside stitching, which is securely stitched across the middle of the glove where the knuckles bend and cause stress; and

4. cuffs with an elastic gauntlet to hold the gloves firm around the wrist, so as to be waterproof, and to keep it securely on the hand.

Style 90D and 92D lack an extra piece of vinyl stitched along the thumb portion and any discernible padding reinforcement across the back of the knuckles. Noting the absence of these features, styles 90D and 92D are not properly classifiable under the provision for other ski equipment in item 735.06, TSUS.

Consequently, Styles 90D and 92D are classifiable under the provision for gloves of leather, men's lined, not seamed wholly or in part by hand, valued over $26 per dozen pairs, in item 705.5800, Tariff Schedules of the United States Annotated (TSUSA). The rate of duty is 17.3 percent ad valorem.

Schedule 7, Part 1, Subpart C, Headnote 2(b) states that any leather component shall be disregarded unless the area of such leather is over 50 percent of the external surface area of the gloves exclusive of applied cuffs.

Accordingly, if the leather covers more than 50 percent of the surface area exclusive of applied cuffs, styles 87B and 88B are classifiable under the provision for leather gloves, in item 705.5800, TSUSA, and are dutiable at the rate of 17.3 percent ad valorem. If the leather covers less than 50 percent of the surface area, style 87B is classifiable under the provision for gloves of man-made fibers, not knit, in item 704.9000, TSUSA. The rate of duty is 14 cents per pound plus 15.7 percent ad valorem. Style 88B would be classifiable under the provision for gloves of man-made fibers, ornamented, in item 704.3215, TSUSA, and is dutiable at the rate of 21.7 percent ad valorem.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

816902

E8

Styles 82, 82A, and 82b are classifiable under the provision for cross-country ski equipment in item 735.0460, TSUSA, and are dutiable at the rate of 4.2 percent ad valorem.

Style 83, the roller ski glove, is classifiable under the provision for skis and ski equipment...other: other: in item 735.0660, TSUSA, and is dutiable at the rate of 5.9 percent ad valorem.

Style 102A, the bicycle glove, is classifiable under the provision for ...other gloves, not provided for elsewhere in this subpart, specially designed for use in sports, in item 735.0700, TSUSA, and is dutiable at the rate of 5.2 percent ad valorem.

This ruling is being issued the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

For your information, the samples you submitted are not legally marked for the purpose of Section 304 of the Tariff Act of 1930, as amended [19 U.S.C. 1304]. One of each pair of gloves should be marked with a sewn in label showing the country of origin.

Sincerely,

John J. Murtagh

Mr. M. Vogt, City Manager
Fritz Companies, Incorporated
1722 QQ South Glenstone
Springfield, Missouri 65804

Dear Mr. Vogt:

In your letter dated January 13, 1986 on behalf of your client, Foreign Accents, you inquired about the dutiable status of U.C. Anti-glare spray from South Africa.

According to your letter the product contains trichloroethane, xylene, polyethylene wax, acrylic resin and the propellant Freon 22.

U.C. Anti-glare is classifiable under the provision for mixtures, not specifically provided for in item 432.10, Tariff Schedules of the United States, and dutiable at the rate of 5 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be trichloroethane, classifiable under item 429.47, Tariff Schedules of the United States, and dutiable at the rate of 18 percent ad valorem.

Your letter requests that we review item 429.51, TSUS, as a possible area for classification. Item 429.51, TSUS, is a provision for single compounds. Since U.C. Anti-glare is a mixture, it cannot be classified in item 429.51, TSUS.

Please note that this product may be in violation of the U.S. Environmental Protection Agency regulations. For information concerning this matter, you may contact them at:

U.S. Environmental Protection Agency
Office of Pesticides and Toxic Substances (EN342)
Washington, D.C. 20460

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Kettlitz-Chemie Gmbh & Co. KG
Postfach 80, D-8859 Rennertshofen
West Germany

Dear Sirs:

In your letter dated November 8, 1985 and received on January 24, 1986, you inquired about the dutiable status of certain chemicals from West Germany.

According to your earlier letter and information received from Akron Chemical Company these products are used in rubber processing.

Based on the information contained in your letter of November 8, 1985 concerning the chemical components of this product, Dispergator FL is classifiable under the provision for mixtures, not specifically provided for in item 432.25, Tariff Schedules of the United States, and dutiable at the rate of 3.9 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be classifiable under item 490.32, Tariff Schedules of the United States, and dutiable at the rate of 4.4 percent ad valorem.

Dispergator KB, OX and Kezadol GR are classifiable under the provision for mixtures, not specifically provided for in item 407.16, Tariff Schedules of the United States, and dutiable at the rate of 1.7¢ per pound plus 13.6 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be classifiable under item 402.36, Tariff Schedules of the United States, and dutiable at the rate of 0.6¢ per pound plus 17.3 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

P.O. Box 32067
Cincinnati, OH 45232

Dear Mr. Schmidt:

In your letter dated January 21, 1986, you inquired about the dutiable status of a product from France.

The product is a mixture of approximately 25 percent crude copper phthalocyanine, 75 percent sodium chloride and a small amount of calcium chloride.

This mixture is classifiable under the provision for mixtures in whole or in part of any of the products provided for in Schedule 4, part 1 subpart B in item 407.1610, Tariff Schedules of the United States Annotated, and dutiable at the rate of 1.7 cents per pound plus 13.6 percent ad valorem but not less than the highest rate applicable to any component material. Based on the crude copper phthalocyanine, which is dutiable in item 406.4400, TSUSA, the rate of duty would be 18.1 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

New Zealand Consultate General
630 Fifth Avenue
New York, NY 10111

Dear Mr. Kappatos:

In your letter dated January 23, 1986, on behalf of New Zealand Perlite Ltd., you inquired about the dutiable status of various decorating coating products from New Zealand. Technical information was submitted for our review.

The Granular Marble products are 100 percent acrylic resins mixed with marble aggregates, and are used for exterior coating to decorate and protect concrete and masonry. They are available for trowel and spray applications.

Featurecoat is a dry blend decorative coating material comprising fine fillers, inert fibers, pigments and polyvinyl alcohol binders. It is available for trowel or roller applications.

Coralcote ceiling spray is a dry blended decorative material incorporating fine fillers, inert fibers, pigments and polyvinyl alcohol binders suitable for spray application.

Rivinterior decorative plaster comprises acrylic co-polymer resins, and fine fillers, inert fibers and pigments. It is available for trowel, roller or spray applications.

Rivotex decorative plaster comprises acrylic co-polymer and graded natural aggregates, inert fibers and pigments, and is made available for spray or trowel applications.

Perlcast, an exterior and interior coating for decorating and protecting concrete and masonry walls, is 100 percent acrylic and very fine graded marble suitable for spray application.

The Granular Marble, Rivinterior, Rivotex and Perlcast are classifiable under the provision for synthetic plastics material, acrylic and methacrylic acid resins, other, in item 445.0520, Tariff Schedules of the United States Annotated (TSUSA). The rate of duty is 7.1 percent ad valorem.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

F1

Featurecoat and Coralcote are classifiable under the provision for synthetic plastics material, vinyl resins, polyvinyl alcohol resins, in item 445.4200, TSUSA, dutiable at the rate of 3.3 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

As you requested, we are returning the data sheets and product information.

Sincerely,

John J. Martuge

Dear Ms. Zirkle:

In your letter dated January 28, 1986, you inquired about the dutiable status of chlorothiazide and methyldopa in 250 mg. tablet forms from Shanghai, China.

Chlorothiazide is a benzenoid diuretic drug.

Chlorothiazide in tablet form is classifiable under the provision for benzenoid drugs, other:, it is a Product provided for in The Chemical Appendix to the Tariff Schedules in item 412.6700, Tariff Schedules of the United States Annotated, and dutiable at the rate of 7.8 percent ad valorem.

Methyldopa is a benzenoid antihypertensive drug.

Methyldopa in tablet form is classifiable under the provision for benzenoid autonomic drugs, other:, it is a Product provided for in The Chemical Appendix to the Tariff Schedules in item 412.0200, Tariff Schedules of the United States Annotated, and dutiable at the rate of 9.7 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

This merchandise may be subject to the regulations of the Food and Drug Administration. You may contact them at 5600 Fishers Lane, Rockville, Maryland 20857, telephone (202) 443-3380.

2436 Bagley Ave.
Detroit, Michigan 48216-1885

Dear Mr. Otromke:

In your letter dated January 23, 1986 you inquired on behalf of your client, Colortech Inc., about the dutiable status of a color concentrate from Canada.

The import under consideration is a color concentrate consisting of 40 percent titanium dioxide, 30 percent calcium carbonate, and 30 percent linear low density polyethylene resin. This concentrate is used by the plastic industry to color plastic film (shopping bags, garbage bags) or plastic objects (bottles, toys). We assume the titanium dioxide pigment is ground to 325 mesh size.

Titanium Color concentrates are classifiable under the provision for titanium dioxide pigments in item 473.7000, Tariff Schedules of the United States, and dutiable at the rate of 6.2 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Sincerely,

Brampton, Ontario, Canada L6T 3V1

Dear Ms. Crowdis:

In your letter dated January 30, 1986, you inquired about the dutiable status of "19900 Black Color Concentrate" from Canada.

The prospective import, "19900 Black Color Concentrate" consists of 40% carbon black, approximately 10-15% calcium carbonate, 42-48% polyethylene resin, 0.5-1.5% titanium dioxide, 0.5-1.5% red iron oxide, and 0.5-1.5% additional mixed pigments. The import will be used to color shopping bags, garbage bags, bottles, and toys.

"19900 Black Color Concentrate" is classifiable under the provision for pigments, not specially provided for in item 473.8820, Tariff Schedules of the United States, and dutiable at the rate of 3.2 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Mr. Richard E. Chorey
R.G. Barry Corporation
P.O. Box 129
Columbus, Ohio 43216

Dear Mr. Chorey:

In your letter dated January 30, 1986, you inquired about the dutiable status of a woman's slipper, product of Mexico.

Inspection of the unnumbered sample submitted with your inquiry indicates that this is a woman's all terry fabric slipper, closed toe, closed back slip-on with elastic fabric binding at the topline, foam backed tricot lining, terry/foam insole, and a stitched-on unit molded rubber/plastic shell sole. It is noted that the sides of the shell sole overlap the upper by 1/4 inch and this would be considered a foxing-like band for Customs purposes.

Therefore, your sample slipper as presently constructed is classifiable under the provision for footwear which is over 50% by weight of fiber, rubber and plastic and over 10% by weight of rubber and plastic; which has a foxing-like band almost wholly of rubber or plastic applied or molded at the sole and overlapping the upper; and which is, we assume, valued for Customs purposes not over $3.00 per pair, in item 700.6400, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 48 percent ad valorem.

With reference to the question raised in your letter, if the band on the sole overlapped the upper by quite a bit less than 1/4 inch and the rest of the construction remained the same, classification would probably be in item 700.5900, TSUSA, and dutiable at the rate of 37.5 percent ad valorem. The "1/4 inch" rule in TD83-116 would not necessarily apply since your slipper does not have the type of unit molded sole contemplated.

With respect to your submitted sample, this is a ruling letter issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)]. For the balance of the merchandise, this is an information letter issued under the provisions of Section 177.1(d)(2) of the Customs Regulations [19 C.F.R. 177.1 (d)(2)].

Mr. Charles A. Fust
P.O. Box 49887
Sarasota, Florida 33578

Dear Mr. Fust:

In your letter dated January 31, 1986, you inquired on behalf of Heritage Church and Missionary Fellowship, Inc., about the dutiable status of a doll from the Peoples Republic of China.

A sample of a talking Susie Moppet doll was submitted with the inquiry. The doll has a plastic molded head surrounded by yellow yarn hair. The body is composed of textile material, whereas, the hands are made of molded plastic. The arms and legs are stuffed with polyester fiber. The torso contains a talking mechanism which is activated by pressing the doll's stomach. The mechanism is surrounded by solid polyurethane foam on the front and back, and fiber filling on the sides. The doll is wearing a red dress with white lace trim and a white ruffled slip. Shoes and socks are worn on the feet.

The doll is not considered to be stuffed. In order to be considered "stuffed" for tariff classification purposes, such merchandise must be "crammed full" or stuffed to distension with filler material. The type of material used to accomplish the "stuffing" or filling out of the "skin" must be traditional type filling materials. The shape of the torso is not imparted by the stuffing but rather by the talking mechanism. The presence of the device is readily apparent to the touch.

The Susie Moppet doll is classifiable under the provision for other dolls in item 737.24, Tariff Schedules of the United States, and dutiable at the rate of 12.7 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Ms. Gail T. Cumins
Sharretts, Paley, Carter and Blauvelt, P.C.
80 Broad Street
New York, NY 10004

Dear Ms. Cumins:

Your letter of February 12, 1986, on behalf of Canon U.S.A. Inc., requested this office to rule upon the tariff classification of a camera carrying bag from Taiwan.

The sample submitted is a "waist bag" type of accessories carrying bag which has an exterior surface consisting entirely of woven nylon with the exception of plastic piping and a small triangular plastic ornament. The carrying strap is also woven from man-made fibers. The interior has one central compartment, a small accessory case and an a full length side pocket with a velcro flap closure. The bag is closed by means of a nylon coil zipper. It appears that the bag is in chief value of man-made textile materials.

Although you claim that the carrying bag is specifically designed, marketed and retailed with the AS-6 camera we do not believe that this bag is of a "type ordinarily sold at retail "with its contents, the camera and its accessories. Furthermore, it cannot be considered an entirety with the camera since the bag retains its own identity. Whether imported with a camera or alone, it would be separately classifiable.

The carrying bag is classifiable under the provision for luggage, of other textile materials, other, in item 706.4152, Tariff Schedules of the United States. The rate of duty is 20 percent ad valorem.

Tariff item number 706.4152 falls within textile category designation 670-L. As a product of Taiwan this merchandise is currently subject to visa and quota restraints based upon international textile trade agreements.

Due to the changeable nature of these agreements you are advised to contact your local Customs office prior to importation of this merchandise to determine the current status of any import restraints or requirements.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Mr. William Becker
Sporto Corp./Gold Seal Rubber Co.
65 Sprague Street
Boston, Mass. 02137

Dear Mr. Becker:

In your letter of February 13, 1986, you requested this office to rule on the tariff classification of a woman's casual shoe, product of the Peoples Republic of China.

Inspection of the sample submitted with your inquiry, Style No. W2100-00, indicates that this is an unlined woman's A-line fabric casual, with elastic at the top of the vamp, heel tab, and a rubber calendered sole which appears to have been cemented and vulcanized to the upper. When we cut this sample across the vamp, it was apparent that this shoe has a "rolled sole" construction which means that the sole is cut from a flat sheet of calendered rubber which is forced up and over the fabric upper at the edges by the application of heat and pressure during its attachment to the upper.

It appears that the "roll up" or overlap on your sample is more than 1/4 inch, and this would be considered a foxing-like band. Customs Headquarters has ruled that while a vertical overlap of less than 1/4 inch in unit molded footwear is usually presumed not to constitute a foxing-like band, this would not apply to rolled sole footwear since a different construction method is involved. Even if the overlap on this rolled sole footwear were less than 1/4 inch, it would still be considered a foxing-like band.

Therefore, your sample is classifiable under the provision for footwear which is over 50% by weight of fiber, rubber and plastic and at least 10% by weight of rubber or plastic; which has a foxing-like band almost wholly of rubber or plastic applied or molded at the sole ansd overlapping the upper; and which is, we assume, valued for Customs purposes not over $3.00 per pair, in item 700.6400, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 48 percent ad valorem. If valued for Customs purposes over $3.00 but not over $6.50 per pair, classification would be in item 700.6700, TSUSA, and dutiable at the rate of 37.5 percent ad valorem, plus 90 cents per pair.

F14

This ruling is being issued under the provision of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Mr. Robert Reid
General Manager
Alaska Pro-Chemicals
Box 4-2934
Anchorage, Alaska 99509

Dear Mr. Reid:

In your letter dated February 10, 1986, you inquired about the dutiable status of "Mosquito Vapes" and vape refill mats from Japan.

Your letter indicates there are two different types of vape sets that you are interested in. One type is for household indoor use; the other is referred to as "car vape" used for autos, boats, and the like. A sample of model A-1003 was submitted with your inquiry. It consists of a small portable, convector heater which operates on a 120 volt circuit. Attached is an electrical line cord with a male plug. A heating element within the device rests under a grille-like feature. A mat impregnated with a mosquito repellent is inserted through the grille opening. The heater contains a very-low heat energy device to warm the mat and release the repellent.

The car vape, you state, is identical in principle to model A-1003, differing only in its cosmetic design. It operates on 12-24 volts, and is designed for other than household use.

The merchandise will be imported as kits, consisting of a convector heater and 12 mats impregnated with mosquito repellent. Refill packages of 30 mats will also be imported.

The household convector heater, whether imported with or without impregnated mats is classifiable under the provision for electro-thermic kitchen and household appliances, in item 684.2080, Tariff Schedules of the United States, and dutiable at the rate of 5.7 percent ad valorem.

The car vape, whether imported with or without impregnated mats is classifiable under the provision for electrical articles and electrical parts of articles, not specially provided for: Other: Other, in item 688.4280, Tariff Schedules of the United States, and dutiable at the rate of 4.1 percent ad valorem.

Your inquiry does not provide enough information for us to give a classification ruling on the allethrin packets/mats when imported separately. Your request for a classification ruling should

62

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

include a complete list of all chemical compounds including the inert ingredients. Please furnish the name of each compound using the Chemical Abstract Service terminology, the percentage of each in the mixture, and if possible its use in the mixture.

If you require further assistance regarding the above requirements please contact National Import Specialist Joseph Di Maria at area code 212-466-5769.

With respect to model A-1003 and the car vape, this is a ruling letter issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)]. For the balance of the merchandise, this is an information letter issued under the provisions of Section 177.1(d)(2) of the Customs Regulations [19 C.F.R. 177.1(d)(2)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Mr. J. M. Cruz
Hercules Incorporated
Hercules Plaza
Wilmington, DE 19894

Dear Mr. Cruz:

In your letter of February 28, 1986 you requested the tariff classification of a product of the Netherlands called Resin Oil, C-9 Stream Resin Feed. In subsequent letters dated March 11, 1986 and March 26, 1986 you furnished additional information and you state that the product is also known as Super Heartcut Distillate Resin Oil.

The breakdown which you have furnished does not identify all of the components of the product. However, based on the components which are identified, it appears that the product is a mixture of hydrocarbons. A number of these hydrocarbons are classified in Schedule 4, part 1, subpart B, Tariff Schedules of the United States Annotated (TSUSA). Headnote 1, Schedule 4, part 10, TSUSA reads as follows:

> 1. Any product described in this part and also in part 1 of this schedule is classifiable in said part 1, except fuel oils, motor fuel, and lubricating oils and greases, containing by weight not over 25 percent of any product described in said part 1.

Resin oil, C-9 Stream Resin Feed is classified under the provision for mixtures in whole or in part of any of the products provided for in Schedule 4, part 1, subpart B, TSUSA, in item 407.1910. The rate of duty is 1.7 cents per pound plus 13.6 percent ad valorem but not less than the highest rate applicable to any component material. Depending on the value, a higher rate of duty could be 0.6 cent per pound plus 17.3 percent ad valorem from item 402.3600, TSUSA, based on the alkylbenzene content.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the

Mr. Daniel Mardinger
President
Monster Cone Inc.
P.O. Box 81
Pointe Claire/Dorval
Quebec, Canada H9P 2K5

Dear Mr. Mardinger:

In your letter dated March 3, 1986, you inquired about the dutiable status of an electric ice cream cone baker, cone mix and cones from Canada.

A photograph of a "Monster" electric cone baker, and literature concerning the cone mix (batter) and cones were submitted with your inquiry. The cone baker is an electro-thermic appliance resembling a waffle iron, except that the depth of the heads are smaller. The device contains a thermostat with an off and on setting, and is used in making ice cream cones.

The "Monster" cone mix consists of flour, sugar (approximately 30 percent), satured soya oil shortening, eggs, vanilla and almond flavors, and glucose. The "Monster" cones (ice cream cones) are made from the above mentioned mix.

The "Monster" cone mix is classifiable under the provision for other flour mixes in item 183.0100, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 10 percent ad valorem. The product containing 30 percent sugar by weight, is subject to quota restrictions in item 958.17, TSUS.

However, your inquiry does not provide enough information for us to give a classification ruling on the "Monster" cone baker and the "Monster" cones. Your request for a classification ruling should include the electric cone baker's dimensions and weight. For the cones, a complete description of the manufacturing process is necessary.

Based upon the information you submitted, the "Monster" electric cone baker would probably be classified under the provision for other portable electro-thermic kitchen and household appliances, in item 684.2040, Tariff Schedules of the United States, with duty at the rate of 5.7 percent ad valorem. The "Monster" cones would probably be classified under the provision for biscuits, cake, cakes, wafers and similar baked products ..., in item 182.2000, Tariff Schedules of the United States, with duty at the rate of 0.4 percent ad valorem.

G6

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

With respect to the "Monster" cone mix, this is a ruling letter issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)]. For the balance of the merchandise, this is an information letter issued under the provisions of Section 177.1(d)(2) of the Customs Regulations [19 C.F.R. 177.1(d)(2)].

Mr. Robert Lumpert
Max Felchlin Inc.
Main Street 63
CH-6430, Schwyz, Switzerland

Dear Mr. Lumpert:

In your letter dated March 4, 1986, you inquired about the dutiable status of a chocolate powder from Switzerland.

A sample of the product which is labelled HA 11E Chocolate Powder was received. The product is a fine brown powder. It consists by weight of 56 percent sugar, 24 percent chocolate liquor, 18 percent cocoa butter and 2 percent moisture. It will be packed in bags of 2.5 kilograms.

The HA 11E Chocolate Powder is classifiable under the provision for sweetened chocolate, in any other form, other than for consumption at retail as candy or confection, not containing butterfat or other milk solids, in item 156.3045, Tariff Schedules of the United States Annotated, and dutiable at the rate of 5 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

Sincerely,

John J. Martuge
Area Director
New York Seaport

Mr. Michael Waldschlager
Brooks Controller
Bro Shoes, Inc.
9341 urtland Drive
Rock rd, MI 49351

Dear Mr. Waldschlager:

Your letter of March 6, 1986 requested this office to rule upon the tariff classification of a shoe bag from Taiwan.

The submitted sample is a shoe bag measuring 11 inches X 15 inches with a drawstring closure. It is constructed of non-woven polypropylene fabric and is designed to contain shoes while traveling.

The shoe bag, whether or not imported with footwear, is classifiable under the provision for Luggage and handbags, of textile materials, other, in item 706.4152, Tariff Schedules of the United States Annotated. The rate of duty is 20 percent ad valorem.

Tariff item 706.4152 falls within textile category designation 670. As a product of Taiwan this merchandise is subject to visa requirements and quota restraints based upon international textile trade agreements.

Due to the changeable nature of these agreements you are advised to contact your local Customs office prior to importation of this merchandise to determine the current status of any import restraints or requirements.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Sincerely,

Mr. Joseph C. Shediack, Jr.
Foote & Jenks
1420 Crestmont Avenue
Camden, NJ 08103

Dear Mr. Shediack:

In your letters dated March 7, 1986 and March 12, 1986, you inquired about the dutiable status of "Fonds" from West Germany.

Twelve samples were examined and disposed of. The products are dry mixes consisting of gelatin, sugar, flavoring, coloring and spices. The submitted component cost breakdown indicated that all types of "Fond" were in chief value gelatin. They will be imported in 125 and 150 gram foil packets, and prepared by mixing with cold water and whipped, unsweetened fresh cream. The mixed product will be used as a cake filling and topping.

This merchandise is classifiable under the provision for edible preparations not specially provided for ... of gelatin, in item 182.9000, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 6 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Mr. Ken Bray
President
Webco
P.O. Box 1253
San Bruno, CA 94066

Dear Mr. Bray:

In your letter of March 12, 1986, you requested the tariff classification of the "Web" from Korea or Hong Kong. You submitted a sample and descriptive literature with your request.

The "Web" is a swimming glove with a woven man-made fabric palm and nylon spandex back. The palm fabric is vinyl coated on the inside. A semi-circular section is cut away on the back of the wrist and secured by a velcro strap. This glove is webbed between all the fingers and the thumb. The fingertips are open on the "Web" so that this glove may be worn with only the fingertips exposed or so that the entire first joint is free, the position depending upon how much web space is desired.

You describe this glove as a hand fin for swimmers. The webbing displaces 2.6 time more water than the hand alone which allows for a more powerful stroke and greater speed. The greater water displacement strengthens the muscles used in a variety of swimming strokes. For this reason, the "Web" has been endorsed as a training aid for swimming by a former Olympic coach.

Accordingly, since this glove helps propel a swimmer while not interfering with established swimming techniques as well as helping develop the muscles needed for swimming, the "Web" swimming glove shows design for use in the sport of swimming.

The Web is classifiable under the provision for other sport gloves in item 735.0700, Tariff Schedules of the United States Annotated (TSUSA), and is dutiable at the rate of 5.2 percent ad valorem.

Articles classifiable under item 735.0700, TSUSA, which are the products of Hong Kong are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

G12

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Ms. Cheryl J. McCulloch
Twelve Stone Flagons, Ltd.
1411 Grandview Avenue
Pittsburgh, PA 15211

Dear Ms. McCulloch:

In your letter dated March 10, 1986, you inquired about the dutiable status of a beverage product called La Pomme Prisoniere to be imported from France.

The sample of La Pomme Prisoniere which you submitted consists of a whole mature apple surrounded by calvados in a glass bottle. Calvados is a brandy distilled from fermented apple juice which in this case has an alcohol content of 80 proof or forty percent by volume. It is our understanding that the bottles are affixed to apple trees just after the trees have bloomed and set fruit in such a way that the apples grow to maturity within the bottles. The bottles are then filled with the apple brandy. It is your intention to import this product in both 250 milliliter and one liter bottles.

While you have described the glass bottles as decanters, the 250 milliliter sample that you submitted is not supplied with a separate glass or metal stopper to replace the shipping cork and does not appear to be an unusual container or fit for reuse after the contents have been consumed. Accordingly, the glass bottles that this beverage will be imported in will be treated as ordinary packing and not subject to the assessement of any additional duties.

La Pomme Prisioniere is classifiable under the provision for Brandy other than Pisco, Singani, or Slivovitz packed in containers holding not over one gallon and valued at over 13 dollars per fluid gallon in item 168.7800, Tariff Schedules of the United States, and is dutiable at the rate of 59 cents per proof gallon. In addition to import duty this product will also be subject to Federal Excise Tax at the rate of $12.50 per proof gallon under 26 U.S.C. 5001.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported.

Dear Mr. Grebe:

In your letter dated 3/17/86, you inquired about the dutiable status of pigment color concentrates from Canada.

Per your request, we are confirming classifications and duty rates for the following color concentrates

Inorganic Color Concentrates in non-benzenoid mediums --

Pigment	Classification	Duty
Carbon black	473.0400	Free
Titanium Dioxide	473.7000	6.2% ad valorem
Cadmium	473.8820	3.2% ad valorem
Chrome Yellow	473.1200	3.9% ad valorem
Molybdenum Orange	473.1800	3.9% ad valorem
Iron Oxides (Synthetic)	473.30	3.9% ad valorem
Iron Oxides (Natural)	473.40	7.8% ad valorem
Ultramarines	473.8400	1.5% ad valorem
Iron Blue	473.2800	3.7% ad valorem

Benzenoid pigments in non-benzenoid plastics (resins) --

All	410.3400	15% ad valorem

Duty is based upon the F.O.B. value, point of shipment, unless purchased ex-factory (at factory door).

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

New York, NY 10004

Dear Mr. Gerard:

Your letter of March 20, 1986, written in behalf of your client, The Mearl Corp. concerns the dutiable status of "titanium coated mica." Your inquiry does not identify the country of origin of this merchandise.

"Titanium coated mica" when imported as pigment grade, 325 mesh (44 micon) is classifiable under the provision for pigments, titanium dioxide, in item 473.7000, Tariff Schedules of the United States. The duty rate is determined by the country of origin. Products of most favored nations are dutiable at the rate of 6.2 percent ad valorem. Products of certain Communist controlled nations are dutiable at the rate of 30 percent ad valorem. Products of certain developing countries may be entitled to duty concessions. A complete listing of countries may be found in General Headnote 3, Tariff Schedules of the United States (19 U.S.C. 1202).

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

817782

Mr. Bill McGehee
Import Traffic Manager
House of Lloyd, Inc.
11901 Grandview Road
Grandview, MO 64030

Dear Mr. McGehee:

In a letter dated March 12, 1986, you inquired as to the dutiable status of a Formula Race Set manufactured in Hong Kong.

Your sample, No. 20-030, is a battery operated remote control road race set consisting of two plastic cars, two individual push button hand control units, a track layout including two cross-over and eight curved track sections, and a number of fence accessories. The set is powered by four "C" cell batteries which are not included with the imported article.

It is your belief that the Formula Race Set is classifiable in item 734.20, Tariff Schedules of the United States (TSUS), the provision for game machines including games having mechanical controls for manipulating the action.

This race set is not a game as that term is defined for tariff purposes. The term "game" has reference to a competitive activity or contest conducted according to rules with the participants in direct opposition to each other. Examination of the sample indicates that the hand controls are of an on/off switch type. They merely start and stop the cars. Unlike rheostat or variable speed controllers that allow for manipulation and speed control by the players, these controls cannot be manipulated so as to increase or decrease the speed of the toy vehicles. The hand control on/off switch limits the actual control on the part of the players. Consequently, it is our position that the element of competition is lacking when two people use this road race set.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A8

Accordingly, the Formula Race Set cannot be considered a game within the purview of that term as used in item 734.20, TSUS. It is our opinion that the race set is chiefly used for amusement and is classifiable under the provision for other toys, not specially provided for, in item 737.95, TSUS, dutiable at the rate of 8.3 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If the entry documents have already been filed, this ruling should be brought to the attention of the appropriate Customs officer handling the transaction.

Sincerely,

John J. Martuge

Mr. John H. Grebe
Ampacet Corp.
250 South Terrace Avenue
Mount Vernon, NY 10550

Dear Mr. Grebe:

Your letter of March 17, 1986 concerns the dutiable status of polyethylene and polypropylene synthetic plastics material from Canada.

You request classification of 45 chemicals that are to be added to polyethylene or polypropylene as extenders, antioxidants, dispersants, etcetra. As you were recently advised by Raymond A. Valdez, National Import Specialist, it is not necessary to classify each product that may be added to a resin. What is important is that the polyethylene and polypropylene resin that you contemplate importing meets the tariff definition of the term "synthetic plastics material." This term embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer may have been added. These products contain as an essential ingredient an organic substance of high molecular weight; are capable, at some stage during processing into finished articles, of being molded or shaped by flow; and are solid in the finished article.

These synthetic materials may be in solid, semi-solid, or liquid condition such as flakes, powders, pellets, granules, solutions, emulsions, and other basic crude forms not further processed.

Polyethylene and polypropylene are classifiable under the provision for synthetic plastics materials. Polyethylene in item 445.3000, Tariff Schedules of the United States Annotated (TSUSA), dutiable at the rate of 12.7 percent ad valorem; polypropylene in item 445.5200, TSUSA, dutiable at the rate of 12.8 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have

USA Marketing Division
Department of External Affairs
125 Sussex Drive
Ottawa, Ontario K1A 0G2 Canada

Dear Mr. Tonkin:

In your letter dated March 20, 1986, on behalf of Freshground Industries, Ltd, Brampton, Ontario, you inquired about the dutiable status of rice cakes from Canada.

A sample package of "plain" rice cakes, and empty containers for three other varieties accompanied your letter. The sample cakes were examined and disposed of; the empty containers were retained by this office. The products are made from a combination of whole grain brown rice and white rice, placed into a mold and subjected to high heat and air pressure. This procedure puffs the rice, which, by virtue of natural starches in the food, sticks together in the molded, disk shape. In addition to the rice, "garlic flavored" cakes contain less than two percent by weight of garlic powder, salt, and sesame seeds. "Sesame salted" cakes contain less than two percent of salt and sesame seeds. "Five grain" rice cakes contain approximately 1.1 percent each of sesame seeds, barley, cornmeal, and cracked wheat.

The rice cakes are classifiable under the provision for biscuits, cake, cakes, wafers, and similar baked products..., in item 182.2000, Tariff Schedules of the United States Annotated, and dutiable at the rate of 0.4 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Sincerely,

John J. Martuge

Mr. Jeff Brookner
21205 Roscoe Boulevard, #8
Canoga Park, CA 91304

Dear Mr. Brookner:

In your letter dated March 27, 1986, you inquired about the dutiable status of food supplements from Mexico.

Five products are named in your letter: Bee Propolis, Royal Jelly, Spirulina, Super Oxide Dismutase (SOD), and Primrose Oil. In a telephone conversation with National Import Specialist Stanley M. Hopard on May 16, 1986, you stated the Bee Propolis will be imported in either of two forms: "natural", in the condition as removed from the hive, or in bottles containing capsules, tablets, or liquid extract. The Royal Jelly will be imported in "raw" condition, as removed from the hive, in dark glass bottles. It will be further processed after importation. Spirulina will be imported in bulk, in plastic bags or cans. You plan to market the spirulina in these containers.

Bee Propolis is classifiable under the provision for other articles not provided for elsewhere in the Tariff Schedules in item 799.0000, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 3.9 percent ad valorem.

Royal Jelly, imported in bulk containers, is classifiable under the provision for animal substances, crude, not specially provided for... other, in item 191.1800, TSUSA, and dutiable at the rate of 2.5 percent ad valorem.

Spirulina and Primrose Oil are classifiable under the provision for edible preparations not specially provided for... other in item 183.0520, TSUSA, and dutiable at the rate of 10 percent ad valorem.

Articles classifiable in items 183.05, 191.18, and 799.00, TSUS, which are the products of Mexico, are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

However, your inquiry does not provide enough information for us to give a classification ruling on Super Oxide Dismutase (SOD). Your request for a classification ruling should include the Chemical Abstract Service (CAS) name and number, trade names, the complete chemical composition, a sample of the product in its imported condition, and a description of the chief use of this product in the United States.

B2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

With respect to Bee Propolis, Royal Jelly, Spirulina, and Primrose Oil, this is a ruling letter issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)]. For the balance of the merchandise, this is an information letter issued under the provisions of Section 177.1(d)(2) of the Customs Regulations [19 C.F.R. 177.1(d)(2)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

5859 West Century Blvd, Suite 1422
Los Angeles, Calif. 90045-6589

Dear Mr. Brady:

In your letter dated March 23, 1986, on behalf of your client, Nichimen America, you inquired about the dutiable status of high performance fluorocarbon oil from Japan.

According to your letter this product is a high quality, special purpose lubricant.

Based on the information supplied in your letter it is classifiable under the provision for ethers of a polyhydric alcohol in item 428.47, Tariff Schedules of the United States, and dutiable at the rate of 12.3 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Sincerely,

John J. Martuge

Mr. Frank Prackler
Harold I. Pepper Co., Inc.
9 Murray Street, Suite 11 East
New York, NY 10007

Dear Mr. Prackler:

In your letter dated March 31, 1986, on behalf of Lonza, Inc., you inquired about the dutiable status of niacin, animal nutrition grade T.R. from Switzerland.

The submitted sample, a cream colored powder, is a formulated product containing essentially niacin, rosin esters and polyethylene wax. It is used as a veterinary nutrition product.

Niacin, animal nutrition grade T. R. is classifiable under the provision for "Vitamins: Synthetic: Niacin: other" in item 437.8207, Tariff Schedules of the United States, and dutiable at the rate of 3.2 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

This merchandise may be subject to the regulations of the Food and Drug Administration. You may contact them at 5600 Fishers Lane, Rockville, Maryland 20857, telephone (202) 443-3380.

Sincerely,

Mr. Frank R. Bailey
Bailey, Inc.
1932 Lebanon Street
Hyattsville, MD 20783

Dear Mr. Bailey:

In your letter of March 25, 1986, on behalf of Patricia Marull of 5727 Western Avenue, N.W. in Washington, D.C. 20015, you inquired about the dutiable status of several food products from Venezuela.

These products are listed in your letter as "Colonial Cafe", "El Carupanero" brand Tuna in Hot Sauce, "Albacore Tuna", "Sardines in Tomato Sauce", "Margarita" brand Tuna in brine, and "Sardinella Anchovia in Vegetable Oil". One sample of each product was forwarded with your inquiry.

"Colonial Cafe", according to the package label, consists of 100 percent pure, natural coffee. The sample, a soft plastic pouch pack, contained 500 grams of ground roast coffee.

"El Carupanero" brand Tuna in Hot Sauce, packed by Propisca S.A., consisted of a 7 ounce (net weight) tin of tuna fish in vegetable oil and salt, with a small amount of vegetables (carrot, onions, and chili pepper) packed at the top of the can.

"Albacore Tuna", packed by Propisca S.A., consisted of a 7 ounce (net weight) tin of albacore tuna packed in vegetable oil and salt.

"Margarita" brand tuna in brine, packed by Alimentos Margarita, C.A., consisted of six and one-half ounce tin of tuna, packed in water and salt.

"Sardines in Tomato Sauce", packed by Propisca S.A., consisted of a 14.5 ounce (net weight) tin of sardines packed in a tomato sauce with vegetable oil and salt. These sardines had been headed, but did not appear to be either skinned or boned.

"Sardinella Anchovia", packed by Propisca S.A., consisted of a tin (70 grams, net weight) of skinless fish fillets in vegetable oil.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B6

"Colonial Cafe" is classifiable under the provision for Coffee, crude, roasted, or ground, whether or not the caffeine has been removed...Roasted or ground in item 160.1040, Tariff Schedules of the United States (TSUS), and free of duty.

The documentary requirements of the International Coffee Agreement are currently suspended due to the current price of coffee in the world market. Should the requirements of the International Coffee Agreement be reinstituted at some future date, then a proper International Coffee Organization Certificate will be required at the time of entry of such merchandise.

"El Carupanero" brand Tuna in Hot Sauce, and "Albacore Tuna" are both classifiable under the provision for Tuna fish, prepared or preserved in any manner, in oil, in airtight containers, in item 112.9000, TSUS, with duty at the rate of 35 percent ad valorem.

"Margarita" brand Tuna in Brine is classifiable under the provision for Tuna fish, prepared or preserved in any manner, not in oil, in airtight containers. If packed in containers weighing with their contents not over 15 pounds each, and within the quota for an aggregate quantity entered in any calendar year not to exceed 20 percent of the United States pack of canned tuna during the immediately preceding calendar year, as reported by the National Marine Fisheries Service, then this tuna is classifiable in item 112.30, TSUS, and dutiable at the rate of 6 percent ad valorem. If entered after the tariff rate quota period has closed, classification would be in item 112.34, TSUS, with duty at the rate of 12.5 percent ad valorem.

"Sardines in Tomato Sauce", containing added vegetable oil, are classifiable as Sardines...neither skinned nor boned...not smoked under the provision for Fish, prepared or preserved in any manner, in oil, in airtight containers. If valued not over 18 cents per pound (including weight of immediate container), classification of this product will be in item 112.5400, TSUS, with duty at the rate of 14.3 percent ad valorem. If valued over 18 but not over 23 cents per pound (including weight of immediate container), classification will be in item 112.6200, TSUS, with duty at the rate of 20 percent ad valorem. If valued over 23 but not over 30 cents per pound (including weight of immediate container), classification will be in item 112.7300, TSUS, with duty at the rate of 15 percent ad valorem. If valued over 30 cents per pound (including weight of immediate container), classification will be in item 112.8200, TSUS, with duty at the rate of 15 percent ad valorem.

"Sardinella Anchovia" skinless fillets in vegetable oil are classifiable as Sardines...skinned or boned under the provision for Fish, prepared or preserved in any manner, in oil, in airtight containers. If valued not over 18 cents per pound (including the weight of the immediate container),

817938

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

classification will be in item 112.5400, TSUS, with duty at the rate of 14.3 percent ad valorem. If valued over 18 but not over 23 cents per pound (including weight of immediate container), classification will be in item 112.6600, TSUS, with duty at the rate of 20 percent ad valorem. If valued over 23 but not over 30 cents per pound (including weight of immediate container), classification will be in item 112.7400, TSUS, with duty at the rate of 30 percent ad valorem. If valued over 30 cents per pound (including weight of immediate container), classification will be in item 112.8600, TSUS, with duty at the rate of 20.5 percent ad valorem.

Importations of tuna and fish and other fish species may be subject to special regulations or requirements administered by other U.S. government agencies. Inquiries regarding such regulations or requirements should be addressed to the following offices:

Protected Species Division
National Marine Fisheries Service
Department of Commerce
3300 Whitehaven St., N.W.
Page 2 Bldg., Room 172
Washington, D.C. 20235

and

U.S. Food and Drug Administration
Division of Regulatory Guidance
HFF 314, 200 C Street, S.W.
Washington, D.C. 20204

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Ms. Aurora Goderich
Action Broker
5200 W. 104th Street
Los Angeles, CA 90045

Dear Ms. Goderich:

In your letter dated March 11, 1986, on behalf of Sunburst Creations Ltd. of Barnaby, B.C., Canada, you inquired about the dutiable status of a wooden flower from Taiwan.

A sample of the wooden flower was submitted. It has the rough shape of a tulip. It is made of solid wood. The head is painted gray and the stem is painted mint green. The wooden flower will be used as a decoration.

The article possesses only the general shape of a flower. It does not contain sufficient detail and does not look enough like a flower to be considered an artificial flower. Consequently, it is not classifiable under the provision for artificial flowers in item 748.2100, Tariff Schedules of the United States Annotated (TSUSA).

This wooden flower is classifiable under the provision for articles not specially provided for, of wood, in item 207.0080, TSUSA, and dutiable at the rate of 5.5 percent ad valorem. Taiwan is presently excluded from eligibility for duty free treatment under the Generalized System of Preferences for articles classifiable under item 207.0080, TSUSA.

The ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R.177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

P.O. Box 27205
San Francisco, CA 94127

Dear Mr. Schneider:

Your letter of March 3, 1986, received in this office April 4, 1986, requested this office to rule upon the tariff classification of various cases from Korea. Your samples will be returned as requested.

You have submitted seven items for a Tariff classification ruling. All the items are of woven man-made fibers, and are described as follows:

1) Compass Case, 3-3/4 inches wide by 6-1/4 inches long when fastened by a velcro closure. It has a belt loop to be worn on the belt a transport a compass and a hole for a lanyard so it can be worn around the neck.

2) Compass Case, 3-1/4 inches wide by 4-1/2 inches long when fastened by a velcro closure. It has a belt loop to be worn on a belt to transport a compass.

3) Ammunition Case, 5-1/2 inches wide by 4-1/2 inches long when fastened by a velcro closure. It has a belt loop to be worn on a belt to transport shotgun shells.

4) Pen holder, 1-1/2 inches wide by 5-3/4 inches long, with a lanyard to be worn around the neck to transport two pens.

5) Flashlight Pouch, 2-1/8 inches wide by 6-3/4 inches long when fastened by a velcro closure. It has a belt loop to be worn on a belt to transport a flashlight.

6) Pencil case, 3-1/4 inches wide by 8-1/2 inches long with a zipper closure, to protect and transport pencils.

7) Protective case for removable car radio, 8-1/2 inches wide by 10-1/2 inches long with a zipper closure, carrying straps, and a front pocket with a velcro closure. The case is used to transport a radio back and forth from a car to a secure place.

B10

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Items 1 through 5 are classifiable under the provision for Articles not specially provided for, of man-made fibers, other, in item 389.6270, Tariff Schedules of the United States Annotated (TSUSA). The rate of duty is 4 cents per pound plus 10 percent ad valorem.

Item 6 is classifiable under the provision for Flatgoods, of textile materials except cotton in item 706.3900, TSUSA. The rate of duty is 20 percent ad valorem.

Item 7 is classifiablue under the provision for Luggage of textile materials, other, item in 706.4152, TSUSA. The rate of duty is 20 percent ad valorem.

Tariff item 706.3900 falls within textile category designation 670-F. Tariff item 706.4152 falls within textile category designation 670-L. As a product of Korea these items are subject to visa requirements and quota restraints based upon international textile trade agreements.

Due to the changeable nature of these agreements you are advised to contact your local Customs office prior to importation of this merchandise to determine the current status of any import restraints or requirements.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Manager
Norman G. Jensen, Inc.
P.O. Box 365
Oroville, Washington 98844

Dear Mr. Wall:

In your undated letter (received this office April 9, 1986), you inquired about the dutiable status of "Deep Lustre Instant Silverware Cleaner" from Canada.

The prospective import, a silverware cleaner kit, consists of 200 grams of rock salt and one 2" x 5" zinc bar. The rock salt is dissolved in 4 litres of hot water with the zinc bar and tarnished item placed in contact with each other in the hot salt solution. The instructions state that the "deep lustre bar" will detarnish gold, silver, silverplate, sterling, and platinum.

"Deep Lustre Instant Silverware Cleaner" is classifiable under the provision for blackings, powders, liquids, and creams for polishing and cleaning, all the foregoing in immediate containers holding not over 10 pounds each in item 493.1000, Tariff Schedules of the United States, and dutiable at the rate of 2.6 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Dear Ms. Shira:

In your letter dated April 7, 1986 on behalf of your client, Tonka Corporation, you inquired about the dutiable status of a Pound Puppies Newborns Puppy Pack from Taiwan or China.

A sample of the Pound Puppies Newborns Puppy Pack was submitted with your inquiry, and is being returned to you as requested. The article, item number 7813, measures 4 1/2 inches in height, 7 inches in width and 11 1/2 inches in length. The pack is made of a beige fabric outer surface and an orange fabric inner surface. A handle is attached to the top of the pack with velcro closures on the front and sides. The sides, composed of plastic material, have an open grid formation with 3/4 inch square openings. The article is used as a toy accessory with the Pound Puppies Newborns stuffed dogs.

Pound Puppies Newborns Puppy Pack, item no. 7813, is classifiable under the provision for other toys in item 737.95, Tariff Schedules of the United States, and dutiable at the rate of 8.3 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If the entry documents have already been filed, this ruling should be brought to the attention of the appropriate Customs officer handling the transaction.

14276 23rd Avenue North
Plymouth, MN 55441

Dear Mr. Eckstam:

In your letter of April 7, 1986, you requested the tariff classification of wooden flowers from Taiwan, Hong Kong, Japan and Korea.

The flowers come in several shapes and are used as room decorations. The sample submitted is made of solid wood and is painted red and green. It has a two-dimensional head shaped like an upside-down heart. It has a simple straight round stem which connects to block-like leaves. The sample is only a rough representation of a flower.

Wooden flowers represented by your sample are classifiable under the provision for articles not specially provided for, of wood, in item 207.0080, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 5.5 percent ad valorem.

Articles classifiable under item 207.0080, TSUSA, which are the products of Hong Kong and Korea are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Mr. S.D. Hoskins
Interox Chemicals Ltd.
P.O. Box 7
Warrington, Cheshire, England WA4 6HB

Dear Mr. Hoskins:

In your letter of March 14, 1986, you inquired about the tariff classification of the monomer and polymer of caprolactone from England.

When produced from benzenoid sources caprolactone monomer is classified under the provision for other products which can be produced from benzenoid sources in item 407.0600, Tariff Schedules of the United States Annotated (TSUSA). The rate of duty is 13.5 percent ad valorem.

When produced from non-benzenoid sources caprolactone monomer is classified under the provision for other lactones in item 429.1200, TSUSA. The rate of duty is 4.1 percent ad valorem.

When produced from benzenoid sources a polymer of caprolactone is classified under the provision for benzenoid, thermoplastic, saturated polyester plastic material in item 408.6800, TSUSA. The rate of duty is 1.4 cents per pound plus 9 percent ad valorem.

When produced from non-benzenoid sources a polymer of caprolactone is classified under the provision for other non-benzenoid thermoplastic resin in item 445.5630, TSUSA. The rate of duty is 1 cent per pound plus 8 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Mr. W. C. McGehee
House of Lloyd, Inc.
11901 Grandview Road
Grandview, MO 64030

Dear Mr. McGehee:

In your letter dated April 2, 1986, you inquired about the dutiable status of "My Little Angel Nite Light" from Hong Kong.

A sample of "My Little Angel Nite Light" was submitted with your inquiry. The article, a figure of a little angel, has a plastic molded head with painted hair, eyes and mouth. The body is composed of a blue fleece material. A long gown gives shape to the torso and concealment of legs. A soft stuffing material is contained in the gown. A white collar and blue ribbon are affixed to the gown. Iridescent wings are attached to the back of the doll. A zipper is sewn on the back of the gown which conceals an illumination apparatus contained in the torso of the doll. The head lights up when the torso of the doll is squeezed. You state in your letter that you feel the proper classification of the article is in item 683.4280, TSUSA, under the provision for electrical articles. The article is not capable of staying illuminated throughout the night. The doll does not have an on or off switch, but merely lights up when squeezed. The article is a doll with an illumination feature. There is insufficient stuffing surrounding the apparatus, therefore, the doll is considered unstuffed for tariff classification purposes.

My Little Angel Nite Light is classifiable under the provision for other dolls in item 737.2400, Tariff Schedules of the United States Annotated, and dutiable at the rate of 12.7 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Dear Mr. Schaeffer:

In your letter dated April 11, 1986, on behalf of your client, Montgomery Ward Importing Inc., you inquired about the dutiable status of a Hide-n-Sleep Play Tent from Taiwan.

A sample of a Hide-n-Sleep Play Tent was submitted with your inquiry and is being returned to you, as requested. The tent is made of 100 percent nylon and is designed to be assembled on a mattress. Included are 16 poles which support the nylon fabric. The tent has a zippered front and vent holes for comfort and safety. It is intended to be used by children for indoor play. The article is chiefly used for the amusement of children.

The Hide-n-Sleep Play Tent is classifiable under the provision for other toys in item 737.95, Tariff Schedules of the United States, and dutiable at the rate of 8.3 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

30 West Service Road
Champlain, NY 12919-9703

Dear Mr. Brunell:

In your letter dated April 11, 1986, on behalf of your client Optical Moulding Systems, you inquired about the dutiable status of a lens cleaner and sealers from Canada.

According to your letter, Dipcoat and Dipcoat AA are similar except that Dipcoat does not contain the surfactant.

Dipcoat is classifiable under the provision for mixtures, not specifically provided for in item 432.28, Tariff Schedules of the United States, and dutiable at the rate of 3.9 percent ad valorem, but not less than the highest rate applicable to any component material. No component has a higher rate.

Dipcoat AA is classifiable under the provision for benzenoid mixtures, in item 413.54, Tariff Schedules of the United States, and dutiable at the rate of 11.9 percent ad valorem, but not less than the highest rate applicable to any component material. No component has a higher rate.

Unbelieveable Lens Cleaner is classifiable under the provision for benzenoid mixtures, in item 413.54, Tariff Schedules of the United States, and dutiable at the rate of 11.9 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate appears to be methanol classifiable under item 427.97, Tariff Schedules of the United States, and dutiable at the rate of 18.2 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported.

Ms. R.L. Kent
Manager Marketing Services
Centerchem, Inc.
660 White Plains Road
Tarrytown, NY 10591

Dear Ms. Kent:

In your letter dated April 9, 1986, you inquired about the dutiable status of squalane from Spain. Your letter indicates that the product you intend to import is produced from olive oil.

Based on this information squalane is classifiable under the provision for hydrocarbons, other in item 429.56, Tariff Schedules of the United States, and dutiable at the rate of 3.9 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations (19 C.F.R. 177.1(a)(1)).

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Sincerely,

John J. Martuge

Mr. Edward Ackerman
Siegel, Mandel & Davidson, P.C.
One Whitehall Street
New York, NY 10004

Dear Mr. Ackerman:

In your letter dated April 17, 1986, on behalf of your client Coleco Industries, Inc., you inquired about the dutiable status of a Cabbage Patch Baby Blanket from Hong Kong.

A sample of the Cabbage Patch Baby Blanket was submitted. The blanket is made of a soft fleeced fabric with a knit fabric trim. The blanket measures 17 1/2 inches by 17 1/2 inches. It is to be used as an accessory with the 12 inch Cabbage Patch Babies line. The blanket is too small for use with actual infants.

The Cabbage Patch Baby Blanket is classifiable under the provision for other toys in item 737.95, Tariff Schedules of the United States, and dutiable at the rate of 8.3 percent ad valorem.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Sincerely,

John J. Martuge

Mr. Daniel G. Rusche
Walmark Inc.
15494 Briar Ridge Circle
Fort Myers, FL 33912

Dear Mr. Rusche:

In your letter of April 1, 1986, you requested the tariff classification of a battery operated key finder from Taiwan.

The Sonic Key Chain is powered by two button type batteries. It is comprised of a plastic module which houses a receiver that activates at a certain audible frequency, a keychain for holding keys and two batteries. By whistling the built in receiver is activated and makes a beeping sound for a short period of time. This item is used as an aid in finding misplaced keys.

The Sonic Keychain module is classifiable under the provision for other audible signalling apparatus, which is electrical in item 685.7038, Tariff Schedules of the United States, and dutiable at the rate of 2.9 percent ad valorem.

The keychain is classifiable under the provision for jewelry and other objects of personal adornment: Other ..., in item 740.38, Tariff Schedules of the United States, and dutiable at the rate of 13.1 percent ad valorem.

The batteries are classifiable under the provision for primary batteries, in item 682.9500, Tariff Schedules of the United States, and dutiable at the rate of 5.7 percent ad valorem.

Articles classifiable under items 685.7038 and 682.9500, TSUS, which are the products of Taiwan are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported.

M. P. Gagnon, President
Corporation D'Investissement Maurice-Pierre Gagnon
4413 Girouard
Montreal, Quebec, Canada h4a 3e5

Dear Ma. Gagnon:

In your letter of April 11, 1986, you requested the tariff classification two margarine products from Canada.

These margarines will contain either a 100 percent soya oil base or a 100 percent base of other vegetable oils, and will be imported in one pound, two pound, four pound, four kilo, and thirteen kilo sizes. These margarines will consist, by weight, of hydrogenated vegetable oil (80 percent), water (16 percent), salt (2.8 percent), whey powder (1.4 percent), soya lecithin (0.2 percent), mono and diglycerides (0.1 percent), sodium benzoate (0.1 percent), vitamin A palmitate, vitamin D3, BHA - BHT, and artificial flavor and natural color.

These 100 percent vegetable oil margarines are both classifiable under the provision for other oleomargarine and butter substitutes in item 116.3040, Tariff Schedules of the United States (TSUS), with duty at the rate of 7 cents per pound.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Mr. John J. Brinckerhoff
Intercon Research Associates Ltd.
1219 Howard Street
Evanston, IL 60202

Dear Mr. Brinckerhoff:

In your letter dated April 17, 1986, you inquired about the dutiable status of various polyethylene bags and printed sheets from France.

The samples submitted consist of nine handle and two tee shirt bags, one carrier bag, dozens of bundle bags and printed sheets of polyethelene. They will be imported in various sizes and shapes and their construction ranges from low to high density polyethylene. It is to be noted that eight of the bags have handle slots punched into their bag bodies while one has a separate rigid double plastic handle. Furthermore, the tee shirt bags have a self-material double handle while the carrier bag and bundle bags have none. The bags are of the type provided or sold by retailers to their customers. All the bags, excluding the tee shirt and bundle bags, display the name or other proprietary feature of the retailer.

The printed polyethelene sheets, coming in rolls, will be utilized in the packaging of frozen food and bathroom products and in the automatic wrapping machines for direct mailing to consumers. Printed on each roll at regular intervals are the trademarked product brand names, product descriptions, preparation instructions, and magnetic ink marks. The marks are read by an electric eye, which triggers a mechanism that cuts, folds, and seals the plastic around the various items in accordance with the location of the marks. Therefore, the merchandise at issue serves as protective packaging during the course of transportation and/or enhances the saleability of the product.

The polyethylene bags are classifiable under the provision for articles not specially provided for, of rubber or plastics, in item 774.55, Tariff Schedules of the United States, and dutiable at the rate of 5.7 percent ad valorem.

The printed polyethylene sheets are classifiable under the provision of containers of rubber or plastics, with or without their closures, chiefly used for the packing, transporting, or marketing of merchandise in item 772.20, Tariff Schedules of the United States, and dutiable at the rate of 3.6 percent ad valorem.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

On reviewing the presented bags, it is determined that only one of the bags is properly marked with the country origin. Section 304 of the Tariff Act of 1930, as amended (19 USC 1304), requires in general that every article of foreign origin must be legibly, permanently, and conspicuously marked to indicate the English name of the country of origin. Therefore, upon importation, all your imported items must be in compliance with the above regulation.

This ruling is being issued under the provisions of Section 177.1(a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

A copy of this ruling letter should be attached to the entry documents filed at the time this merchandise is imported. If the documents have already been filed, this ruling should be brought to the attention of the Customs officer handling the transaction.

Sincerely,

John J. Martuge

Mr. Michael R. Toole
Assistant Import Manager
Fritz Companies, Inc.
40 Exchange Place
New York, N.Y. 10005

Dear Mr. Toole:

In your letter of April 29, 1986, you requested the tariff classification of a wrist wallet from Taiwan. Your inquiry is on behalf of a Multi Toys Corporation, Fort Lee, New Jersey.

The submitted sample, style number 1365, is a wrist wallet of woven fabric, measuring approximately 7-1/2 inches long by 2-1/4 inches wide. It has a zipper closure in the center for carrying miscellaneous articles and velcro tabs at each end. It has an applique with the name "L.A. GEAR" glued on the front of the wrist wallet.

When in chief value of cotton, the wrist wallet is classifiable under the provision for Ornamented articles not specially provided for, of textile materials, of cotton, other in item 386.0430, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 25 percent ad valorem.

When in chief value of man-made fibers, the wrist wallet is classifiable under the provision for Ornamented articles not specially provided for, of textile materials, other, of man-made fibers, in item 386.1343, TSUSA, and dutiable at the rate of 12.5 percent ad valorem.

Articles classifiable under item 386.1343, TSUSA, which are the products of Taiwan are entitled to duty free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

This ruling is being issued under the provisions of Section 177.1 (a)(1) of the Customs Regulations [19 C.F.R. 177.1(a)(1)].

Mr. Philippe Bonnet
Fromagerie Clemente Inc.
54 rue Principale
Saint-Damase, Quebec, Canada JOH 1JO

Dear Mr. Bonnet:

In your letter dated April 25, 1986, you inquired about the dutiable status of two fresh cheeses from Canada.

The cheeses, designated Faisselle St-Damase and Fontainebleau, are unripened cheeses made from pasteurized cow's milk. Faisselle St-Damase consists of creamy fresh, white curd. The label on a sample container of 125 grams indicates a moisture content of 84 percent and a fat content in the finished cheese of 3.2 percent. Fontainebleau, which is made by whipping Faisselle St-Damase, appears, on examination of a sample, to have a smooth even texture. Fontainebleau cheese may be imported plain or flavored with various fruit purees.

Faisselle St-Damase and Fontainbleau cheeses are both classifiable under the provision for other cheeses, and substitutes for cheese in Part 4C of Schedule 1 Tariff Schedules of the United States (TSUS). If valued not over 25 cents per pound, these cheeses are classifiable in item 117.7555, TSUS, with duty at the rate of 5 cents per pound. If valued over 25 cents per pound, these cheeses are classifiable in item 117.8855, TSUS, with duty at the rate of 10 percent ad valorem.

Articles classified in items 117.7555 and 117.8855 are subject to quota quantity restrictions listed in item 950.10D in part 3 of the Appendix to the Tariff Schedules. Additionally, an import license, issued to the importer by the United States Department of Agriculture, would be required at the time such merchandise is entered for consumption in the United States.

Inquiries regarding licensing procedures and requirements for quota purposes may be addressed to the following office:

Head, Diary and Import Group
Dairy, Livestock and Poultry Division
Foreign Agricultural Service
U.S. Department of Agriculture
Washington, D.C. 20250

Choco-MILK

(No Report)

JBB-9
DJW-9
CSK-9

JUN 1 2 1972
NCB 464.11 SO
020378

[redacted]

Dear [redacted]

In your letter of May 19, 1972, and associated correspondence, you ask the tariff classification and rate of duty applicable to a cocoa drink in powder form, made in Mexico where it is known as "Choco Milk." You furnished 2 sample packets of the product which you intend to import in 14 oz. and 29 oz. tins. You also supplied the formula, the method of manufacture, and the cost percentages of each ingredient. The product is mainly composed of granulated sugar, cocoa powder, and skimmed milk powder. The other ingredients, approximately 2 percent of the product, are vitamin supplements and essences. The vitamin substances are in such minimum percentages as to have no therapeutic value per se, and, therefore, do not affect the classification.

The product described above is classifiable under the provision for edible preparations, not specially provided for, in item 182.95, Tariff Schedules of the United States (TSUS), with duty at the rate of 10 percent ad valorem. As this product is in chief value of sugar, an additional duty of 0.53 cent per pound of total sugars would apply pursuant to item 901.00, TSUS.

If the merchandise contains butterfat, it could be subject to the quota restrictions contained in item 950.16, TSUS, or item 950.23, TSUS, copies enclosed. If the merchandise were subject to either of the above quota provisions, it would, in effect, be prohibited from entering the United States, since there is no established quota quantity for Mexico.

Sincerely yours,

(Signed) J.W. [illegible]

[redacted] Acting Director
Division of
Classification and Value

Dear [redacted]

571444

This is in reference to your correspondence of March 14, 1974, which raised several questions concerning the assembling of automobiles in a foreign trade zone.

You first inquired as to the dutiable status of foreign machinery entered into a foreign trade zone for the purposes of assembling the automobiles. Machinery which is brought into a foreign trade zone for use as manufacturing equipment is dutiable at the time of entry. Material which is to become part of the automobile is not dutiable until brought into the Customs territory.

Secondly, you inquired as to the applicability of local sales tax requirements on United States goods purchased for use within a foreign trade zone. We suggest that you contact Mr. John J. DaPonte, Executive Secretary, Foreign-Trade Zones Board, United States Department of Commerce, Washington, D.C. 20230, for an answer to this question.

033238

Finally, you indicate that automobiles will be assembled using privileged status United States materials and foreign materials of a non-privileged status, and you inquire as to the proper basis for determining dutiable value when entering the complete automobile into the commerce of the United States. You suggest that only the value of the foreign components should be considered. We cannot agree.

When non-privileged foreign merchandise and privileged U.S. material are combined in a zone, it is proper to apportion the labor costs between the privileged and non-privileged merchandise in accordance with their relative values. See section 146.43(a), Customs Regulations and T.D. 53493(2). Therefore, the dutiable value of the non-privileged foreign materials will be the sum of their value prior to manipulation

Dear [redacted]

In your letter of March 18, 1974, you inquire concerning the dutiable status of antiques, the age requirements for the articles to be considered antiques, and the dutiable status of articles not meeting the age requirements for antiques. You also inquire whether import duties would be assessed on antiques entered into Canada from the United States and exported from Canada to the United States.

Ethnographic objects made in traditional aboriginal styles and made at least 50 years prior to their date of entry, and other antiques made prior to 100 years before their date of entry, are free of duty under item 766.25, Tariff Schedules of the United States (TSUS). These items may be entered duty-free even though such articles have been repaired or renovated, as long as there has been no change in their original form or character. However, item 766.20, TSUS, provides that an antique which has been repaired with a substantial amount of additional material within 3 years prior to importation will be assessed a duty on the value of the repairs at the rate which would apply to the article itself in its repaired condition if it is not within the purview of the provisions for antiques.

Please note, item 766.30, TSUS, provides that any article imported for sale and claimed to be classifiable as an antique under item 766.25, TSUS, and thereafter determined not to be authentic in respect to the antiquity claimed is subject to a duty of 12.5 percent ad valorem in addition to any other duty imposed on such article under the tariff schedules.

Articles that do not fulfill the age requirements necessary to be considered antiques are classifiable under the many items in the tariff schedules. Without more information regarding the particular articles to be imported we are unable to determine specific rates of duty. There are more than 8,000 classifications in the tariff schedules. A copy of the Tariff Schedules of the United States Annotated can be purchased, and instructions for doing so can be found in the enclosed pamphlet entitled "United States Import Requirements."

Antiques imported into the United States from either Canada or the Netherlands are treated the same. There is no special exemption for antiques imported from Canada. As for the rates of duty on articles exported from the United States to Canada, we suggest you write for this information to the Deputy Minister of National Revenue, Customs and Excise Appraisal, Connaught Building, Mackenzie Avenue, Ottawa, Ontario, Canada K-1A0L5. We do not have Canadian rates of duty available to us.

Enclosed for your information is a copy of the pertinent provisions of the tariff schedules and the headnotes thereto, Customs Regulations pertaining to antiques, and other information concerning United States import requirements.

Sincerely yours,

(Signed) R. X. ARNOLD

037736

[redacted]

Dear [redacted]

Your letter of December 3, 1974, concerns the tariff status of a potato mixture called "Ras," a product of the Netherlands. This potato mixture will be imported in powder form and will be used in a special machine to make ready-to-eat french fried potatoes. You indicate that the merchandise has been entered under items 140.50 and 140.70, Tariff Schedules of the United States (TSUS).

The manufacturer, [redacted] has stated in its letter dated September 13, 1974, that the composition of the Ras Super Fry Flour is 96.5 percent dried boiled (dehydrated) potato powder, 0.5 percent salt, and 3 percent of sodium caseinate, dried egg white and soya meal. The powder is mixed with water and is then deep fat fried automatically in the machine.

In decision on the classification of potato mixes, we have stated that the provisions for potatoes dried, desiccated or dehydrated whether or not reduced in size or reduced to flour is limited by the parenthetical phrase "(but not otherwise prepared or preserved)," and that such merchandise is classifiable under item 140.50, TSUS, dutiable at the rate of 1.3 cents per pound. If reduced to flour, it is classifiable under item 140.70 TSUS, dutiable at the rate of 1.2 cents per pound.

The above provisions would include dried, desiccated, or dehydrated potatoes which have certain chemicals added in minute quantities to the potatoes. These chemical additives are present in the finished product in only trace amounts which total substantially less than 1 percent by weight and are for purpose of serving as an emulsifier, a non-brown agent, or sequestering agent to prevent impurities from spotting, and as an anti-oxidant.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

18

REPLY TO: COMMISSIONER OF CUSTOMS, WASHINGTON, D.C. 20229

[redacted]

In a decision involving dehydrated potatoes with milk products in powder form added to the granules, we have determined that the potato product is something more than dehydrated potatoes, the something more (skim milk powders) being the deliberate result of a preparation and/or preservation process in amounts exceeding the allowance considered reasonable. This addition does constitute preparation for the purposes of item 141.81, TSUS. It is our position to classify such merchandise under the provision for other vegetables (whether or not reduced in size), otherwise prepared or preserved, other, in item 141.81, TSUS.

For this purpose the classification of the instant merchandise is considered to contain food materials as well as chemicals which serve as an emulsifier, a non-browning agent, or sequestering agent. The fry flour consisting of the ingredients as stated herein, is classifiable under the provision for other vegetables (whether or not reduced in size), otherwise prepared or preserved, other, in item 141.81, TSUS, dutiable at the rate of 17.5 percent ad valorem.

Sincerely yours,

James W. O'Neil

037885

[redacted]

Dear [redacted]

Your letter, postmarked December 5, 1974, concerns the assessment of duty in the amount of $17.20 on a chest claimed to be one hundred years old, imported from Canada. You suggest that the chest was qualified for duty-free entry as an antique under the provision for the free entry of antiques made one hundred years prior to the date of entry, in item 766.25, Tariff Schedules of the United States (TSUS).

It is our understanding that the article in question entered without an affidavit or certification of any kind as to the article's antiquity. A Customs official, with expertise in this field, determined that the article was not one hundred or more years of age and was thus not qualified for treatment under item 766.25, TSUS. It was classified under the provision for articles not specially provided for, of wood, in item 207.00, TSUS, and assessed an 8 percent ad valorem duty amounting to $7.20.

The additional $10 referred to in your letter constitutes a charge by your broker, [redacted] This is not an assessment by Customs.

In the future, we suggest that some type of certification be supplied with articles being imported in order to assist Customs officials with establishing antiquity. Although a certification is not conclusive as to the question of antiquity, it does assist Customs officials with their determination.

We are enclosing for your information certain pamphlets and materials relating to United States import requirements that should be of assistance for future shipments.

Sincerely yours,

JAN 19 1976

REFER TO
CLA-2:R:CV:MC
043363 PR

043363

The Honorable
Hugh Scott
United States Senate
Washington, D.C. 20510

Dear Senator Scott:

In your letter of December 9, 1975, you request that the tariff classification of certain synthetic netting used exclusively for mushroom growing be changed from item 358.14, Tariff Schedules of the United States (TSUS), to a duty-free provision for agricultural equipment. I assume that the duty-free provision to which you refer is item 666.00, TSUS, which covers on-farm equipment for the handling or drying of agricultural or horticultural products, and agricultural and horticultural implements not specially provided for elsewhere in the tariff schedules.

You indicate that the netting is used to hold growing compost beds and in conjunction with net puller machines to remove spent compost after the crops are grown and harvested. Without a sample and a complete description, the proper tariff status of the netting cannot be definitely ascertained.

However, assuming that the netting in question is in chief value of textile materials, it is prevented from being classified in item 666.00 because of Headnote 1 (copy enclosed) to Part 4, Schedule 6, TSUS, wherein item 666.00 is located, which specifically excludes belts and belting, and articles of textile materials from coverage by the provisions contained in Part 4.

Item 358.14, TSUS, covers other belting and belts, for machinery, of man-made textile fibers, and provides for duty, depending on the country of origin, either at the column 1 rate of 12.5 cents per pound plus 15 percent ad valorem or at the column 2 rate of 45 cents per pound plus 65 percent ad valorem. Column 2 rates of duty are applicable to products of those countries listed in General Headnote 3(e), TSUS, copy attached. Column 1 rates of duty are applicable to products of all other countries.

If the netting is imported in material lengths and then cut to size, it would probably be classifiable under the provision for other netting in the piece, not ornamented, made on a machine other than a Mechlin (or Malines) machine, in item 352.80, TSUS, with duty either at the column 1

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

All

rate of 12 percent ad valorem, or at the column 2 rate of 90 percent ad valorem. If the netting is imported already cut to the sizes and shapes in which it will be used, it would probably be classifiable in either item 358.14, if it is to be used as belting or belts, or, if not, then under the provision for other net articles of textile materials not specially provided for, in item 386.08, TSUS, with duty either at the column 1 rate of 25 percent ad valorem or at the column 2 rate of 90 percent ad valorem.

I appreciate your concern about the agricultural industry within your state. However, I am without authority to administratively waive or modify any of the provisions or requirements of the Tariff Schedules of the United States. In order to allow duty-free entry to the netting in question, the tariff schedules would have to be amended by the Congress.

If I can be of further assistance in this or other matters, please do not hesitate to call on me.

Sincerely yours,

G. R. Dickerson

Acting Commissioner of Customs

8 DEC 1976

CLA-2:R:CV:MB
044054 I

[redacted]

Dear [redacted]

This is in further consideration of your letters of January 29, 1976 and September 21, 1976, regarding the applicability of General Headnote 3(a), Tariff Schedules of the United States (TSUS), to certain garments made in the United States Virgin Islands. A sample of one garment, ladies slacks No. 11200, was submitted.

You state that you intend to manufacture the garments in St. Croix, Virgin Islands, from fabric (bolt goods) imported there from United States supplier. You also intend that no foreign bolt goods (fabric) will be used to manufacture the garments. However, style No. 11200, is manufactured from Japanese-made cotton fabric. You also state that other materials, including waistbands, zippers, and thread will be products of the United States.

As you are aware, articles imported into the Customs territory of the United States from the Virgin Islands are subject to duty at the rates set forth in column 1, TSUS. However, General Headnote 3(a), provides, in part, for free entry into the Customs territory of the United States for articles grown or produced in the Virgin Islands, as well as articles manufactured or produced there which (1) do not contain foreign materials valued at more than 50 percent of the final appraised value of the manufactured articles, (2) come directly into the Customs territory of the United States from the Virgin Islands, and (3) are not prohibited by quota limitations or otherwise. The test for determining whether an article manufactured or produced in the Virgin Islands contains foreign materials valued at more than 50 percent of its final appraised value is set forth in section 7.8(d), of the Customs Regulations, copy enclosed.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

A13

1933

[redacted]

It is our opinion, that garments completely manufactured in the Virgin Islands from fabric (United States or foreign) imported there (the operations include cutting the fabric into components and sewing those components together, and sewing in the linings, waistbands, and zippers into completed garments) will result in a product considered "manufacture or produced" in the Virgin Islands within the scope of General Headnote 3(a), TSUS. Accordingly, the garments can enter the United States free of duty under General Headnote 3(a), TSUS, provided the 50 percent value limitation of the statute is met, and further provided there is compliance with section 7.8 of the Customs Regulations (copy enclosed).

Please note that General Headnote 3(a)(ii) provides that:

> "In determining whether an article produced or manufactured in any such insular possession contains foreign materials to the value of more than 50 percent, no material shall be considered foreign which, at the time such article is entered, may be imported into the customs territory from a foreign country, other than Cuba or the Philippine Republic, and entered free of duty."

Sincerely yours,

A. Isaacs
for Salvatore N. Caramagno
Director
Classification and Value Division

MAR 19 1976

CLA-2:R:CV:MS
044113 I

[redacted]

Dear [redacted]

In your letter of February 6, 1976, on behalf of [redacted] you ask if General Headnote 3(a), Tariff Schedules of the United States (TSUS), is applicable to long and short sleeve shirts, T-shirts, and tank tops made in Guam. The samples submitted show the articles in their finished condition and in the condition in which the foreign articles are imported into Guam.

Exhibits A and B, attached to your letter, set out the condition in which the articles are imported into Guam and the operation performed to them in Guam. With the exception of the tank top, we have previously held that, in order to qualify as an article manufactured or produced in Guam, the following minimal operations must be performed in Guam to the following designated articles:

A. Long sleeve shirts (blouses).

1. Shoulder seams (2) must be sewn from the neckband to the point where the sleeves are sewn to the body of the shirts. The shoulder seams may be sewn only at the point where they are attached to the neckband when imported into Guam.

2. The sleeve cuffs must be sewn to each sleeve. The sleeves may be imported in a tubular condition (sewn, but minus the cuffs).

3. Each sleeve must be sewn to the body of the shirt at each shoulder.

4. All side seams must be sewn to form the body of the shirt. The three separate panels forming the body of the shirt may be sewn to the neckband when imported into Guam. Hemline at bottom of shirt is sewn.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B1

[redacted]

5. The buttonholes must be made in Guam.

B. Short sleeve shirt (blouse)

1. Same as long sleeve shirt, except that in place of sleeve hem must be sewn.

C. Long sleeve T-shirt

1. Both shoulder seams must be sewn to join the front and back panels. However, the panels may be sewn to the rockband when imported into Guam.

2. Both side seams must be sewn forming the body of the T-shirt.

3. The hem must be sewn at the bottom of the T-shirt body.

4. The sleeves must be imported in a flat condition and sewn to the shoulders. Sleeve hem must be sewn.

5. If neckbands and sleeve bands are separately made in a country other than Guam, they may be imported into Guam and sewn to the body of the T-shirts there.

D. Short sleeve T-shirt

1. Same as long sleeve T-shirt

E. Tank Top

1. Front and back panel must be sewn together at shoulder and sides.

2. Neck and sleeve bands, if made in a country other than Guam, must be sewn tothe body of the garment in Guam.

Because the company is presently operating in Guam and exporting goods to the United Staes under General Headnote 3(a), TSUS, we are not enclosing

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B2

[redacted]

a copy of the law or the Customs regulations. We are also in receipt of a new manufacturer's statement satisfactorily setting forth all other pertinent information.

A copy of this letter if being sent to Customs officials in Guam.

Sincerely yours,

Director, Classification and Value Division

Applicability of General Headnote 3(a), TSUS, to certain garments imported from Guam. Internal Advice No. 37/76.

In your memorandum, dated February 18, 1976, you requested internal advice with regard to the applicability of General Headnote 3(a), TSUS, to certain merchandise imported from Guam.

The Classification and Value Division has issued rulings to certain manufacturers located in Guam, regarding the applicability of General Headnote 3(a), TSUS, to certain garments made in Guam and exported to the United States.

An investigation into the operations in Guam was requested by the ports of San Francisco and New York. The significant information developed by the investigation is as follows:

1. No verification of the actual assembly operations performed on the merchandise in question could be obtained. The officers of the corporation stated that they were not familiar with the production aspects of the business.

2. No inspection of the operation in Guam was performed on the merchandise covered by the entries listed in the addendum.

3. The procedures supporting the issuance of the Certificate of Origin were inadequate to insure that the merchandise in question was subjected to sufficient operations on the island. When verifying the certificate, Guamanian Customs officials merely attempted to determine whether the articles were 100 percent finished when entering the island. The "degree of completion" was not a concern of Guamanian Customs.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

BF

4. The manufacturer does in fact maintain machinery on its facilities with which clothing can be fully manufactured.

From the foregoing information it is clear that the importers have complied with all the legal requirements for duty-free entry by providing the government with all the documentation mandated by Section 7.8 of the Customs Regulations. Most importantly, they have submitted Certificates of Origin verified by Guamanian Customs officials. It has been our practice to accept those documents as conclusive proof of origin. Nothing on the face of these documents indicates that they do not reflect the true facts. In addition, no evidence has been developed in the course of the investigation which conclusively demonstrates that the documents are false.

A similar situation was involved in Internal Advice No. 331/75, where the issue concerned the country of origin of certain CPO shirts. The basis for the determination that the shirts were dutiable at the column 2 rates of duty was (1) the Austrian manufacturer failed to cooperate with the investigation by failing to obtain documents from the Austrian government which would have established the condition of the goods when they entered Austria, (2) there was no convincing evidence that production facilities were available in Austria for this operation, and (3) the parties had a past history of importing from one country and claiming another as the country of origin. The ruling held that since the importor had supplied all the documents legally required and no direct evidence existed indicating that the documents were fraudulent, the articles should be dutiable as claimed by the importer.

Accordingly, viewing the file in its present condition, it is clear that the importers have satisfied all the documentation requirements and that there is no direct evidence which indicates that the documents are false or that the goods were not in fact a product or manufacture of Guam. Accordingly, there is no legally sustainable reason to disbelieve the documents.

[redacted]

Dear [redacted]

This is in reference to your inquiry regarding the tariff status of herring in 50 kilo barrels, apparently the product of a country or area entitled to the reduced rate of duty.

We assume that the herring are either salted or pickled, and are commonly imported in barrels or half barrels. It is also assumed that the herring are not in airtight containers.

On the basis of the above the herring in barrels are classifiable as herring, salted or pickled, whether or not whole, but not otherwise prepared or preserved, and not in airtight containers, in bulk or in immediate containers weighing with their contents over 15 pounds each, in item 111.32, Tariff Schedules of the United States (TSUS), and are free of duty.

If otherwise prepared or preserved in any manner, not in oil, in airtight containers weighing with their contents over 15 pounds each, they are classifiable in item 112.12, TSUS, dutiable at the rate of 0.5 cent per pound; or if otherwise prepared or preserved in any manner, in oil, in airtight containers whether or not weighing with their contents over 15 pounds each, classifiable in item 112.46, TSUS, dutiable at the rate of 12.5 percent ad valorem.

Copies of the tariff provisions set forth herein are enclosed. The column 1 rate of duty is explained in General Headnotes 3(e) and (f), TSUS.

We apologize for taking so long to answer your inquiry and hope that our delay has not caused you any inconvenience.

(051850 is correct NO.)

[redacted]

In your letter of April 25, 1977, on behalf of [redacted] you inquire as to the tariff classification of streptococcus and gonococcus test kits. It is assumed that the merchandise in question is of Swedish manufacture.

Descriptive literature indicates that the [redacted] gonococcus test is a rapid co-agglutination test performed on glass slides for the identification of N. gonorrhoeae that have been primarily identified as oxidase positive colonies in cultures. Specific antibodies to N. gonorrhoeae are bound to the cell wall of staphylococci. When N. gonorrhoeae is mixed with this reagent, antigens in the gonococcal cell wall bind specifically to the anti-gonococcus antibodies, producing heavy co-agglutination. When bacteria other than N. gonorrhoeae are mixed with the reagent, no co-agglutination occurs. You indicate that the gonococcus test consists of the gonococcus reagent, a control reagent, a buffer substance, and instructions for use.

Descriptive literature further indicates that the [redacted] streptococcus test is for the differentiation of streptococci into Lancefield groups A,B,C, and G in samples taken from humans. Differentiation of streptococci into Lancefield groups (5) is important for the treatment as well as the prognosis of the individual patient. Antibodies to groups A,B,C, and G respectively are bound to the cell surface of dead staphylococci. When a sample containing streptococci belonging to one of these groups is mixed with its specific reagent, the antigens on the cell surface of the streptococci bind to the corresponding antibodies forming a heavy co-agglutination lattice. You indicate that the streptococcus test consists of a kit containing several streptococcus reagents, a buffer substance, and instructions for use.

NCB 401.5 T
017349

[redacted]

Dear [redacted]

This is in reply to your inquiry of December 15, 1971, on behalf of [redacted] about the dutiable status of grain screenings shipped to the United States in pellet form.

No samples and no information as to the method of manufacture was submitted but it is assumed that a binding agent is used in making the pellets. The Bureau has previously ruled that grain screenings pelleted with Lignosite as a binder are classifiable under the provision for other animal feeds in item 184.75, Tariff Schedules of the United States (TSUS). The Bureau has also previously ruled that hay which has been compressed into pellet form is also classifiable under the provision for other animal feeds in item 184.75, TSUS. These products were precluded from classification under the so called provision for grain screenings and hay because the addition of binders and/or compressing them into pellet form resulted in the creation of another product.

In view of the above, the grain screenings in question are probably classifiable under the provision for other animal feeds and ingredients therefore in item 184.75, TSUS, with duty at 7.5 percent ad valorem.

Sincerely yours,

(Signed) J.W. O'NEIL

CLA-2:R:CV:MS
049813 JM

[redacted]

Dear Mr. [redacted]

In your February 15, 1977, letter you requested that we ascertain the tariff classification for a photo micronaizer particle size analyzer (PMS-1000) which is made in Japan. Descriptive literature was submitted.

The analyzer is designed to measure the particle size distribution of particulate materials. It consists of three units: (1) a photo-extinction measuring unit, (2) a logarithmic recorder unit, and (3) a centrifuge.

The analyzer is designed to function based on photo-extinction principles and sedimentation techniques in analyzing particle size. More specifically, a beam of light is passed through particles in suspension. The light beam scatters and is absorbed by the suspended material. The variation in the intensity of the light is measured by a photo cell. The variation is compared with the intensity of a pure liquid. The comparison, when computed with certain other factors, produces a determination of particle size. The centrifuge is designed to accelerate natural sedimentation and to reduce the adverse affects of natural convection and Brownian motion in the measurement of fine particles.

An important consideration in the classification of the article in question is whether or not the article is an optical instrument. In Engis Equipment Co. v. United States, 62 Cust. Ct. 29, C.D. 3670 (1969), the United States Customs Court defined the characteristics whch are necessary to qualify a device as an optical instrument for tariff purposes. First, the device must function in such manner that employment of its optical features is dominant or primary, as compared to the role of its other components. Second, the device's optical elements must be essential to its operation, that is, it cannot be operated in the intended manner without the optical components. Third, the optical instrument must act upon, deal with, or route the rays of light. Finally, the optical system of the device must aid human vision or create for inspection a picture or image of some object.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B13

[redacted]

It does not appear that the article in question fully meets the criteria set forth in Ragis, particularly with regard to the fourth criterion.

Accordingly, we are of the opinion that the photo-extinction measuring unit and the logarithmic recorder unit are both classifiable in item 712.49, Tariff Schedules of the United States (TSUS), as non-optical electrical measuring and analyzing instruments, with duty at the rate of 10 percent ad valorem."

The centrifuge, although a part of the overall PMS-1000 analyzer, is more specifically provided for as a centrifuge, per se, in item 661.90, TSUS, with duty at the rate of 5-1/2 percent ad valorem. Therefore, classification of the centrifuge in item 661.90, TSUS (rather than in item 712.49, TSUS, as a part of the electrical measuring and analyzing instrument in question) is required by General Interpretative Rule 10(ij), TSUS. Rule 10(ij) states that a provision for "parts" of an article covers a product solely or chiefly used as a part of such article, but does not prevail over a specific provision for such part elsewhere in the TSUS.

Sincerely yours,

(Signed) R. X. ARNOLD

[redacted]

Dear Mr. [redacted]

In your letter of April 4, 1977, on behalf of [redacted], you inquire as to the tariff status of spectrofluorimeters produced in England. Subsequent correspondence and various brochures initiated by [redacted] have also been received for our examination.

Information before this office indicates that even though descriptive literature depicts numerous instruments, you are primarily interested in the following:

1. FC100 Fluoricord Spectrofluorimeter
2. FM100 Fluoripoint Spectrofluorimeter
3. SFR100 Ratio Recording Spectrofluorimeter

Accordingly, our reply will be limited to the merchandise named above. The subject instruments are used in fluorescence analysis. The method appears to be closely related to spectrophotometer analysis, in which the amount of light absorbed characteristically is used to measure samples.

On the basis of the information submitted, it is our opinion that the merchandise described is classifiable under the provision for electrical measuring, checking, and analyzing instruments and apparatus in item 712.49, Tariff Schedules of the United States, dutiable at the rate of 10 percent ad valorem.

Sincerely yours,

[redacted]

(Signed) R. X. ARNOLD

[redacted]

Dear [redacted]

This is in reply to your letters of May 23 and August 26, 1977, in which you requested information regarding the tariff status of cordage of man-made fibers and the identical cordage with eye-splices on one or both ends, manufactured by your associated mill in the Republic of the Philippines.

You stated that the cordage is within the definition of cordage of stranded construction provided in Headnotes 1(a) and (b), Schedule 3, Part 2, Tariff Schedules of the United States, (TSUS), being constructed of 3 or more strands, each strand of 2 or more yarns of man-made fibers (i.e., polyproplyene or nylon), and has been properly classified upon importation in the United States under the provision for cordage of man-made fibers in item 316.60, TSUS, dutiable as a product of the Philippines at the reduced column 1 rate of duty of 12.5 cents per pound plus 15 percent ad valorem.

052298

This classification provides no problem for you; however, you state that, at times, pursuant to a request from a customer, you order and your associated mill in the Philippines provides the identical cordage, cut to a specific length, with eye splices in one or both ends. Upon entry into the United States, this merchandise is classified under the provision for other articles of textile materials not specially provided for, not ornamented, of man-made fibers, other than artificial flowers or of knit or pile or tufted construction, in item 389.62, TSUS, dutiable as a product of the Philippines at the reduced column 1 rate of duty of 25 cents per pound plus 15 percent ad valorem.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C2

[redacted]

It is your position that: the mere addition of an eye splice at the end or ends of a specific length of cordage, the cordage being otherwise identical in all respects of cordage classifiable in item 316.68, TSUS, in no way supports the change in either the classification or the resultant rate of duty; and, irrespective of the splice or splices, the merchandise remains cordage "... within the fullest meaning of Schedule 3, Part 2, Sub-sections [sic, Headnotes] 1(a), (b) and (d)." Additionaly, in support of your position, you stated that "... there is no value added, for the reasons that such splices (eyes) are supplied by the factory free of charge, that is to say, the basic cost to us of the rope is the same, whether a splice (eye) is included or not."

Based on your position, you request our review and confirmation of your interpretation that classification in item 389.62, TSUS, of lengths of cordage (rope) with eye splices in one or both ends "... was not and is not intended to cover cordages in any case and, more specifically, that it does not relate to the type of cordage (stranded, man-made, with or without eye splices) ..." in which you are interested.

We do not agree with your interpretation of these 2 provisions of the tariff schedules.

The term "cordage" is defined in the above-cited Headnotes as "... assemblages of textile fibers or yarns, in approximately cylindrical form and of continuous length, ..., designed and chiefly used as an end product, and comprising cable, rope, cord, and twine.. [emphasis supplied]."

As is readily apparent from this definition, in conjunction with the other cited Headnotes, merchandise in chief value of man-made fibers which conform to these definitional requirements is, as you indicated, properly classifiable under the provision for cordage of man-made fibers in item 316.68, TSUS, at the rate of duty applicable thereto.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

C3

055298

However, with regard to the specific issue raised in your inquiry (i.e., the different classification applied to such cordage with eye splices at the end or ends of specific lengths thereof), classification under this provision is precluded by the specific language of the Headnote quoted in part above, in that the merchandise (i.e. specific lengths of cordage with eye splices at one or both ends) is neither "... of continuous length .." nor does it retain its identity as "... cable, rope, [or] cord ...". Headquarters, United States Customs Service has consistently held that the mere cutting of cordage to specific lengths for specific uses, in and of itself, constitutes a change in condition significant enough to require a change in classification. The additional processing of such merchandise by the addition of an eye splice in the end or ends thereof further dedicates the end product to a specific use and, dispite your contention that this is done without additional charge by your associated mill, constitutes both an advance in value and condition over and above the cutting to specific lengths, thereby further removing it from the "generic" description as cordage. It has, by virtue of additional processing or manufacturing become a new and difference article of commerce.

Accordingly, absent any further information concerning the exact nature of the use to which such merchandise is ultimately destined, classification of the provision other articles provided for of textile materials, man-made fibers, other than of knit or pile or tufted construction in 389.62, TSUS, dutiable as a product of the Philippines at the reduced column 1 rate of duty of 25 cent per pound plus 15 percent ad valorem is completely proper.

With regards to that part of your inquiry wherein you indicated that "... it is imperative that the rate of duty to be assessed be formly established and clearly known at the time that the original commitment is made for any given importation [of specific length of cordage with one or two eye splices at the end or ends thereof]," Headquarters, United States Customs Service, has consistently so treated such merchandise at least since 1971.

052298

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

[redacted]

Additionally, your inquiry raises a subsidiary issue which we believe requires further examination. You indicated that your supplier, which you referred to as an "associated mill," supplies the subject eye splices to you "free of charge." Since we believe this situation could conceivable constitute an element of value, properly subject to duty, we have forwarded a copy of your inquiry and this reply to the Value Branch, Classification and Value Division, here at Headquarters for direct reply to you concerning this issue. Additionally, we have also circulated a copy of this ruling to all District Directors of Customs for their consideration with regard to the classification aspect on any pending (unliquidated) or future entries of merchandise of this nature.

Sincerely yours,

(Signed) James W. O'Neil

[redacted]

Dear Mr [redacted]

This concerns your letter of July 29, 1977, as to the tariff status of alfalfa grown in Canada and shipped to the United States in cube form. Your request is on behalf of [redacted]

The alfalfa is harvested and then chopped into 1-1/4 inch lengths. The product is next pressed through restricted openings by press wheels to form small cubes. The cubed article is sold as alfalfa for animal fodder in the same manner as baled hay. They are referred to as "mini bales." The hay in the bales may be pried apart to restore the individual pieces (chopped) of alfalfa.

In C.J. Tower & Sons v. United States, 31 Cust. Ct. 108, C.D. 1553, the court considered alfalfa meal as hay since the eo nomine designation in the tariff act, without limitation, includes all forms of the article as long as they are recognizable as such.

The sample submitted was found to consist of individual pieces of hay. The merchandise as presented by the sample is classifiable under the provision for hay in item 184.30, Tariff Schedules of the United States (TSUS), and is free of duty.

Sincerely yours,

(Signed) James W. O'Neil

MAR 3 1978

CLA-2:R:CV:MC
053941 LR

[redacted]

Dear [redacted]

This is in reply to your letter of October 12, 1977, requesting a classification ruling on a woolen scarf from Uruguay. The submitted sample is a woven wool scarf measuring approximately 58 inches in length, including a 2 inch self-fringe on either end, and 14 inches in width. The lengthwise edges are unhemmed.

The fringed edges constitute ornamentation for tariff purposes. Therefore, the scarf which you have submitted is properly classifiable under the provision for other ornamented scarfs in item 372.10, Tariff Schedules of the United States (TSUS), and dutiable at a rate of 30 percent ad valorem.

You also inquire as to the duty which would be imposed on rolls of fabric measuring 56 inches in width and approximately 70 to 80 yards in length. According to your description, there are 4 inch sections appearing at regular 58 inch intervals, running the width of the fabric, in which the filling yarns have been omitted. Presumably, these sections indicate cutting lines for the scarfs and will form the fringe when cut. If, in addition to these cutting lines, there are repeated patterns or lines of demarcation to indicate cutting lines running the length of the fabric, such fabric is similarly classifiable under the provision for other ornamented scarfs in item 372.10, TSUS, and dutiable at a rate of 30 percent ad valorem.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

c1

[redacted]

In the absence of repeated patterns or lines of demarcation, the fabric as described is classifiable under the provisions for woven wool fabrics, according to its value. If valued not over $1.26-2/3 per pound, it is classifiable in item 336.50, TSUS, with duty at the rate of 35.3 cents per pound plus 60 percent ad valorem. If it is valued over $1.26-2/3 but not over $2 per pound, it is classifiable in item 336.55, TSUS, with duty at the rate of $1.135 per pound. If the fabric is valued over $2 per pound it is classifiable in item 336.60, TSUS, with duty at the rate of 37.5 cents per pound plus 38 percent ad valorem.

The merchandise described above may be subject to international textile trade agreements. If you desire further information in this regard, it is suggested that you write directly to our Duty Assessment Division, enclosing a copy of the letter with your inquiry.

Your sample is being returned under separate cover.

Sincerely yours,

(Signed) James W. O'Neil

The Honorable
William S. Cohen
House of Representatives
Washington, D.C. 20515

JAN 6 1978

Dear Mr. Cohen:

With your letter of December 21, 1977, you enclosed a letter from [redacted] of [redacted] Son, concerning the tariff classification of canned clams from Canada.

[redacted] states that he does not believe the 14 percent rate of duty is justified because there is no United States clam industry, to speak of.

Canned clams may be imported under the provision for clams in airtight containers, if razor clams (siliqua patula), in item 114.01, Tariff Schedules of the United States (TSUS), dutiable at 3.5 percent ad valorem. Other clams in airtight containers are classifiable in item 114.05, TSUS, dutiable at 14 percent ad valorem. Further, pursuant to headnote 1, Part 3E, Schedule 1, TSUS, the ad valorem duty provided for in item 114.05, TSUS, is assessed on the American selling price of like or similar articles produced in the United States. Fresh, chilled or frozen clams not in airtight containers are free of duty under item 114.10, TSUS.

All merchandise imported into the United States is dutiable on its total value and quantity unless specifically exempted. There is no exemption for clams in airtight containers.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

C9

While we appreciate [redacted] point of view, the Customs Service, as an administrative agency, has no authority to make any changes or grant any waivers in the provisions of the tariff schedules. Your constituent may wish to contact the Office of the Special Representative for Trade Negotiations at 1800 G Street, N.W., Washington, D. C. 20506. That office is presently conducting tariff negotiations under the so called "Tokyo Round."

If we can be of further assistance to you, please feel free to call on us.

Sincerely yours,

(Signed) Robert E. Chasen

Commissioner of Customs

DEC 0 9 1980

[redacted]

Dear [redacted]

In your letter of August 25, 1980, on behalf of [redacted] you asked about the applicability of item 806.20, Tariff Schedules of the United States (TSUS), to certain specialty articles of merchandise that are exported to Canada for printing in the form of advertising messages according to individual customer needs, and returned to the United States.

It is stated that the merchandise will consist of such specialty articles as plastic office products, ball point pens, and cigarette lighters, made of either plastic or metal or a combination of both. The advertising messages will be applied by various methods of printing and lettering.

Item 806.20, TSUS, provides for an import duty to be assessed on the value of repairs or alterations that are made abroad on articles exported for that purpose. Generally, the described printing of advertising messages constitutes neither a repair nor alteration within the meaning of item 806.20, TSUS, but instead is considered a part of the total processing, a finishing operation that is performed abroad.

In this respect, printing an advertisement on articles exported for that purpose creates a new and different article of commerce. The imported printed articles are not the same commercially as unprinted articles and may be offered for sale in different markets to different classes of buyers. The foreign printing process has created a new and different article of commerce, with new characteristics and uses, and is thus beyond the alterations provision of item 806.20, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C11

CODE AND DATE							
SURNAME							
CODE AND DATE							
SURNAME							

Further, unless printing is performed on articles in conjunction with the assembly provisions under item 807.00, TSUS, and bears a direct relation to the assembly, since it is also stated that components of specialty articles may be exported for assembly and printed, the printing is not considered incidental to the assembly. No allowances can be made under item 807.00, TSUS, for components that are printed abroad with advertising logos or other messages. The described foreign printing constitutes a non-assembly step, contrary to the requirements of item 807.00, TSUS.

Sincerely,

(Signed) R. X. ARNOLD

for the Harvey B. Fox
Director, Classification
and Value Division

C12

[redacted]						
[redacted]						

JAN 28 1981

CLA-2:CO:R:CV:G
055902 EH

055902

District Director of Customs
U.S. Customs Service
P.O. Box 9516
El Paso, Texas 79985

Dear Sir:

This concerns your request under the internal advice procedure (No. 181/80), on behalf of the importer, [redacted] and its agent [redacted] concerning the applicability of item 807.00, Tariff Schedules of the United States (TSUS), to certain metal cans and covers exported to Mexico for use in the assembly of electronic noise filters.

ISSUE:

Assuming that item 807.00, TSUS, remains applicable on the merits of assembling other components making up the described filters, the only issue for determination herein is whether the punching of holes in the cans for eyelets and screws, and the trimming of covers for certain model cans are operations considered incidental to the assembly process.

FACTS:

As stated by the importer in its request for a ruling on the drilling of holes in different locations on the metal cans, the following operations are listed as part of the assembly operation:

1) Can punched and eyeletted, insulated wire fed thru the holes.

2) Can punched and screws inserted through the holes for screw terminals.

3) Can punched and terminals eyeletted to the can.

In addition to the described hole-drilling operations, the importer also claims the trimming of metal covers used in certain

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

C13

filter models to be incidental to the main assembly process. In the request for internal advice, it is stated that the assembly descriptions previously filed by the importer showed that prior to 1975, holes were punched in the cans before exportation.

055902

CONTENTIONS:

The importer claims that the holes cannot be punched in the cans before exportation but must be punched abroad as an incident to assembly. It is claimed in the request for internal advice that the holes must be punched before exportation since making holes in the cans amounts to a substantial change not considered incidental to the assembly.

LAW AND ANALYSIS:

It has previously been the practice to preclude tariff treatment under item 807.00, TSUS, whenever holes were made in exported components. However, in Rudolph Miles v. United States, C.A.D. 1202, it was held that burning slots and drilling holes in steel Z-beams to permit proper alignment for assembly did not produce such a substantial change in the beams as to constitute further fabrication. The foreign processing of the beams was held to be a part of the assembly under item 807.00, TSUS. In view of this precedent, we are now of the opinion that similar holes made in components to facilitate assembly may also be regarded as assembly operations. In this respect, since the holes are drilled in the metal cans at the time of assembly in order to determine the location of the holes, as claimed by the importer, this drilling of holes should also be regarded as not so substantial as to constitute a fabrication.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C14

Accordingly, since the holes in question are made solely to accommodate eyelets and screws essential to the assembly of the components, punching holes will not preclude tariff treatment of the cans under item 807.00, TSUS. Slight trimming of the metal covers, of course, is also considered a step incidental to the assembly process and eligible for item 807.00 tariff relief.

Sincerely,

(signed) Harvey B. Fox

APR 07 1978
CLA-2:R:CV:MA
056449 HL

056449

[redacted]

Dear [redacted]

This is in reference to your letter of March 2, 1978, concerning the tariff status of jewelry from Australia, Hong Kong, Taiwan, and the Philippines.

We are enclosing copies of the Tariff Schedules of the United States (TSUS), relating to jewelry. Note that items 740.05 and 740.10, TSUS, cover precious jewelry. In particular, item 740.05, TSUS, covers articles of silver (including rolled silver) valued not over 18 dollars per dozen pieces or parts. Item 740.10, TSUS, covers all other precious articles, including gold jewelry and silver jewelry valued over 18 dollars per dozen pieces or parts. Thus, articles of silver jewelry valued at 3 dollars each from a non-Communist country would be classifiable under item 740.10, TSUS, and dutiable at the column 1 rate of duty of 12 percent ad valorem.

Items 740.30, and 740.38, TSUS, cover nonprecious jewelry and other objects of personal adornment not covered by the precious jewelry catagories. Costume jewelry would probably be classifiable under either item 740.30 or 740.38, TSUS, depending upon value. Shell Jewelry would be likewise classifiable.

Pursuant to the Generalized System of Preferences (GSP), various products from certain eligible developing countries have been granted free entry. Articles classifiable under items 740.05, 740.10, 740.30, and 740.38, TSUS, which have been produced in Taiwan and the Philippines, and articles classifiable under items 740.05 and 740.38, TSUS, which have been produced in Hong Kong are included among the eligible articles and entitled to free entry under GSP, if otherwise qualified. Articles classifiable under items 740.10 and 740.30, TSUS, from Hong Kong are excluded from GSP treatment. We are enclosing a copy of general Headnote 3(c), TSUS, which sets forth the requirements under GSP.

A certificate of origin, also known as Form A, indicating country of origin for obtaining GSP treatment, is usually obtained from the seller in the country of exportation.

[redacted]

Dear [redacted]

In your letter of December 12, 1977, you request "permission" to export toilet soap and bay rum from the Virgin Islands to the United States. You state that you manufacture these articles in the Virgin Islands. The bay rum is processed from bay extract and alcohol, and the soap is processed from coconut oil and alkali. Samples were submitted for our examination. You do not indicate the origin of the materials.

Articles imported into the United States directly from the Virgin Islands may be exempt from duty under General Headnote 3(a), Tariff Schedules of the United States (TSUS). In pertinent part, General Headnote 3(a) states that articles may be accorded duty-free status if they are manufactured or produced in the Virgin Islands and if they do not contain foreign materials to the value of more than 50 percent of their total value. The requirements of section 7.8, Customs Regulations, copy enclosed, must also be met.

You have not provided us with sufficient information to determine whether the requirements of General Headnote 3(a) have been satisfied. However, Customs officials in the Virgin Islands should be able to advise you whether you have met the requirements if you provide them with an adequate description of the manufacturing processes, the value and origin of the components, and cost of processing.

If you have any questions concerning internal-revenue taxes and import restrictions on alcoholic products, you should contact the Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

Sincerely yours,

[redacted]

Dear [redacted]

In your letter of December 8, 1978, on behalf of [redacted], you asked about the applicability of item 806.20, Tariff Schedules of the United States (TSUS), to balloons that are exported to Canada for printing, and returned to the United States.

A small sample printed balloon was submitted, bearing the printed logo "Bank of Montreal" thereon. It is stated that both the small balloons which appear to be printed for advertising purposes, and the ink used in the printing are exported from the United States. The printing process performed in Canada involves a silk-screening procedure.

Partial exemptions may be made under item 806.20, TSUS, which provides for a duty to be assessed on the value of repairs or alterations performed abroad on articles exported for that purpose, provided that the foreign operations do not result in new or commercially different articles, different in name, value, appearance, size, shape, or use, from that which was exported. In the described circumstances, however, a new product, a balloon advertisement, emerges from the foreign inking and printing process, which did not exist before.

Inflating the balloons also succeeds in advertising the printed name or logo thereon and this is the purpose of the printing - to create a new and different article, different in value, appearance, and commercial use from that which was exported. Thus, the foreign printing is said to have created a new, designated article of commerce, which is beyond the alterations provision of item 806.20, TSUS.

With respect to the application of item 806.20, TSUS, to the T-shirts referred to in your letter that are exported

D1

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

for printing small crested school designs thereon, unlike the printed balloons, printing a school insignia is not intended to advertise a commercial product or establishment. The insignificant printing on the shirt does not give it a new name or use.

Accordingly, in the absence of any other partial exemption from the payment of duty that might be applicable in the circumstances, the printed balloons would be subject to duty on the total value and quantity when returned to the United States.

Sincerely,

(Signed) R. X. ARNOLD

[redacted]

Dear [redacted]

This is in reply to your letter of January 5, 1978, concerning the tariff status of plastic strips which you state are waste products from the manufacture of carpet backing. The country of origin is Canada. Samples were submitted.

The samples are colored strips which you state are polypropylene. These strips are over 0.06 inch but not over 1 inch in width and do not appear to be over 0.01 inch in thickness. You indicate that the strips were originally intended to be used as carpet backing and are either spool ends or are not up to specification. After importation into the United States, the strips will be converted into a sorbent for use in the recovery of heavy, viscous oils which have been spilled on water.

Merchandise as represented by the submitted samples is classifiable under the provisionsfor waste of man-made fibers, not advanced, other, in item 309.66, with duty at the rate of 2.5 percent ad valorem.

The merchandise described above may be subject to international textile trade agreements. If you desire further information in this regard, it is suggested that you write directly to our Duty Assessment Division, enclosing a copy of this letter and a sample of the merchandise with your inquiry.

Sincerely yours,

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

CLA-2:RRUCMA
062827 E

District Director of Customs
U.S. Customs Service
300 S. Ferry Street
Terminal Island, San Pedro 90731

Sir:

In an informal memorandum dated October 17, 1979, Mr. Kass of your office asked whether certain tungsten ore imported under entry No. 78-145869 of December 16, 1978, should be classified under item 601.54 or 603.45, TSUS.

Headquarters records disclose the following:

a. In a letter dated August 26, 1975, (041529), to [redacted] counsel for [redacted], he was informed that scheelite concentrates from Thailand and Canada which had undergone roasting, and in some cases, leaching with hydrochloric acid, were classifiable under item 603.45, TSUS.

b. On February 17, 1976, in connection with a claim of an established and uniform practice of classifying natural scheelite concentrates under item 601.54, TSUS, made by [redacted] supported such classification even though noting that the recent Executive Order 11888 of November 24, 1975, which designated Thailand as a beneficiary developing country would be to its advantage.

c. On March 1, 1978, (044372) Headquarters informed [redacted] that an established and uniform practice did exist to classify the concentrated natural scheelite ores in item 601.54, regardless of the processes used to concentrate them, and that future entries of natural scheelite will continue to be

[redacted]

D10

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

13297

classified under item 601.54, TSUS, and artificial scheelite will be classified under item 603.45, TSUS.

Since the merchandise covered by entry No. 78-145869 is understood to be natural scheelite, it should be liquidated under item 601.54, in conformity with Headquarters letter of March 1, 1978. Headquarters letter of August 26, 1975, is revoked, and Headquarters letter of March 1, 1978, to [redacted] is considered compliance with Section 177.9(d), Customs Regulations.

Sincerely,

(Signed Arthur P. Schifflin

[redacted]

Dear [redacted]

In your letter of May 2, 1979, you asked about the applicability of item 806.30, Tariff Schedules of the United States (TSUS), to large sheets of aluminum metal that will be imported for the purpose of processing in the United States.

You explained that the aluminum sheets or coils will be slit, trimmed, cut to size, and finally sold to customers in the United States for use as plates in the offset printing industry.

Under item 806.30, TSUS, any article of metal (except precious metal) manufactured in the United States or subjected to a process of manufacture in the United States, if exported for further processing, and if the exported article as processed outside the United States, or the article which results from the processing outside the United States, is returned to the United States for further processing, may be entered with duty on the cost or value of the processing abroad, upon compliance with the Customs Regulations.

If the described imported aluminum sheets are made abroad from raw material aluminum of American origin exported in ingot, billet, or similar form, the provisions of item 806.30, TSUS, could be applicable if further processed here.

On the other hand, sheets made from foreign-made metal if imported into the United States and further processed here before being sold for final use would fail to comply with the requirements of the tariff provision.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D12

In this respect, we are enclosing a copy of item 806.30, TSUS, and the regulations governing importations thereunder.

Sincerely,

(Signed) R. X. ARNOLD

[redacted]

Dear [redacted]

In your letter of June 26, 1979, you request information regarding the importation of certain flameproofed wool cool uniform garments that are manufactured in New Zealand. You requested that we consider item 861.10, Tariff Schedules of the United States (TSUS), to allow these garments and future replacement garments to enter free of duty.

Since item 861.10, TSUS, covers imported drawings and plans and similar articles, we believe you wanted to refer to item 853.10, TSUS, which covers lifeboats and life-saving apparatus. In general, life-saving apparatus imported for the use of an institution established to encourage the saving of human life is entitled to duty-free treatment under the provisions of item 853.10, TSUS. However, the provisions of item 853.10, TSUS, are not applicable in this situation.

The Customs Service has previously ruled, in similar cases, that in order for an institution to qualify under the duty-free provisions of item 853.10, TSUS, as "an institution established to encourage the saving of human life," such an institution must be established for the purpose of rescuing people. We have ruled that clothing worn by members of a bomb squad to protect themselves, and not to save others, does not meet the requirements of item 853.10, TSUS.

Consequently, the articles in question are not classifiable in item 853.10, TSUS, as the wearing of the flameproofed clothing by the police helicopter pilots and observers appear to be primarily for their own protection.

Sincerely,

[redacted]

[redacted]

Dear [redacted]

In your letter of July 9, 1979, you request information regarding the applicability of General Headnote 3(a), Tariff Schedules of the United States (TSUS), to certain pumps which you plan to produce in the United States Virgin Islands. Brochures and a parts list were submitted.

The articles are described as self-priming rotary vane type pumps, precision made from high grade carbon, stainless steel, and plastic. The most popular uses are in the beverage equipment industry, welding, refrigeration, cleaning, dosing technology, medical research, and food stuff manufacture. The pumps are manufactured in one basic size weighing approximately 330 grams.

As you know, General Headnote 3(a), TSUS, provides in pertinent part for duty-free treatment of:

> Articles the growth or product of [an insular] possession, or manufactured, or produced in any such possession from materials, the growth, product, or manufacture of any such possession or of the Customs territory of the United States . . .

In determing whether an article is manufactured or produced in an insular possession within the scope of General Headnote 3(a), TSUS, a new and different article of commerce must result from the operation performed in the insular possession.

In your letter you fail to discuss the assembly or manufacturing process which will take place in the Virgin Islands. However, assuming that the pumps are assembled from components detailed in your parts list and imported

E'

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

into the Virgin Islands in 2 or more separate shipments so that no shipment of components could be classifiable as an unassembled unfinished pump, General Headnote 3(a), TSUS, would be applicable to the importation of these goods providing they do not contain foreign materials valued at more than 50 percent of the final appraised value and there is compliance with the pertinent regulations.

For your information, we are enclosing a copy of Duty Preferences Accorded United States Insular Possessions which sets forth further information for entry under General Headnote 3(a). We are also enclosing a copy of section 7.8, Customs Regulations, which governs such entry.

Sincerely,

(Signed) R. X. ARNOLD

[redacted]

Dear [redacted]

In your letter of July 26, 1979, you provide additional information on the assembly and testing operations of self-priming rotary vane type pumps. You request information regarding the applicability of General Headnote 3(a), Tariff Schedules of the United States (TSUS), to the pumps which will be assembled in the United States Virgin Islands from parts imported in separate shipments from Europe and the United States.

You describe the assembly operation as follows: carbon pump chambers are placed into a plastic housing and fastened through retaining pins. The motor with special carbon vanes is then inserted into the chamber. The carbon vanes are either spring loaded or kept under pressure against the pump pressure chamber by pins. Sealing rings and pressure retaining sealants are then placed onto the shaft of the motor and this entire subassembly is inserted into the housing. An "O" ring is then placed on the shaft and the pump is closed with a front panel. A ball bearing racer is then placed on the other end of the shaft.

The pumps are tested for pressure limitations under certain volume output. The pumps are further tested for pressure relief through the bypass adjustable mechanism and for leaks around the shaft, front panel, etc.

Based on the this description of the operations to be performed in the Virgin Islands and the information provided in your initial letter of July 9, 1979, the pumps would be accorded duty-free treatment under General Headnote 3(a), TSUS, providing they do not contain foreign materials valued at more than 50 percent of the final appraised value. The entry must also comply with section 7.8, Customs Regulations, copy enclosed.

Sincerely,

E3

[redacted]

Dear [redacted]

In your letter of August 21, 1979, you submitted additional information on certain chemicals you wish to import into the United States under the provisions of General Headnote 3(a), Tariff Schedules of the United States (TSUS).

The chemicals which are the subject of your inquiry are Sodium Sulfathiazole and Sulfmethazine. The ingredients and procedures for the production of these chemcials are as follows:

1. SODIUM SULFATHIAZOLE FROM SULFATHIAZOLE ACID

Water, sodium hydroxide, and sulfathiazole acid are combined in a tank. The mixture is maintained at 60 C and mixed well until clear. The mixture is then filtered while hot (if necessary) and poured into pans to solidify. When hard, the mixture is crushed and dried to 7 - 9 percent moisture, milled, and then packed for shipment. The product is Sodium Sulfathiazole.

2. SULFALMETHAZINE FROM SULFAGUANIDINE

Water, acetic acid, sodium hydroxide, sulfaguanidine (93 percent), and acetylacetone are combined in a reactor. The mixture is heated to its boiling point and allowed to boil with agitation for 24-36 hours. The mixture is then purified by solubolizing it with soldium hydroxide, and filtering and recrystallizing it from the water. The pure crystals are collected, dryed, milled, and then packed for shipment. This process yields Sulfamethazine.

We are now satisified that the production of Sodium Sulfathiazole and Sulfamethazine as described requires a

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E4

chemical change in the component materials utilized and would result in articles the manufacture or product of the Virgin Islands within the meaning of General Headnote 3(a), TSUS. Accordingly, these articles would be eligible for duty-free importation into the United States provided the value limitations are met and there is compliance with the pertinent regulations.

Sincerely,

(Signed) R. X. ARNOLD

[redacted]

Dear [redacted]

We have your letter of February 15, 1980, regarding the dutiable status of a bag to be imported from Japan.

The sample you mentioned was not received. You state that the bag is made of poly/vinyl/alcohol and is designed for hospital use. Contaminated linen will be placed in the bag and deposited directly into a washing machine. The water then dissolves the bag completely.

On the basis of the information submitted, we would classify the bag under the provision for articles of plastic under item 774.55, Tariff Schedules of the United States, with duty at the rate of 8.5 percent ad valorem.

Sincerely,

(Signed Arthur P. Schifflin

[redacted]

Dear [redacted]

In your letter of April 3, 1980, on behalf of [redacted] you asked for information about the tariff status of certain steel wire mesh that is produced in Canada from steel wire exported from the United States for that purpose.

Descriptive brochures were submitted. It is explained that a roll of single strand stainless steel wire weighing from 300 to 600 pounds, is exported to Canada where it is converted into mesh cage material measuring 16-1/2 inches wide, with each mesh opening measuring 1 by 1/2-inch. The foreign process consists of passing a series of 31 line wires spaced 1/2-inch apart, through welding heads. Another series of horizontal stay wires each 17 inches long, is laid across the line wires at 1-inch intervals and the two wires are welded together automatically by the weld heads. This process is repeated continuously until a roll of mesh wire measuring about 450 feet is made. The formed wire mesh is trimmed to a width of 16-1/2 inches, with 3/4-inch of the horizontal stay wires overhanging on each side. The wire mesh is then wound into rolls with the stay wires on the outside and returned to the United States in 450-foot rolls.

Upon return, the rolls are loaded into cage-forming machines and in a series of hammers, the machine bends the 3/4-inch overhang and simultaneously forms the mesh into a cylindrical shape. A stainless steel seam strip is then crimped over the bent stay wires to hold rigid the round shape of the cage. Mesh cages are cut to specified lengths, ranging from 8 to 19 feet. Upon removal from the cage machines, stainless steel top and bottom caps are crimped over the ends of the cages.

The mesh cages are used to provide a rigid support for fabric filter bags used as particle collectors for pollution control systems in foundries, cement, chemical processing, and power plants, etc. The bags are merely mounted over the cylindrical mesh cages.

E7

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Item 806.30, Tariff Schedules of the United States (TSUS), applies only to articles of metal that are exported for further fabrication in the foreign country and again upon return to the United States, upon compliance with the regulations.

In this respect, the conversion of stainless steel wire, exported as a raw material, into wire mesh abroad with trimming to width, and forming the returned wire mesh from a semi-finished product in 450-foot rolls into finished mesh cages ready for final use, appear adequate to comply with the further processing requirements, sufficient to satisfy the tariff provision.

Accordingly, the described operations performed on the wire adequately meet the requirements of further processing under item 806.30, TSUS, and the material imported could qualify upon compliance with pertinent regulations.

Sincerely,

(Signed) R. X. ARNOLD

Dear [redacted]

We have your letter of April 18, 1980, regarding the dutiable status of oyster flavored sauce, a product of Hong Kong.

Two samples were submitted, a 5 pound (80 ounce) tin and and8 ounce bottle sealed with a metal cap. Both samples are marked to show the contents as oyster extractives, water, salt, starch and acetic acid colored with caramel.

This merchandise is classifiable under item 114.55, Tariff Schedules of the United States (TSUS), as shellfish juices in airtight containers with duty at the rate of 3.9 percent ad valorem. As products of Hong Kong the sauces are entitled to duty-free treatment under the Generalized System of Perferences (GSP) upon compliance with all applicable regulations.

District Director of Customs
Nogales, Arizona 85621

Director, Classification and Value Division

Internal Advice No. 110/80; Dutiability of Certain Expenses Incurred by a U.S. Parent Corporation in Connection with Its Subsidiary's Assembly Operation in Mexico

ISSUE:

Whether certain expenses incurred by a parent corporation in the United States in connection with a subsidiary's assembly operation in Mexico are dutiable assists under constructed value and/or computed value.

FACTS:

The parent ("X") sends U.S. components to its subsidiary assembler ("Y") in Mexico. The components are assembled into finished products and then returned to the United States to X under the provisions of item 807.00, Tariff Schedules of the United States (TSUS). A transfer price is paid by X to Y.

The parent incurs certain costs which the District Director's office believes should be treated as dutiable assists under the constructed value basis of appraisement. The costs are described as follows:

1) X conducts an annual physical inventory of all inventory material that is in Y's possession, to meet IRS and accounting requirements. Because it is not economical or feasible for X to send its own employees to Mexico to conduct the physical inventory, most of the work is performed by Y's employees. The additional costs incurred by Y are recovered from X in the form of higher transfer prices for the assembled merchandise.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E10

X points out that the inventory is only consigned to Y and, therefore, ownership remains in X; and that there is no legal or accounting requirement that Y conduct a physical inventory of material owned by another company. Further, X is of the opinion that the physical inventory is not necessary to Y to perform its function, but is merely a service performed by Y for X.

2) Approximately every 18 months, X sends its auditors to review Y's books and records to confirm that they are maintained in accordance with X's accounting requirements. The cost of this audit is not billed to Y by X. This audit is in addition to the cost of an annual audit incurred by Y.

In X's opinion, the costs of the audit are not dutiable because the audit is not performed to assist the assembler but to assure X that the books are maintained in good order and that certain accounting requirements are met. Further, the audit is not requested by Y, but is imposed by X.

3) Personnel from X's U.S. operation make periodic visits to Y's plant to review, discuss, assist, and audit "work already performed" as opposed to actually performing work for Y. X believes that these costs should not be treated as dutiable expenditures of Y.

4) X's employees in the United States periodically make telephone calls to Y in connection with various aspects of the assembly work. X believes that these costs should not be considered dutiable general expenses of Y.

In the opinion of our Nogales office, all of these costs are dutiable general expense assists for the reason that such expenditures are normal costs of doing business. Under this theory, it is assumed that such costs would have been incurred by the assembler (as a "usual" general expense) had not the importing parent borne the expense.

Our New York office agrees that the costs incurred for the annual inventory and 18-month audit should be considered part of the assembler's general expenses and, therefore, should be dutiable under TSUS item 807.00. However, it is that

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E11

065213

office's opinion that neither the expenses incurred by X for periodic visits to review, discuss, assist, and audit "work already performed," nor the cost of telephone calls to its subsidiary, should be treated as dutiable assists. This view is equally applicable to merchandise appraised under constructed value or computed value.

065312

LAW AND ANALYSIS:

a) Constructed Value - Section 402(d)(2), Tariff Act of 1930, as amended, includes as part of constructed value "...an amount for general expenses and profit equal to that usually reflected in sales of merchandise of the same general class or kind as the merchandise undergoing appraisement which are made by producers in the country of exportation, in the usual wholesale quantities and in the ordinary course of trade, for shipment to the United States..."

In C.I.E. 7/73, dated March 1, 1973, Headquarters set forth a listing of the various elements which usually enter into the determination of statutory constructed value (or cost of production) for merchandise assembled in Mexico under item 807.00, TSUS. In the category under "General Expenses," we included such costs as building rent, telephone, fire and liability insurance, administrative salaries, and auditing expenses.

In ORR Ruling 73-0092, dated April 4, 1973, we held that the costs incurred by a parent firm in auditing a Mexican assembler were a necessary expense of conducting that operation and should be included in the assembler's general expenses.

The Olga Company v. United States, 71 Cust. Ct. 42, C.D. 4468 (1973), concerned the dutiable consequences of the cost of certain trips to the Mexican assembler's plant by the plant manager of the U.S. parent. The purpose of the trips was to check on the quality of the assembler's work.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E12

The court in that case held that such costs were neither costs of fabrication essential to the production of the merchandise nor general expenses of the assembler. Accordingly, such costs were held to be nondutiable.

b) Computed Value - (We assume, for the purposes of this ruling, that transaction value for the subject merchandise cannot be found under sections 402(b) or 402(c), Tariff Act of 1930, as amended by the Trade Agreements Act of 1979; and that computed value (section 402(e) of the Act) is the proper basis of appraisement due either to the importer's choosing or because deductive value (section 402(d)) is also inapplicable.)

Included in computing this basis of appraisement are: 1) Profit and general expenses equal to that usually reflected in sales of merchandise of the same class or kind as the imported merchandise that are made by the producers in the country of exportation for export to the United States; and, 2) any assist, if its value is not otherwise included elsewhere.

Under section 402(h) of the new law, an assist is defined as any of the following items that the buyer of imported merchandise provides directly or indirectly, and free of charge or at reduced cost, for use in the production of or the sale for export to the United States of the imported merchandise:

1) Materials, components, parts, and similar items incorporated in the imported merchandise;

2) tools, dies, molds, and similar items used in producing the imported merchandise;

3) merchandise consumed in producing the imported merchandise;

4) engineering, development, artwork, design work, and plans and sketches that are undertaken outside the United States.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E13

065343

HOLDING:

a) Constructed Value

1) Annual Physical Inventory - This cost was actually incurred by the subsidiary and not by the U.S. parent, although the expense was recovered in the transfer price. Accordingly, no assist was involved under either the new or the old law.

In our opinion, a physical inventory would be a usual general expense of an assembler or producer. We see no difference whether or not X retained legal title to the components at the time of the inventory. Accordingly, such cost should be considered a dutiable general expense of Y.

2) Audit - Under prior Headquarters rulings, supra, an audit has been considered to be a usual general expense of the foreign assembler or producer. However, in the instant case, if X can establish that the 18-month audit is primarily for its benefit and is duplicative of the annual audit which Y incurs, we would not consider such cost to be a usual general expense of the assembler and, therefore, not a dutiable assist.

3) Review of Work by U.S. Personnel - We do not consider these costs to be a usual general expense of the assembler nor a cost of fabrication since they were undertaken for the parent's benefit and after the work was performed. See The Olga Co., supra. Rather, these costs are general expenses of the parent.

4) Telephone Costs - Similarly, the cost of telephone calls made by the parent in the United States to the subsidiary are general expenses of the U.S. company, and cannot be attributed to the assembler. A different finding might result if X paid for the phone service used by Y in Mexico.

E14

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

b) Computed Value

Under the new law, it is apparent that none of the involved expenditures fall within any of the assist categories, supra. Therefore, the costs incurred by X for the 18-month audit, telephone calls, and employee trips to the Mexican assembler are not dutiable. As in the case under constructed value, however, the costs incurred by Y for the inventory are dutiable general expenses, if in accord with the generally accepted accounting principles of Mexico, the country of assembly.

It is noted that in a recent case (C.D. 4867), the Customs Court held that general expenses incurred by a parent corporation in the United States could not be imputed to the subsidiary foreign assembler. This case, however, is currently being appealed, and therefore, the decision is not final. Until a final decision has been rendered, Customs will adhere to its current position that certain general expenses may be imputed as assists.

Harvey B. Fox

[redacted]

Dear [redacted]

In your letter of February 11, 1981, on behalf of [redacted], you asked about the applicability of item 807.00, Tariff Schedules of the United States (TSUS), to certain component aluminum frame strips proposed to be exported to Mexico for assembly into luggage which is returned to the United States.

Luggage will be returned following the assembly operations in Mexico from fabricated components of United States origin. One of the exported components that forms the frame of the luggage is a pre-cut aluminum strip that is about 45 inches long and 1-1/4 inches wide, with 18 pre-punched holes of various sizes and shapes.

Although exported in straight form, the strip is placed in a jig and formed by hand into a basic rectangular shape. Following this, the strip is removed and placed in two smaller jigs in order to further refine the rectangular shape more precisely. These operations are said to consume about 25 seconds per frame prior to assembly along with other components into finished luggage.

With respect to a foreign assembly, item 807.00, TSUS, provides for the assembly of an article from components that are exported in condition ready for assembly without further fabrication.

In support of your claim that the forming operations performed in Mexico on the exported aluminum strips would be considered incidental to assembly, you compared the horizontal coils made from exported spooled magnet wire in General Instrument Corporation v. United States, C.A.D. 1128. Wire that was used to make horizontal coils for T.V. deflection yokes was despooled from a supply spool and formed into the primary shape of a horizontal coil by a winding machine. The wire was further taped to prevent unraveling, cement dipped, dried, and precision shaped by machine pressing to fit the contours of a plastic liner on which it was subsequently mounted. The steps performed on the exported wire were considered to be assembly steps within the meaning of item 807.00, TSUS,

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

and the spooled wire was held to be capable of immediately entering into the assembly process to make the imported yokes. The operations performed on the wire were held necessary to the assembly process since the wire was already a finished product that could not have been exported in the described coil forms, but only on spools. The spooled wire was merely transferred to another wound form as part of the assembly process. In this respect, operations performed abroad on the spooled wire were considered to be assembly steps rather than a fabrication.

On the other hand, the described aluminum strips were exported in an unfinished state when they left the United States and were not capable of immediately entering into the assembly process. Further work was required to shape the strips to the specialized rectangular scale before they were ready for the luggage pattern. The described forming and shaping operations are considered too substantial and remote from the assembly process to be considered an incidental part thereof. Unlike the winding of the coil, the bending of the strips is not an assembly operation. In this respect, the shaping operations performed on the metal strips are fabricating steps performed in preparation of a component for subsequent assembly. Generally, the cases construing the meaning of the phrase "fabricated components" in terms of narrow materials such as wire exported in rolls and merely cut to length abroad include the General Instrument cases, C.A.D. 1062, 1106, 1128, and C.D. 4468.

Fabricating or non-assembly steps performed on exported components between the time of arrival abroad and the assembly merely show that the exported components were not "in condition ready for assembly without further fabrication."

Sincerely,

(Signed) R. X. ARNOLD

[redacted]

Dear [redacted]

In your letter of April 17, 1981, you ask about the tariff status of platinum jewelry made in Taiwan from metal exported from the United States.

Platinum jewelry is classifiable under item 740.10, Tariff Schedules of the United States, at the rate of 10.6 percent ad valorem. If the product of Taiwan, it is eligible for GSP treatment, provided the direct costs of processing are not less than 35 percent of the appraised value of the jewelry imported. You indicate that the labor cost would only be about 7 percent.

It does not appear from the facts set forth in your letter that the value of the metal can be used to compute the 35 percent requirement. Only if the platinum if first transformed into another article, such as wire, can its value be included.

Copies of our publications "Exporting to the U.S." and "GSP information" are enclosed for your further information.

Sincerely,

(Signed) R. X. ARNOLD

[redacted]

Dear [redacted]

In your letter of August 27, 1981, you inquired concerning the tariff status of an electronic module to be imported into the Virgin Islands for incorporation into certain quartz watch movements being manufactured there.

You state that you intend to import the module through New York, pay the duty, and ship it to the Virgin Islands. You believe that the cost of the module and the duty paid in the United States should not be included as part of the landed cost.

Under Danish Law No. 64 of April 1, 1914, as amended, continued in force in the Virgin Islands of the United States by section 4 of the Act of March 3, 1917, as amended (48 U.S.C. 1395), and section 36 of the Act of June 22, 1936 (48 Stat. 14061), merchandise of foreign origin imported into the Virgin Islands from the Customs territory of the United States is dutiable regardless of whether duty was paid on its entry into the Customs territory of the United States.

In the circumstances, there is no way in which we could allow the entry of the foreign-made module into the insular possession without the payment of duty or authorize the exclusion of its cost in computing the dutiable status of the finished movement which will be imported into the United States.

Sincerely,

(Signed) R. X. ARNOLD

[redacted]

Dear [redacted]

In your letter of November 6, 1981, you asked for information about the tariff status of surplus military vehicles and spare parts that had been exported from the United States during the period of World War II under certain lend-lease or other types of foreign agreements, and are now being returned to the United States.

You explained that the vehicles and parts therefor are purchased from a foreign government but during the course of years it was found necessary to overhaul and rebuild the equipment in order to maintain it in an operable and serviceable condition for the purpose, probably military, intended by the foreign government. It is claimed that since the vehicles and spare parts had been exported in a new condition, any rebuilding program performed abroad on the vehicles could never restore the exported articles to their original new condition.

With respect to the return of American goods, item 800.00, Tariff Schedules of the United States (TSUS), provides for the free entry of products of the United States when returned after having been exported, without having been advanced in value or improved in condition by any process of manufacture or other means while abroad.

Generally, American goods may be returned under item 800.00, TSUS, provided that the articles have not been advanced in value or condition but were merely maintained to keep them in their original serviceable condition. This would include the overhaul of vehicles abroad in order to maintain them in working condition. The repair and maintenance includes also replacing parts and accessories with foreign-made parts, such as tires, carburetors, batteries, etc., which are in the nature of running repairs. It is assumed that the vehicles are not rebuilt specifically for the purpose of upgrading them for resale in the United States.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Further, with respect to the kind of evidence adduced to prove claims of American goods returned, it is incumbent upon the importer to produce documentary or other satisfactory evidence that would be acceptable to Customs officers at the port of entry, to show that the articles being imported are American goods which are being returned under the free entry provisions of item 800.00, TSUS.

In this respect, any questions arising as to what constitutes satisfactory evidence to prove claims of American goods returned rests ultimately with the discretion of the District Directors of Customs at the various ports of entry.

Sincerely,

(Signed) R. X. ARNOLD

Dear [redacted]

This has reference to your letters of January 21, and February 8, 1982, concerning the free entry of Canadian-made Fire Fighters Turnout Gear under the provisions of item 853.10, Tariff Schedules of the United States (TSUS). This was the subject of a previous letter dated October 22, 1981, 068879.

Sample swatches of the fabric material used and a single-page brochure describing the turnout gear worn by fire fighters, were submitted. Briefly, item 853.10, TSUS, provides for the free entry of lifeboats and life-saving apparatus that would be imported by an institution established to encourage the saving of human life.

In this respect, however, the governing headnotes provide that the articles covered thereunder (including lifeboats and life-saving apparatus, among others) must be exclusively for the use of the institutions involved, and not for distribution, sale, or other commercial use within 5 years after being entered. Copies of these tariff provision are enclosed.

From this standpoint, since the fire fighting equipment is not being imported directly by or for the use of such an institution, but instead the proposed importations are for commercial sale and distribution, in these circumstances the provisions of item 853.10, TSUS, are clearly foreclosed from applying to the proposed importations of the fire fighting gear.

Further, in the absence of any other exemption or partial exemption that might be applicable in the circumstances, it appears that the imported merchandise would be dutiable on total quantity and value as set out in the previous letter.

Sincerely,

[redacted]

In your letter of May 28, 1982, you indicate that you are engaged in the process of tempering glass in Colombia and inquire whether this processing constitutes a substantial transformation for Generalized System of Preferences (GSP) purposes.

In Guardian Industries Corporation v. United States (1982) Slip Op. 82-4, the Court of International Trade held that the tempering of glass made it into a new and different article and exceeded an alteration for the purposes of item 806.20, Tariff Schedules of the United States. A copy of this decision is enclosed.

In view of this judicial interpretation, we are of the opinion that the tempering of glass is a sufficient processing to constitute a substantial transformation of the glass for the purposes of GSP.

Sincerely,

[redacted]

067999

NOV 08 1982

CLA-2:CO:R:CV:S
067999 EM

Dear [redacted]

In your letter of October 5, 1982, on behalf of [redacted] you asked about the applicability of item 806.20, Tariff Schedules of the United States (TSUS), to certain articles of wearing apparel that would be exported to Canada for a silk-screen printing process and returned to the United States.

A brochure-type descriptive page showing T-shirts, tank tops, and sweatshirts, with certain words and insignia printed thereon, was submitted. You explained that cotton/polyester T-shirts, sweatshirts, sweatsuits, and hats would be exported to Canada for imprinting designs and lettering on the articles. The Canadian process is described in terms of preparing artwork and burning the artwork on a silk screen, mounting the silkscreen on a machine, inking the silkscreen and forcing the inked design onto the textile article and finally, heat curing the inked design in order to implant it into the fibers of the garments.

Item 806.20, TSUS, provides for an import duty to be assessed on the value of repairs or alterations that are made abroad on articles exported for that purpose.

It is contended that the foreign printing of descriptive logos, slogans, and various insignia does not result in a major change in the garment itself, since the garment may be worn whether printed or unprinted. However, printing generally is considered neither a repair nor an alteration under the provisions of item 806.20, TSUS. A printed garment is different from an unprinted one and the printing of words or designs thereon generally creates a new and different article of commerce. Printed garments are often offered for sale as novelty items in different markets and to different classes of buyers. As such; therefore, the foreign printing operations have created a different article of commerce, regardless of where it may be sold.

Moreover, the printing operations generally constitute a finishing of the garment performed in the course of manufacture, the last step in the total process of producing the printed garment. In this respect, depending on customer needs, the garments are not considered finished products until they undergo the final printing and then they become ready for marketing and sale as specialty items displaying a slogan, advertising, or other message.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

F10

Accordingly, since the printed garments would not be eligible for item 806.20 tariff relief because the printing is more than a mere alteration, and as there are no other provisons of the tariff schedules under which an exemption from the payment of duty could be granted, the imported garments would be subject to duty on the total quantity and value under the appropriate provisions of the tariff schedules.

Sincerely,

(Signed) R. X. ARNOLD

Dear [redacted]

In your letter of December 15, 1981, you asked for information about the tariff status of certain explosive ordnance disposal (E.O.D.) suits that are manufactured in Canada from component materials of United States origin.

The imported suits will consist of a unique design of protective apparel for use by either police or military bomb disposal squads. The raw materials used in fabricating the suits consist of multi-layers of Kevlar and Nomex materials, both containing man-made fibers made in the United States. The special helmet used in conjunction with the suits has a polycarbonate molded shell covered with several layers of Kevlar and a final outer layer of Nomex. The face visor of the helmet is made of thermoplastic sheet laminates.

With respect to the fabrication of the suits from component raw materials of United States origin, there appears to be no exemption or partial exemption that might apply from the payment of duty when the suits are imported into the United States. Item 807.00, Tariff Schedules of the United States (TSUS), only applies with respect to fabricated United States components that are designed to be fitted together with other components in an assembly process, with no operations performed thereon except the attachment of the components to form the imported articles. This provision of the tariff schedules is inapplicable, however, where finished goods are manufactured from raw materials. This constitutes a fabricating, not an assembly process. In the circumstances, this tariff provision would be inapplicable to the imported suits.

Further, item 853.10, TSUS, provides for the free entry of lifesaving apparatus when imported for the use of an institution established to encourage the saving of human life. Generally, fire and police departments, and the military services, are not qualifying institutions established to encourage the saving of human life since their purposes is to fight fires and maintain order. However, if conceivably specially trained units have been established within these organizations for the purpose of rescuing people, these units might qualify as such institutions established to encourage the saving of human life. But where use is made of wearing apparel by members of a bomb squad or some other unit designed to protect the members of the units, and not to save others, this would not be sufficient to permit entry under item 853.10, TSUS. In these circumstances, this tariff provision would also be inapplicable to the imported suits.

F12

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

In the absence of any other applicable exemption or partial exemption from the payment of duty, the specially designed bomb suits would be classifiable under the provision for articles not specially provided for, of man-made fibers, in item 389.62, TSUS, with duty at the rate of 21 cents per pound plus 14 percent ad valorem.

Sincerely,

(Signed) R. X. ARNOLD

1 JUL 1982

CLA-2 CO:R:CV:G
069845 JH

Dear Sir:

Re: Decision on the Application for Further Review of Protest No. 1001-1-010368 Dated August 28, 1981, Concerning the Classification of Canned Pilchard From Peru

FACTS:

The product known as pilchard (sardinops sagax), a product of Peru, is canned in 6.5 ounce cans. The canned product is called "chunk style Pilchard" and is said to be processed from the loin portion of the fish with no vascular dark meat or muscle present.

ISSUE:

Whether the canned pilchard in issue is classified as other herring in item 112.10, Tariff Schedules of the United States (TSUS), if not packed in oil, or 112.46, TSUS, if packed in oil; or whether it is classifiable as sardines, other, in item 112.23, TSUS, if not in oil, or 112.86 if packed in oil; or alternatively whether it is classifiable as other fish in item 112.36 or 112.94, TSUS, if not regarded as herring

LAW AND ANALYSIS:

On behalf of the petitioner, it is argued that the term "sardine" has no scientific definition, but has to be construed in accordance with the common and commercial meaning. In reliance on such commercial meaning it is urged that "sardine" would exclude the full grown pilchard - 10 to 12 inches in length - the type of fish in issue here and refer only to the immature pilchard. Several cases are cited, as well as definitions from various tariff studies in furtherance of this argument. It is contended

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

F14

that from all of these sources it may be concluded that the term "sardine" applies to any number of different fish families, notably the herring, provided that they are the appropriate size and canned in the customary manner. It is claimed that the 1948 Summaries of Tariff Information refer to sardines as "the young of the pilchard" and small fish of the herring; and it is asserted further that the fish in issue is too large and too mature to be considered a sardine in the commercial meaning of the word. The fish in question is 10 to 12 inches in length and is cut into chunk style for canning. In addition to these arguments, copies of advertising material were submitted to show that the product is marketed in certain areas of the country in 6.5 ounce cans as chunk style pilchard and advertised as a tuna substitute. Also a statement was received from a marketing consultant dealing in canned fish commodities to the effect that the common understanding of sardines is the small whole fish which is canned and not the type of product here in question.

The petitioner's argument is that the imported product is not commonly or commercially known as "sardines" by virtue of its size and the manner in which it is processed, packed and marketed.

We agree that the term "sardine" does not have a scientific meaning and is to be defined on the basis of the common or commercial usage. Far from being one particular species of fish, it is understood that the term "sardine" could describe about 125 different species. No one identification necessarily being definitive of the product as a whole, since there is no uniform definition of "sardine." Although usually thought of as being packaged in small cans with the individual fish more or less intact, it is not uncommon for larger sardines to be packaged in larger cans either in the manner described or in chunk style.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

While advertising copy and canned labels were submitted to show that the product is considered a pilchard, it is noted that other firms can the same product, also from Peru, and label it as "chunk sardines." Although the 1948 Summaries of Tariff Information may have referred to sardines in its discussion of paragraph 718(a), Tariff Act of 1930, as "canned small fish," it also stated in its discussion of paragraph 718(b) that sardines are pilchards among other species, and that "although the products are generally labeled sardines, a small part of the domestic pack and indeterminate quantity produced abroad are labeled "pilchards." Thus, the labeling of the cans as reflected in the advertising copy on record, as "chunk pilchard" is not determinative of a commercial designation, but most probably reflects the trade appeal in a particular locale.

In fact, the 1968 Summary of Trade and Tariff Information, in its discussion of canned sardines, states that not only is the pilchard considered a sardine but while the sea herring is packed in "quarter" cans with label weight of 3 3/4 ounce, "pilchards are mostly packed in containers with a label weight of 15 ounces." These larger cans, of course, are usually packed with sardine larger than the ones seen in the 6.5 ounce can. The 1968 Summaries also note that Portuguese pilchards packed in olive oil comprise almost the entire pack of sardines produced in Portugal and that the Portuguese canned sardines in oil are often skinned and boned.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

069845

62

In the Fishery Leaflet "129" published by the Fish and Wildlife Service in 1945, the topic was "the Pacific Sardine Fishery." The subject was the commercial fishing of the "Pacific Sardine or Pilchard." In describing the sardine's development, the article notes that "juvenile sardines when 3 to 5 inches in length are caught in large numbers for tuna bait," but when the sardines have grown to about 7 inches in length "they make their first appearance in the regular commercial fishery." The leaflet goes on to state that when the fish are 10 inches in length they are aggressively sought by commercial fishermen. The leaflet in no way indicates there is limitation on the sardine designation based on length. In fact, the only reference to size limitation is the caution that over fishing will result in a smaller fish being the only one available. The fish classification expert for the Fish and Wildlife Service states that the definition of the pilchard as a sardine in that article has not changed in the intervening years. The Encyclopedia Britannica (1976 edition) in its discussion of sardines states that the sardinops sagax is called "sardine" in the United States and "these fish are about 10 to 12 inches in length."

Thus, it is not believed that the petitioner has established a commercial definition of sardines which has a meaning which was general (extending over the entire country), definite (certain of understanding), and uniform (the same everywhere in the country). Hutchinson Brokers, Inc. A/C Thos. P. Gonzalez Corp., Plaintiff v. United States, Slip Op. 81-108. While this product may be known as a pilchard in some marketing areas, it is definitely known as sardine in others; and although the more popular form of the canned sardine may involve a small fish which is more or less intact in a small can, this does not exclude a larger fish which may or may not be whole in the can or in chunk style.

G3

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

069845

HOLDING:

Therefore, the chunk style pilchard in issue if not packed in oil is classified in item 112.22 (112.23) as a sardine or if in oil, item 112.86.

You are directed to deny the protest in full. A copy of this decision should be attached to your Form 19 Notice of Action to be sent to the protestant.

The protest file is enclosed herewith.

Sincerely,

(Signed) Arthur P. Schifflin

U.S. CUSTOMS SERVICE

WASHINGTON

MAR 07 1983

REFER TO
CLA-2:CO:R:CV:S
071018 SC

071018

Dear [redacted]

In your letter of May 24, 1982, on behalf of [redacted] you inquire as to the tariff classification of a Micro-Fone IA Credit Authorization Device, a product of Belgium.

The merchandise in question is described as a versatile terminal device intended to reduce significantly the risk of fraud to which merchants are exposed in authorizing credit card transactions. We note that the Micro-Fone IA (hereinafter referred to as M-F1A) is an enhanced version of the [redacted] Micro-Fone Credit Card Verfication Device, the subject of Internal Advice 47/82. The M-F1A is likewise designed to send alpha-numeric inquiries over voice-grade telephone lines to a host credit card (or check cashing) authorization computer such as that of the major credit cards. All of the M-F1A's inquiries and responses are transmitted in digital form to or through a modem (both the M-F1A and the host computer with which it communicates are equipped with modems) over the public telephone network. (The modem converts digital data to analogue form for transmission, and converts the analogue data back to digital form at the receiving location). The M-F1A, too, is equipped with a handset for voice communication, when necessary. It is also equipped with a calculating capability (addition and subtraction). In fact, the instant merchandise can add and subtract up to eight digits. Even though the M-F1A has been equipped with a telephone handset, a telephone number can neither be manually dialed, nor can telephone numbers and labels be stored when this feature is in operation. It does not appear that the device is an accounting, computing, or other data processing machine.

Schedule 6, Part 4, Subpart G, Headnote 2(b), Tariff Schedules of the United States (TSUS), provides:

> For the purposes of this subpart --
>
> * * *
>
> (b) a "calculating mechanism" is one designed to perform one or more of the four arithmetical operations, i.e., addition, subtraction, multiplication, and division.

Inasmuch as the M-F1A possesses a calculating capability, it is unlike its predecessor, the ordinary Micro-Fone, the subject of IA 47/82, in that it is more than mere telegraph apparatus.

GS

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Accordingly, we conclude that the M-F1A described is classifiable under the provision for calculating and similar machines incorporating a calculating mechanism, other, in item 676.25, TSUS, dutiable at the rate of 4.9 percent ad valorem.

Sincerely,

Russell Arnold
Chief, Special
Classification Branch

Dear [redacted]

Your letter of December 20, 1982, addressed to our New York office, has been referred here for reply concerning the application of item 806.30, Tariff Schedules of the United States (TSUS), to aluminum extrusions and sheets processed in Canada.

You indicate that the foreign operations consist of welding, hole drilling, and other processing to manufacture skylight components. Upon return to the United States, these components will be anodized. You inquire whether these operations will constitute further processing within the meaning of the statute.

We are of the opinion that the drilling of holes in Canada and the anodizing upon return may be considered further processing so as to entitle the articles to tariff treatment under item 806.30, TSUS, upon compliance with the regulations.

Sincerely,

(Signed) R. X. ARNOLD

Russell Arnold

073826 c

TO : Area Director of Customs
New York, New York 10048

FROM : Director, Office of Regulations and Rulings

SUBJECT: Your Memorandum Dated December 2, 1983 (File No. CLA-2-03 S:C:D7-76-JS) Relating to the [redacted] Chief Value Inquiry

In the above referenced memorandum you set forth those costs which should be included in any chief value determination as follows:

(a) Raw materials, including unrecoverable waste.

(b) Production workers' salaries including salaries of inspectors/supervisors.

(c) Fringe benefits for workers including bonuses, retirement fund, housing allowances, free meals and free transportation.

(d) Pro-rated share of the rental or amortization cost of all machinery used. "All machinery used" is defined as that which either touches the component or produces something, e.g. heat or steam which changes the components.

(e) The pro-rated cost of energy, i.e. oil or electricity, and repairs for the machinery.

As you know, representatives of major shoe importers, including [redacted] and the [redacted], have been actively involved in the disposition of this issue. They have been successful in convincing members of Congress, Treasury officials, and me, that the guidance they received from Customs as to which costs to include in CMCV was incomplete and misleading. We have created the appearance that we are making up the rules as we go along. In the future, we must issue clear complete guidelines and stick to them.

There is no ideal resolution of this issue, however, the best resolution appears to be along the lines of the form which [redacted] distributed in 1981.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

68

Therefore, with respect to liquidation of entries of the footwear in issue which have not become final, it is our position that the costs set forth above by you as being relevant in a chief value determination are modified as follows:

(1) Cost or value of materials - we will accept importer cost data for leather and rubber/plastics material, without regard to cost figures for those materials submitted by other manufacturers, unless you have tangible evidence that the data submitted are false.

(2) Cost of Processing - we will include actual labor costs and fringe benefits which are paid in cash such as sick pay, holiday pay, overtime and any other benefit paid in cash. We will not include in component material of chief value determinations those fringe benefits in the form of services (day care, company picnics, transportation, housing etc).

(3) General Expenses - we will not include depreciation of machinery or energy costs in arriving at a chief value determination. We will include costs of molds if, as I understand it, foreign producers have been collecting these costs.

It is requested that you circulate this decision to all ports in order to insure that all importers are treated equally.

It should be noted that the criteria set forth above will be effective until 90 days from the date on which clear and complete guidelines on the matter are issued.

[redacted]

Dear [redacted]

This is in reply to your letter of September 26, 1984, concerning the quota status of garments imported from Mexico. The merchandise has been made from Italian fabric which was cut into garment parts in the United States after importation under item 864.05, Tariff Schedule of the United States (TSUS) - - temporary importation under bond. The garment parts were then sent to Mexico to be assembled into completed articles. You believe that under interim Section 12.130, Customs Regulations, T.D. 84-171, the completed garments are products of the United States and, therefore, not subject to Mexican quota restraints.

While the assembly in Mexico is an item 807.00, TSUS, type of situation, the merchandise is precluded from 807 treatment by Headnote 1(d), Subpart 1B, Schedule 8, TSUS.

The proviso in Section 12.130(a)(2) that the rule of origin in that section does not change the "foreign article" status of textiles and textile products under Headnote 2, Part 1, Schedule 8, TSUS, was inserted into the new regulation to ensure that there is no confusion about the country of origin for textile restraint purposes in 807 type situations where imported merchandise may, without the application of Headnote 2, be considered a product of the United States and, therefore, not be subject to the textile restraint program.

The background material in T.D. 84-171 clearly states that the purpose of the new regulations is to prevent circumvention or frustration of various multilateral and bilateral agreements to which the United States is a party. The negotiations for those agreements have continually recognized the existence of 807 type operations and the limits negotiated have been based on and are intended to cover that trade. The intent of the President in issuing E.O. 12475, the authority on which the new regulations is predicated, was to insure that the bilateral agreements were effectuated consistent with those negotiations. To interpret the regulations in the manner you suggest would frustrate the express intent of the negotiated agreements.

G10

DOCUMENT MAY BE RELEASED TO THE PUBLIC

Accordingly, it is the position of the Customs Service that, under the factual situation described above, the proviso in Section 12.130(a)(2) operates to confer Mexican origin on the subject merchandise for quota and visa purposes.

Sincerely,

Margaret M. O'Rourke

for Robert P. Schaffer
Assistant Commissioner
(Commercial Operations)

[redacted]

Dear [redacted]

This is in reply to your letter of October 3, 1984, on behalf of [redacted], concerning the country of origin for tariff purposes of certain sweaters.

Three factual situations were presented. In each of the factual situations the yarns from which the sweaters are knit originated in a country not otherwise involved in the manufacture of the sweaters.

In the first factual situation, the front panel of the sweater is knit in China while the rest of the manufacturing or processing operations are performed in Hong Kong. In the second factual situation, the back panel and sleeves are knit in China while the rest of the manufacturing and processing operations are performed in Hong Kong. In the third factual situation, the front and back panels are knit in China while the sleeves, collar, and accessories are knit in Hong Kong and the rest of the processing on the sweaters is also performed in Hong Kong. In this last set of facts, we assume that the sleeves are long sleeves and that the collar is a major portion of the garment.

Pursuant to interim section 12.130, Customs Regulations, which is currently under review, under all three factual situations, the sweaters, when imported into the United States, would be considered to be products of Hong Kong and would require a Hong Kong visa or export license.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

Philip S. Gallas, Esq.
Mandel & Grunfeld
2000 L Street, N.W.
Washington, D.C. 20036

Dear Mr. Gallas:

This is in reply to your four requests of November 8, 1984, on behalf of Crystal Knitters, concerning the country of origin of certain sweaters. Each of the requests involves similar but differing factual circumstances concerning the manufacture of sweaters. In each of the factual circumstances presented, either a back panel or a front panel or one of those two panels and two sleeves are knit in China from yarn produced in Taiwan. The rest of the garment is knit in Hong Kong also from yarn produced in Taiwan. All other stages in the manufacturing process of the subject sweaters occurs in Hong Kong.

Under the facts as presented, pursuant to interim section 12.130, Customs Regulations, which is currently under review, Hong Kong would be the country of origin of the subject sweaters in each of the factual circumstances described. Accordingly, since the merchandise is a product of Hong Kong, it would require a Hong Kong visa or export license upon its importation into the United States.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

DEPARTMENT OF THE TREASURY
U.S. CUSTOMS SERVICE
WASHINGTON, D.C. 20229

JUN 27 1988

REFER TO
CLA-2:CO:R:CV:G
074412 PR

074412

This ruling concerns the tariff classification of certain materials to be used in the manufacture of disposable hospital articles.

ISSUE:

The issue presented is whether the subject merchandise is classifiable (1) as a textile fabric for tariff purposes under the provision for other textile fabrics, including laminated fabrics, not specially provided for, of man-made fibers, in item 359.50, Tariff Schedules of the United States (TSUS), or (2) in Schedule 2, TSUS, as either reinforced paper, in item 253.35, TSUS, or as an article of reinforced paper in item 256.87, TSUS, or (3) as an article of textile materials not specially provided for, in item 389.62, TSUS.

FACTS:

The merchandise in question will be used to make disposable surgical drapes and surgical gowns. A number of samples were submitted to Customs. Each of the samples consists of multi-layers, with one layer being common to all samples. That one layer itself consists of two layers-- a layer of wood pulp fiber tissue paper which appears to have been made on an unmodified paper making machine and a layer of spun bonded man-made fibers. Those two layers are bonded or laminated together to form reinforced paper. Most of the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A4

074412

samples are made of three distinct layers of materials: (1) the layer of reinforced paper, (2) a layer of plastic film, and (3) a spun bonded layer of nonwoven man-made fibers. Except for one sample, all the numerous samples submitted of these three-layer materials have the layers joined in a similar manner. The film and the nonwoven fabric are joined to the reinforced paper by thin parallel lines of adhesive, approximately two inches apart. Between the lines of adhesive there is no bonding or joining of the three distinct layers. One three-layer material appears to be slightly different than the others in that the plastic film appears to be lightly laminated entirely to the reinforced paper while the nonwoven fabric is joined to that combination in the same manner as the other samples. A sample of a two-layer material was also submitted. That sample consists of a layer of reinforced paper and a layer of man-made fiber nonwoven spun bonded fabric. These two layers are also joined by lines of adhesive at two-inch intervals.

LAW AND ANALYSIS:

In order to be classifiable in Schedule 3, TSUS (item 359.50 or item 389.62), the merchandise must either fall within the definition of the term "textile materials," as defined in Headnote 2, Schedule 3, TSUS, or be an article in chief value of a "textile material."

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

KS

Here, since the competing provisions include reinforced paper or articles of reinforced paper, the textile layer in the reinforced paper portion of the materials, which causes that paper to be "reinforced paper," cannot be used to justify the classification of the merchandise as a textile material. It is an integral part of the reinforced paper and is attributable thereto for all purposes.

To justify classification in item 359.50, reliance must be placed on the independent spun bonded man-made fiber fabric which is joined to the reinforced paper by the parallel lines of adhesive. In order for the spun bonded layer to cause the entire material to be considered a textile material, it is necessary that it be "laminated" to the other layers. Otherwise the combination of the various layers of materials forming the single material would not fall within the purview of Headnote 2, Schedule 3. However, the court has ruled in C. J. Tower & Sons of Buffalo, Inc. v. United States, 62 Cust. Ct. 643, C.D. 3840 (1969), that the word "laminating" means the bringing together of two layers into permanent union so that the final product will be an integral article, and the word "laminated" means composed of layers of firmly united materials. In applying those definitions to the subject merchandise, it is clear that a textile fabric which is merely attached at two inch intervals to other layers of material cannot be said to have been laminated to those materials. Accordingly, the subject merchandise is not a textile material within the purview of Headnote 2, Schedule 3.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A6

074412

The next step in determining the classification of the subject merchandise is to ascertain whether the combination of the layer of reinforced paper with additional layers of material will cause the entire composite to be considered reinforced paper. Customs ruled on November 1, 1974, 036036, and on July 21, 1981, 065674, that reinforced paper could consist of one or two layers of tissue paper, a layer of textile fabric, and a layer of plastic film. However, while not clear in the earlier ruling, the later ruling expressly states that all the layers were present when the reinforced paper came into existence. The situation involving the separate existence of a layer of reinforced paper which is combined, but not laminated, with layers of other materials has not, to our knowledge, been ruled upon.

It is a cardinal rule of statutory construction that tariff acts are drafted according to the meaning given their terms by the trade and commerce of this country. Meyer & Lange v. United States, 6 Ct. Cust. Appls. 181, TD 35436 (1915). In order to establish a commercial designation of a tariff term, it must be shown that the term has a meaning which is general (extending over the entire country), definite (certain of understanding), and uniform (the same everywhere in the country). Rohm & Haas Co. v. United States, 5 C.I.T. 218 (1983). In this regard, information received by Customs has satisfied us that that the subject merchandise is not generally and uniformly known in the trade and commerce of this country as "reinforced paper."

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

074412

Since the subject merchandise is neither a textile material nor reinforced paper, but is comprised of components of both, the subject material is classifable according to its component material of chief value. Even if the merchandise is in chief value of the partially attached man-made fiber spun bonded fabric, it would not be classifiable in item 359.50 since that provision provides for textile fabrics. The subject merchandise consists of a textile fabric combined with a reinforced paper layer and, in most instances, a layer of sheet plastics material. Since these layers are not firmly united and, therefore, are not "laminated," the materials do not form a "textile fabric."

HOLDING:

The subject merchandise, assuming it is not in chief value of plastics, is classifiable, if in chief value of the reinforced paper (paper tissue plus textile nonwoven) layer, under the provision for other articles of reinforced paper not specially provided for in item 256.87, TSUS, or, if in chief value of the partially attached spun bonded fabric, under the provision for other articles of textile materials not specially provided for, of man-made fibers, in item 389.62, TSUS. Surgical drapes and gowns made in whole or in part of the subject material are also classifiable according to their component material of chief value. However, without a

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A8

074412

detailed cost breakdown and samples in their condition as imported, we are unable to rule on their tariff status.

DEPARTMENT OF THE TREASURY

U.S. CUSTOMS SERVICE

WASHINGTON

DEC 7 1984

REFER TO

CLA-2:CO:R:CV:G
075329 PR

[redacted]

Dear [redacted]

This is in reply to your letter of December 3, 1984, on behalf of [redacted], concerning the country of origin of certain sweaters.

According to your submission, 66,000 sweaters were contracted for prior to August 3, 1984. Subsequent to that date, the contract was modified to provide for a reduction of 18,000 sweaters, to 48,000 sweaters, but with a redistribution of the style numbers so that the contract price remained approximately the same. The sweater panels were knit in China and exported to Hong Kong prior to October 31, 1984. Sufficient documentation has been submitted to support all of the above assertions.

Under interim Section 12.130, Customs Regulations, the assembly in Hong Kong of sweater parts knit in China would not change the country of origin of those parts for quota, visa, and export license requirements. However, under a limited exception to that regulation, published in the August 29, 1984, Federal Register, section 12.130 is not applicable to merchandise contracted for in writing prior to August 3, 1984, and exported from the country of origin, as defined in that regulation, prior to October 31, 1984. Merchandise which qualifies for the exception is subject to the rules of origin in effect prior to September 7, 1984, the effective date of section 12.130. Under the origin rules applicable prior to September 7, the assembly of all the major panels of a sweater was sufficient to change the country of origin of the sweaters from the country of knitting to the country of assembly.

[redacted]

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____ NO

Accordingly, if individual unattached sweater panels, a fact which is not made clear in your submission, were shipped from China to Hong Kong for completion into finished sweaters, under the limited exception to interim section 12.130, the sweaters which are the subject of your inquiry would be considered a product of Hong Kong for quota, visa, and export license purposes.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 3601-4-000288, Classification of a "Crude Butadiene Stream"

The imported commodity entered in April 1984, is described as a crude butadiene stream, a trade level butadiene, which is a fundamental or generic co-production stream from an ethylene cracker, utilizing light gases for feedstocks (i.e., propane, ethane). The stream is said to contain about 71 percent butadiene. A characteristic C_4 stream, it is said, has a butadiene content normally ranging from about 65 to 75 percent. It is claimed that while the butadiene content of such streams in the 55 to 65 percent range are not unknown, with today's methods of ethylene cracking, such streams are not as common as they once were.

The issue is whether this "crude butadiene" is classifiable as butadiene in item 429.50 (now 429.53), TSUS, or as a mixture of two or more organic compounds in item 430.10, TSUS.

Item 429.53 covers butadiene, butylene, ethylene and propylene. In general, Part 2D, Schedule 4, TSUS, covers chemicals which are commercially recognized as having a high degree of purity, not source materials. The Tariff Classification Study notes that technical descriptions of chemicals are used to impact greater certainty.

The Condensed Chemical Dictionary shows four grades of butadiene: technical 98.0 percent; chemically pure-99.7 percent; instrument-99.4 percent; and research-99.8 percent. The Phillips Petroleum Company's "Hydrocarbons Catalog" lists three grades of 1,3 butadiene: research grade-99.8 percent, special purity grade-99.6 percent (99.5 percent minimum)) and ruber grade 99.4 percent (99.0 percent minimum). Thus, all the recognized grades of butadiene are in excess of 98.0 percent. Nowhere is a feedstock stream with a 71 percent butadiene content generally recognized as butadiene. Essentially the imported product is an intermediate product - a hydrocarbon mixture from which high purity butadiene is obtained.

Hydrocarbon or C_4 stream mixtures of the type described herein are classifiable under the provision for mixtures of two or more organic compounds that are in whole or in part of hydrocarbons derived in whole or in part from petroleum, shale oil, or natural gas, in item 430.10, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Dear Sir:

Re: Decision on Review of Protest No. 3901-4-000990 on the classification of an Americium-241/beryllium neutron source capsule

The source is described as a three curie americium 241/ beryllium neutron source. It consists of the compound americium oxide with the element beryllium as a diluent, with the isotope produced by the americium oxide being americium 241. The emission of the alpha particles from the radioactive compound bombard the beryllium which in turn releases the neutrons. The americium oxide and beryllium are said to be enclosed in a stainless steel capsule. The specification sheet for the capsule shows that it is specially engineered to fit a specific type of apparatus. The source capsule is said to have many uses, including moisture monitoring, such as soil or coke moisture, hydrocarbon exploration and use as a reference source or in laboratory research. It was classified, therefore, under the provision for parts of apparatus based on the use of radiations from radioactive substances in item 709.66, TSUS.

The petitioner contends that rather than being designed to fit a particular type of equipment with one specific use, the capsule is capable of fitting a variety of apparatus used for different purposes. The source is claimed to be dutiable, therefore, under item 494.50, the provision for usefully radioactive compounds and isotopes.

However, the question is whether the capsule is specially designed to be a part of equipment which cannot function without it. The neutron source is intended to serve a particular end-whether it be to detect hydrocarbons, monitor soil or what - and the particular apparatus which it is designed to be used with has no other function but to facilitate the capsule's end use. Therefore, the capsule is not a mere container, used merely to store, handle or transport radioactive material; rather, the capsule is specially built to be a part of a particular apparatus which is designed to perform a specific function.

Mr. Louis Hochstaedter
President
Highcity International
P.O. Box 935
San Anselmo, California 94960

Dear Mr. Hochstaedter:

Your letter of December 10, 1984, requested a ruling on the tariff classification of an angler's jacket, style AJ 4441, and an angler's vest, style AV 4450, to be imported from Taiwan or Korea.

The garments have a woven twill shell that we assume to be in chief value of man-made fibers. The jacket has ribbed knitted wrist bands, waist band and collar. Both the jacket and vest have a partial inner liner of nylon mesh or net and both have zippered frontal openings. The net lining comprises a minor part of the articles. Both jacket and vest also have numerous pockets, attached D-rings, and back pouches designed to contain or secure fly-fishing equipment. All these features appear to be functional.

Both the jacket and vest contain an emergency flotation bladder that can be inflated orally. The bladder for the vest is also adapted for inflation with carbon dioxide compressed in a cartridge. The bladder is polyurethane heat sealable coated nylon. It fits between the shell of the garment and the nylon mesh to provide buoyancy in emergency situations. The instructions panel sewn on the inside of the garment recommends that the bladder be inflated slightly during normal use. Should an emergency arise, the wearer would presumably inflate the device entirely to provide the projected 19 pounds buoyancy.

You suggest that the vest and jacket are properly classified as textile articles, not specially provided for (n.s.p.f.), because they are worn for protective purposes rather than for comfort, decency, or adornment. You also suggest an alternative classification in item 790.3900, Tariff Schedules of the United States Annotated (TSUSA), as inflatable articles n.s.p.f.

This office has repeatedly ruled that the individual characteristics of the imported goods must be considered in making a determination whether the classification is as wearing apparel or articles n.s.p.f. Therefore, articles need not be eliminated from consideration as wearing apparel simply because they provide some protection from hazards or the elements. See Headquarters Ruling Letter (HRL) 073962, January 10, 1985, (IA 144/83).

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B2

The individual characteristics of these samples appear on examination to weigh heavily on the side of wearing apparel. Although you claim that the purpose of the vest or jacket and the reason one buys it is for its inflatable characteristic, we disagree. These samples represent fishing garments of substantial and complex design. The feature of the inflatable inner bladder would surely enhance the desirability of the garments (and add to the cost), but the inflatable potentially life-saving characteristic is not the principal reason one buys a fishing vest or jacket. Fishing vests and jackets of special design have been in use for decades, occupying a special niche in the range of wearing apparel for sport. The instant merchandise corresponds to that class of wearing apparel, notwithstanding that feature that is potentially life-saving.

As to the proposed classification as inflatable articles, the vest or jacket are garments that provide the principal characteristics, not the fact that a detachable part of it inflates. The inflatable article provision embraces articles that are not more than inflatable articles; that is, the term inflatable article describes the whole article and the article is not provided for elsewhere. Neither vest nor jacket meets these standards.

Your letter explains that the logo will be screen printed on the front in the breast area. A screen-printed logo does not constitute ornamentation. The label that appears on one of the samples, an embroidered textile label, does constitute ornamentation. If the textile label does not appear on these garments when imported, the garments would not be considered ornamented.

The garments are classifiable, if identified as being intended exclusively for the wear of men or boys, as other men's or boys' wearing apparel, of man-made fibers, not knit. The jacket is classified in item 381.9530, TSUSA, dutiable at 15 cents per pound plus 27.5 percent ad valorem. This item takes textile category 634. The vest is classified in item 381.9837, dutiable at 4 cents per pound plus 18.8 percent ad valorem. This item takes textile category 659.

As products of Korea or Taiwan, this merchandise is subject to a visa requirement and quota restraints based upon international textile trade agreements. Due to the changeable nature of these agreements, you are advised to contact your local Customs office prior to importation of this merchandise to determine the current status of any import restraints or requirements.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B3

075703

A copy of this ruling should be attached to the entry documents filed at the time this merchandise is imported. If the entry documents have already been filed, this ruling should be brought to the attention of the appropriate Customs officer handling the transaction.

Your samples are being returned under separate cover.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

UNITED STATES GOVERNMENT
Memorandum

DEPARTMENT OF THE TREASURY
UNITED STATES CUSTOMS SERVICE

075820

DATE: JUL 15 1985

FILE: CLA-2:CO:R:CV:G
075820 JGB

TO : District Director of Customs
Chicago, Illinois 60607

FROM : Director, Classification and Value Division

SUBJECT: Request for Internal Advice 4/85, Classification of Pacemaker Programmers. (Your Memorandum of December 17, 1984, MAN-1-02-CV:CH CT 7 JJ)

The request for internal advice was initiated on behalf of the importer by counsel in a letter dated December 3, 1984. Our decision follows:

ISSUE:

Whether two models of pacemaker programmers are classified as an entirety with their pacemakers in item 709.17, Tariff Schedules of the United States (TSUS), the provision for other electro-medical apparatus, and parts thereof: other, dutiable at 4.9 percent ad valorem (1984), or separately in item 712.49, TSUS, as "Electrical measuring, checking, analyzing, or automatically-controlling instruments and apparatus, and parts thereof: other," dutiable at 6.8 percent ad valorem (1984), or otherwise.

This request raises the issue of the applicability of item 960.15, Appendix to the TSUS, to this merchandise. Item 960.15, is a temporary provision that was in effect until August 11, 1985, providing duty-free treatment for articles "specially designed or adapted for the use or benefit of ... physically ... handicapped persons (however provided

BS

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

for in Schedules 1 to 7)," subject to the other requirements of the provision.

FACTS:

The pacemaker, model 674, is a unipolar implantable multiprogrammable pulse generator and is a device that has a power supply and electronic circuits that produce a periodic electrical pulse to stimulate the heart. The pacemaker is listed and defined in §870.3610 of Title 21, Code of Federal Regulations (Food and Drug Administration).

The pacemaker programmer is similarly listed in §870.3700 and is defined as a device used to change non-invasively one or more of the electrical operating characteristics of a pacemaker. At issue here are models 600 AV and 700. While both programmers are said to be used to change the rate, amplitude, pulse duration, sensitivity, and refractory period of the pulse generator, the 700 model has a telemetric function permitting the measurement of rate, interval, and pulse duration as well as operating to program the pacemaker. The 700 Model has an alphanumeric printer and an LCD visual display.

Based on the information we have in the file provided by your district, open entries from October 18, 1984 through September 5, 1985 have included articles claimed to be duty-free under item 960.15 that would otherwise be classified in item 709.1705, Tariff Schedules of the United States Annotated (TSUSA), the statistical breakout for pacemakers under the superior heading "Therapeutic

B6

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

075820

apparatus". There are also entries for this time period for item 709.1790/960.15, the Schedule 7 provision for "Parts, not specially provided for" of other electro-medical apparatus. There are also entries under item 712.4950/960.15 which we presume to be for the pacemaker programmers.

LAW AND ANALYSIS:

The classification of the pulse generator (pacemaker) itself is not in dispute. The description "Pacemakers" corresponding to the statistical suffix 05 provides for pacemakers for use with the human heart. We know of no other tariff item in which pacemakers are classified. Moreover, the "parts," n.s.p.f., provision is the proper classification for parts of pacemakers. In both instances, there is no more specific provision.

Neither model of programmer is classified in item 712.49, TSUS, because this provision, governed by Headnote 2 to Subpart D, Schedule 7, requires in relevant part that the apparatus be classified in Subpart 2C or item 711.04 to 711.88 inclusive (from Subpart 2D) and "depend on an electrical phenomenon which varies according to the factor to be ascertained" or be "instruments or apparatus for measuring or checking electrical quantities." Neither electronic programmer is classified in the range of provisions mentioned above (therefore excluding it from classification in Subpart D) and the programmers, complex electronic machines, are more than apparatus for measuring electrical quantities.

075820

B7

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Item 712.49, TSUS, is also less specific than item 709.17, TSUS, in that the goods covered by Subpart 2B, a combination of use and eo nomine provisions, must all be used in some form of medicine (general medicine, dentistry, surgery, or veterinary medicine). Goods classified in items 709.15 through 709.27 must further share an electrical characteristic. We must reject item 712.49 when applied to the pacemaker programmers. Even though this item also provides for electronic apparatus with discrete analysis abilities, if we say that it is more specific than medical apparatus, then all such apparatus, whether or not medical, would be classified thereunder. This result would eliminate the rationale for provisions for electro-medical apparatus and conflict with the logic of the organization of the TSUS. General Interpretative Rule 10(c), TSUS. See also Travenol Laboratories v. United States, 83 Cust. Ct. 1, C.D. 4812 (1979), aff'd 67 CCPA 71, C.A.D. 1247 (1980), where the narrow use characteristics of items 709.15 through 709.27 are discussed.

Having ruled out the classification of the programmer in item 712.49, we then classify it in item 709.1720, as other electro-medical apparatus, other (than electro-surgical), other therapeutic apparatus. Because this classification is under the same 5-digit tariff item number as the pacemaker, bearing the same rate of duty, it is unnecessary for us to reach the issue of whether the programmer forms an entirety with the pacemaker.

B8

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

075820

The application of item 960.15 to the pacemaker programmer may be resolved by an analysis of the operation of the device itself. The programmer is not ordinarily operated by a patient; it is operated in a medical setting by a physician or trained technican under the supervision of a physician. In that respect its use is analogous to specially designed implantation tools imported with a prosthetic hip replacement system. In our ruling on such a system, Headquarters Ruling Letter 075113, June 20, 1985, we determined that the prosthetic hip joint, the thing implanted, was eligible for duty-free treatment under item 960.15, but the tools required to be used in implantation were excluded from the coverage of item 960.15, because they were used by the physician to accomplish his job and were only remotely related to the handicapped person.

The pacemaker programmers undoubtedly provide some benefit to a person who has a pacemaker implanted in him, but the benefit also runs more directly to the physician or technician who is by means of the programmer able to make the adjustments in the pulse generator indicated by prudent medical practice. In other words, the essential nexus between the apparatus and the person benefitted is missing here. Therefore, we must conclude that the language of the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B9

075820

statute goes only as far as articles for the use and benefit of chronically handicapped persons and that medical apparatus operated by someone other than the handicapped person, providing only indirect or incidental benefit, is outside the scope of this statute.

HOLDING:

In view of the above, all unliquidated entries of pacemaker programmers as described in this decision should be liquidated as dutiable according to item 709.1720.

A copy of this decision should be provided to the inquirer.

11 JUL 1986

075911

Mr. Louis K. Hochstaedter
President
Highcity International
P.O. Box 1584
Novato, California 94948-1584

Dear Mr. Hochstaedter:

Your letter of March 22, 1985, requests reconsideration of a ruling issued March 5, 1985, from our New York office, file No. 812107. That ruling provided the tariff classification for a waterproof jacket. It also was an information letter, not a ruling, for coveralls, because no sample was provided.

You have since provided this office with specifications and other material related to the coveralls. The direct-mail retailer has provided this office with a sample of the coveralls in a letter dated June 26, 1985. Consequently, we are now able to provide a ruling on the coveralls, as well.

The coveralls, Model FJ-570, are specially designed to incorporate hypothermia protection and personal flotation should the wearer fall into the water. They are said to be designed to be worn over standard work clothing. They are described by the retailer as having the following features: (1) inherently buoyant closed-cell polyvinylchloride foam is designed to provide U.S. Coast Guard (U.S.C.G.) Type III flotation performance and, also, effect the proper flotation angle which will bring the head and upper torso higher out of the water for added hypothermia protection; (2) outer shell fabric is coated and seams are sealed to reduce the flow of water exchange when the wearer is immersed, allowing only the water immediate to the body to attract body heat; (3) take-up straps on wrists and legs, and seal for close fitting hood reduce ingress of cold water and continue to reduce the exchange of water while the wearer is immersed, and (4) zipper and Velcro closure combination from neck to crotch further reduce cold water exchange when the wearer is immersed.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B11

The coveralls, which substantially cover and protect the body from head to ankles, excluding hands, face, and feet, are said to be designed specifically to meet the U.S.C.G. standards for hypothermia which allow no more than a 1.5 degree Celsius reduction in body temperature in 46 degree to 56 degree Fahrenheit water for one hour, or no more than 8 degree Celsius reduction in body temperature in 46 degree to 56 degree Fahrenheit water for six hours for a person wearing the coveralls over ordinary work clothing. We understand that these tests have been conducted at the Hypothermia Water Safety Institute at the University of Minnesota.

You have provided additional information about personal flotation devices (PFD's), in particular, the standard for buoyant cushions issued by Underwriters Laboratories, which, when addressing the subject of hypothermia, notes, p. 24, that "when operating in cold water consideration should be given to using a coat or jacket style PFD as they cover more of the body than the vest style PFD's." From this information and the remainder of the foregoing, we have concluded that the coveralls would be used, as claimed, as a PFD meeting U.S.C.G. Class III standards for flotation and as protection against hypothermia.

The coveralls would be used by commercial fishermen, offshore rig personnel, construction personnel, barge workers, sportsmen who would be at risk of falling into cold water, and others who would benefit by keeping dry at work or recreation.

The issue for the coverall is whether it is classified as articles of textile material or as wearing apparel.

There is no dispute that the coverall is of textile material. It is constructed of woven nylon. We assume that it is coated or filled with rubber or plastics and that the shell is waterproof. This sample has not been tested by our laboratory, however.

The issue of whether the merchandise is wearing apparel is settled by reference to relevant court decisions. The basic definition for wearing apparel was provided by the Customs Court in its decision in Antonio Pompeo v. United States, 40 Cust. Ct. 362, C.D. 2006 (1958). Pompeo states that wearing apparel includes articles worn by human beings

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B12

075911

for "decency, comfort, or adornment" and does not include articles worn for "protection against the hazards of game, sport, or occupation, or the prevention of injury."

The distinction between providing protection against hazards, as opposed to providing decency and comfort, has been maintained by both the courts and Customs rulings since Pompeo, supra. The court has, however, observed in Admiral Craft Equipment Corp. v. United States, 82 Cust. Ct. 162, 163, C.D. 4796 (1979) that "[a]n important, if not primary, purpose of wearing apparel is protection against the environment," and in so doing, specifically distinguished Pompeo on its facts. Also, more recently, the Court of Appeals for the Federal Circuit in reversing the Court of International Trade noted that "[v]irtually all wearing apparel is to a degree (often a high degree) designed and worn to provide comfort and protection, often for very specific situations." Daw Industries, Inc. v. United States, 1 CAFC 146, 150, 714 F.2d 1140 (1983). Therefore, an article need not be eliminated fro- consideration as wearing apparel simply because it provides some protection from hazards or the elements. The court has refrained from establishing an immutable test for deciding what is included in wearing apparel. Instead, it appears to have recognized a continuum for merchandise providing adornment, comfort, or decency at the wearing apparel end and purely protective gear at the other.

The instant merchandise has few characteristics that are not characteristics of wearing apparel. The similarities are, among others, that it covers the body like wearing apparel to help keep out cold and moisture, or, otherwise stated, to retain heat. It encases the body to permit outdoor work on ships and drilling rigs or ice fishing or any number of physical endeavors outdoors, whether recreational or occupational. It supplants a rain jacket and trousers and rain hat or hood so that the owner of these coveralls would not likely wear those garments if he owned this multi-purpose one. It would also be readily worn and useful to protect one from cold and moisture whether or not worn in the presence of a potential hazard. Therefore, for example, a person going ice fishing might reasonably be expected to ride in a snowmobile some distance wearing these coveralls (where no drowning hazard is present) and then return to the starting point. He would not wear winter garments (such as ski jacket and pants) on the way to the hazard and then take them off at the site of the hazard and put on this protective garment, reversing the process at the conclusion of the potentially hazardous activity.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B13

075911

The similarity of this merchandise to purely protective articles, or its dissimilarity to wearing apparel, is that it is specially designed to keep a person afloat and somewhat warm in cold water. Ordinary wearing apparel does neither of these things. We also understand that the cost of adding the buoyancy and hypothermia protective features is substantial in that there are additional costs for design, safety testing, and quality control in manufacturing. Such costs would not usually be involved in the manufacturing of ordinary rainwear or winter garments.

When this merchandise is compared with purely protective articles, such as the typical life jacket that is depicted as Type I or Type II in the U.S.C.G. literature you provided, the dissimilarity is readily apparent. The purely protective article provides no decency, comfort or adornment. The instant article, by contrast, satisfies the comfort standards and possibly decency standards as well.

Taking into consideration the characteristics discussed above, we conclude that the instant merchandise has more similarities to wearing apparel than dissimilarities. Also we conclude that the instant merchandise is more dissimilar to purely protective articles than similar to them.

After determining that the instant merchandise is substantially similar to wearing apparel, we examine what appears to be the principal function of the merchandise. Although we have determined that this merchandise does function as wearing apparel, an article which has its principal function as something other than as wearing apparel would not usually be classified in those provisions. In the instant case, this merchandise does not appear to have as its principal function the saving of the life of the wearer during emergencies. The life-saving feature would surely play a major part in the decision to buy this garment in place of a combination of waterproof garments with a life jacket and even a wet suit underneath all of it for hypothermia protection. However, when in regular use, this garment is not so different in its principal function as to be improperly described as wearing apparel. Moreover, in looking at the protective or

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B14

076591

075911

life-saving features, we could not say that they are so prominent in their function, which is different from the function of wearing apparel, that coveralls with these features must be removed from the class or kind of goods used as wearing apparel. Therefore, the coveralls, Model FJ-570, are classified as wearing apparel. Following the standards enunciated in Internal Advice Memoranda Nos. 188/78 and 62/81, the merchandise must be classified according to the component material in chief value. If in chief value of man-made fibers, it would be classified in item 381.9805, TSUSA, dutiable at 4 cents per pound plus 18.8 percent ad valorem. If the value of the polyvinylchloride, the material that creates the buoyancy, exceeds the value of the man-made fiber component, making the merchandise in chief value of rubber or plastics and if the merchandise contains 50 percent or more by weight of man-made fibers, it would be classified in item 772.3140, TSUSA, dutiable at 6.3 percent ad valorem.

The sample provided by the direct-mail retailer will be returned to them.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

Mr. Louis K. Hochstaedter
President
Highcity International
P.O. Box 935
San Anselmo, California 94960

Dear Mr. Hochstaedter:

Re: PFDC 852203

Your letter of March 22, 1985, requests a ruling on the tariff classification of a woven nylon shell which when filled with polyvinyl chloride buoyant material will serve as a personal flotation device.

The submitted sample has man-made fiber straps sewn on the outside extending about 8 inches on either side forming loops enabling it to be attached to the body. The shell measures 15-1/2 inches by 15 inches by 2-1/2 inches. One side is open for the insertion of the buoyant material which will be inserted after importation.

A heat transfer plastic decal logo appears on the outside of a panel on the cover. This type of decal is considered to be an applique and therefore ornamentation.

This article when complete would be worn about the person only during an emergency to help protect against drowning. Moreover, it does not have any characteristics commonly associated with wearing apparel, nor does it have any use for comfort, decency or adornment. Therefore, it would not be considered wearing apparel.

This sample is classifiable under the provision for articles, not specially provided for, of textile materials, ornamented, of man-made fibers, in item 386.1343, Tariff Schedules of the United States Annotated, dutiable at 12.5 percent ad valorem. Goods classified in this item are also eligible for duty-free treatment if products of beneficiary countries of the Generalized System of Preferences.

Your sample will be returned under separate cover.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

30 JUN 1986

CLA-2 CO:R:CV:G
075934 JLV

District Director of Customs
610 South Canal Street
Chicago, Illinios 60607

Re: Decision on Protest and Application for Further Review of Protest No. 3901-4-001167, Dated November 8, 1984

Dear Sir:

The above protest and application for further review were timely filed against your action in which you classified certain fasteners under the provision for wood screws in item 646.49, Tariff Schedules of the United States (TSUS). The fasteners were entered at Chicago on Entry No. 00647505, dated December 20, 1983, liquidated on August 10, 1984. This ruling is our decision on the classification issue.

FACTS:

The merchandise at issue is a hex head, threaded fastener described by the protestant as a hex head drive spike for use in railway track contruction. The shank is cylindrical with a threaded diameter of approximately 1 inch. The diameter of unthreaded shank is slightly smaller than the diameter of the threaded part. The end of the fastener is chamfered.

In an affidavit submitted by the protestant, the use of the fastener is described (items 4 and 5):

> 4. The Hex Head Drive Spike is used in railway track construction to secure track and ties. The Hex Head Drive Spike is driven with a hammer, mallet or airgun into pre-formed holes in concrete ties and tie plates. The bolt head secures the rail to the ties. The hole in the concrete tie is larger in diameter than the Hex Head Drive Spike and is lined with a tube containing an epoxy substance. When the Hex Head

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C3

Drive Spike is driven into the oversize hole, the epoxy substance is released, forming a seal bonding the bolt and ties and securing the track and ties.

5. The head on the Hex Head Drive Spike is used solely for removal of the bolt and is not used for setting the bolt in place.

The protest also states that the fastener is known in the trade as a bolt or as a spike and not as a screw.

It is your position that on the basis of prior administrative rulings, the threaded fasteners are wood screws for tariff purposes.

ISSUE:

Whether the imported fastener is more specifically described as a screw, and, if so, whether it is principally used in wood?

LAW AND ANALYSIS:

Although the protestant has offered an affidavit as evidence that the hex head fastener is known in the trade as a bolt or spike, there is no other evidence that would support this statement. No trade literature or other trade description as to what is a bolt or spike has been offered as evidence in support of classification as a bolt or spike.

The hex head is not conclusive evidence for classification as a bolt. In this case, the threaded fastener cannot be used with a nut or similar article. The threading and cylindrical shank are more typical of the coarse threading and shape used in wood screws for predrilled holes. The chamfered point is also characteristic of such

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

07525

075924

screws. Finally, the fastener appears to be the type that is torqued by the head. Therefore classification as a bolt is clearly inappropriate.

Protestant describes the use of this fastener in paragraph 4 of the affidavit, supra. However, unlike spikes with corrugations (not spiral threading) and similar ridges, this fastener apears to have a significant feature that makes it more than a fastener that is set by being driven. The threading and hex head are evidence of use as a screw. Furthermore, the fastener is similar to articles known as drive screws which are driven into place but are either torqued to specification or removed by torque applied to the head. In a ruling letter of December 22, 1969 (file MCS 424.4M), we classified a hexagonal head threaded spike with a tapered chamfered point as a wood screw. The fastener in that ruling was generally used to fasten rails to wooden ties.

The threaded fastener is within the common meaning of the term screw. It also has the characteristic of a screw used in wood. Therefore, absent convincing evidence to the contrary, we classify the hex head threaded fastener as a wood screw rather than as a spike.

Protestant cites H. T. Kennedy Co., Inc. v. United States, 32 Cust. Ct. 124, C.D. 1593 (1954), and C. S. Emery & Co. v. United States, 64 Treas. Dec. 1135, Abs. 26313, as controlling However, in H. T. Kennedy, supra, the "common meaning" of the term "spike" was discussed as it applied to a

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

U-shaped article and not in the context of distinguishing between a spike and a screw for tariff purposes. In C. S. Emery, supra, the "screw spike" was a spirally cut fastener with a beveled head that was not suitable for torquing with a tool. Therefore, these judicial opinions are not controlling.

HOLDING:

The hex head threaded fastener is more specifically described as a screw for tariff purposes. Furthermore, it is the type of screw that is principally used in wood. Therefore, it is classified under the provision for wood screws of iron or steel in item 646.49, TSUS. You should deny the protest in full.

A copy of this decision should be given to the protestant at the time notice of action is given on Customs Form 19.

Sincerely,

Arthur P. Schaffer

Mr. Luc C. Pamerleau
Market Entry Section
USA Marketing Division
Department of External Affairs
125 Sussex Drive
Ottawa, Ontario
Canada, K1A 0G2

Dear Mr. Pamerleau:

Re: UTH-0877
6506-USA/6

This letter is in response to your letter of April 4, 1985, requesting the reconsideration of Headquarters Ruling Letter (HRL) 075551, issued February 26, 1985, New York file 811761. Your letter was written on behalf of Software Research Corporation, 3939 Quadra Street, Victoria, British Columbia, Canada V8X 1J5. Our ruling letter pertained to the tariff classification of a Visual Speech Aid (VSA). The VSA consists of: (1) an interface card for installation into the peripheral slot of an Apple II Plus or Apple IIe Microcomputer; (2) a program diskette; (3) a data diskette, and (4) a microphone.

Our ruling held that the interface card was classified in item 676.52, Tariff Schedules of the United States (TSUS), and was also eligible for duty-free treatment under the temporary item 960.15, Appendix to the TSUS. We also held that the microphone was classified in item 684.70, TSUS, and that it was not eligible for duty-free treatment under item 960.15. Your letter asks for a reconsideration of our decision on the eligibility of the microphone for item 960.15. Upon reconsideration of that ruling and the additional information presented, we have concluded that the initial ruling is correct as issued. A copy of HRL 075551 is enclosed for your reference.

Our rationale for determining that the microphone and cord are not eligible for item 960.15, is that the microphone's identity has not been substantially altered in its "adaptation" for the use or benefit of other physically handicapped persons. We have examined catalogues of nationwide retailers of electronic articles and have determined that a variety of low-cost plugs and jacks are readily available for microphones and similar articles. This information leads to our determination that the jack modification to the microphone enabling the microphone cord to be connected with the interface card is an insignificant adaptation which, by itself,

c1

THIS DOCUMENT MAY BE RELEASED TO THE
PUBLIC _____

does not qualify the microphone for duty-free entry under item 960.15. See T.D. 84-17 for a discussion of insignificant adaptations. Moreover, the microphone does not form an entirety with the interface card, even though they may be imported and used together, because, as noted above, the identity and characteristics of the microphone are never lost, submerged or obscured when joined with the interface card or the microcomputer.

The cord restrainer for the microphone card is no more than a safety feature that would provide protection to any person who might pull on the cord and damage the electronic device. This restrainer is therefore unrelated to the physically handicapped as defined in the tariff provision.

Sincerely,

Arthur P. Schaffer

Re: Decision on Request for Internal Advice 85-28

Dear Sir:

In a memorandum of February 21, 1985, you requested advice on whether galvanization of steel sheets constitutes a substantial transformation. It is your opinion that uncoated steel sheets and galvanized steel sheets are not commercially interchangeable, are different in appearance and name, and, therefore, the processing of steel sheets into galvanized steel sheets is a substantial transformation. This ruling is our decision on the issue.

FACTS:

The merchandise is steel sheet, in coil, produced in Brazil and galvanized in Mexico. There are two principal types of processes that constitute galvanizing of steel sheet: electrogalvanizing and hot dip galvanizing. The nature of the steel sheet and the intended applications determine, in part, the galvanizing process.

Other types of galvanizing are: application of zinc by a mechanical process similar to peening; coating with a zinc-rich paint; and spraying molten zinc onto the steel product.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C9

Galvanization gives a protective layer of corrosion-resistant metal to carbon steel. Hot dip galvanizing gives a more durable layer of protection because it does not simply coat the surface or deposit zinc on the surface. It involves a molecular bonding by the formation of a thin layer of zinc-steel alloy between the layers of steel and zinc. This interpenetration of molecules establishes a durable bond for the protective surface.

The process for hot dip galvanizing involves the following: clean and descale; pass through molten zinc; trim excess zinc; and chromate. If the process is a continuous hot dip process, the steel sheet is annealed after cleaning. It is then immersed into the molten zinc.

ISSUE:

Is galvanization of steel sheet a substantial transformation such that the origin of the galvanized sheet is that of the country in which it is galvanized?

LAW AND ANALYSIS:

In a ruling dated November 5, 1982, affirmed in a ruling of May 20, 1983, we held that electrogalvanizing and temper rolling of cold rolled steel sheet did not constitute a substantial transformation. A substantial transformation requires that an article, subjected to a manufacturing or processing operation, be transformed into a new and

076342

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

C10

different article having a distinctive name, character, or use. Anheuser-Busch Brewing Association v. United States, 27 U.S. 556 (1908); Uniroyal, Inc. v. United States, 3 CIT 220 (1982); National Juice Products Association, v. United States, ___ CIT ___ (Slip Op. 86-13, decided January 30, 1986).

The essential article, the nature of which remains constant through the various stages of finishing, is the cold rolled carbon steel sheet. Galvanization does not change the inherent name of steel sheet; it does not change the chemical composition that gives steel sheet its structural quality; nor does it change the use of steel sheet as a material in the production of numerous articles. The fact that galvanization is performed by a processor, rather than a user, to provide a protective finish to steel sheet is not determinative. See Uniroyal, Inc. and National Juice, supra, in which the court ruled on products that were processed from producer's goods to consumer's goods. In both cases the court held that the products, shoe uppers attached to soles and orange juice concentrate reconstituted as juice, respectively, were not substantially transformed.

Galvanization increases the market value of the product by a wide range of percentages, varying, for example, from 15 percent to 66 percent of the cost of the steel sheet.

076342

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C11

The cost of the zinc material, however, is the most costly element in the galvanization process. It accounts for approximately 50 percent of the added cost. Furthermore, the processing operation by which zinc is applied to steel is significantly less complex and less costly than the process by which the steel sheet is formed. Because galvanization does not materially alter the structural nature of the product as cold rolled steel sheet, the costs added by galvanization do not justify a conclusion that there is a substantial transformation.

Galvanization gives a distinctive surface character and appearance. But surface finishing in this case does not change the name or essential character of the article as flat rolled carbon steel sheet. The processing is an enhancement or finishing of an identifiable product. It is not a change in the name or character.

Galvanized steel sheet is often used in applications different from those in which ungalvanized sheet is used. However, the underlying structural use as steel sheet, whether or not galvanized, is an interchangeable use. The fact that a particular industry requires a specific protective surface on steel sheet is not conclusive evidence of "new" use. It only recognizes that steel sheet is finished with different coatings or surface treatments in order to protect an article more adequately from

076342

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ___

C12

corrosion. Therefore, although galvanization enjoys a recognized status in many user-applications, it is our position that the use of steel, as a material, has not been changed by virtue of the protective coating or surface.

HOLDING:

Galvanization of cold rolled steel sheets, whether by electrogalvanization or hot dip galvanization, is not a substantial transformation of the steel sheet.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

JUL 30 1985

REFER TO
CLA-2 CO:R:CV:G
076369 JAS

076369

District Director of Customs
40 South Gay Street
Baltimore, Maryland 21202

Dear Sir:

This is our decision on Application for Further Review of Protest No. 1303-4-000195, dated June 22, 1984. It covers consumption entries 150176, 151869 and 152115 dated, respectively, March 11, April 20, and April 27, 1982. The entries were liquidated April 20, 1984. At issue is the classification of certain steel plates, U-shaped profiles, angles, channels and I beams from Austria.

FACTS:

The subject components are used in the construction of tanks which hold and store processed sunflower seeds and their oil. Counsel for protestant maintains that all components necessary to make up a complete storage/holding tank arrived in each of the three shipments. Each component is said to have been drilled, shaped and formed in such a way that on-site assembly requires only that the components be fitted together and welded to form a complete tank.

Classification under the provision for tanks and other containers, of metal, having a capacity over 75 gallons and ordinarily installed as fixtures in industrial plants or elsewhere for storage or manufacturing use, in item 640.35, Tariff Schedules of the United States (TSUS), is therefore felt to be appropriate. Counsel advances an alternative classification under the provision for columns, pillars, posts, beams, girders and similar structural units, other, not in part of alloy iron or steel, in item 652.94, TSUS. This is because the various components are said to

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C14

support the vertical loads or stresses imposed by conveyors, bridges, walkways and platforms situated on top of and surrounding the tanks, as well as diffusing downward the weight of the tanks' contents.

You have liquidated the subject entries under the provision for other articles of iron or steel, not coated or plated with precious metal, in item 657.25, TSUS.

ISSUE:

(1) Does each shipment/entry contain components necessary to comprise a complete or substantially complete tank, and if not, (2) has classification in item 652.94 been substantiated?

LAW AND ANALYSIS:

With respect to the first issue, an affidavit, dated May 21, 1986, from the sunflower seed processing plant's technical director, attests to the fact that the holding/storage tanks were shipped as complete, unassembled units, although in some instances either additional components were present or a few minor parts omitted. None of the entry documents are present in the protest file so that we are unable to independently verify this fact. Submitted packing lists and shippers' invoices do not significantly clarify the issue.

If your review of the subject entries reveals that all the essential components necessary to the completion of a tank otherwise meeting the requirements of item 640.35, TSUS, were present in any or all of the protested entries, with such components arriving in the same shipment, classification in item 640.35, TSUS, would be appropriate. Replacement or additional parts or components in each entry would be classified and assessed with duty under that tariff provision you find to most narrowly

D'

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

076369

and specifically describe them, or in item 657.25, as appropriate. Our rulings 034529, dated July 24, 1974, and 041677, dated January 6, 1976, are enclosed for your reference.

If your review reveals that minor parts or components in each entry were omitted, classification in item 640.35 would still be warranted provided the components comprise a substantially complete tank, in accordance with General Interpretative Rule 10(h), TSUS. See Daisy-Heddon Div. Victor Comptometer Corp. v. United States, C.D. 4765, aff'd. C.A.D. 1228 (1979).

076369

With respect to the second issue, that is, if components for less than a substantially complete tank are found in any or all of the entries, the merits of an item 652.94, TSUS, classification must be addressed. In accordance with J. Ray McDermott & Co., Inc. v. United States, 69 Cust. Ct. 197, C.D. 4394 (1972), and the Protest Review Decision of November 7, 1983 (072156), copy enclosed, the structural units classifiable in item 652.94 need not necessarily support vertical concentrated loads in the strictest and most technical sense, but must transmit stresses or loads in a vertical direction. While some of the structural components in each shipment may support apparatus atop or alongside the tanks, or even the weight of the tanks and their contents, these units or components are not identified in each shipment. We conclude that there is insufficient evidence in the record to show which, if any, of the components in the protested entries represent structural units ejusdem generis with the exemplars in item 652.94, TSUS. Moreover, classification as "parts" of structures, in item 653.00, TSUS, would be precluded because there is no evidence as to the chief use of the various components, as required by General Interpretative Rule 10(ij), TSUS.

D2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Possibly applicable provisions in Schedule 6, Part 2, Subpart B, TSUS, were also considered. However, there is no evidence in the protest file to establish conformity with the Subpart B, Headnote 3(g) or 3(j) definitions for Plates and sheets or Angles, shapes and sections, respectively.

HOLDING:

To the extent that you find classification in item 640.30, TSUS, to be appropriate, the protest should be allowed. Otherwise, the protest should be disposed of in accordance with the views herein expressed. A copy of this decision should be attached to the Form 19, Notice of Action, to satisfy the notice requirements of section 174.30(a), Customs Regulations.

Sincerely,

Arthur P. Schaffer

District Director of Customs
Houston, Texas 77057-3012

Dear Sir:

Re: Decision on Application for Further Review of Protest Nos. 5301-3-000617.

This protest was filed against your decision in the liquidation on July 23, 1983, of entry No. 81-383513-2 dated September 21, 1981. The entry covers a shipment of catalytic naphtha, said to be used only as a gasoline blending stock.

At issue is whether the catalytic naphtha from the Netherlands is properly classifiable as naphtha in item 475.35, Tariff Schedules of the United States (TSUS), or as a benzenoid mixture in item 407.16, TSUS.

Customs maintains that the catalytic naphtha imported by the petitioner contains dutiable alkylbenzenes which have a benzenoid structure that are synthetically produced during the catalytic cracking process. The importer maintains that catalytic cracking is not a synthesis process. However, during the cracking process, large molecules break down into fragments which reassociate to form molecules containing a benzenoid structure. This benzenoid structure appears only after the catalytic cracking and is produced by chemical reaction. This is a synthesis process.

The importer also maintains that even if the dutiable benzenoids exist as a result of the synthesis process, the benzenoids are de minimis. Of the 7.2 percent dutiable benzenoids that are synthetically produced, the importer claims that 5.3 percent are undesirable because they produce engine deposits. However, the dutiable benzenoids present help boost octane and the importer does not show that the problem of engine deposits outweighs the positive effect of octane enhancement. Customs maintains its position that the 7.2 percent of dutiable benzenoid compounds resulting from the synthesis do enhance the product for use as a blend stock and is not considered de minimis.

D4

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Headnote 1, Part 10 (the petroleum section) states that any product described in the petroleum section and also in the benzenoid schedule is classifiable in the latter, except for motor fuel, fuel oils, lubricating oils and greases. Naphtha is not included in that exception, and, therefore, naphtha containing more than a de minimis amount of synthetic benzenoids would be classifiable as a benzenoid mixture under 407.16, TSUS. A 7.2 percent benzenoid (alkylbenzene) content is far in excess of a de minimis amount.

Therefore, the catalytic naphtha is properly classifiable under the provision for benzenoid mixtures in item 407.16, TSUS.

You should deny the protest. A copy of this decision should be attached to the Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffer

Mr. James Tang
Hecny Brokerage Services, Inc.
10804 S. La Cienga Blvd.
Inglewood, California 90304

Dear Mr. Tang:

Your letter of May 6, 1985 requested a ruling on the tariff classification of a garment that you identify as a 100 percent cotton corduroy short-overall. You asked whether this garment was classified under item 379.6430, Tariff Schedules of the United States Annotated (TSUSA), now item 381.6530, TSUSA.

The sample you provided is a pair of woven cotton corduroy shorts with a bib. The shorts have two front pockets and a rear pocket. The waistband of the shorts is elasticized on the rear portion and has two tunnel-type belt loops on the front that are formed by an upward extension of the front pockets. A bib with a front and back panel has been inserted under the waistband on the inside and stitched to the shorts; two cloth straps, stitched to the back panel, are designed to act as suspenders by passing through two buttonholes on the front panel. The "suspenders" are to be secured and adjusted to the size of the wearer by knotting.

The bib portion of the garment is composed of a lighter weight corduroy than the shorts and is crudely finished. The ends of the suspender-like straps are knotted at the buttonholes at the bib and are so poorly finished that, with the slightest use, they will unravel. If this garment were worn with the bib portion, the waistband would flop over because the tension from the suspenders coupled with the weight of the garment would be focussed in a spot about 1-1/2 inch below the waist band. In short, the bib addition to this garment is an unusual element having no apparent actual utility nor commercial reality. The bib feature is obviously not intended to be used with the shorts. Rather, the purchaser of the garment would cut off the bib at its attachment at the inner bottom of the waistband and throw it away. The bib feature appears to be useful only to try to enable the garment to be classified under a tariff provision that fails to describe it accurately.

D6

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

This office has previously ruled on garments that have unrealistic features oddly attached.

In our ruling on a sweater and panty-like garment attached by a single yarn, we determined that the two pieces together were not known in the commerce of the United States nor were they used as a single garment. Headquarters Ruling Letter 073219, February 29, 1984. The instant sample may be subjected to the same test. Is this bibbed pair of corduroy shorts known in the commerce of the United States in the form it appears in the sample? Are the bib and the shorts worn together? We must answer both questions in the negative because these features do not present an identity beyond a pair of shorts with a superfluous construction of material attached in the wrong place, even for a bib.

In another ruling from Customs Headquarters, file SPE-2-07-O:B: SR, March 14, 1978, the inquirer presented women's blue jeans to which had been attached a bib in front and back purporting to make them overalls.

In that ruling it was stated, "[w]hile admittedly, goods are classified in the condition as imported, the sample garment in question cannot be regarded as a commercial entity in its imported condition." In that case the bib was insecurely stitched to the waistband and was left in an unfinished condition. Here the bib is more or less unfinished but is sewn semi-securely in the wrong place for a real bib. The principle of the March 14, 1978 ruling remains. Customs must classify goods according to what the goods are in reality meant to be. Any feature of a garment that has no commercial significance, that is meant to be removed by the purchaser, and that is obviously designed to skew trade reporting statistics and textile quota enforcement efforts, cannot form the basis of a correct tariff classification.

It is worth noting that this ruling does not affect in any way the general principle of classifying goods in their condition as imported. See Dwight v. Merritt, 140 U.S. 213, 219 (1890); Falk v. Robertson, 137 U.S. 225, 232 (1890). However, the reality of the identity of the goods being entered is an inherent part of arriving at the correct classification. Customs has no interest in judging whether a

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D7

076411

given fashion will meet commercial success or whether a given garment is tasteful. The obligation is rather the correct application of the tariff provisions to goods presented for entry.

The shorts are classified in item 381.6210, TSUSA, the provision for "Other men's and boys' wearing apparel, not ornamented: Of cotton: Not knit: Other: Other: Suits, trousers, slacks and shorts, Shorts," dutiable at 16.5 percent ad valorem. The bib portion, having no recognizable value as wearing apparel, is classified in item 386.20, TSUS, the provision for "Articles not specially provided for, of textile materials: Other articles, not ornamented: Of cotton: Pile or tufted construction: Corduroy," dutiable at 20 percent ad valorem.

Sincerely,

For Harvey B. Fox

New York, New York 10048

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 1001-4-011820

This protest was filed against your decision in the liquidation of entry 84-162800-7 dated January 13, 1984, covering vinyl inflatable boats produced in Taiwan.

This ruling concerns the correct classification of the vinyl inflatable boats.

FACTS:

The merchandise at issue is three polyvinyl chloride (PVC) inflatable boats. The packing and the advertising claim that the model with bow number 604 (Model SKU 04953) is for use by one person, number 784 (Model SKU 04661) by two people, and number 955 (Model SKU 04359) by three people. The Customs laboratory in New York verified that the thickness of the PVC in the three boats is close to that claimed on the packaging: 18 gauge for numbers 604 and 784, and 23.5 gauge (not 24 gauge) for 955.

All three models have two inflatable air chambers in the floor. In addition, numbers 604 and 784 have one inflatable air chamber in the body of the boat, while number 955 has two in the body of the boat. None of the three have any transverse inflatable air chambers. Number 604 was rated by the Customs laboratory at 160 pound capacity, number 784 at 318 pound capacity, and number 955 at 500 pound capacity (not 600 as claimed on the package). The boats are sold at retail for $12.99, $26.99 and $37.99 respectively when on sale.

D9

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Counsel for the protestant claims that the boats are classified under the provision for canoes, racing shells, pneumatic craft, and pleasure boats not specially provided for which are not of a type designed to be chiefly used with motors or sails, pneumatic craft, in item 696.35, Tariff Schedules of the United States (TSUS).

The New York import specialist classified the one person and two person boats (numbers 604 and 784) under the provision for other inflatable articles not specially provided for, in item 790.39, TSUS. He classified the three person boat (number 955) in item 696.35, TSUS.

ISSUE:

Should the one person and two person inflatable boats be classified as pneumatic craft in item 696.35, TSUS?

LAW AND ANALYSIS:

In a written brief, counsel for the protestant argues that an eo nomine provision is more specific than a provision for "articles, not specially provided for." She claims that the one and two person boats are specifically covered by the provision for pneumatic craft in item 696.35, TSUS, therefore they are not classifiable in the basket provision for other inflatable articles not specially provided for in item 790.39, TSUS. She asserts that all three boats meet the dictionary definition of "craft." She points out that all the boats are designed for use with oars or paddles and that the three person boat (number 955) is capable of having a motor mount and motor installed for navigation purposes.

Counsel further contends that all three boats meet the standards set for "pneumatic craft" by Customs in that they are of substantial construction and are suitable for serious boating, as required by Customs

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

076435

D10

Headquarters Ruling Letter (HRL) 047016, dated September 1, 1977. She observes that each boat has several air chambers intended to prevent sinking if a puncture occurs and that they are all advertised and sold as boats.

She argues that Customs has set an arbitrary standard by determining that boats made of 20 gauge plastic (or greater) are of substantial construction while those made of less than 20 gauge plastic are of insubstantial construction. Finally she claims once again that the vinyl boats are more specifically provided for as "pneumatic craft" than as "other inflatable articles not specially provided for."

In a conference at Customs Headquarters, a second attorney representing the protestant presented additional oral arguments. He claims that 46 U.S.C. 1452 and the United States Coast Guard's Boat Hull Identification Number (HIN) program apply to the instant merchandise. He argues that, pursuant to the Coast Guard's HIN program, effective August 1, 1984, HINs were required by the Coast Guard for identification of certain boats. He states that he does not know when the HINs were actually issued for the instant merchandise, but he presented a purchase order dated April 9, 1983, which indicates that HINs were in use for the 2 man and 3 man boats which were ordered at that time. The attorney also provided three samples (one of each type of boat) and two catalogs covering similar merchandise. We note that the three samples provided all had HINs, but that the HINs were all dated — according to the Coast Guard formula — September 1984, therefore the samples were not part of the instant merchandise, which was covered by an entry dated January 13, 1984.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D11

076435

There is no doubt that pneumatic craft such as those at issue here are classified in item 696.35, TSUS, if they are of substantial construction. See United States v. Seagull Marine, 67 CCPA 89, C.A.D. 1251 (1980), in which similar pneumatic craft were held classifiable in item 696.35, TSUS.

The next question is "What makes a boat of substantial construction?" Customs has held that boats made of 20 gauge (or greater) plastic are of substantial construction, while those made of less than 20 gauge plastic are of insubstantial construction. Customs has used the gauge measurement of thickness (in order to determine whether a boat is of substantial construction or not) for some time. See HRL 046517 of September 7, 1977, HRL 053578 of December 8, 1977, HRL 070502 of February 8, 1983, and HRL 075365 of July 31, 1985, all of which discuss and adhere to the 20 gauge rule.

Inflatables range in durability of construction from extremely flimsy items intended for use in swimming pools to boats with 100 horsepower motors which are used by Jacques Cousteau in exploring glacial waters. Obviously not all of these items qualify as "pneumatic craft" in item 696.35, TSUS, and there must be a dividing line somewhere. We have found the 20 gauge or over rule to be a reasonable dividing line in the past.

It may be that none of these boats are actually intended for serious boating. We take note of the fact that the instant merchandise is sold in boxes which state as follows:

> "Not recommended to be used in open water."
>
> "Not to be used as a life saving device as defined by the U.S. Coast Guard."
>
> "Warning: Do not use as a life preserver."
>
> "Use under strict parental guidance."

D12

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

None of the above warnings inspire confidence in the substantial construction of the boats, nor in the seriousness of the purposes to which they may be put. We further note that their use is limited to people weighing not over 160 pounds each for number 604, 159 pounds for number 784, and 167 pounds for number 955. Nevertheless, we have adhered to the rule that boats made of 20 gauge plastic (or greater) are of substantial construction in the past, and we shall continue to adhere to that rule in this case for the sake of uniformity.

Counsel's arguments concerning 46 U.S.C. 1452 and the Hull Identification Numbers (HINs) are informative, but they have nothing to do with the case before us. It seems that counsel would have us adopt the Coast Guard's HIN system as a way of separating boats intended for serious boating from other inflatables. We decline to do so, inasmuch as we already have a system in place for making such a determination (i.e., the 20 gauge rule explained above.)

Counsel's eo nomine and specificity arguments do not apply to inflatable boats which are not sturdy enough to qualify as "pneumatic craft." Based on our past experience and rulings, we find that the one person boat (number 604) and the two person boat (number 784) are not substantial enough to be used for serious boating. Both of these boats are of less than 20 gauge plastic and should be classified in item 790.39, TSUS, as other inflatable articles. The three person boat (number 955), which is made of 23.5 gauge plastic, is of substantial construction and could be used for serious boating. Following United States v. Seagull Marine, supra, we find that it should be classified in item 696.35, TSUS, as "pneumatic craft."

D13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

076435

HOLDING:

The one person and two person boats (numbers 604 and 784) are classified in item 790.39, TSUS. The protest is denied in part with regard to these items. The three person boat (number 955) is classified in item 696.35, TSUS. The protest is approved in part with regard to this article.

The protest is approved in part and denied in part as spelled out above. A copy of this decision letter should be sent to the protestant along with the CF 19 Notice of Action.

08 JUL 1986

District Director of Customs
Philadelphia, Pennsylvania 19106

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 1101-5-000084

This protest was filed against your decisions in the liquidations on March 15, 1985, of entry No. 79-106636 dated October 31, 1978, and entry No. 79-107401 dated November 2, 1978.

The athletic shoes involved were classified in liquidation under the provision for other footwear which is over 50 percent by weight of fibers and rubber or plastics with at least 10 percent by weight being rubber or plastics and having uppers of which not over 90 percent of the exterior surface area is rubber or plastics in item 700.60, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 20 percent ad valorem.

Pursuant to Schedule 7, Part 1, Subpart A, Headnote 3(b), TSUS, the athletic shoes were appraised on the American selling price of specified domestically produced athletic shoes.

The protestant sets forth several arguments opposing American selling price appraisement in this instance. However, the arguments are moot inasmuch as partial refunds of certain duties paid will be made as part of the compromise agreement reached with the protestant (ASICS Sports of America, Inc.) pursuant to 19 U.S.C. 1617.

The protest is denied. However, in accordance with the enclosed copy of the compromise agreement, a refund of $17,120.41 is due the protestant including a refund of $1,689.20 on entry No. 79-106636 and a refund of $471.88 on entry No. 79-107401. A copy of this decision should be attached to the Form 19 Notice of Action to be sent to the protestant.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

Mr. Gordon Baynham
Canada Wire and Cable Ltd.
250 Ferrand Drive
Don Mills, Ontario
Canada M3C 3J4

Dear Mr. Baynham:

This is in response to your calls following a letter dated December 16, 1985, from Mr. C. S. Archibald, your predecessor, and the initial inquiry from Mr. Gary Reitmeier of C. J. Tower & Sons, Buffalo, New York, written on behalf of your firm. In the calls subsequent to Mr. Archibald's letter you have provided additional information and clarification of the issue to be decided. This ruling concerns the classification procedure for wooden reels imported with their wire or cable.

We understand that your firm exports a wide range of wire and cable products to the United States. The cable and wire products are shipped on either wooden or steel spools or reels. The steel reels are not at issue here because they are considered instruments of international traffic. This letter concerns only wooden reels. You estimate the sizes of the reels to be from 22 inches to 96 inches in diameter and their value to range from $40 to $800.

The issue is whether the wooden reels are dutiable with their contents or are treated as imported articles separate and distinct from their contents.

The resolution of this issue turns on the meaning of "containers or holders, if not designed for, or capable of, reuse," a phrase from General Headnote 6(b)(i), Tariff Schedules of the United States (TSUS). This headnote provides that the containers are dutiable with their contents if not designed for or capable of reuse.

We understand from you that the wooden reels at issue here are manufactured for your company according to the National Electrical Manufacturers Association (NEMA) standards for non-returnable wooden reels. The NEMA specifications are found in Wire & Cable Packaging WC 26-1984, published to establish the minimum standards required to handle, load and transport a reel safely.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

E2

076553

There is no question that the reels are containers or holders in the language of the headnote. Moreover, the wooden reels would meet the standard for "containers not designed for... reuse" because the design, at least from the standpoint of durability, is embodied in the NEMA standard. A reusable container would be constructed of different materials according to a higher or different standard and would usually show a deposit on the commercial invoice. The usage of the industry appears to be embodied in the NEMA standards which provide Customs with both the common and commercial understanding of the terms "designed for... reuse."

The meaning of the second part of the headnote phrase, "capable of reuse," is not as easy to interpret. We understand that some wooden reels survive the first transportation process intact and may be suitable for reuse. We also understand that in some segments of the wire and cable end-user industries, salvagers in fact go over used reels in an attempt to find reels that may be usable as is, or that may be repaired enough to use again as reels to transport and contain wire. But in contrast to this information, we are aware from speaking with a representative of the domestic industry who serves on the Packaging Committee of the Wire and Cable Division of NEMA, that non-returnable reels are most often destroyed after use. We have learned that the salvaging of the reels is more the exception than the rule.

The word "reuse" as used in this headnote means practical, commercial reuse, not incidental or fugitive reuse. Fontana Hollywood Corp. v. United States, 64 Cust. Ct. 204, 209, C.D. 3981 (1970). It follows that the only reuse that might qualify for "capable of reuse" is commercial reuse, not incidental use. Therefore, our observation that many of these wooden reels take on a new life as a picnic table or as a student's coffee table is immaterial to the headnote meaning of reuse. There is no doubt that some reuse of the reels takes place, but that reuse is not generally of the type recognized by the tariff language.

The word "capable" in this context is obviously limited by the other words analyzed above. The Court of Appeals for the Federal Circuit considered this term in its published decision in Holly Stores, Inc. v. United States, 1 CAFC 16, 17 (1983), when it agreed with the Customs Service that "capable" is limited by the limited meaning of "reuse." At issue was the reusability of wire and plastic clothes hangers imported with their clothes. The evidence showed that while the clothes hangers were designed to be and were in fact of fairly durable construction and that it would be physically possible to reuse them, the clothes hangers were, in general practice, never reused. Instead they were given away or thrown away. The situation is similar here. While we do not have precise statistics on the frequency of commercial reuse of the reels, we are convinced that the incidence of one-time commercial use is overwhelming. The trial court, affirmed in Holly Stores, supra, found the theoretical capability of reuse of the clothes hangers to be modified by the practical and commercial reality of one-time use for the clothes hangers.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

E3

Likewise, we cannot regard a salvage and repair operation on wooden reels to create any significant reuse for them. Therefore, non-returnable wooden reels for cable and wire manufactured to NEMA standards for non-returnable reels will be considered "not designed for or capable of reuse" according to General Headnote 6(b)(i) and will therefore be dutiable at the same rate as their contents.

Sincerely,

Arthur P. Schaffner

Re: Decision on Protest and Application for Further Review of Protest No. 2904-5-000081, dated March 5, 1985

Dear Sir:

The above-referenced protest and application for further review were timely filed against your classification of certain hydrojet engine components under the provision for parts of pleasure boats in item 696.15, Tariff Schedules of the United States (TSUS). The merchandise was entered at Portland on Entry No. 84-412116-1, dated September 20, 1984, and liquidated on December 21, 1984. This ruling is our decision on the issue raised by the protest.

FACTS:

The protestant identifies the merchandise in issue as follows:

1. Rear mount kits;
2. T3 steering;
3. Indicator kits; and
4. 1031 HTR kits.

The protestant claims that these components are classifiable as parts of hydrojet engines in item 660.77, TSUS. As evidence of this, the protestant has submitted descriptive literature on some of the components. The 1031 HTR kit, for example, is a high-thrust reverse bucket for the Hamilton Jet 1031 engine. Each kit consists of a bucket which directs

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

ES

the jet stream and is mounted on the rear of the engine, an electro-hydraulic power pack, a hydraulic cylinder and mounting bracket, and a control stick and panel. The indicator kit appears to be an optional item which is used to show the position of the bucket. The rear engine mount kit consists of a bell housing support, jet engine support, and rubber insulators, and is designed to ensure correct alignment of the front engine and rear jet engine. The T3 steering unit was not described in the literature.

076560

ISSUES:

1. Whether the components are parts of jet engines?

2. If so, whether they are specifically provided for elsewhere?

3. If not parts of engines and if not specifically provided for elsewhere, are the components classified as parts of pleasure boats?

LAW AND ANALYSIS:

The protestant does not produce any argument which would demonstrate that the components are considered, for tariff purposes, to be parts of jet engines. The literature submitted by protestant shows that the components are used in conjunction with jet engines. However, they are not necessary to the completion or functioning of the jet propulsion unit. Rather, the components are used to couple the jet engine to a power source (rear engine mount) and to provide a directional change of the jet thrust (reverse bucket and indicator kit).

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC.

E6

These items are distinct from the entity known as the jet engine and, therefore, would not be parts of the engine. They are accessories.

No specific provision has been proposed for any of the individual components. Based on the evidence submitted with this protest and application for further review, we hold that classification in item 696.15, TSUS, is correct.

HOLDING:

For the reasons expressed above, the components are classified as parts of pleasure boats in item 696.15, TSUS, and the protest should be denied in full. A copy of this decision should be given to the protestant at the time notice of action is given on Customs Form 19.

Sincerely,

Arthur P. Schaffner

Re: Decision on Protest and Application for Further Review of Protest No. 3001-4-000692, Dated November 1, 1984

Dear Sir:

The above-referenced protest and application for further review were timely filed against your action in classifying certain steel fasteners as screws in item 646.63, Tariff Schedules of the United States (TSUS). The merchandise was entered at the Port of Seattle on Entry No. 00277151, dated April 26, 1984, liquidated on August 3, 1984. This ruling is our decision on the classification issue.

FACTS:

The merchandise is a steel fastener, described as a timber head drive spike (Plan 3M) used to secure tie plates, switch plates, and other track items to a cross tie. It is a square washer head fastener with a quadruple thread of 3/8 inch pitch (four separate spirals), measuring 1/2 inch by 6-1/2 inches. The shank is cylindrical and the point is chamfered. It is used in predrilled holes.

The protestant, through its counsel, states that the fasteners are driven, not screwed, into predrilled holes by an airgun, hammer, or mallet. Protestant claims that the fasteners are classified, for tariff purposes, as bolts, or, in the alternative, as spikes, rather than as screws. In support of its position, protestant offers an affidavit in which the affiant states that the square head bolt plan 3M is used in

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

numerous surface materials (rubber, steel, epoxy, wood) and that the square head is used solely for removal of the spike, not for setting the spike.

You state that the classification is more properly as wood screws in item 646.49, TSUS, rather than as other screws, in item 646.63, TSUS, the provision under which you liquidated the entry. You have classified this fastener on subsequent entries as wood screws.

ISSUE:

Whether this fastener is described by the tariff term "screw" rather than by the term "bolt" or "spike?"

LAW AND ANALYSIS:

The spiral threading on the fastener is the type of steep spiral found primarily on specialty nails and spikes to improve holding power in various types of materials. In the advertising literature submitted by protestant, two different types of threaded spikes are shown. One is called a "screw spike" and has a square head, with or without washer, and a single thread. The article in issue is called a "timber head drive spike" and has a four-lead thread. The difference between these two products appears to be that the "screw spike" is intended to be torqued into place, while the "drive spike" is intended to be driven in a manner similar to a spike or similar type of spiral fastener.

However, the controlling feature in this case is that the fastener has a square head to which torque can be applied, either for the purpose of securing or removing the fastener.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

076584

E9

Therefore, it falls within the class or kind of fastener that is known as a drive screw. The threaded spike, classified as a spike by the court in C.S. Emery & Co. v. United States, 64 Treas. Dec. 1135, Abs. 26313, had a bevelled head which precluded the use of a tool to remove it by torquing the head.

The special feature of the square head, in this case, is controlling. This distinguishes the fastener as in the class or kind of articles known as "screws" for tariff purposes.

The argument that the fastener is commonly known as a bolt is without merit. None of the evidence in the file supports this statement. Furthermore, the usual distinction between a bolt and a screw is that a bolt is fastened by torquing a nut onto the bolt, whereas a screw is fastened by torquing the head.

There is no evidence that the fastener is used, to any significant degree, in materials other than wood. The descriptive literature calls it a "timber" drive spike. We conclude that the principle use of this article is in wood.

Holding:

The timber square washer head threaded fastener is classified as a wood screw in item 646.49, TSUS. The protest should be denied. A copy of this decision should be given to the protestant at the time notice of action is given on Customs Form 19.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC_____

E10

076584

Because the rate of duty under item 646.49, TSUS, is higher than under item 646.63, the provision under which the screws were classified and liquidated, and is higher than the rate for either of the claimed provisions, the protest should be denied in full without reliquidation under item 646.49, TSUS.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 3004-4-000050

This protest was filed against your decision in the liquidation on February 24, 1984, of two Blaine entries covering shipments of cedar paneling manufactured in Canada.

This ruling concerns the correct tariff classification of the cedar paneling.

FACTS:

The merchandise at issue is 1/4 inch thick by 3-11/16 inches wide by 8 feet long cedar paneling, which has been tongue and grooved along the edges and which has square cut ends. The product was made from lumber which was cut into veneers. The veneers were then tongue and grooved to produce the imported product.

The merchandise was liquidated under the tariff provision for articles, not specially provided for, of wood, in item 207.00, Tariff Schedules of the United States (TSUS). The protestant claims that the merchandise should be classified under the provision for dressed or worked cedar lumber in item 202.27, TSUS, or under the provision for wood veneers in item 240.03, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

E12

076637

ISSUE:

Is cedar paneling with square cut ends and with edges which have been tongue and grooved classified as articles of wood in item 207.00, TSUS, as dressed or worked lumber in item 202.27, TSUS, or as wood veneers in item 240.03, TSUS?

LAW AND ANALYSIS:

The protestant's broker argues that the instant merchandise is classifiable under the provision for lumber, rough, dressed, or worked softwood, cedar, in item 202.27, TSUS, because it meets the tariff definitions of "lumber" and of "worked lumber" set forth in Headnote 2(a) and 2(a)(iii), Subpart 1B, Schedule 2, TSUS. Alternatively, he argues that the merchandise is classified under the provision for wood veneers, whether or not face finished, not reinforced or backed, other, in item 240.03, TSUS, because the merchandise is 1/4 inch thick and is described on the invoice as paneling. He assumes that such paneling will probably be used to overlay inferior material, therefore he claims that the cedar paneling meets the definition of "wood veneers" set forth in Headnote 1(a), Subpart 3, Schedule 2, TSUS. Finally, he points to General Interpretative Rule 10 and claims that because both item 202.27, TSUS, and item 240.03, TSUS, are more specific than item 207.00, TSUS, relative specificity prohibits the classification of the cedar paneling in item 207.00, TSUS.

The instant merchandise begins as lumber which meets the tariff definition of "lumber" set forth in Headnote 2(a) supra. When the merchandise is cut into veneers, however, it becomes a new product with a new name, a new use and new specifications. This new product is no longer classifiable as lumber.

E13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Inasmuch as the new product meets the tariff definition of wood veneers set forth in Headnote 1(a), Part 3, Schedule 2, TSUS, it would be classified as veneers if the edges remained square cut. The classification issue here turns upon the tongue and grooving of the edges of the merchandise, which takes it out of the category of veneers. It becomes the final product, i.e., cedar wall paneling, which puts it into the category of wood articles, not specially provided for, in item 207.00, TSUS.

It is argued that there is a distinction between bullnosed edges and tongue and grooved edges. Both processes constitute edge working, however, and, as such, they advance the panel beyond the wood veneer stage to the wood wall paneling. Edge working has been the subject of previous Customs rulings. See, for example, Customs Headquarters Ruling Letter (HRL) 068226, dated May 21, 1981, and HRL 074493, dated September 28, 1984. HRL 074493 concerned cedar strip veneer with bullnosed edges; it found that such bullnosed cedar veneer was classified in item 207.00, TSUS. Finally, see Border Brokerage Company, Inc. v. United States, 68 Cust. Ct. 7, C.D. 4325 (1972), in which wood strips which technically met the definition of wood veneers were held to be classified as articles of wood, not specially provided for, because they had been advanced beyond the stage of wood veneers by further processing prior to importation.

We find that the instant cedar paneling, which has been tongue and grooved on the edges, is classified as articles of wood, not specially provided for, in item 207.00, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E14

076637

HOLDING:

The instant cedar paneling, which has been tongue and grooved on the edges, is classifiable in item 207.00, TSUS. The protest should be denied in full. A copy of this decision should be sent to the protestant along with the CF 19 Notice of Action.

Sincerely,

Arthur P Schaffner

Re: Decision on Protest and Application for Further Review of Protest No. 5501-4-000031, dated March 2, 1984

Dear Sir:

The above-referenced protest and application for further review were timely filed against your classification of a certain belt for a corrugator machine under the provision for clothing for paper-making machines, not specially provided for, of man-made fibers, in item 358.50, Tariff Schedules of the United States (TSUS). The merchandise was entered at the port of Dallas/Ft. Worth on Entry No. 83-273926-4, dated April 22, 1983, and liquidated on January 27, 1984. This ruling is our decision on the classification issue.

FACTS:

The merchandise is a continuous belt 160 feet long, 90 inches wide, and approximately 3/8 inch thick. It is a tightly woven three-ply product of man-made fibers. The belt is known as an "Aqua Pull® Belt" and is used in a paper corrugator machine.

In the descriptive literature it is stated that the belt provides excellent transport, maximum heat exchange between the paper and hot-plate, and a high hygroscopic character which gives the belt absorption and evaporation rates essential for production of corrugated products.

F2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

In application, the belt is mounted on drive rollers above the path of the corrugated paper. Just prior to contact with the belt, two surface layers of paper are coated with glue and then pulled over the top and bottom of a fluted layer of paper. As these layers are joined, they pass between the belt and a series of metal hot plates for bonding. At this stage of processing there is also a series of hot rollers above the belt that are necessary to maintain constant tension and heat to ensure uniform bonding. The belt rides above the corrugated product and acts as a cushion to prevent crushing during bonding. The moving belt is capable of transmitting motion to (i.e., transports) the paper because its coefficient of friction is greater than that of the steel plates.

As the paper product moves beyond the rollers, it passes over another series of hot plates in the drying section. The belt continues to ride above the paper and, at this point, utilizes its hygroscopic qualities to effect a rapid and even moisture removal. After the drying stage, the belt pulls the product over cooling plates. The belt alone continues to ride above the paper and functions to transfer heat from the paper to the atmosphere. After the cooling stage, the belt and the paper separate, and the belt continues in its cycle back to the bonding stage.

076682

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

F3

The protestant claims that the belt is classifiable under the provision for belts, for machinery, of man-made fibers, in item 358.14, TSUS, apparently on the reasoning in two revoked ruling letters (revoked because the requests were not in compliance with sections 177.2 and 177.5 of the Customs Regulations (19 CFR 177.2 and 177.5)). The protestant, however, does not produce additional evidence that the belts in issue are principally used in a transport function and that the other functions are secondary to this function. It is your position that the belts are an integral and substantial part of the corrugating process, and that the transmission of motion is not the sole principal function.

ISSUE:

Does the imported merchandise have the single principal function of transporting, or, does it have two or more functions that are essential to the corrugating process?

LAW AND ANALYSIS:

The provision for belts and belting (item 358.14, TSUS, in this case) has been held to apply to those articles which are designed to transmit motion or to transport or convey. If designed to perform other functions that are not merely auxiliary or incidental to transport or to the transmission of motion, belts used on machinery are classifiable under the broader provision for machine clothing in items 358.24 to

076682

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

358.60, TSUS, depending on component material of chief value. I.A. 89/76, dated December 16, 1976 (file 047203). In I.A. 89/76 we ruled that papermakers' felts were classified as machine clothing rather than as belts because the felts had three distinct functions: transport, removal of water, and finishing of the surface on paper. We also noted in the ruling that the legislative history made it clear that felts were intended to be considered articles of machine clothing.

Belts used in a sludge dewatering system have been classified as machine clothing because they perform two functions: transport and filtration or separation of water and solids. Ruling letter of June 29, 1978 (file 052438).

Contrary to your position, the transport function of the belt is the principal function. Much of the literature submitted on the Aqua Pull® Belt describes its high tractive force (similar to cotton belts) and its durability (from the unique man-made fiber). The hygroscopic nature of the belt is an additional feature of the belt which enhances the processing of a corrugated product. However, unlike the filtration process or the surface finish process in the above cited cases, the hygroscopic design of the belt does not represent a function of the belt that is anything other than a normal, but secondary, function of such transport belts.

076682

FS

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

HOLDING:

The Aqua Pull® Belt is classified under the provision for belting and belts, for machinery, of man-made textile fibers, other than V-belts, in item 358.14, TSUS. The protest should be allowed in full. A copy of this decision should be given to the protestant at the time notice of action is given on Customs Form 19.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Mr. Mick W. Blakely
C. F. Liebert Inc.
P.O. Drawer L
Blaine, Washington 98230

Dear Mr. Blakely:

Your letter dated April 2, 1985, addressed to our New York office concerning the dutiable status of a two piece insole system, has been referred to us for a direct reply to you. A sample manufactured in Italy was submitted for examination.

The so-called insole sytem is a combination of two separate pieces. One piece, A, is a molded, full insole of foamed plastic having a fabric socklining bonded to its top surface. The second piece B, is a molded heel and arch "stabilizer" of non-foamed plastic designed to be used with the foam insole. Specifically, the second piece B has holes in it corresponding to the nubs on piece A. In use, the interlocking of A and B is such that they cannot slide with relation to each other and would effectively act as a single unit.

Inasmuch as you have asked for the classification of A and B when imported together and when imported separately, we assume that the item or parts of it may be imported for sale both directly to consumers and to an assembler who will combine the parts for resale to consumers.

The issue to be decided is whether the insole is almost wholly of foamed plastic. General Headnote 9(f)(iii), Tariff Schedules of the United States (TSUS), defines the term "almost wholly of" to mean "that the essential character of the article is imparted by the named material, notwithstanding the fact that significant quantities of some other materials may be present."

It is our view that the insole is almost wholly of foamed plastic. It is much thicker in the heel and arch area than at the ball and has been molded to "cup" the wearer's heel. It is our opinion that both of these features which are imparted by the foam plastic are present to provide substantial shock absorption and to increase the foot's stability by preventing one's heels from sliding within the shoe. These two characteristics are intended to reduce the chance of injury while jogging and constitute the essential character of the merchandise. It should be noted that the plastic is the only material which contributes to this "essential character."

F1

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

076721

In view of the foregoing, it is our position that piece A, is classifiable under the provision for expanded, foamed, or sponge rubber or plastics, and articles not specially provided for wholly or almost wholly of such rubber or plastics in item 770.80, TSUS, and dutiable at the rate of 7.3 percent ad valorem.

Regarding the importation of either A or B together or B by itself it is our opinion that they would not be almost wholly of foamed plastics. Inasmuch as their chief use appears to enable consumers to improve footwear purchased separately, these items are not considered parts of footwear, but footwear accessories. On this basis, they are classifiable under the provision for other articles not specially provided for, of rubber or plastics in item 774.55, TSUS, and dutiable at the rate of 5.7 percent ad valorem. This classification is based on the assumption that A was not made from a sheet of laminated fabric and that the cost of the plastic in A plus the cost of B is higher than the cost of the fabric lining in A.

Sincerely,

William P. Schaffner

U.S. CUSTOMS SERVICE
WASHINGTON, D.C. 20229

REFER TO

2 3 JUL 1986

CLA-2 CO:R:CV:G
076735 JLV

Jeffrey S. Beckington, Esq.
Collier, Shannon, Rill & Scott
1055 Thomas Jefferson Street, NW.
Washington, D.C. 20007

Dear Mr. Beckington:

In your letter of August 8, 1985, as supplemented by letters of September 17, October 4, October 11, and November 13, 1985, together with samples, you requested information concerning the following:

1. Whether shipments of low fuming brass brazing rod, produced in South Africa, are being transshippped through other countries and improperly documented at the time of entry as products of the country through which they are transshipped;

2. Whether low fuming brass brazing rod, classified in item 612.6205, Tariff Schedules of the United States Annotated (TSUSA), is improperly claimed and classified at entry in item 612.6290, TSUSA; and

3. Whether the low fuming brass brazing rod from South Africa is properly marked, either when resold to end-users in its condition as imported (after repackaging), or when sold after being fluxed in the United States?

With regard to the first question, it has been determined that entries of South African low fuming brass brazing rod were incorrectly reported on the entry documents as products of the country through which they were shipped (such as Saudi Arabia), but that the Customs IM 115 report showed South Africa as the port of lading. Corrective action has been taken by Customs to improve the accuracy of reporting at the time of entry.

Similarly, the tariff classification of the brazing rod has been misreported at entry with regard to statistical identification. In order to correct this at the New York

F9

Seaport, for example, all entries of copper rod (and wire) were removed from the bypass system so that they can be monitored and compared with the metallurgical criteria for low fuming brazing rod.

Finally, the question as to country of origin marking raises two separate issues. Clearly, if merely repackaged and sold to users in the United States, country of origin of the product remains South Africa (or other country in which the low fuming brazing rod was produced) and it must be marked accordingly.

As to the country of origin of the fluxed brazing rod, we are of the opinion that fluxing does not substantially transform the low fuming brazing rod into a product of the country in which it is fluxed. The fluxing does not change the essential metallurgical character of the brazing rod. Although the different fluxing materials have specific characteristics, we view the metallurgical character of the rod as the primary consideration for determining country of origin, because it is that character which is critical for the type of weld to be performed.

This response is not a ruling. It is an information letter. If you have specific information or believe that the merchandise is not properly classified by Customs, you may have specific procedural rights under Section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516).

Sincerely,

John T. Rath

Area Director of Customs
New York Seaport
6 World Trade Center
New York, New York 10048

Dear Sir:

This is in reply to your Request for Internal Advice, No. 68/85, concerning the tariff classification of certain imitation leather materials. Our ruling on the matter follows.

ISSUES:

Two issues are presented by the subject inquiry. The primary issue is the classification of the merchandise in question: Whether the method in which it is constructed is a coating process, thus causing the merchandise to be classifiable under the provision for nonwoven fabrics, whether or not coated or filled, of man-made fibers, in item 355.25, Tariff Schedules of the United States (TSUS), or if the merchandise is constructed in a laminating process, which would cause it to be classifiable under the provision for other textile fabrics not specially provided for, including laminated fabrics, in item 359.50, TSUS. The second issue presented is the effect on two Customs Headquarters rulings of a letter by the Chief, Duty Assessment Branch 7/8, U.S. Customs Service, New York Seaport, which expresses views on the classification of the subject merchandise that are contrary to the Headquarters rulings.

F11

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

FACTS:

The importer's representative describes the subject merchandise as a supported fabric composed of a nonwoven substrate which is coated with a compound plastic coating. The substrate consists of man-made fibers held together by a synthetic latex binder. One side of the substrate is coated with plastics to give the merchandise a leather-like appearance. The process of manufacture is described as follows:

> The fabric is manufactured by the "counter coat process". The preparation of the coating begins with the application of a layer of polyurethane paste to a a special siliconized paper. The polyurethane is then heated and dried in an oven. Next a layer of liquid polyvinylchloride (PVC) is applied on the top of the polyurethane, and the coating is again heated until the PVC is partially dried. A plastic adhesive is applied to the PVC. At this point the coating is semi-liquid and lacks any structure--its consistency is like gelatine. The gelatine-like plastic coating is applied to the nonwoven substrate. After being coated, the fabric is cured in an oven. It is at this point that the plastic coating dries and binds to the substrate. When the curing is complete, the paper is stripped off the fabric, and a lacquer is applied to the surface of the coating. Then the fabric is trimmed, cut, and wrapped for shipment.

On February 20, 1981, in a response to Internal Advice Request No. 18/81, file 067089, (CIE N-36/75), this office specifically ruled that the same manufacturing process as involved herein caused a fabric to be laminated to the plastic layered component.

In a letter of July 16, 1982, from the Chief, Duty Assessment Branch 7/8, U.S. Customs Service, New York Seaport,

076742

F12

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

concerning the same merchandise and process which were the subjects of Internal Advice Request 18/81, it was specifically stated that the process described in our response to Internal Advice Request 18/81 was a coating operation and not a laminating process.

On February 16, 1983, the same attorney who initiated the prior correspondence, requested for the same importer a clarification from Customs Headquarters on the tariff status of fabric combined with plastics in a counter coat process. In response to that request, Customs replied by letter of May 25, 1983, 071199, that our response to Internal Advice Request 18/81 determined that if there was an acceptable laminating process, allowance may be made under item 807.00, TSUS, for domestic exported fabric; that our views on laminations remained unchanged; and that entries made in reliance on our reply to Internal Advice Request 18/81 should be accorded treatment under item 807.00. The February 20, 1981, ruling was not modified or changed in any respect. The clear import of that response was that the counter coat process was considered "an acceptable laminating process."

LAW AND ANALYSIS:

Since the inception of the Tariff Schedules, Customs has continuously interpreted the superior heading to items 355.02-355.25, as precluding the classification of laminated fabrics in those provisions. Accordingly, nonwoven fabrics, in material lengths, which have been laminated with rubber or

F13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

plastics material have been classified under the provision for other textile fabrics not specially provided for, in items 359.10-359.60, TSUS. The importer here contends that the Customs Service is required to classify its merchandise under item 355.25 because over the past ten years it has imported merchandise under that tariff provision, creating an established and uniform practice of classification that Customs is prohibited from changing without going through the procedures required by 19 USC 1315(d) and 19 CFR 177.10(c)(1).

In this regard, we note that for an established and uniform practice based on liquidations to exist, it must be applicable to virtually all of the same or essentially similar merchandise imported into this country, not just the merchandise imported by a particular importer. The importer here has failed to present any convincing evidence of the existence of such a practice, or that no other importer imports identical or similar merchandise into this country, thus establishing a practice based on its own liquidations. In addition, such a practice is not deemed to exist because, as recognized by the importer, the subject merchandise was, by court decision, classified in Schedule 7, TSUS, until 1984 when Congress deleted Headnote 1(vii) from Subpart 4C, Schedule 3, TSUS, and enacted Headnote 5(b), Schedule 3, TSUS. The action by Congress effectively negated the holdings of prior court decisions and caused the classification of the

F14

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

subject merchandise to be changed from Schedule 7 to Schedule 3. The claim of a practice must, therefore, be predicated on published rulings, or liquidations, occurring after the effective date of Congress' action.

The importer cites various lexicon definitions, the Brussels Tariff Nomenclature, and legislative history pertaining to coated or filled fabrics to show that the instant merchandise should be classified in item 355.25. In addition, it cites the case of C. J. Tower & Sons of Buffalo, Inc. v. United States, 62 Cust. Ct. 643, C.D. 3840 (1969), to support its position that the plastic layer on its merchandise is not a lamination.

In view of our determination that the fabric has been laminated with rubber or plastics material, the citations to authorities concerning the classification of coated or filled fabrics is not pertinent. Further, we do not agree that C. J. Tower supports the importer's position. In C. J. Tower, a liquid plastic sheet was extruded directly onto another plastics sheet. We do not interpret the language of the court in the same manner as the importer. There, the court stated that "lamination" means bringing together two plastic sheets into a permanent union so that the final product will be an integral article. The court also stated that "laminated" means that an article is composed of layers of firmly united materials. The court went on to say, "It is clear, then, that the words 'adhesive' and 'laminate' can hardly find proper

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

usage in association with articles which are not solids to begin with." Apparently, the importer interprets this latter language as meaning that a lamination can only occur between solids. However, such an interpretation is dispelled in the next paragraph of the court's opinion.

> It is true, of course, that in the initial stage of the process at bar the polyester is a solid and the polyethylene is a liquid. Nevertheless, the process described . . . is a controlled operation which anticipates the transformation of the liquid into a solid before completion of the process, and provides in advance for the adhesion of two solids together in the final product. (at pg 647-8).

In this instance, as described by the importer, the plastic portion of the merchandise, just prior to its combination with the nonwoven fabric, has an identity as an existing layer or sheet. As such, it has an existence as a separate layer that is capable of joinder to a second layer by means of an adhesive. This situation is very similar to that before the court in C. J. Tower and there it was held that the process was an assembly and did not result in a coating. Accordingly, the subject merchandise consists of a nonwoven fabric which has been laminated with rubber or plastics material and is properly classifiable in item 359.50, TSUS.

The second issue to be decided is the effect of the New York letter of February 16, 1982, on the two Customs Headquarters rulings. Section 177.0, Customs Regulations (19 CFR 177.0) gives authority to make rulings to the Headquarters

076742

62

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Office of the United States Customs Service and to the Regional Commissioner of Customs, New York Region. The Regional Commissioner, New York, has delegated this authority to the Area Director of Customs, New York Seaport, but not to the Chief, Duty Assessment Branch 7/8. Accordingly, the letter of July 16, 1982 could not constitute a binding ruling upon which the recipient could rely.

Furthermore, we note that all three of the concerned Customs' letters, two from this headquarters and one from our New York office, as well as the instant inquiry, involved the same attorney acting on behalf of the same importer. Therefore, the importer was clearly on notice by virtue of two Customs Headquarters' rulings, one of which postdated the New York letter, that the New York letter should not be relied upon.

HOLDING:

The subject merchandise is made by a laminating process and is classifiable in item 359.50, TSUS. A copy of this ruling should be furnished to the importer's representative.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 20024000279

The above-captioned protest and application for further review were filed against the tariff classification of blood tubing lines for hemodialysis machines in several entries filed in 1984. This merchandise is a product of Japan. Our decision follows:

ISSUE:

The merchandise was entered under the provision for parts of electro-medical instruments and apparatus in item 709.17, Tariff Schedules of the United States (TSUS). The column 1 rate of duty required under that provision in 1984 was 4.9 percent ad valorem. However, this rate was advanced to 11.7 percent ad valorem, the 1984 column 1 rate for other nonelectric medical articles in item 709.27, TSUS. An alternative claim is also made that the merchandise is classifiable under the provision for rubber or plastic tubing with or without fittings in item 772.65, TSUS. The 1984 column 1 rate of duty under that provision was 3.4 percent ad valorem. The main issues thereby raised are whether the merchandise constitutes parts of hemodialysis machines and, if not, whether an established and uniform practice exists in the importer's favor.

G4

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

FACTS:

The merchandise consists of sets in various configurations of arterial and venous blood lines for use with hemodialysis machines to transport blood to and from the patient. The clear plastic tubes contain clamps, valves, drip chambers and other fittings which when compared to those on competing merchandise appear to be of a universal type. The merchandise is sold in bags pursuant to prescription. Nothing on the sample bag we have been provided shows a part number or indicates in any way that the merchandise is for the exclusive use with any specific make or model of hemodialysis machine.

LAW AND ANALYSIS:

Classification of the merchandise at issue under item 707.27 was in accordance with our decision of September 20, 1983, file No. 071150. While the protestant now faults that decision for various reasons, it was essentially our position at that time that hemodialysis tubing lines most closely resembled the merchandise which was the subject of Travenol Laboratories, Inc. v. United States, 67 CCPA 71, C.A.D. 1247 (1980), and that a different dutiable status was not warranted. The Travenol merchandise consisted of tubing products for intravenous use which, although not as complex as dialysis tubing lines, had analogous clamps, fittings, drip chambers, etc., and were sold in the same type of packaging.

However, while this protest has been pending another court decision has been issued dealing more directly with the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

GS

076777

dutiable status of dialysis supplies, viz., Terumo Corp. v. United States, Slip Op. 86-19 (Ct. Int'l Trade, decided February 21, 1986). Exhibits submitted in connection with the instant matter show that the Terumo merchandise consisted of filters which, similar to the tubing components for the overall dialysis system, are disposable, attached as an external nonreusable component to the dialysis pumping machine, provided with universal fittings, and sold in the same circumstances as the tubing for use in no single make of dialyzer.

Accordingly, we find at this time that the Terumo decision is more in point as a precedent for the classification of the instant tubing products than the Travenol decision.

HOLDING:

For the foregoing reasons it is now our position that our tariff classification of September 20, 1983, supra, has been superseded by the principle of Terumo Corp. v. United States, supra, and will no longer be followed. Accordingly, it is unnecessary for us to review and discuss the practice and other alternative claims made in this matter and the extensive precedent cited in support of them. Therefore, you are

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

076977

instructed to deny the protest except to the extent reclassification of the merchandise under item 709.17 results in a partial allowance. A copy of this decision should be attached to the Form 19 Notice of Action to be sent to the protestant.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

SUBJECT: Request for Internal Advice No. 78/85 Concerning the Tariff Classification of Atomic Absorption Spectrophotometers and Other Types of Spectrophotometers

076823

This internal advice request was initiated by the importer's letter of August 5, 1985. Since that time counsel has participated in this matter. The merchandise is a product of Australia. Our decision follows:

ISSUES:

The importer contends that its products are classifiable as nonoptical electrical measuring, checking, analyzing, or automatically-controlling instruments and apparatus in item 712.49, Tariff Schedules of the United States (TSUS). The column 1 rate of duty under that provision in 1984 was 6.8 percent ad valorem. The importer, therefore, objects to the proposed advancement to the applicable rates for optical instruments and apparatus in item 712.05, TSUS, covered by the same superior heading. For example, the 1984 column 1 rate under that provision was 15.6 percent ad valorem.

The major subordinate issues upon which this tariff classification competition must be resolved are whether the types of spectrophotometers involved qualify as optical instruments under the definition in Headnote 3, Part 2, Schedule 7, TSUS, and if so, whether there exists in the importer's favor an established and uniform practice.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

68

FACTS:

Technical information which has been submitted shows that atomic absorption spectrophotometers use a light source which emits light only of a wave length characteristic of the metal or material for which an analysis is being made. The light after passing through the chamber where the sample has been atomized is directed to a photoelectric detector. The amount of material for which the sample is being tested is proportional to light absorption. Other types of spectrophotometers employing infrared, visible or ultraviolet light may be used as more versatile means for testing more than one material. Apparatus of the latter type does not use atomization chambers, and the monochromator is positioned differently in relation to the light source and sample. Mirrors as well as monochromators are common to most types of spectrophotometers, and results may involve data in both digital and graph form.

LAW AND ANALYSIS:

Apparatus which combines optical and electronic features typically incorporates photoelectric detectors. Previous classifications of this type of merchandise under item 712.49 have mainly been based on failure to meet the criteria for an optical goods classification in Engis Equipment Company v. United States, 62 Cust. Ct. 29, C.D. 3670 (1969). Of those criteria the most important was the first which required that the optical feature be primary or dominant in relation to the electronic feature in order for apparatus to be regarded as an optical instrument. Since the optics could seldom be regarded as more than co-equal in relation to electronic and other features, classifications of photoelectric apparatus as optical goods were infrequent.

076823

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G9

However, in Norman G. Jensen, Inc. v. United States, 77 Cust. Ct. 9, C.D. 4668 (1976), it was held that the primary-or-dominant criterion was no longer applicable under the definition for "optical instruments" in Headnote 3, Part 2, Schedule 7, and that the test was now whether the optics were subsidiary or not subsidiary in relation to other features. Therefore, for merchandise in which the optics were more than subsidiary emphasis shifted to the question of whether or not the fourth Engis criterion was met. Under that criterion, merchandise must aid human vision or produce a picture or image of an object in order to qualify for an optical instruments classification.

Based on certain dicta in United States v. Ataka America, Inc., 64 CCPA 60, C.A.D. 1184 (1977), it was our conclusion that compliance with the cited headnote definition plus the remaining three viable Engis criteria would no longer be required, and these applicable criteria would be regarded in the disjunctive rather than in the conjunctive. Accordingly, we took the position that absence of the direct enhancement of vision or the production of a picture or image by itself was not sufficient for avoiding an optical goods classification. It was our further view that even if this were not the case, the fourth Engis criterion could be satisfied anyhow indirectly by, as in the case of spectrophotometers, substituting electronic methods for previously used optical eyepiece observations or by the production of a graph or other computer generated pictorial information. This point of view was initially incorporated in our decision of July 9, 1982, IA 124/81, file No. 067495, from which several classifications of photoelectric apparatus under item 712.05 ensued, including our classification of spectrophotometers in our PRD of May 24, 1984, file No. 074233.

076823

G10

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

While this reconsideration of that position has been pending, the court has had occasion to consider the dutiable status of photoelectric apparatus in EAC Engineering Division of East Asiatic Company v. United States, Slip Op. 85-111 (Ct. Int'l Trade, decided October 24, 1985). In that matter, the court regarded the fourth Engis criterion as indispensible for an optical instruments classification, and gave no consideration to the possibility of meeting that criterion indirectly. The latest order in that litigation, Slip Op. 86-32, has become final without an appeal by the Government.

HOLDING:

For the foregoing reasons, we find that our classifications of spectrophotometers as optical instruments under item 712.05, TSUS, are no longer sustainable and, therefore, no longer reflect the current views of the Customs Service. This finding makes it unnecessary for us to review the further claim made in this matter concerning the possible existence of an established and uniform practice. Accordingly, spectrophotometers are classifiable under the provision for nonoptical electrical measuring, checking, analyzing or automatically-controlling instruments and apparatus in item 712.49, TSUS. A copy of this decision should be furnished to the internal advice applicant.

Paul E. Linet, Esq.
Sandler & Travis, P.A.
444 Brickell Avenue
Miami, Florida 33131

Re: Tariff Classification of Modified Asphalt Roofing Membrane

Dear Mr. Linet:

This is in response to your ruling request dated August 23, 1985, supplemented by your letter of September 23, 1985, on behalf of your client Bitupol, Inc., concerning the tariff classification of a modified asphalt roofing membrane.

The subject product is a mixture of styrene butadiene styrene (known as SBS, a synthetic thermoplastic rubber), asphalt, oil and polyethylene, with a crenette fabric polyester carrier that is supported by a nonwoven fiberglass mat. The product is imported in rolls weighing approximately 125 pounds each. In your description, you state that the fabric is woven; however, further scrutiny reveals that this is not the case. Rather, the fabric is comprised of yarns of polyester filaments which are held together by a plastic binding. The warp and filler yarns cross at right angles and are fused at each intersection. The crenette fabric comprises approximately 4 pounds of each roll.

In your view, the merchandise is classifiable as textile fabrics, including laminated fabrics, not specially provided for: other, under the provisions of item 359.60, Tariff Schedules of the United States (TSUS), dutiable at the rate of 4.3 percent ad valorem.

You initially state that the subject product is classifiable under Part 4, Subpart C, Schedule 3. We concur. Headnote 5(b), Schedule 3, provides, " Any fabric described in part 4C of this schedule shall be classified under part 4C whether or not also described elsewhere in the schedules." Customs has held crenette fabric to be classifiable as textile fabrics, including laminated fabrics, not specially provided for: of man-made fibers, under

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

A3

the provisions of item 359.50, TSUS, based on component material of chief value of the textile. See Customs Ruling Letter dated January 24, 1973 (Control No. 020501), Customs Ruling Letter dated July 19, 1977 (Control No. 039981), and Customs Ruling Letter dated August 1, 1978 (Control No. 059492). Inasmuch as the crenette textile fabric has been held as being described in Part 4C of Schedule 3, classification of the instant product elsewhere in the tariff schedules is precluded.

Headnote 2(c), Part 4C, Schedule 3, TSUS, prohibits classification under items 355.65-355.85 of woven or knit fabrics that are coated, filled or laminated with sheet rubber or plastics and weigh in excess of 44 ounces per square yard. The subject asphalt roofing membrane weighs approximately 80 ounces per square yard. As such, you assert that the product is barred from classification under the noted item numbers. We concur that classification of the subject product under the noted provisions is improper; however, we base our objection on the fact that items 355.65-355.85 cover woven or knit fabrics. By definition, crenette is neither woven nor knit and cannot be so classified.

You rely extensively on the Court of International Trade decision in Uniroyal, Inc. v. United States, Slip Op. 85-94 (Ct. Int'l. Trade decided September 13, 1985), as support for the suggested classification of item 359.60, TSUS. In Uniroyal, Inc. v. United States, supra, the Court held that certain rubber coated hoses which were reinforced with a fabric wrapping were properly classifiable under Schedule 7, TSUS. Customs advanced the position that Headnote 4(b), Schedule 3, TSUS, precluded consideration of the coating when determining whether the merchandise was in chief value of fiber or rubber. The pertinent Headnote reads:

> In determining the component fibers of chief value in coated or filled, or laminated, fabrics and articles wholly or in part thereof, the coating or filling, or the nontextile laminating substances, shall be disregarded in the absence of context to the contrary.

In further support of its position, Customs relied on language in C. Itoh & Co. America v. United States, 1 CIT 223, 520 F.Supp. 273, aff'd 69 CCPA 147, 678 F.2d 218 (1982). The C. Itoh Court noted that "in determining whether a textile fabric is of a particular type of fabric, or in chief value of a particular fiber ... the nontextile laminating substances are to be disregarded in the absence of context to the contrary". C. Itoh, supra, 1 CIT at p. 230, 520 F.Supp. at 278.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A4

076874

Consistent with C. Itoh, the Customs Service has continuously, from the inception of the tariff schedules, interpreted and applied Headnote 4(b) as meaning that in the case of almost all coated, filled, or laminated textile fabrics, the coating or filling or the nontextile laminating material is not considered in determining the proper classification of the fabric or article from which the fabric is made. See Customs Ruling Letter of May 1, 1981 (Control No. 061982).

The Uniroyal court rejected Customs position and distinguished the reasoning in C. Itoh. Citing Marshall Co. v. United States, 67 Cust. Ct. 316, CD 4291 (1971), and Briarcliff Clothes Ltd. v. United States, 66 Cust. Ct. 228, CD 4194 (1971), the Court stated that the pertinent Headnote referred only to the situation in which a choice must be made between several fibers. The headnote does not indicate that coating, filling or laminating substances should be disregarded for other purposes. You assert that this language supports the proposition that the classification of the subject roofing material must be based on the component material in chief value. The SBS cannot be disregarded when determining component material in chief value. Inasmuch as the SBS comprises 42 percent of its value, the material must be classified as textile fabrics, other, under item 359.60, TSUS.

We do not agree. Uniroyal involved competing Schedule 3 and Schedule 7 classifications of textile-reinforced rubber hose. The Uniroyal decision did not overrule C. Itoh, which ultimately involved competing classifications within Schedule 3. The Court distinguished C. Itoh by noting that the Headnote 4(b) interpretation espoused in that case was used only with reference to alternative classifications within Schedule 3. That is the precise situation that is currently under consideration. We are of the view that the interpretation of Headnote 4(b) set forth in Uniroyal should be limited to situations where competing classifications involve Schedule 3 and another schedule. We find C. Itoh to be controlling in this case. The nontextile laminating substance, i.e. the SBS, is to be disregarded in determining the component material of chief value.

The case of Semperit of America, Inc. v. United States, Court No. 79-6-01201 (17 Cust. Bull. No. 30, at p. 27), is cited as confirming classification of the subject roofing membrane under item 359.60, TSUS. In Semperit, the merchandise at issue was a woven laminated fabric with a rubber sheeting, weighing

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

AS

over 44 ounces per square yard and in chief value of rubber. Headnote 2(c) of Subpart 4C precluded classification of this woven material under items 355.65-355.85, TSUS. The subject material is not woven. As a crenette fabric, it is precluded from classification in items 355.65-355.85, TSUS. The headnote which controlled classification is inapplicable here.

You cite Customs Ruling Letter dated May 1, 1981, supra, as supporting the 359.60 classification. That case involved classification of a roofing material known as Rhenofol CV, a material comprised of a woven scrim of man-made fibers completely covered on both sides by nontransparent polyvinyl chloride plastic applied by a laminating process. The merchandise weighed over 44 ounces per square yard, thereby precluding classification under items 355.65-355.85, TSUS. As in Semperit, supra, the core material was a woven fabric covered with a plastic laminate. Headnote 2(c) of Subpart 4C precluded classification of this woven material under items 355.65-355.85, TSUS. The subject merchandise, because it includes a crenette fabric, is not subject to Headnote 2(c), Subpart 4C, and is therefore distinguishable from Rhenofol CV.

Numerous administrative rulings have held roofing materials which include a textile layer of nonwoven man-made fibers to be classifiable under item 359.50, TSUS. See the following cases: Customs Ruling Letter dated December 1, 1983 (Control No. 072123), involving a product comprised of layers of asphalt, sandstone, a fiberglass nonwoven fabric laminated to a nonwoven polyester fabric, and a film of olefin plastic material; Customs Ruling Letter dated December 8, 1983 (Control No. 072018) involving a product comprised of slate granules, polymeric bitumen, polyester felt, unfillerized bitumen and polyethylene film; and Customs Ruling Letter dated August 20, 1985 (Control No. 076414), involving a product called Derbigum which included modified bitumen and a core of nonwoven polyester textile fabric laminated to a specially constructed (not woven) grid fabric of man-made glass fiber yarns. It is Customs view that the subject merchandise is also classifiable under item 359.50, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A6

076414

In light of C. Itoh and the subsequent administrative decisions on like products comprised of a nonwoven fabric, the subject asphalt roofing membrane is properly classifiable as textile fabrics, including laminated fabrics, not specially provided for: of man-made fibers, under the provisions of item 359.50, TSUS, dutiable at the 1986 compound duty rate of 7¢ per pound plus 20 percent ad valorem. Products which are so classifiable also may be subject to quota restrictions pursuant to textile category 627.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

SUBJECT: Internal Advice Request No. 76/85 Concerning the Classification of Certain Unfinished Footwear

This request for information was initiated by a letter from John B. Pellegrini, Esquire, of Baskin and Steingut, P.C., representing the importer, the Outdoor Footwear Company, a wholly owned subsidary of Timberland.

FACTS:

The merchandise at issue is men's leather moccasin-type boat shoe uppers (i.e., unfinished footwear) which will be completed in the United States by the addition of an insole, a midsole and an outsole. Three samples were submitted along with the inquiry. Exhibit A is the upper in its condition as imported. Exhibit B is the upper with a midsole attached. Exhibit C is the completed shoe, with the outsole attached and a sock lining (i.e., insole) inserted. The insole, midsole and outsole are added in Puerto Rico after importation into the Customs territory of the United States.

The instant merchandise, Exhibit A, consists of a moccasin-type leather upper manufactured in the Dominican Republic. The upper consists of a piece of leather which is folded up to create an elongated U-shape closed at one

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

AS

end. A plug, which covers the front of the foot, is hand sewn to the open end of the U-shape. A collar/eyelet stay component is sewn to the closed end of the U-shape. A slit is cut in the center of the upper's bottom. The slit, which is sewn loosely, runs through about 40 percent of the bottom's length. The instant leather upper is completely formed and sewn, and it has a bottom. Except for the insole, the midsole, and the outsole, the sample is a complete shoe. (At this point, we note that the bottom of the instant sample is the equivalent of an insole or a midsole inasmuch as it covers the bottom of the foot entirely. Therefore even though both a midsole and an insole are added after importation, the instant upper already has the equivalent of an insole or a midsole.)

For the record, we note that the sample upper is virtually identical to that covered by Customs Headquarter Ruling Letter (HRL) 068874 of September 8, 1982 (Internal Advice 71/81) and its reconsideration, HRL 072978 of August 23, 1983. HRL 072978 reversed HRL 068874 and made the new tariff classification of "unfinished footwear" effective 90 days from the date of the ruling for that specific merchandise. We further note that the only merchandise at issue here is that imported prior to October 1984.

The inquirer claims that this unfinished footwear is classifiable under the tariff provision for leather cut or wholly or partly manufactured into forms or shapes suitable for conversion into footwear, other, uppers, in item 791.27, Tariff Schedules of the United States (TSUS).

The inquirer also asks that no country of origin marking be required, claiming that the merchandise undergoes a substantial transformation in the United States and that his client is therefore the ultimate purchaser. The country of origin marking issue will be subject of a separate ruling letter issued by the Entry, Licensing and Restricted Merchandise Branch.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A9

076846

It is the import specialist's position that the unfinished footwear at issue is classified under the provision for footwear of leather (except footwear with uppers of fibers), other, for men, youths and boys, in item 700.35, TSUS, in accordance with General Interpretative Headnote 10(h), TSUS.

ISSUE:

Is the imported upper classifiable as unfinished footwear in item 700.35, TSUS? Or is it classifiable as leather manufactured into forms or shapes suitable for conversion into footwear in item 791.27, TSUS?

LAW AND ANALYSIS:

The inquirer makes the following claims in support of his assertion that the unfinished footwear should be classified in item 791.27, TSUS:

(1) The imported uppers are specifically described by item 791.27, TSUS.

(2) General Interpretative Rule 10(h), TSUS (hereafter called Rule 10(h)), provides for the classification of unfinished articles as complete articles "unless the context requires otherwise." Since there is a specific provision for leather uppers, the context requires otherwise, so Rule 10(h) does not apply. He cites United States v. J. Gerber et al., 58 CCPA 110, C.A.D. 1013 (1971) and Corporacion Sublistacion, S.A. v. United States, 1 CIT 120 (1981) in support of the latter argument.

(3) The imported uppers are within the common and commercial meanings of the term "upper." He cites Webster's Seventh New Collegiate Dictionary and an American Footwear Industries Association brochure entitled "The Art and Science of Footwear Manufacturing" in support of this assertion.

(4) The term "upper" is an eo nomine designation not limited in any way. As such, it encompasses all forms of the article.

(5) Assuming arguendo that Rule 10(h) is used to classify the imported merchandise as unfinished footwear, the instant merchandise is not substantially complete footwear, therefore it cannot be classified as unfinished footwear. He argues that in Rule 10(h) cases, the courts have placed emphasis upon the fact that the imported article was made into the finished product with minimal effort, therefore articles subject to substantial processing in the United States may not be classified as unfinished. He cites various cases in support of these contentions, especially Daisy-Maddon, Div. of Victor Comptometer v. United States, 81 Cust. Ct. 55, C.D. 4765 (1978), aff'd 68 CCPA 97, C.A.D. 1228 (1979).

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A10

076846

(6) The imported articles are not lasted uppers. The inquirer attempts to distinguish Treasury Decision 79-100 (T.D. 79-100), 13 Customs Bulletin 247, and Customs Headquarters Ruling Letter (HRL) 072978 of August 23, 1983, which held that leather uppers were classifiable as unfinished footwear.

(7) Even if Customs decides that the instant merchandise is classified as unfinished footwear, the uppers imported on or before November 23, 1983, should be liquidated in item 791.27, TSUS, as entered. He claims that this is necessary because HRL 072978 did not become effective for the specific unfinished footwear in that case until 90 days after the date of the ruling. He claims that there was a uniform and established practice under T.D. 79-100 and that to change the alleged practice other than prospectively would be illegal.

In response to the inquirer's first four claims, he is comparing tariff provisions which are subordinate to different superior headings. General Interpretative Rule 10(c)(ii), TSUS, (hereafter called Rule 10(c)(ii)), reads as follows:

> (c) an imported article which is described in two or more provisions of the schedules is classifiable in the provision which most specifically describes it; but, in applying this rule of interpretation, the following considerations shall govern:
>
> * * * * * * * * * *
>
> (ii) comparisons are to be made only between provisions of coordinate or equal status, i.e., between the primary or main superior headings of the schedules or between coordinate inferior headings which are subordinate to the same superior heading.

See Arthur J. Humphries, Packard-Bell Electronics v. United States, 59 Cust. Ct. 231, C.D. 3128 (1967), which commented on Rule 10(c)(ii), "We interpret the cited language to mean that under TSUS the rule of relative specificity does not apply between provisions of inferior headings under different superior headings...."

The inquirer is attempting to compare item 700.35, TSUS, and item 791.27, TSUS, which are inferior headings under different superior headings, but he is barred from doing so under Rule 10(c)(ii). Instead, Rule 10(c)(ii) mandates a comparison between the superior heading for item

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

All

791.27, TSUS, and that for item 700.35, TSUS — i.e., between "footwear, of leather (except footwear with uppers of fibers)" for item 700.35, TSUS, and "leather cut or wholly or partly manufactured into forms or shapes suitable for conversion into footwear" for item 791.27, TSUS.

The footwear upper at issue, Exhibit A, is obviously too far advanced to be classified as a leather shape or form. The instant leather upper is completely formed and sewn, and it has a bottom. Indeed, except for the insole, the midsole, and the outsole, the sample is a complete shoe. To recapitulate what has been done to manufacture the leather into an upper, the leather has been folded up to create a U-shape. A plug has been hand sewn to the open end of the U-shape. A collar/eyelet stay component has been sewn to the closed end of the U-shape.

Indeed, although the import specialist only claims that the leather upper is unfinished footwear, the leather upper looks like a complete moccasin and is capable of being worn as a moccasin-type slipper just as it is. We note that the "Art and Science of Footwear Manufacturing" brochure submitted by the inquirer has an illustration, on page 25, of a "true moccasin" which is virtually identical to the sample before us. The "Art and Science" brochure states that "The true moccasin construction is a single piece of leather encompassing the bottom and sides of the foot and second piece, called the plug, covering the top of the foot." This description aptly summarizes the sample before us.

General Interpretative Rule 10(c), TSUS, states that an imported article which is described in two or more provisions of the schedules is classifiable in the provision which most specifically describes it. The instant sample is more specifically described as unfinished leather footwear than as leather shapes or forms suitable for conversion into footwear.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

A12

076846

Uniroyal, Inc. v. United States, 3 CIT 220, (1982), aff'd 1 CAFC 21 (1983), dealt with similar merchandise — i.e., a leather footwear upper which was a complete shoe except for an outsole and which had been lasted so that it had attained its ultimate shape, form and size. Uniroyal found that the upper was "the very essence of the completed shoe" and that the upper was already "a substantially complete shoe" at the time of importation.

Customs Headquarters Ruling Letter (HRL) 072978 of August 23, 1983, classified virtually identical leather uppers as unfinished footwear, so that the Customs Service has already ruled on merchandise which is the twin of that at issue here. (The samples from HRL 072978 are almost identical to Exhibit A, the sample of the instant merchandise.) We find that the instant leather upper, which is completely formed and sewn and which has a bottom, is unfinished footwear.

Having found that the instant leather upper is unfinished footwear, we proceed to the inquirer's fifth claim, which is that, under Daisy-Reddon, supra, the upper is not substantially complete footwear, therefore it cannot be classified as unfinished footwear. It is unnecessary to go into the Daisy-Reddon tests, however, because the issue of whether a leather upper constitutes unfinished footwear has already been litigated. In Uniroyal, supra, another leather upper was held by both the Court of International Trade and the Court of Appeals for the Federal Circuit to be classified as unfinished footwear because the upper was a "substantially complete shoe" at the time of importation. This issue has already been litigated in Uniroyal, and the inquirer's position did not prevail.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Next, the inquirer claims that the imported uppers are not lasted uppers, citing T.D. 79-100 and HRL 072978. T.D. 79-100 dealt with leather footwear uppers which had been lasted (i.e., in that instance, which had an insole or a midsole and which had been formed to fit the foot). As stated in HRL 072978, which elaborated upon what constitutes lasting, "That ruling [T.D. 79-100] did not purport to set forth an all-inclusive definition of the term 'lasted.'" HRL 072978 went on to discuss leather uppers virtually identical to the leather upper at issue here. It concluded that the leather uppers were "sufficiently processed...to constitute 'lasted leather uppers' as that term is used in T.D. 79-100." Inasmuch as HRL 072978 considered virtually identical leather uppers and found them to be lasted, we find that this issue has also been decided previously. We follow HRL 072978 and find that the instant leather upper is lasted, too.

Finally, the inquirer claims that the uppers liquidated on or before November 23, 1983, should be liquidated in item 791.27, TSUS, as entered even if the instant merchandise is unfinished footwear. In answering this claim, we note that the only reason HRL 072978 did not become effective immediately on August 23, 1983 (the date when HRL 072978 was issued), was because it was a revocation of a previous letter to the same party (HRL 068874 of September 8, 1982). Inasmuch as there had been a previous letter (i.e., HRL 068874) upon which that inquirer had relied, a grace period of 90 days was given for the change set forth in HRL 072978.

The instant inquirer, however, was not the party involved in either HRL 068874 or HRL 072978, therefore he had no right to rely upon HRL 068874 nor to expect a 90 day grace period following HRL 072978. (We note that the instant inquirer had not even requested a ruling letter regarding his client's transaction.) It is clearly stated in 19 CFR 177.9(c) that:

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A14

076874

> A ruling letter is subject to modification or revocation without notice to any person, except the person to whom the letter was addressed. Accordingly, no other person should rely on the ruling letter or assume that the principles of that ruling will be applied in connection with any transaction other than the one described in the letter.

Following the clear mandate of 19 CFR 177.9(c), the inquirer had no right to rely upon HRL 068874, therefore he is not entitled to a 90 day grace period following the August 23, 1983, issuance of HRL 072978.

The inquirer further claims, however, that there was a uniform and established practice established by T.D. 79-100 and that to change the alleged practice other than prospectively would be illegal. T.D. 79-100 dealt with leather footwear uppers which had been formed to fit the foot and which had an insole or a midsole. The instant merchandise has been formed to fit the foot, but it does not have an insole nor a midsole. As we noted above, however, the instant upper has the equivalent of a midsole or an insole in that it covers the bottom of foot entirely. The instant upper is substantially similar to that covered by T.D. 79-100, therefore it is both lasted and unfinished footwear. (As we noted in HRL 072978, T.D. 79-100 "did not purport to set forth on all-inclusive definition of the term 'lasted.'") We would agree with the inquirer that a uniform and established practice was established in T.D. 79-100 and in HRL 072978 to call this type of leather upper "unfinished footwear." Inasmuch as we are following rather than changing the practice, however, there is no need for any prospective application.

Finally, having decided that the instant leather upper constitutes unfinished footwear classified in item 700.35, TSUS, the law allows us no discretion to allow the liquidation of entries dated prior to November 23, 1983, under item 791.27, TSUS, which is the incorrect tariff classification.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B1

076846

Indeed, to allow the liquidation of the entries under item 791.27, TSUS, would exceed the power granted to this office by the law. See National Corn Growers Association et al. v. United States, Slip Op. 86-55 (decided May 23, 1986).

Based on all the foregoing, we find that the instant leather upper, which is completely formed and sewn and which has a bottom, is unfinished footwear. It is classified in item 700.35, TSUS. No 90 day grace period for HRL 072978 will be allowed.

HOLDING:

The instant leather upper constitutes unfinished footwear. It is classified in item 700.35, TSUS. No 90 day grace period for HRL 072978 will be allowed. You should inform the inquirer of this ruling.

Sincerely,

William P. Muffler

2 JUL 1986

Mr. Mark N. Itoh
James J. Boyle & Company
311 South Spring Street
Los Angeles, California 90013

Dear Mr. Itoh:

In your letter of July 2, 1985, you requested a ruling on the tariff classification of an article described as "seamless carbon steel pipe with well screen welded."

The article consists of (1) a base pipe which has been drilled or otherwise perforated with holes, (2) multiple support rods which run the length of the section to be screened, and (3) a V-shaped wire which has been wound around the support rods on the base pipe. All of the components are welded together to form a section of pipe covered with a screen.

These pipe-base screens are said to provide an improvement over slip-on screen jackets because they have a higher tensile strength and resist separation when pulled out for service or replacement. Well screens are essential filtration equipment used in production wells. Well screens may differ in construction and design, but the purpose is the same: separate sand and other soil materials from the fluids which flow into a pipe for extraction.

The pipe-base well screen is not merely a pipe or tube covered with steel wire for reinforcement, protection, or similar purpose. The wire and support rods, when welded to the pipe base, form a specialized filtering and fluid collection device. Therefore, the article is more than a pipe covered with wire and is not described or classifiable under the provisions for pipes and tubes in Part 2 of Schedule 6.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B3

The pipe-base well screens are filtering devices and, as noted in our letter to your company on March 18, 1985 (file 074698), are classifiable as other filtering apparatus for liquids or gases, in item 661.95, TSUS.

Sincerely,

Arthur P. Schaffner

JUN 27 1985

CLA-2:CO:R:CV:GV
076896 JLV

District Director of Customs
200 East Bay Street
Charleston, South Carolina 29402

Re: Decision on Protest and Application for Further Review of Protest Nos. 1601-5-000044 and 1601-5-000045, dated June 13, 1984

Dear Sir:

The above protests and applications for further review were timely filed against your action in classifying certain self-propelled sprayers under the provision for motor vehicles specially constructed and equipped to perform special services or functions, in item 692.16, Tariff Schedules of the United States (TSUS).

The merchandise was entered at Charleston on Entry No. 84-108656, dated March 9, 1984, liquidated April 5, 1985, and on Entry No. 84-109327, dated April 10, 1984, and liquidated on May 24, 1985. This ruling is our decision on the classification issue.

FACTS:

The merchandise is a self-propelled sprayer suitable for agricultural use. It is imported from Italy and is designated by the manufacturer as the Nuovo Semovente, SE.4x.150.2000/42" VV Fan, with a VM 1056 diesel engine. It has a storage tank which holds 525 U.S. gallons, a 36.9 GPM pump, a 42" VV fan, an 8-speed transmission, and 4-wheel drive. The 42" VV fan has a special sprayer head for use in spraying orchards. The 8-speed transmission has 8 forward and 8 reverse speeds. Other spray heads and special accessories or options are also available.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

35

The protestant claims that the sprayers are provided for as sprayers suitable for agricultural and horticultural use, in item 662.45, TSUS.

ISSUE:

Is the self-propelled sprayer more specifically described under the provision for mechanical appliances for projecting, dispersing, or spraying liquids: sprayers suitable for agricultural or horticultural use, in item 662.45, TSUS, rather that under the provision for other motor vehicles specially constructed and equipped to perform special services or functions, in item 692.16, TSUS?

LAW AND ANALYSIS:

In a decision dated February 23, 1978 (file 054040), we held that the model 2112 4 RM/DS self-propelled sprayer, known generally as the "Semovente," was classified in item 692.16, TSUS. The model in issue is substantially the same sprayer.

The protestant does not address any evidence that the self-propelled sprayer is not a motor vehicle described in item 692.16, TSUS. In Headnote 1(v), Part 4, Schedule 6, it is stated:

> **Part 4 headnote:**
>
> 1. This part does not cover ...
>
> (v) articles and parts of articles specially provided for elsewhere in the schedules.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B6

076896

In view of this headnote, which controls item 662.45, and in view of our ruling of February 23, 1978, the self-propelled sprayer is more specifically described in item 692.16, TSUS.

HOLDING:

The self-propelled sprayer is classifiable in item 692.16, TSUS. You should deny the protest in full. A copy of this decision should be given to the protestant at the time notice of your action is given on Customs Form 19.

Sincerely,

Arthur P. Schaffner

for Harvey B. Fox
Director, Classification
and Value Division

Mr. P. J. Dixon
Office of the Minister (Commercial)
Embassy of Australia
1601 Massachusetts Ave., N.W.
Washington, D.C. 20036-2273

Dear Mr. Dixon:

In your letter of September 17, 1985, reference 306/1/45, on behalf of Siddons Pty. Ltd., Victoria, Australia, you inquire as to the tariff classification of various dozer, scraper, and grader blades and edges, and single and double bevel flat steel sections. Descriptive materials were submitted on these products, each designated numerically.

Heat treated steel blades (1.1), in either single or double bevel curved or double bevel flat sections, are available in 3 to 12 ft. lengths, in thicknesses of 1/2, 5/8, 3/4 and 1 inch, and with holes punched at 6 or 12 inch pitch. They are advertised as ground engaging tools for motor graders. These blades are classifiable under the provision for other excavating, levelling, boring, and extracting machinery, and parts thereof, in item 664.08, Tariff Schedules of the United States (TSUS), dutiable at the rate of 2.8 percent ad valorem. Grader end bits (1.2), bolted to the ends of the grader blades to protect them from wear and damage, are likewise classifiable in item 664.08, TSUS.

Bulldozer cutting edges or ground engaging tools (2.1), are finished carbon steel blades for wheeled and nonwheeled tractors. Available in lengths of from 1 to 12 ft. they come in straight, universal, or angle blade configurations depending on the volume of material to be moved and distance covered. Those blades up to 6 ft. long have been determined by Customs to belong to a class or kind of blades chiefly used on farm type tractors. Accordingly, they are classifiable under the provision for agricultural and horticultural implements not specially provided for, in item 666.00, TSUS, free of duty. Those blades 7 ft. to 12 ft. long are classifiable in item 664.08, TSUS. Bulldozer end bits (2.2), both the general purpose high impact-high abrasion types, and the penetration types for low impact/abrasion materials, are classifiable in item 666.00, TSUS, or item 664.08, TSUS, as indicated.

Medium carbon steel scraper blades, or ground engaging tools, are available in 18 to 72 inch lengths, with one, two, or three rows of bolt holes, and in level-cut (3.1) or stinger (3.2) arrangements depending on degree of impact and desired wear life. These blades are classifiable in item 664.08, TSUS. Scraper router bits (3.3), similar in function to the bulldozer and grader end bits, are likewise classifiable in item 664.08, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

BS

Single piece edges or ground engaging tools for loader buckets (4.2), general purpose bucket edges (4.3) consisting of cutting edge and 2 end pieces, and 1 piece wrap-around loader bucket edges (4.4), all of medium grade carbon steel, are classifiable in item 664.08, TSUS.

Single bevel (one edge) flat sections (5.1), and double bevel (two edges) flat sections (5.2), of medium and high grade carbon steel, will be imported both in material lengths and cut to length, with and without holes, ready for welding to buckets. The beveling of these sections is achieved during the hot rolling process. Those flat sections which are cut to length and drilled or punched, are finished grader blades classifiable in item 664.08, TSUS. Those flat sections cut to length but without holes, and ready for welding, are similarly classifiable. Beveled flat sections imported in material lengths, not drilled, not punched, and not otherwise advanced, and not of alloy steel, would be classifiable under the provision for hot rolled angles, shapes, and sections, in item 609.80, TSUS, dutiable at the rate of 0.9 percent ad valorem. Those beveled flat sections which have been drilled, punched, or otherwise advanced, would be classifiable under the provision for such merchandise which are hot rolled angles, shapes, and sections, in item 609.84, TSUS, dutiable at the rate of 4.8 percent ad valorem.

Grouser retread bars (6.0), permit the renovation of worn crawler track shoes. They may be imported in mill lengths from which required lengths are cut. Such merchandise is classifiable under the provision for hot rolled angles, shapes, and sections, not drilled, not punched, and not otherwise advanced, in item 609.80, TSUS. Such merchandise cut to the exact length of the track shoe is regarded as a part chiefly used with industrial tractors. This cut-to-size product is classifiable under the provision for other tractors and parts of such tractors, in item 692.35, TSUS, dutiable at the rate of 2.6 percent ad valorem.

Stubble mulch plowblades (7.0), are used with 3-wheeled mulch machinery. Such cut-to-size blades, hole punched, are classifiable under the provision for knives and cutting blades for agricultural or horticultural machines and for shoe machinery, in item 649.65, TSUS, free of duty.

The three-piece bevel flat sections (7.1) are 6, 8, or 10 inch edges for the bucket of a front end loader. The 6 to 8 inch double bevel curved sections (7.2) are for mounting to the blades of earth graders. Although advertised as ground engaging tools for agricultural machinery, they belong to a class or kind of edges chiefly used with loaders and graders of the industrial type. They are therefore classifiable in item 664.08, TSUS. Finally, the 6 or 8 inch double bevel curved sections (7.3) are for

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

076978

mounting to the blade of a box scraper. Such scrapers are of the type believed primarily used agriculturally to make land level. These sections are therefore classifiable as agricultural or horticultural implements, not specially provided for, in item 666.00, TSUS.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

St. Louis, Missouri 63105

Re: Decision on Protest and Application for Further Review of Protest No. 4503-4-000035, dated December 7, 1984

Dear Sir:

The above protest and application for further review were timely filed against your classification of certain lighting fixtures under the provision for other illuminating articles of base metal, in item 653.39, Tariff Schedules of the United States (TSUS). The merchandise was entered at St. Louis on Entry Nos. 84-109213, dated August 9, 1984, and 84-109194, dated August 14, 1984, both of which were liquidated on November 16, 1984. This ruling is our decision.

FACTS:

The articles in issue are the model PL-13 table base (clamp mounted) fluorescent lighting fixtures. The design of the fixtures is such that the ballast is located at the end of the electrical cord which plugs into an electrical socket.

The protestant submitted a technical drawing which lists all of the components in each lamp. These components were identified as either plastic or metal. Based on this evidence, the protestant claims that the lighting fixtures are in chief value of plastic.

ISSUE:

Is there sufficient evidence to demonstrate that the articles are in chief value of plastic?

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B11

077004

LAW AND ANALYSIS:

The tariff description for illuminating articles provided for in item 653.39 requires that they be in chief value of base metal. Illuminating articles in chief value of plastic are classifiable elsewhere.

Using the cost itemizations submitted by the protestant, we conclude that the lamps are in chief value of metal. The sum of the costs for the identifiable metal components is $4.18, whereas the sum of the costs of the identifiable plastic components is approximately $2.95. Included in our allocation of costs were the component costs of the materials in the ballast.

HOLDING:

The lighting fixtures, Model PL-13, are in chief value of base metal, and, therefore, are classifiable in item 653.39, TSUS. You should deny the protest in full. A copy of this decision should be given to the protestant at the time notice of action is given on Customs Form 19.

Sincerely,

Arthur P. Schaffner

George R. Tuttle, Esq.
Three Embarcadero Center
Suite 1260
San Francisco, California 94111

Dear Mr. Tuttle:

In your letter to the Area Director of Customs, New York Seaport, dated March 29, 1985, you ask that we reconsider a letter issued to your client concerning certain snow chains from Italy.

A letter dated October 31, 1984 (810984), from the Area Director, New York Seaport, considered the tariff status of the Konig Rally-Flash, a snow chain for use on vehicle tires. The chain was described in the ruling letter as follows: "It has an inner side ring for fitting the inner part of the wheel and an outer side ring for the outer side of the wheel, linked by various elements which provide friction on the tread. The cross chains are of square steel about 3.90mm thick." These chains were held to be classifiable under the tariff provision for chain and chains, of base metal, other, including parts, in item 652.35, Tariff Schedules of the United States (TSUS), dutiable at the rate of 7.1 percent ad valorem.

You state that the description of this snow chain was inaccurate, in that the subject chains are not of square steel but of stock which is D-shaped in cross section. You cite our letter dated March 20, 1980 (064173), published as C.S.D. 80-240, in which we held that the links of certain tire chain in the form of a D were of a "somewhat circular" cross section and, consequently, were classifiable in item 652.30, TSUS, a provision describing such chain by diameter which is of stock essentially round in cross section.

The second paragraph of C.S.D. 80-240 contains the following: "Since merchandise is classified in its condition as imported, it is only necessary to consider the sample link of the tire protection chain. This sample is doughnut-shaped with a flattened inner surface. It was cut in half resulting in two half-circular portions. The shape of the cross section of these half circular portions is more of a 'D' rather than a circle." Pictures of the merchandise under consideration in ruling 064173 indicate to us that the stock was not in the true shape of a D, but of a cross section in the somewhat oblong shape of a lemon. These pictures were made available to Mr. Smith of your office. The reference to a D shape is a description of convenience for a particular sample. Therefore, it is not this reference or the above-cited description in C.S.D. 80-240, but the merchandise itself, which governs classification.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

313

We are advised that the link stock in this case is formed from bar cold drawn through a die. One half of this die is in the form of a bisected circle and the other half of the die is in the form of a square with one side missing. A submitted sample of the stock and the description of the die from which it is made lead us to conclude that the stock is not lemon shaped. Therefore, C.S.D. 80-240 is not controlling here.

It is our position that stock with at least one side flat or straight cannot be considered essentially round for the purposes of item 652.30. Consequently, the described snow chain is classifiable under the provision for other chain and chains, and parts thereof, all the foregoing of base metal not coated or plated with precious metal, in item 652.35, TSUS. The letter dated October 31, 1984 (810984), is therefore affirmed.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Frederick P. Waite, Esq.
Cadwalader, Wickersham & Taft
1333 New Hampshire Avenue, N.W.
Washington, D.C. 20036

Dear Mr. Waite:

In your letter of September 2, 1985, you requested on behalf of the American Wire Producers Association, information on the classification of poultry and stucco netting.

The merchandise is produced from carbon or alloy steel wire which is twisted and woven, generally into a hexagonal pattern. You state that the diameter of the wire used in poultry netting is usually 0.035 inch, and that the diameter of the wire used in stucco netting is usually 0.054 inch. The products may be coated with metal either before or after weaving.

A wire netting product, described by you, would be classifiable under the provision for netting not specially provided for, of wire, not cut to shape, woven (but of other than simple warp and weft construction) and composed wholly or in substantial part of wire measuring under 0.075 inch in maximum cross-sectional dimension, in item 642.45 (if coated with metal before weaving) or in item 642.47 (if coated with metal after weaving), Tariff Schedules of the United States.

Enclosed is a copy of a ruling issued on December 15, 1976 (file 047785), in which a similar netting product was classified under the above provisions.

Sincerely,

Arthur P. Schuffler

Mr. Eric Swadell
Custom House Broker
180-A6 Mace Street
Chula Vista, California 92011

Dear Mr. Swadell:

This is in response to your letter of September 20, 1985, concerning the tariff classification of articles assembled in Mexico and entered at the port of San Diego.

The merchandise is a small plastic container-like article with a top or cover which snaps onto the bottom. The cover is made to serve as a receptacle for urine specimens and various reagents. It has a hole in the bottom covered by a thin filter which is claimed to be impregnated with a human chorionic gonadotropin (HCG) antibody. The filter is supported by a plastic disc. Underneath that and filling the remainder of the container is a cylindrical piece of foamed plastics material. Markers are contained in the receptacle for measuring purposes. In the United States, these articles are added to kits which contain the reagents and other materials necessary for an in vitro pregnancy test.

Your claim for classification under item 772.42, Tariff Schedules of the United States (TSUS), cannot be allowed because the merchandise does not meet the description of any of the specific exemplars enumerated under that provision. Nor would we regard the merchandise classifiable as a medical instrument or appliance. In this connection, Headnote 1(iii), Subpart B, Part 2, Schedule 7, TSUS, precludes laboratory appliances from classification as medical instruments, and we would not regard a device which replaces laboratory apparatus for home use as any more eligible for such classification. Your further claim for alternative classification as a miscellaneous medical supply in Subpart C, Part 13, Schedule 4, TSUS, must also be rejected since the merchandise is not within any of the descriptions there. Further, we would not regard the HCG antibody as a medicinal.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

C2

Ordinarily, articles which are in chief value of a chemical combined with laboratory glassware or other devices or chemicals which make them entireties which are more than the named chemical are classifiable under the so-called similitude or basket provisions in Part 14, Schedule 7. See, for example, our decision of October 20, 1980, file No. 064257; Pharmacia Laboratories, Inc. v. United States, 67 CCPA 5, C.A.D. 1235 (1979). However, on the basis of the broad nature of the provision for certain biologicals which are duty-free under item 437.76, TSUS, as indicated in the legislative history, we have allowed the classification of certain pregnancy kits under that provision in our decisions of February 15, 1983, file No. 069234, and April 12, 1984, file No. 072667. We now find that those decisions are controlling with respect to the dutiable status of the instant merchandise.

Accordingly, the instant articles are classifiable under item 437.76.

Sincerely,

Arthur P. Schaffer

Ms. Paula Quinn Regan
Vice President
Prestige Premiums, Inc.
41 Vreeland Avenue
Totowa, New Jersey 07512

Dear Ms. Regan:

This is in reference to your inquiry concerning the dutiable status of a "Twinkle Ink" pen, a product of Taiwan.

The "pen" is designed to decorate a surface with glitter. In application, the pen is squeezed, with the glitter being transmitted to the surface to be decorated. It is designed to be used on T-shirts, packages, decorations and ornaments. Examination of a sample pen discloses that the cap and barrel are made from polyethylene, and the glitter of a plastic chemical material mixed with a water soluble adhesive.

A product of this type is classifiable, if in chief value of the chemical ingredients, under the provision for other articles not provided for elsewhere in the tariff schedules, item 799.00, Tariff Schedules of the United States. The rate of duty is 3.9 percent ad valorem. As a product of Taiwan it is entitled to duty-free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

Sincerely,

Arthur P. Schifflin
Chief, General
Classification Branch

Re: Decision on Applicaton for Further Review of Protest No. 4110-5-000016, on the Classification of Industrial Robots and Parts, Products of West Germany

Dear Sir:

The protest concerns the classification and appraised value of Niko 600 robots and parts. The claim of the importer is that the industrial robots are classifiable under the provision for electric welding machines and parts thereof in item 683.90, TSUS. It is further contended that any license fees paid are not part of the dutiable value of the merchandise.

Customs classified the merchandise under the provision for machines not specially provided for, and parts thereof in item 678.50, TSUS.

Descriptive literature concerning the Niko 600 gantry robot units describes them as all electric, continuous path robots providing exceptional versatility, capable of performing a wide range of complex tasks, such as automated press operations, automated machining and fabrication cells, line trackable welding, loading and unloading of machine tools, casting and forging processes, quality control inspection and many others.

Regarding appraisement, the petitioner maintains that the license fees described in the license agreement between the seller and themselves are non dutiable and that the appraised value should be the invoiced unit values, less any invoiced discount, packed.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

cs

Although the petitioner maintains the merchandise is used in welding, the literature submitted shows that the robots were capable of a wide variety of uses, and that there is no physical difference between Niko 600 robots and other general purpose robots. Therefore it has not been established that the robots are chiefly used for welding operations only.

As to the appraisement issue, the license agreement between the petitioners and the West German manufacturer provides that the petitioner must pay a royalty for the exclusive right to make, have made, or use and sell the robots, utilizing the technical information, patents, drawings tests, etc., furnished by the foreign manufacturer. Under section 402(b), Trade Agreements Act of 1979, any royalty or license fee related to the imported merchandise that the buyer is required to pay, directly or indirectly, as a condition of the sale of the imported merchandise for exportation to the United States must be added to the price actually paid or payable for the merchandise. We are not convinced from the evidence before us that the license fee is not a condition of the sale of the imported merchandise for exportation to the United States. Accordingly, the license fee is part of the appraised value under transaction value.

You are directed to deny the protest in full. A copy of this decision should be attached to the Customs Form 19 Notice of Denial furnished the petitioner. That portion of the original protest file included with the appeal is hereby returned.

Sincerely,

Arthur P Schaffner

Mr. A.W. Baird
Senior Customs Representat
Shell Canada Limited
P.O. Box 100, Stn. (M)
Calgary, Alberta T2P245
Canada

Dear Mr. Baird:

This is in response to your request for classification of "Clean-Sol 34," a product consisting of the following components: paraffins, 48.1%; napthenes, 34.7%; and aromatics, 17.2%.

Classification of this product as a benzenoid mixture in item 407.16, Tariff Schedules of the United States (TSUS), is inappropriate because the dutiable benzenoids that are present in Clean-Sol 34 are naturally occurring; that is, the benzenoids are naturally present in the crude oil used in the initial distillation during the production of Clean-Sol 34.

After reviewing the submitted specifications sheet, classification as naptha in item 475.35, TSUS, is incorrect because Clean-Sol 34 does not have a naptha boiling range.

Based upon the product specifications and flow diagrams of Clean-Sol 34, we find it properly classifiable as a kerosene in item 475.30, TSUS, dutiable at the rate of 0.25 cent per gallon.

Sincerely,

Arthur P. Schaffer

District Director of Customs
111 West Huron Street
Buffalo, New York 14202

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 0901-4-701660

The above-captioned protest and application for further review were filed against the tariff classification of pocket diaries which were the subject of entry No. 113671 filed at the port of Buffalo in 1984. The merchandise is a product of Canada. Our decision follows:

ISSUE:

Duty was liquidated at the 1984 column 1 rate of 6.3 percent ad valorem for diaries under item 256.56, Tariff Schedules of the United States (TSUS). It is claimed the merchandise is dutiable at the 1984 column 1 rate of 2 cents per pound for lithographed paper calendars in item 274.10, TSUS. The underlying issue is the effect to be given precedents when the ratio decidendi of the later one appears to be inconsistent with that of the earlier one and the merchandise is similar but not identical.

FACTS:

Further details concerning the pocket diaries at issue are contained in the following discussion.

LAW AND ANALYSIS:

This protest has been preceded by precedents of which three are most pertinent, and all involve articles which have some features in common, but none of which are identical. The earliest of these decisions is Sormani et al. v. United States, 33 Cust. Ct. 423, Abs. 58502 (1954), in which an

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

C8

article described as a calendar booklet was classified as a calendar, and the Customs classification as a diary was not sustained. In the next decision, Baumgarten v. United States, 49 Cust. Ct. 275, Abs. 67150 (1962), merchandise invoiced as desk diaries was easily regarded by the court as diaries, and there was no alternative claim for classification as calendars for the court's consideration. However, in Charles Scribner's Sons v. United States, 574 F. Supp. 1058 (CIT 1983), merchandise designated engagement calendars was classified as calendars and the Customs classification as diaries was overruled.

The Sormani merchandise, which was classified as calendars, was similar to the Scribner's merchandise in that it had a typical calendar configuration with a picture on one page and a date tabulation on the opposite page for the display of both when left open on a desk. The common spiral binding feature which facilitated this use is not common to the instant merchandise which is also smaller than all of the articles in the precedents and which otherwise is suited to a pocket use rather than a desk top display use. The Baumgarten merchandise, which was classified as diaries, unlike the Sormani merchandise, but similar to the instant merchandise, did not have any pictures. Further, the Baumgarten articles did not have the single-page-per-month format of the Sormani articles, nor does either the Scribner's or the instant merchandise.

Therefore, the instant merchandise is distinguishable from the Sormani calendars. In fact, while it was held that the areas for entering notations in the latter calendars were incidental to the calendar feature, the same cannot be said of the spaces in the instant articles because they represent the salient feature. Aside from slight differences in size and

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

C9

071150

in the method of binding, the Baumgarten merchandise and the instant articles are essentially the same except that the instant articles only provide for entries by day, while the Baumgarten articles instead of allowing for one page per week allowed for two with a further space breakdown for entries by hour of the day. In fact, the spaces allowed for these entries are not significantly different in size than the spaces in the Scribner's merchandise and the spaces in the instant merchandise. The view, therefore, that the instant merchandise must be classified in accordance with the views of the Scribner's court rather than those of the Baumgarten court is predicated on the position that Scribner's has made a change which supersedes previous precedent. We disagree with that conclusion.

When previous precedent is overruled the court will usually so state, which it did not do in Scribner's. The court, however, did imply that Baumgarten was not stare decisis for Scribner's because the issues as framed by the parties were different. The decisions still meet head on in that the Baumgarten court found that even though the spaces were intended for entries other than those for the typical diary, the user could enter whatever information that was chosen in the spaces. The Scribner's court found no such alternative uses for spaces of essentially the same size. Proponents of a calendar classification for the instant merchandise, therefore, interpret Scribner's as establishing a single criterion for determining what constitutes a calendar and what does not constitute a diary based on the size of the spaces allocated for notations. In this connection, although the Scribner's court did note that the spaces had the primary purpose of allowing for the entry of "dates for future appointments and references," rather than diary entries, 574 F. Supp. 1060, later findings

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

C10

051749

by the court do not support a single criterion standard. At 574 F. Supp. 1063, the court made the finding that the article's "essential purpose was to convey high-quality Sierra Club photography" and was "not suitable for diary purposes."

Accordingly, we find that the Baumgarten decision has not been overruled and that it was not stare decisis for the Scribner's litigation mainly because of differences in the merchandise involving the significance of the area for entries as it relates to other features, such as pictures for desk display. On that basis, if Baumgarten was not stare decisis for Scribner's, Scribner's would not be precedent for the classification of merchandise which we find, taking all of its characteristics as a whole into consideration, rather than any single criterion, has more features in common with the Baumgarten merchandise than with the Scribner's merchandise.

It should be noted that where there is a difference in the ratio decidendi in two court decisions not involving identical merchandise or identical issues as framed by the parties, there is no rule requiring that one court's views on a matter be regarded as correct and another court's differing views incorrect merely because one decision is later than the other. Further, failure of the Government to appeal generally implies acquiescence in the correctness of the court's ultimate conclusion taking all considerations into account. In a situation as here, where there are multiple considerations such as commercial designation, presence of pictures, printing process, manner in which used, size of booklet, type of binding, format of tabulated information and type of paper, acquiescence does not concede agreement with the court's views and points on every one

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C11

0571150

of these considerations, particularly, when the court's views on a single consideration, such as the size of the space for entries, cannot be reconciled with the views of an earlier court. It is the responsibility of the Customs Service in tariff classification matters to apply precedent in a manner which gives effect to all pertinent and viable court decisions without ignoring or overruling any pertinent precedent administratively when a later court has not specifically done so itself.

HOLDING:

For the foregoing reasons, we find that the instant pocket diaries most resemble the diaries which were the subject of Baumgarten v. United States, supra, and their classification is controlled by the principle of that precedent in accordance with the requirements of 19 CFR 152.16(b). Under the principle of that decision, the merchandise is properly classifiable under the provision for diaries in item 256.56, TSUS. Therefore, you are instructed to deny the protest in full. A copy of this decision should be attached to the Form 19 Notice of Action, and the Form 19 is returned herewith.

Sincerely,

Arthur P. Schaffner
for Harvey B. Fox
Director, Classification
and Value Division

Joseph A. Bosco, Esq.
Bosco, Curry, Paulsen & Tesoro
Attorneys at Law
120 Nineteenth Street, N.W.
Washington, D.C. 20036

Dear Mr. Bosco:

Your letter dated October 25, 1985, regarding the classification of Nutella, a hazelnut cocoa spread, has been forwarded to this office for reply. In your October 25, 1985, letter, you ask that Nutella be classified under item 156.47, Tariff Schedules of the United States (TSUS). In the event that item 156.47, TSUS, is deemed to be inappropriate, you suggest classification under either items 156.30 or 157.10, TSUS. In any event, you suggest that classification under item 183.05, TSUS, is inappropriate. It is noted that by letter dated May 20, 1986, you have withdrawn your request for alternative classification under item 157.10, TSUS. However, we are compelled to point out that all possible classifications are considered, whether or not an inquirer makes a claim for a particular classification.

Your submission points out that Nutella consists of the following ingredients:

sugar	50 percent
edible vegetable fat	20 percent
roasted hazelnut powder	13 percent
nonfat dry milk	10 percent
lowfat cocoa powder	7 percent
traces of soy lecithin and vanillin	(less than 1 percent)

which are combined in an anhydrous paste with particle size of less than 0.05 millimeter.

It is advertised and marketed as a "chocolaty nut spread," and is imported and sold in 7 oz., 13 oz., and 2 lb. jars. You state that it is chiefly used as a topping on cakes and cookies as well as a spread on bread and crackers and at least one retail bakery has used it as an ingredient in its "chocolate-filled croissants."

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C13

The National Import Specialist has pointed out that the label on the submitted sample has a logo which shows the product already spread onto bread with an ordinary table knife. The extensive past history of this product clearly shows its chief use to be a spread on bread.

The relevant TSUS provisions are then items 156.30, 156.47, 157.10 and 183.05.

Item 156.30, TSUS, provides for sweetened chocolate in any other form other than in bars or blocks weighing 10 pounds or more each. Item 156.47, TSUS, provides for confectioners' coatings and other products (except confectionery) containing by weight not less than 6.8 percent nonfat solids of the cocoa bean nib and not less than 15 percent of vegetable fats other than cocoa butter. Item 157.10, TSUS, provides for candy, and other confectionery, not specially provided for. Item 183.05, TSUS, provides for edible preparations not specially provided for.

Headnote 1, Subpart B, Part 10, Schedule 1, TSUS, provides:

> 1. The term "chocolate", as used in this subpart, shall be limited to products (whether or not confectionery) consisting wholly of ground cocoa beans, with or without added fat, sweetening, milk, flavoring, or emulsifying agents.

Headnote 2, Subpart C, Part 10, Schedule 1, TSUS, provides:

> 2. The term "confectionery" as used in this subpart, covers confections or sweetmeats ready for consumption. This subpart does not cover all confectionery (see Subpart B of this part, Part 9 of Schedule 1, and Subpart B of Part 15 of Schedule 1 for other provisions covering confectionery).

You acknowledge that Customs has previously ruled that Nutella was classifiable under item 183.05, TSUS; however, you suggest that recent court developments justify the review of this classification. In support thereof, you cite Rockwell Import Corp. v. United States, 76 Cust. Ct. 262 (1976), and Leaf Brands, Inc. v. United States, 70 Cust. Ct. 66 (1973).

In reviewing the various TSUS provisions at issue, we note that classification under item 156.30, TSUS, is inapplicable because of the presence of nuts and vegetable fats. See in this regard, the United States v. Rockwell Import Corp., 65 CCPA 12 (1977), where the court stated:

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

C14

071161

The courts have repeatedly held that the presence of nuts in imported products referred to as "chocolate" precluded classification of such products under the sweetened chocolate provisions of the Tariff Acts. C. J. Van Houten & Zoon, Inc. v. United States, supra, (Tariff Act of 1930); A. Herman & Co. v. United States, 56 Treas. Dec. 435, T.D. 43666 (Cust. Ct. 1929) (Tariff Act of 1922). In enacting TSUS, Congress intended to continue the established classification practices:

> In Subpart B the provisions relating to cocoa have been brought together. The headnote is new and represents an effort to settle a question that has come up from time to time concerning the classification of sweetened chocolate and chocolate containing nuts, fruits, etc. The headnote would continue the practice of classifying sweetened chocolate under the provisions for chocolate (items 156.25 and 156.30) even though it may be regarded as confectionery, and the practice of classifying such chocolate containing added ingredients such as nuts, fruits, etc., under the provision for confectionery (items 157.10 and 157.11). [Tariff Classification Study, Schedule 1, 163 (1960)].

In addition, the court pointed out:

> [5] Congress thus intended to preclude assessment of chocolate products containing vegetable fat other than cocoa butter at the rate applicable to chocolate, either directly, by classification as "chocolate," or indirectly by similitude.

Insofar as the application of item 156.47, TSUS, is concerned, you state in your letter of May 20 that the fat content of the cocoa bean is less than 1 percent. Since item 156.47, TSUS, requires not less than 6.8 percent non-fat solids of the cocoa bean nib, and the Nutella contains 7 percent low fat cocoa powder, we are unable to conclude that the product qualifies for entry under item 156.47, TSUS. In any event, the legislative history of item 156.47, TSUS, demonstrates that products such as Nutella were clearly not intended to be covered by that provision. See for instance the discussion in Rockwell, supra, which provides:

> As originally proposed, the TSUS included the present definition of chocolate but not item 156.47. When item 156.47 was added, its purpose was explained in the Tariff Classification Study, Sixth Supplemental Report 1 (May 23, 1963):

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D1

Explanation: This change is required to clarify the status of certain related products containing cocoa or chocolate and vegetable fat other than cocoa butter. These products include confectioners' coatings, coating for ice cream bars, and simple mixtues of cocoa or chocolate and vegetable fat.

Consequently, entry under item 156.47, TSUS, is inappropriate.

Insofar as the application of item 157.10, TSUS, is concerned, we see nothing in the holding of Leaf Brands, Inc. v. United States, 70 Cust. Ct. 66 (1973), to indicate that Nutella should be classified as a candy or other confectionery. In fact, there is no evidence that the product is chiefly used as a confection. If anything the product closely resembles the "halawi," a product made from sesame oil and sugar and was eaten, as imported, on bread, and was held to be erroneously classified as a confectionery. Magdalini Bros. v. United States, stated 55 T.D. 812, T.D. 43418 (1929).

For the reasons herein stated, we are of the opinion that Nutella is appropriately classified under item 183.05, TSUS.

Sincerely,

Arthur P. Schaffler

DEPARTMENT OF THE TREASURY
U.S. CUSTOMS SERVICE
WASHINGTON

JUL 18 1986

REFER TO
CLA-2 CO:R:CV:G
077244 jlj

District Director of Customs
1 East Bay Street
Savannah, Georgia 31401

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 1703-3-000217

This protest was filed against your decision in the liquidation of entry number 82-255730-4 of May 10, 1982, covering a shipment of nylon/leather athletic footwear produced in South Korea.

This ruling concerns the correct tariff classification of the instant nylon/leather athletic footwear.

FACTS:

The instant nylon/leather athletic footwear is described on the Customs Form 6445 as follows:

A. Boys' Boston Nylon Split Track Shoes, Stock No. 73265, Style K2J657, and

B. Boys' Nylon Jogger Shoes, Stock No. 73384, Style 87003B.

The Savannah import specialist liquidated the entry under the provision for other footwear, other, other, in item 700.95, Tariff Schedules of the United States (TSUS).

The protestant Maldisco claims that the athletic footwear should have been classified under the provision for footwear, of leather (except footwear with uppers of fibers), other, for men, youths and boys, in item 700.35, TSUS.

ISSUE:

Is the instant nylon/leather athletic footwear classifiable as leather footwear in item 700.35, TSUS, or other footwear in item 700.95, TSUS?

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D3

LAW AND ANALYSIS:

With regard to Stock No. 73384, the import specialist states that Customs Laboratory Report 83/1235 of December 10, 1982, which dealt with Stock No. 73384, indicated that size 3 footwear had only 0.5476 square feet of leather, as opposed to the manufacturer's stated 0.77 square feet of leather. This means that the component value breakdown submitted by the protestant was incorrect. The import specialist found this shoe to be classified in item 700.95, TSUS.

With regard to Stock No. 73265, the import specialist states that the detailed component value breakdown cost of rubber and plastic, excluding the cost of cutting and sewing, is $0.9495. About 46 percent of the total leather purchased is waste. The cost of the leather, using a 35 percent waste allowance and excluding cutting and sewing costs, is $0.65. Based on these figures, the import specialist found Stock No. 73265 to be classified in item 700.95, TSUS.

The protestant submitted a voluminous statement regarding why it believes that both types of footwear should have been classified in item 700.35, TSUS. The gist of its statement is that it is reasonable to assume that leather was the component of chief value for both Stock No. 73384 and Stock No. 73265.

We have reviewed the manufacturer's component value breakdown for Stock No. 73265. Based on the cost information shown there, we find that Stock No. 73265 should have been classified in item 700.35, TSUS, as claimed by the protestant.

We have also reviewed the manufacturer's component value breakdown for Stock No. 73384. The manufacturer claims that there is 0.77 square feet of split and Everskin leather in a pair of boys' size 4 joggers. Customs

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D4

079234

Laboratory Report 83/1235 indicates that there is 0.5476 square feet of leather in a pair of boys' size 3 joggers. If the cost of leather is adjusted to take this discrepancy into account, the results are as follows:

.5476 / .77	x $0.88 (stated cost of leather)	=	$0.626
			.22 cutting
			.22 trimming
			$0.896 leather cost

The adjusted cost of the leather must be compared to the cost of the rubber and plastic, which is as follows:

Rubber and Plastic	-	$0.95
Cutting	-	$0.09
Trimming	-	$0.06
		$1.10

Based on a comparison of the costs stated above, the component of chief value for Stock No. 73384 is rubber and plastic. (We have disregarded the stitching costs of $0.26 for the leather and $0.10 for the rubber and plastic components because there is no indication that these costs are based on the weight of the upper's components. In any case, even if these costs were added, the component of chief value would still be rubber and plastic rather than leather.) We find that Stock No. 73384 is classified in item 700.95, TSUS, as the import specialist stated.

HOLDING:

Based on the analysis given above, we find that Stock No. 73265 should have been classified in item 700.35, TSUS. The protest is approved with regard to Stock No. 73265. We find that Stock No. 73384 was correctly classified in item 700.95, TSUS. The protest is denied with regard to Stock No. 73384.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

DS

The protest is approved in part and denied in part as stated above. A copy of this decision should be sent to the protestant along with the Customs Form 19 Notice of Action.

Sincerely,

Arthur V Schaffner
for Harvey B. Fox

077248

Mr. Paul B. Dacy
Sea Containers America, Inc.
One World Trade Center
Suite 1235
New York, New York 10048

Dear Mr. Dacy:

In your letter of October 30, 1985, you inquire as to the tariff classification of 20 ft. and 40 ft. refrigerated containers and 20 ft. tank containers, presumably from countries entitled to the column 1 rate of duty. Brochures were submitted.

You maintain that the provision in item 640.30, Tariff Schedules of the United States (TSUS), covering other containers, of base metal, chiefly used in the packing, transporting, or marketing of goods, represents the proper classification of these containers. Our New York office, however, has suggested item 657.25 and item 661.35, TSUS, as possible alternative classifications.

With respect to the refrigerated containers, or reefers as they are commonly called, entries under item 640.30 would be subject to Schedule 6, Part 3, Subpart A, Headnote 1(i), TSUS, which precludes from coverage within item 640.30 containers with mechanical or thermal equipment such as agitators, heating or cooling coils, or electrical elements (provided for in parts 4 and 5 of Schedule 6). The reefers described on page 4 of the submitted brochure, fitted with nose-mounted clip-on diesel generator, would fall within this exclusion and would therefore be precluded from classification under item 640.30.

Item 661.35, TSUS, is a provision for refrigerators and refrigerating equipment, whether or not electric, and parts thereof. Tariff terms are normally construed in accordance with their common and commercial meanings, which are presumed to be the same. The term "refrigeration" denotes the process of producing low temperature usually throughout an appreciable volume. Moreover, the 1969 Summaries of Trade and Tariff Information, a compilation of trade data disseminated by the U.S. International Trade Commission, while not indicative of the legislative intent in enacting item 661.35, TSUS, reflect Customs handling of entries accepted under that item. Volume 8, Schedule 6 thereof, at p.90, in discussing refrigerators and refrigerating equipment, whether or not electric, describes machines or assemblies of apparatus which function in a continuous cycle of operations to produce and maintain temperatures ordinarily near or below freezing. These units normally comprise, among other things, a compressor (with or without motor) and condenser mounted on a common base, whether or not

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

D7

complete with evaporator, or self-contained absorption units. It is our opinion that the refrigerated (reefer) containers at issue possess these elements. Consequently they are specifically provided for in item 661.35, TSUS. The 1986 rate of duty is 3.2 percent ad valorem.

The literature describes the 20 ft. IMCO Type 1 tank container for transporting hazardous liquids, the 20 ft. IMCO Type 2 container for low/medium hazard liquids, and the 20 ft. ISO container for non-hazardous liquids. The IMCO Type 1 has electrical immersion elements fitted in fully welded and pressure tested stainless steel tubes situated internally near the bottom of the tank with terminals at the rear dished end. The IMCO Type 2 has four external steam channels welded to the underside of the tank to provide steam heat. The ISO tank container has two 4 inch diameter semicircular full length steam tubes fitted on the underside of the tank. These tank type containers are designed to transport chemicals and other liquids which require controlled heat. The presence of the heating elements would preclude classification of these containers in item 640.30, TSUS, because of Schedule 6, Part 3, Subpart A, Headnote 1(i), TSUS, previously cited.

Inasmuch as there is no other specific tariff provision believed applicable to these containers, and because stainless steel is the component material in chief value, the IMCO Type 1 and Type 2 tank container and the ISO container, would be classifiable under the tariff provision for other articles of iron or steel, not coated or plated with previous metal, in item 657.25, TSUS, dutiable in 1986 at the rate of 6.2 percent ad valorem.

Sincerely,

Arthur P. Scheffler

Mr. D. Edgar MacLeod
Scotwell Industries Limited
Suite 503
5800 Rue St. Denis
Montreal, PQ Canada

Dear Mr. MacLeod:

We are responding to your request for a ruling on the country of origin of cabinet toweling and operating room surgical towels. You have furnished additional details about the processing in a letter dated October 31, 1985, which was in response to our letter of June 12, 1985. Your submission elaborates on the finishing performed in Canada on greige cloth that is imported from various countries.

The precise operations performed on the cloth include sewing the individual pieces end to end into one continuous length. The fabric is then brushed and singed. It is passed through a solution containing enzymes and other chemicals on the padding machine which dissolves starch and protein products such as casein, glue, gelatine. From the padding machine, the cloth is steamed and washed to remove impurities. The next step is to bleach the cloth, after which it is washed and dried. During these washing and drying processes the fabric passes through a device that shrinks the fabric and sets it at a permanent width. The fabric is prepared for vat dyeing by a specially trained technician. After the towelling material is dyed, it is cut to lengths of 40 yards, hemmed and put up into rolls. As noted in your submission, the cost of the equipment is over $750,000. And, you have pointed out that the huck towels have been classified by the U.S. Food and Drug Administration as medical devices. It is your view that the finishing and cutting and hemming performed on the towelling material in Canada amounts to a substantial transformation.

Under Section 12.130(b), Customs Regulations, merchandise that is processed in more than one country is considered to be a product of the last country where it underwent a substantial transformation. That is, a new and different article of commerce must be created by means of a substantial manufacturing or processing operation.

Section 12.130(e)(2), Customs Regulations provides that an article usually will not be considered a product of a particular country by virtue of merely having undergone:

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D9

077249

(ii) Cutting to length or width and hemming or overlocking fabrics which are readily identifiable as being intended for a particular commercial use;

This provision governs the importation of the subject towels into the United States. Since the towelling material, as imported into Canada, must only be cut to length to form the individual towels, the finishing operations are not sufficient to result in a substantial transformation of the merchandise. See Headquarters Ruling Letter 077055 dated April 22, 1986, where a substantial transformation did not occur when terry toweling in rolls and grey form is cut to length and stitched, bleached and dyed.

Although we do not deny that the processing performed in Canada adds significant value to the product, it is our view that the essence of the final product nevertheless is the towelling material. The landmark case of Uniroyal v. United States, 3 CIT 220, 542 F. Supp. 1026 (1982), aff'd., 702 F. 2d 1022 (Fed. Cir. 1983) supports this view. In the Uniroyal decision, the court rejected the importer's claim that attaching a leather upper to an outsole in the United States resulted in a substantial transformation of the merchandise. In characterizing the assembly process as "minor", the court stated that the upper was "the very essence of the completed shoe."

Even though the material and the finished towels are classifiable in discrete tariff provisions, that is not decisive in ascertaining the country of origin. This is consistent with the decision in Rolland Freres, Inc. v. United States, 23 CCPA 81 (1935) where the court made the following observation:

> While the fact that by a manufacturing effort expended on an article its tariff status may have changed is a proper matter to consider along with other circumstances in arriving at a conclusion as to whether the article has been "manufactured or produced," it certainly should not be a controlling consideration.

To sum up, we find that processing the towel material in Canada does not result in a substantial transformation of the merchandise. Thus, the country where the fabric is woven is the country of origin of the finished towels.

Sincerely,

Harvey B. Fox

Ms. Angela De Gaetano
U.S. Customs Service
Customs Information Exchange
Room 200
6 World Trade Center
New York, New York 10048

Dear Ms. De Gaetano:

In a memorandum dated October 30, 1985, you forwarded a Customs Form 6431 dated September 9, 1985, from the port of Pembina concerning entry No. 85-3252487 covering polycoated printed natural kraft paper manufactured by Bonar Packaging in Canada. This difference is listed on the twelfth line, first page of C.I.E. N/64 dated December 13, 1986.

The instant merchandise is printed polycoated kraft paper which is made into bags for potato slices. The paper is imported in rolls. It has marks capable of being read by an electric eye. According to the importer, the paper is "sealed into a tube, bottom sealed, filled with [the] product, and top sealed" after importation, thereby making the paper into a bag. The issue is whether the instant paper, imported printed and in rolls, is classifiable as coated paper, other, not lithographically printed, impregnated, coated or both, not gummed, other, in item 254.85, Tariff Schedules of the United States (TSUS), or as articles of paper not specially provided for, other articles of coated paper, other, in item 256.87, TSUS.

One port argues that Sanwa Foods, Inc. v. United States, (Sanwa), Court No. 81-10-01363, Slip Op. 85-37 (March 25, 1985) is controlling. It contends that the instant rolls of paper are more specifically provided for as unfinished bags (i.e., as articles of paper not specially provided for) than as paper.

The other port argues that Customs Headquarters Ruling Letter (HRL) 073464 of December 29, 1983, is controlling. HRL 073464 discussed a similar issue, i.e., whether pre-printed paper imported in rolls and intended for sugar bags was classifiable as other printed paper in item 254.70, TSUS, or as other articles of paper in item 256.90, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D11

It concluded that the merchandise there at issue was not advanced far enough to be considered unfinished sugar bags and that the merchandise was more specifically described as other printed paper than as other articles of paper, not specially provided for.

The merchandise involved in Sanwa was:

> ...rolls of unassembled plastic packaging for various noodle mixes produced by plaintiff. Printed on each roll at regular intervals are the trademarked product brand name, product descriptions, preparation instructions, and magnetic black ink marks. The marks are read by an electric eye, which triggers a mechanism that cuts, folds, and seals the plastic around various noodle mixes in accordance with the location of the marks.

(Slip Op. 85-37 at 2-3.) As the quotation above indicates, the merchandise in Sanwa is very similar to the merchandise at issue here.

Prior to classifying the merchandise under item 772.20, TSUS, the Sanwa court determined that the imported packaging constituted "articles" rather than "material" because the character and identity of the individual pieces was fixed at the time of entry and because the merchandise was not commercially capable of any other use than packaging the noodle mixes. We find that these principles apply to the instant merchandise too, therefore the instant paper is classifiable as unfinished paper bags in the tariff provision for other articles of paper, not specially provided for, other, of coated paper, other, in item 256.87, TSUS, dutiable at the rate of 5.6 percent ad valorem.

19 Code of Federal Regulations 152.16(b) (19 CFR 152.16(b)) states as follows:

> 152.16 Judicial changes in classification.
>
> (b) Similar merchandise under decision favorable to Government. The principles of any court decision favorable to the Government shall be applied to merchandise, though not identical with the merchandise the subject of the court's decision, if its classification is affected by such principles, provided that

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D12

052725

it has been entered or withdrawn for consumption after 30 days from the date of publication of the court's decision in the Customs Bulletin.

The date of publication of Sanwa in the Customs Bulletin was April 17, 1985. If the principles of Sanwa are applied to the instant merchandise, a higher duty rate will result, therefore the Sanwa decision in this context is favorable to the government.

Pursuant to the above-cited 19 CFR 152.16(b), the principles of Sanwa apply to the similar merchandise at issue here. Therefore, all such merchandise which was entered or withdrawn for consumption after 30 days from April 17, 1985, should be classified in item 256.87, TSUS. Because the change in classification was effected judicially, no formal change of practice procedure is required.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

District Director of Customs
511 N.W. Broadway, Federal Building
Portland, Oregon 97209

Dear Sir:

Re: Application for Further Review of Protest No. 2904-4-000205

This protest was filed against your decision in the liquidation on August 31, 1984, of entry No. 413677-1 of September 15, 1983, covering a shipment of backswings produced in Taiwan.

This decision concerns the correct tariff classification of the backswings (Body-Trac 200 or Back-Trac 200).

FACTS:

The merchandise at issue is Body-Trac 200 (also known as Back-Trac 200) backswings. This merchandise is a physical fitness apparatus which allows the user to invert his body, thereby reversing the effect of gravity. According to an advertising brochure, the Body-Trac 200 backswing relieves stress and tension, back, shoulder and neck pain, and improves circulation, posture and complexion. The Body-Trac 200 is similar in purpose and function to various traction devices sold in sporting goods and physical fitness stores.

The backswings were liquidated under the provision for gymnastic, athletic or playground equipment in item 735.20, Tariff Schedules of the United States (TSUS).

The protestant's broker claims that the backswings should be classified under the provision for orthopedic appliances and similar devices, other, in item 709.57, TSUS.

D14

THIS DOCUMENT MAY BE RELEASED TO THE

ISSUE:

Are the backswings classifiable in item 735.20, TSUS, or in item 709.57, TSUS?

LAW AND ANALYSIS:

The protestant's broker argues that the backswings are medical devices ordered by medical stores and doctors for patients, therefore they are classifiable as orthopedic devices in item 709.57, TSUS. The protestant states that 95 percent of the backswings are sold to doctors. A number of backswing invoices to doctors and medical establishments have been submitted along with the protest.

In Customs Headquarters Ruling Letter 058970 of May 7, 1978, orthopedic appliances were defined as articles "that are generally worn on the person and used in the correction of body disabilities which are most often of an incapacitating nature." Inasmuch as the backswings are not worn on the person, they do not meet this definition of "orthopedic appliances."

In HRL 058970, we stated that orthopedic appliances "are professionally prescribed and are available through professional outlets. Articles which are available in ordinary retail stores for use in alleviating sprains or strains are not, for purposes of tariff classification, considered orthopedic devices." As we noted above, the Body-Trac 200 is similar to various traction devices sold in physical fitness and sporting goods stores. The mere fact that doctors purchase certain physical fitness equipment for their own personal use or for their patients does not make the equipment an orthopedic appliance.

The Portland import specialist suggested that the Body-Trac 200 might be classified under the provision for mechano-therapy appliances in item 709.40, TSUS. In the Explanatory Notes of the Tariff Classification Study

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

E1

077269

(CIE 1/64), mechano-therapy appliances are described as "those primarily used to treat diseases of the joints and muscles by mechanical reproduction of various movements. Such articles, however, are those that are ordinarily used for treatment given under medical supervision, and do not include ordinary exercising or physical culture equipment such as rowing machines and the like." Based on this definition, the Body-Trac 200 is not a mechano-therapy device classifiable in item 709.40, TSUS.

Inasmuch as the backswings do not meet the definitions of orthopedic appliances or mechano-therapy appliances and inasmuch as similar devices are sold in sporting goods and physical fitness stores, we find that the backswings are correctly classified as gymnastic, athletic or playground equipment in item 735.20, TSUS.

HOLDING:

The backswings are classified in item 735.20, TSUS. The protest should be denied in full. A copy of this decision should be sent to the protestant along with the Customs Form 19, Notice of Action.

Sincerely,

Arthur P. Schaffer

Miss Neelam Dhamija
First Secretary (Commerce)
Embassy of India
2536 Massachusetts Ave., N.W.
Washington, D.C. 20008

Dear Miss Dhamija:

This is in reply to your letter of November 5, 1985, concerning the classification and textile category of two types of yarn-dyed fabric from India.

No construction information was given for either fabric. You state that both fabrics are 100 percent cotton and power-loomed. The entry documents accompanying this submission show that both fabrics were entered at Los Angeles International Airport in 1984, as woven cotton colored fabrics, not fancy or figured, in item 322.9872 Tariff Schedules of the United States Annotated (TSUSA). The accompanying visaed invoice was for textile category 318.

Customs officers at Los Angeles issued a notice of redelivery and required a visa or visa waiver because the fabric belonged in textile category 310. You believe that the proper category for these fabrics is category 318 and refer to a booklet containing guidelines for textile category 310. We assume you are referring to the Textile Category Guidelines, CIE 36/79, of September 17, 1979. The guidelines for this category state that the TSUSA definition which did not change between 1979 and 1984, for gingham is adequate. That definition for gingham, Statistical Headnote 1(b), in Subpart 3A, Schedule 3, TSUSA, provided:

> (b) Gingham: Plain-woven and fancy yarn-dyed fabrics having two or more colors in the warp and/or in the filling. Includes checked and plaid ginghams, gingham stripes, cloth of "haircord" construction (i.e., cloth having cord stripes in the warp which are formed by yarns woven from an extra beam), and "poplin" type fabrics with a difference in picks per inch and ends per inch of less

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E3

than 40 (e.g., 90 x 60). Excluded are yarn-dyed handkerchief fabrics made in box looms. The following are examples:

Yarn number (before weaving) Warp	Filling	Yarns per inch Warp	Filling
20s	20s	62	50
40s	40s	80	70
40s	40s	90	60
40s	40s	70	60
30s	30s	70	60
30s	30s	76	64
30s	40s	73	66
30s	40s	90	60

The construction parameters in the definition above were stated to be examples only and were not intended to include all possible constructions for gingham.

Basically, gingham is a plain woven yarn-dyed fabric which is a check, plaid or stripe. Examination of the fabric samples shows that both fabrics are plain woven, yarn-dyed, and fancy or figured (containing two or more colors in the filling). One fabric is a stripe. The other is a plaid. Our tests indicate that neither fabric has a difference between the warp and filling of 40 or more. Both samples conform to the TSUSA definition of gingham and, therefore, must be classified as such.

You note that the Guidelines exclude chambray and madras from textile category 310 and conclude the fabrics in question fall into category 318 by default.

Where there is a conflict between the Guidelines and a statistical headnote in the TSUSA, the headnote prevails. However, here we note no real discrepancy. Chambray is a fabric with a single color in the warp and a single color in the filling. The fabric designated style 1221 has two different colors in the filling and, therefore, is not a chambray. Further, after reviewing the history of the Guidelines, we are convinced that the type of madras fabric

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

E4

067290

meant to be excluded was a figured weave fabric, not the plain weave as represented by the fabric designated style 1038.

In addition, since both types of fabrics have two or more colors in the filling, they should have been classified as fancy or figured fabrics pursuant to Headnote 3, Subpart 3A, Schedule 3, TSUS.

In view of the above, we can find no reason to exclude quality 1038 or quality 1221 from category 310. Both fabrics are properly classifiable under the provision for woven cotton fabrics, fancy or figured, colored, in item number 325.-- TSUS. We are advised by our National Import Specialist that the statistical suffix applicable to these fabrics in 1984 should have been 18 or 20.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

UNITED STATES GOVERNMENT
Memorandum

DEPARTMENT OF THE TREASURY
UNITED STATES CUSTOMS SERVICE

077390

DATE: JUN 23 1986

FILE: CLA-2 CO:R:CV:G
077390 TLL

TO : Area Director of Customs
New York Seaport
New York, New York 10048

FROM : Director, Classification and Value Division

SUBJECT: Reconsideration of Headquarters Ruling Letter Dated December 29, 1983, File No. 073464

This is in response to a memorandum dated November 15, 1985, submitted by the New York Seaport concerning a recent court case, Samsa Foods, Inc. v. United States, Court No. 81-10-01363, Slip Op. 85-37 (March 25, 1985) (hereinafter referred to as Samsa and its implications with regard to HRL dated December 29, 1983, file No. 073464.

The merchandise involved in Samsa was:

> ...rolls of unassembled plastic packaging for various noodle mixes produced by plaintiff. Printed on each roll at regular intervals are the trademarked product brand name, product descriptions, preparation instructions, and magnetic black ink marks. The marks are read by an electric eye, which triggers a mechanism that cuts, folds, and seals the plastic around various noodle mixes in accordance with the location of the marks. The subject merchandise thus serves both to protect its contents and promote the sale of the product.

Slip Op. 85-37 at 2-3.

The court in Samsa preliminary to classifying the imported merchandise under item 772.20, Tariff Schedules of the United States (TSUS), made the determination that the imported merchandise was "articles" under the TSUS rather than merchandise.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

EG

The merchandise involved in file HRL dated December 29, 1983, was:

> ...40 pound MF bleached kraft sugar bag, imported in rolls 16-1/8 inches in width. The paper is completely pre-printed by flexographic process with all the printing that is necessary for a sugar bag, including such instructions as "To open, lift flap" and "Cut here for easy pouring spout." Each printed impression will make an individual bag. After importation, the rolls of paper are cut up, glued and assembled into sugar bags.

The competing tariff provisions involved in file No. 073464 were the basket provision for articles of paper, not specially provided for, in item 256.90, TSUS, and the provision for other printed papers, not specially provided for, not lithographically printed, weighing over 18 pounds per ream, in item 254.70, TSUS. The merchandise was classifiable under item 254.70, TSUS.

In reviewing the Sarma case and your comments thereon, we agree that if the merchandise described in Sarma is an article then the merchandise described in HRL dated December 29, 1983, would also be considered an "article" for tariff purposes. This being the case, Headnote 1, Subpart B, Part 4, Schedule 2, becomes relevant. That headnote provides in part:

> This subpart covers paper and paperboard, in rolls and sheets, cut to size or shape, and not made up into articles, finished or not finished.

Since item 254.70, TSUS, is set forth in Subpart B, we are precluded from classifying these "articles" within item 254.70, TSUS. Therefore, the merchandise should be classified under item 256.90, TSUS.

Harvey B. Fox

Ms. April Evans
The A.W. Fenton Company, Inc.
P.O. Box 19937
Columbus, Ohio 43219

Dear Ms. Evans:

Your letter dated October 21, 1985, regarding the classification of recipe cards has been forwarded to Headquarters for response.

Sample cards were attached. They are two copies of a Recipe Number 9, of a set of unstated number; each is printed by a lithographic process on paper, with a picture of a cooked dish, Skillet Chicken with Biscuit Dumplings, on one face, and a recipe for the preparation of listed ingredients, printed in two columns, on the other side. The cards measure approximately 4 5/8 by 4 1/8 by .008 inches.

In reviewing the classification of this merchandise, we have concluded that the printing of the recipe in columns is the controlling point and that the merchandise would be considered charts for classification purposes. The merchandise would be classified under item 273.35, Tariff Schedules of the United States (TSUS), with a free rate of duty.

Sincerely,

Arthur P. Schaffner

Mr. Joseph B. Caleca
F.W. Myers & Co., Inc.
One World Trade Center
New York, New York 10048

Dear Mr. Caleca:

This is in response to your ruling request submitted on behalf of Montgomery Ward Importing, Inc., inquiring as to the tariff classification of two metal tool chest and cabinet combinations, both manufactured in Taiwan.

Article 4271 is comprised of a cabinet and tool chest. The cabinet has dimensions of 26 inches in width, 26 1/2 inches in height and 13 inches in depth. The cabinet contains two drawers and a large storage compartment. It is designed to stand on the floor. The corresponding tool chest is designed to sit on top of the cabinet. It has seven drawers and is not equipped with handles. The chest is 24 inches in width, 13 1/4 inches in height and 11 inches in depth.

Article 4277 also is comprised of a cabinet and tool chest. The cabinet has one drawer and a large storage compartment. It has dimensions of 22 inches in width, 23 1/2 inches in height and 12 1/2 inches in depth and is designed to stand on the floor. The corresponding tool chest is 20 inches in width, 11 1/2 inches in height and 10 inches in depth. It, too, is not equipped with handles.

The cabinets fall within the tariff definition of furniture in that they are movable articles of utility designed to be placed on the floor or ground designed to equip the home or other establishment. See Headnote 1, Schedule 7, Part 4A, Tariff Schedules of the United States (TSUS). Both cabinets are classifiable as furniture, ..., not specially provided for: other, under item 727.70, TSUS, dutiable at the rate of 4.7 percent ad valorem. See I.A. 65/83.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

E9

Inasmuch as the tool chests are not equipped with handles, they are not cases designed to be carried with the person and are disqualified from tariff classification under the luggage provisions. See Customs Ruling Letter of February 6, 1984, (Control No. 073673). Accordingly, the chests are classifiable as articles of iron or steel, not coated or plated with precious metal: other articles; other, under item 657.25, TSUS, dutiable at the rate of 6.2 percent ad valorem.

Sincerely,

Arthur P. Schaffler

Area Director of Customs
Airport International Plaza, Room 210A
Newark, New Jersey 07114

Dear Sir:

Re: Application for Review of Protest No. 1001-5-007072

This protest was filed against your decision in the liquidation on March 1, 1985, of entry No. 84-927516 dated July 19, 1984, covering a shipment of "Marty Mouse" produced in South Korea.

This ruling concerns the proper tariff classification of "Marty Mouse," a Hartz Mountain cat toy.

FACTS:

The merchandise at issue is "Marty Mouse," Hartz Mountain Code No. 114004, a cat toy which is a textile mouse with a hat and with eyeglasses.

The Newark import specialist classified Marty Mouse under the provision for articles not specially provided for, of textile materials, not ornamented, of man-made fibers, of pile or tufted construction, in item 389.50, Tariff Schedules of the United States (TSUS).

The attorney for the protestant argues that Marty Mouse is ornamented, therefore it should be classified under the provision for articles not specially provided for, of textile materials, other articles, ornamented, in item 386.13, TSUS.

ISSUE:

Is Marty Mouse an ornamented article for tariff purposes because of its hat and eyeglasses?

E11

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

LAW AND ANALYSIS:

Customs has consistently ruled that features which are necessary to create the article itself do not constitute ornamentation for tariff purposes. See C.I.E. 6871/66, CBR Ruling 72-0263, Protest Review Decision (PRD) 75-15 of May 27, 1975, Customs Headquarters Ruling Letter (HRL) 069169 of December 4, 1981, and HRL 073029 of October 11, 1983.

The importer concedes that the eyes or eyeglasses attached to Marty Mouse may help create the toy, however, it believes that the hat ornaments Marty Mouse. The attorney for the importer cites Headnote 3(a)(iii) and (iv) of Schedule 3, TSUS, Endicott Johnson Corp. v. United States, 82 Cust. Ct. 49, C.D. 4787 (1979), and Blairmore Knitwear Corp. v. United States, 60 Cust. Ct. 388, C.D. 3396 (1968) in support of her client's claim that Marty Mouse is ornamented. She argues that the toy mouse is created by its body, eyes and tail, while the hat is unnecessary to create a mouse, therefore it is ornamentation.

In PRD 75-15, one of the cat toys under review was a duck-like figure wearing a cap. Inasmuch as the cap (i.e., hat) was held to be one of the features which created the duck-like figure, it was held not to be ornamentation.

In HRL 073029, a textile mouse wearing a hat and eyeglasses was found to be unornamented because the hat and the glasses were used to create the article.

As stated in PRD 75-15 "...whether or not a doll or plaything reasonably resembles any known animal is not the governing criterion. Nor is the fact that the doll or plaything is intended for use by an animal that may or may not be capable of understanding or recognizing the features

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E12

077444

of that doll or plaything. What must be determined is whether the features on the doll or plaything are used to create that article or merely to decorate it." HRL 069169 and HRL 073029 also emphasize the idea that features which are necessary to create the article itself do not constitute ornamentation. We find that both the hat and the eyeglasses are necessary to create the article itself, therefore they do not constitute ornamentation.

HOLDING:

Marty Mouse is not ornamented. It is classified in item 389.50, TSUS. The protest is denied in full. A copy of this decision should be sent to the protestant's attorney along with the Customs Form 19, Notice of Action.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Mr. Lawrence Reisman
Good Idea Corp.
320 Northern Blvd.
Suite 9
Great Neck, New York 11021

Dear Mr. Reisman:

You have requested a ruling on the tariff classification of four sewing kits from Taiwan.

Three of the sewing sets are contained in hard plastic cases with hinged covers. Each sewing set contains the following articles: scissor measuring approximately 2 1/2 inches, two needles, one plastic thimble, one needle threader, and a formed plastic pin cushion. The three cases contain 10, 12, and 14 spools of varicolored threads, respectively. Each spool contains 35 yards of spun polyester thread.

The remaining sewing kit consists of 12 spools of assorted colored threads, two needles on a piece of paper-backed foil, a safety pin, an aluminum needle threader, and a pair of scissors. These items are contained in a blister package.

The term "sewing set" was construed in New York Merchandise Co., Inc. v. United States, 66 Cust. Ct. 20, C.D. 4162 (1971) where the court stated:

> In our opinion the sine qua non to designation of an article of commerce as a "sewing set" is that an article which contends to be such contains, needle and thread, the essentials needed to perform the act of sewing, in addition to whatever other sewing accessories it may happen to include, i.e., scissors, thimbles, pins, tape measure, etc.

In the past, Customs required the container to be substantial or reuseable. See Headquarters Ruling Letter 072763 dated June 4, 1984. It is now our view that the requirement for a substantial or reuseable container is erroneous. In a recent decision dated March 17, 1986, file No. 077311, we ruled that a sewing kit contained in a blister package was classified in item 651.13, TSUS, as a sewing set in leather cases or other containers of types ordinarily sold therewith in retail sales, other in item 651.13, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E14

Thus, all four kits are classifiable in item 651.13, TSUS. Articles from Taiwan that are classifiable in item 651.13, TSUS, are eligible for duty-free treatment under the Generalized System of Preferences upon compliance with all pertinent requirements.

Sincerely,

Arthur P. Schifflin
Chief, General
Classification Branch

Arthur V. Fitzwater
Reed Rolled Thread Die Co.
Industrial Park
Holden, Massachusetts 01520-1895

Dear Mr. Fitzwater:

In a letter of December 13, 1985, you requested a ruling on the classification of certain tool steel products, called die blanks, imported from Japan.

The die blanks are produced from hot rolled or forged AISI D-2 tool steel bars. After being cut from material lengths of bar to approximate individual lengths, the blanks are milled to exact length. The blanks are then ground on all four sides to specific dimensions. The ends may be finished as follows: by a double bevelling at 5 degree angles, by a single bevelling at a 5 degree angle, or by a straight edge on both ends. After the ends are finished, the blanks are imported and then further processed. Processing after importation consists of grinding or milling the cutting threads, and polishing and buffing.

The blanks with straight edges are classifiable under the provision for other bars of alloy tool steel in item 606.95, Tariff Schedules of the United States (TSUS). Although you state that these are to be used as blanks for thread rolling machinery, they have not been advanced or dedicated to the point where they are considered to be other than bar stock. In Avins Industrial Products Co. v. United States, 62 CCPA 83, C.A.D. 1150 (1975), affirming 72 Cust. Ct. 43, C.D. 4503 (1974), the court held that certain lengths of wire, specially straightened and cut to length for use as antennas, were classified as wire rather than as unfinished antennas because the wire lengths were capable of use in applications other than as antennas.

The blanks with the bevelled ends, however, have been processed by an operation that is not allowable under Headnote 1, Part 2, Schedule 6, TSUS, for products classifiable in Part 2 of Schedule 6. Furthermore, the bevelling is performed to the specifications for use in a particular screw thread rolling machine. They have been advanced to the point where they are dedicated to a specific, sole use, and are considered to be unfinished interchangeable tools for the thread rolling machine.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

F2

Therefore, the blanks with bevelled ends are classifiable under the provision for interchangeable tools for hand or machine tools not suitable for cutting metal, in item 649.49, TSUS.

The articles classified in item 606.95, TSUS, are subject to quota under items 926.22 (for products entered on July 20, 1985, through July 19, 1986) and 926.23 (for products entered on July 20, 1986, through July 19,1987), Appendix to the Tariff Schedules.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

R. Brian Burke, Esq.
Rode & Qualey
295 Madison Avenue
New York, New York 10017

Dear Mr. Burke:

Under the authority of Part 177, Customs Regulations, you have requested the tariff classification and quota status of eight styles of hand-crocheted cotton garments from the Philippines. You presented additional arguments at a meeting at Customs Headquarters on November 18, 1985, attended by representatives of the Government of the Philippines and Customs and Commerce. Your request contained in a letter dated December 6, 1985, was accompanied by several sample garments.

The eight sample tops that are the subject of this request are hand crocheted with the exception of the knit waistbands that are machine-made.

We agree with your claim that the garments are classifiable for tariff purposes as blouses rather than sweaters. Each top covers the body from the neck to below the waist and satisfies the definition of the term "blouse." These garments crocheted from fine to medium sized yarns that result in a lightweight fabric with varying amounts of openwork probably will be worn over underwear. Nor do we regard the amounts of openwork fabric as indecent or immodest as to preclude these garments from being classifiable as blouses.

You correctly note that none of the garments have a net construction: that is, an open mesh fabric with uniform spacing. To classify a garment as "net," the fabric used to manufacture the garment must be machine-made. See T.D. 75-57 and HRL 059884 dated September 20, 1978. It is our judgment that the machine-made waistband on a hand-made garment is not sufficient to result in classifying the garment as net. A description of the individual garments follows:

Style 8501 is a sleeveless pullover blouse with a round neck and scalloped edging at the neckline and arm openings. It has a net-like construction punctuated by vertical rows of raised knots of yarn known as "popcorn stitches" that are formed during the knitting process and do not constitute ornamentation for tariff purposes. Style 8604 is similar to style 8501 except that the popcorn stitches form diagonal rows across the front panel, and the neck and sleeve openings have straight rather than scalloped edgings.

F4

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Style 8602 is a sleeveless pullover with a V-neck, and features decorative scalloped edging at the armholes and neck, and a row of "popcorn stitches" on each side of the front yoke. The fabric of the front panel consists of hand knit patterns with varying degrees of openwork.

Like style 8602, style 9401 is a sleeveless pullover blouse composed of a mesh-like fabric with a V-neck and decorative scalloped edging at the armholes and neck. Popcorn stitches formed during the knitting of the fabric are scattered over the front panel. This garment has textile appliques in the shape of flowers which are stitched to the front panel.

Style 9404 is a sleeveless pullover blouse with a V-neck and decorative picot edging at the armholes and neck. The front panel consists of openwork fabric with a diamond shaped design.

Style 9406 is a sleeveless pullover blouse with a V-neck and picot edging at the armholes and neck. The fabric of the rear panel and the top front half consists of open mesh with scattered popcorn stitches. The remainder of the front panel consists of a diamond-patterned knit with small pointelle holes.

Style 9409 is a sleeveless pullover blouse with a V-neck and with scalloped edging at the neck and armholes. The front and back panels have openwork fabric in an inwrought design.

Style 9411 is a sleeveless pullover blouse with a round neck. The armholes and neck have decorative picot edging. The front and back have openwork in an inwrought design.

You have claimed that the garments that are the subject of this ruling are not of lace construction. As you point out, the term "lace" for tariff purposes is defined as an "openwork fabric with a preconceived inwrought design" E. C. Carter & Sons v. United States, 38 Cust, Ct. 368, C.D. 1889 (1957). That is, the garment must have a significant amount of openwork with an intricate design. Delicacy is a characteristic associated with lace. Openwork garments knit or crocheted from bulky yarns in preconceived inwrought designs may lack the delicacy associated with lace. In Headquarters Ruling Letters 059454 dated June 19, 1979, and 059958 dated May 3, 1979, Customs held that certain openwork sweaters were of "lace" construction because they were sufficiently delicate to be commercially acceptable as lace.

Turning to the merchandise at hand, it is our view that styles 9406, 9409, and 9411 are sufficiently delicate, and possess significant openwork in an inwrought design to be considered lace wearing apparel.

You claim that the picot stitch or scalloped edging does not ornament these garments, because it serves the functional purpose of finishing the edges on these garments. In our opinion, that is not decisive. The test that has been developed to determine if a feature constitutes ornamentation is whether its primary purpose is decorative rather than functional. Schedule 3, Headnote 3(b)(iii), TSUS, specifically states that an edging is

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

not required to have a separate existence from the fabric or article on which it appears in order to constitute ornamentation. Ordinarily, the fact that a feature completes a raw edge is entitled to great weight in determining whether it is primarily decorative or functional. If an edging, however, is formed during the knitting process, it would always complete the garment. Such an edging, as provided for in the headnote may be yet considered ornamentation if the balancing test results in a finding that the effect produced by the edging is primarily decorative. Applying this test to the subject edgings, it is our view that they are more pleasing to the eye than a straight edging would be. Nor, do we believe that the decorative effect of these edgings is merely incidential. It is true, as you note, that the edges are small and are created from the same yarn which is used in the body of the garment. Unlike Brittania Sportswear v. United States, 5, CI.T. 212, 214 (1983), where the court mentioned those factors in holding that a hammerloop on a pair of jeans did not constitute ornamentation, both edgings are highly decorative and do indeed constitute ornamentation.

As for the floral-shaped designs that are stitched to the front panel of style 9401, they are not formed at the same time the garment is created; rather these decorative designs are appliques under Headnote 3(a)(ii), Schedule 3, TSUS, and accordingly, ornament the garment.

The final issue to be resolved concerns whether these garments are exempt from quota under the Philippine Bilateral Agreement. You have argued that all hand-crocheted garments which are products of the cottage industry and which have been properly certified by the Philippine Garments and Textile Export Board are exempt from quota.

Article 16(A) of the Bilateral Textile Agreement provides as follows:

> In conformity with Article 12, paragraph (3) of the Arrangement, this agreement shall not apply to exports of handloom fabrics of the cottage industry of the Republic of the Philippines, or handmade cottage industry products made of such handloom fabrics in the Republic of the Philippines, or to folklore handicraft textile products traditional to the Republic of the Philippines including those specified in Annex D as "Philippine Items," provided that such products are properly certified under arrangements established between the two Governments pursuant to paragraphs 11 and 18 of this agreement and the above mentioned article of the Arrangement. "Philippine items" are traditional Philippine products, cut, sewn, or otherwise fabricated by hand in cottage units of the cottage industry. Additional items may be subsequently added to this list by mutual agreement.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

077470

Annex D

Philippine Items

Philippine Traditional Folklore Handicraft Textile Products.

Philippine Items are traditional Philippines Products, cut, sewn, or otherwise fabricated by hand in cottage units of the cottage industry. The following is the agreed upon list of such items.

Batik and Harlon Fabrics - hand woven fabrics of the cottage industry.

Banaue Cloth - Cotton Handloom Fabric in Multi-Colors.

Other Hand Woven and Handloom Fabrics of the Cottage Industry.

Articles and garments made by hand from hand woven and handloomed fabrics.

Hand crocheted garments, shawls, hats, and accessories, including the "Catsa Group" type garments (heavily hand crochet work in combination with coarse greige or dyed cotton fabric or batik fabric).

Taking these provisions together, it is our view that only hand-crocheted garments that are traditional Philippine products that are cut, sewn, or otherwise fabricated by hand in cottage units of the cottage industry are exempt under Annex D. The garments at hand are clearly not traditional Philippine items; accordingly, they are subject to the Bilateral Textile Agreement.

Since our meeting at Customs Headquarters on November 18, 1985, we have been advised by the Committee for the Implementation of Textile Agreements that the Government has agreed, for 1986 only, to permit entry for consumption and from withdrawal from warehouse for consumption of both traditional and non-traditional hand-crocheted garments certified under the provisions of Paragraph 1A and Annex D by the Government of the Philippines. See 51 Fed. Reg. 10651 (1986).

To be considered exempt from quota, garments must be entirely hand-crocheted. The garments which are the subject of this ruling have waistbands that are machine-made; thus, they do not qualify for the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

057470

exemption. We note that if the garments, including the waistbands, were to be entirely hand-crocheted, then they would be exempt from quota under Annex D of the Bilateral Textile Agreement between the United States and the Philippines.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

077473

08 JUN 1986

Edward J. Farrell, Esq.
Bronz & Farrell
2021 K Street, N.W.
Washington, D.C. 20006

Dear Mr. Farrell:

This is in reply to your letter dated December 9, 1985, requesting a ruling on behalf of your client Pascobel, Inc. Montreal, Canada, as to two products. You submit that both products are properly classifiable as casein mixtures under item 493.17, Tariff Schedules of the United States (TSUS). As such, you suggest the products would be free of quota.

The first product, Nollibel P25-C, is a mixture of calcium and sodium caseinate with sweet dried whey, whey protein concentrate, and edible lactose. It has the following composition:

Lactic acid	1.5 percent
Ash	7.5 percent
Lactose	60 percent
Fat	2 percent
Protein	25 percent
Moisture	4 percent

The value composition would be:

Composition	Percent Value
Caseinate (Mixed Na and Ca)	43.2
Sweet dried whey	30.8
Dried whey protein concentrate	22.0
Edible lactose	4.0

Further, you point out that Nollibel P25-C is used as an ingredient in such frozen products as ice cream, fruit ice, sorbets, ice milk; in milk desserts such as dessert custards, jellied milk, etc; and in prepared dishes such as milk sauces, quiche fillings, pancake fillings, etc.

The second product concerned, Belcover P25-C, is a mixture of calcium and sodium caseinate with denatured sweet dried whey protein, whey protein concentrate and lactose and has the following composition:

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Moisture	4 percent
Protein	25.5 percent
Lactose	61 percent
Fat	0.5 percent
Ash	7.5 percent
Lactic acid	1.5 percent

You provide the following value breakdown for this product:

Composition	Percent Value
Caseinate (mixed Na and Ca)	43.5
Sweet dried denatured whey	31.6
Dried whey protein concentrate	22.2
Lactose	2.7

Belcover P25-C is used principally in chocolate product formulas and its incorporation is possible in a whole range of chocolate products such as milk chocolate bars or blocks, milk chocolate coverings, confectionary chocolate, and chocolate fillings. Its characteristics allow it to obtain homogenous sized particles having a smooth surface without fissures or cavities. It exhibits excellent behavior during crushing, reduces fat liaison, allows for reduction of fat content in bars because of the gain in viscosity and also allows for a reduction in the thickness of coating due to the reduction of the flow limit which it permits.

The controlling classification provision is item 493.14, TSUS, which appears under the superior heading for "Casein and mixtures in chief value thereof (other than a product described in item 118.45)." Item 493.12, TSUS, provides for the classification of casein. Item 493.14, TSUS, provides for the classification of:

> Dried Milk (described in items 115.45, 115.50, 115.55, and 118.05) which contains not over 5.5 percent by weight of butterfat and which is mixed with other ingredients, including but not limited to sugar, if such mixtures contain over 16 percent milk solids by weight, are capable of being further processed or mixed with similar or other ingredients and are not prepared for marketing to the retail consumers in the identical form and package in which imported.

Item 493.17, TSUS, provides for the classification of "other" casein and mixtures.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

MOLLIBEL P25-C is a mixture of calcium and sodium caseinates, sweet dried whey, whey protein concentrate, edible lactose, and 2 percent fat. It is in chief value of the caseinates. Item 493.14, TSUS, provides for dried whey (118.05, TSUS) mixed with other ingredients, having over 16 percent milk solids, not over 5.5 percent by weight of butterfat, and not packaged for retail trade. Since this product is a mixture in chief value caseinates having a dried milk described in item 118.05, TSUS, it is classifiable under item 493.14, TSUS, and subject to the provision of item 950.19. The product is prohibited from entering the commerce of the United States.

BELCOVER P25-C is a mixture of calcium and sodium caseinate, denatured sweet dried whey protein, whey protein concentrate, lactose, and 0.5 percent fat. It is in chief value of the caseinate.

Therefore, it is not a direct mix of an item provided for in item 493.14 (one or more items 115.45, 115.50, 115.55 or 118.05). Since this article is in chief value of caseinates, and is excluded from classification as an edible preparation because of Headnote 3, Subpart B, Part 15, Schedule 1, classification under item 493.17, TSUS, is appropriate.

Sincerely,

John T. Kerl
for Harvey B. Fox

UNITED STATES GOVERNMENT
Memorandum

DEPARTMENT OF THE TREASURY
UNITED STATES CUSTOMS SERVICE

077514

DATE: JUL 18 1986

FILE: CLA-2:CO:R:CV:G
077514 JLF

TO : Area Director of Customs
New York Seaport
New York, New York 10048

FROM : Director, Classification and Value Division

SUBJECT: Internal Advice Request No. 92/85 Concerning the Tariff Classification of Merchandise Identified by the Importer as "Santa's Song Book."

This is in response to your memorandum dated December 6, 1985, regarding the tariff classification of merchandise known as "Santa's Song Book," under Internal Advice 92/85. Your memorandum was initiated by a request from Patrick Powers Customhouse Broker for the importer, Hope Industries, dated October 17, 1985.

We find the proper classification of this article to be an entirety under the provision for other electrical articles and electrical parts of articles, not specially provided for, in item 688.42, Tariff Schedules of the United States (TSUS), with separate classification of the batteries in item 682.95, TSUS.

Classification of this article as a toy in item 737.95, TSUS, is inappropriate since the quality of emotion induced by the user of the article is not mere amusement, but rather that of musical interest. This merchandise is not characteristic of a plaything that is chiefly used for amusement.

Classification in item 688.34, TSUS, which provides for other electrical articles or electrical parts of articles using pre-programmed digital integrated circuits, is also improper since the song book does not produce the rectangular wave-based sound which was intended as part of the requirement for inclusion in item 688.34, TSUS. Rather, the article produces sound by a single tone oscillator feeding a flat speaker which produces the tone corresponding only to the individual key being depressed.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

F12

- 2 -

In view of the foregoing, the subject merchandise marketed as "Santa's Song Book" is properly classifiable as an entirety in item 688.42, TSUS, with separate classification of the batteries in item 682.95, TSUS.

You should inform the inquirer of this ruling.

Harvey B. Fox

Miss Beth C. Ring
Attorney at Law
Sandler & Travis, P.A.
505 Park Avenue
New York, New York 10022

Dear Miss Ring:

Your letter of December 26, 1985, supplements the information provided in your request for a ruling dated August 14, 1985, and follows our letter to you dated December 24, 1985 (our file No. 076798). You have requested a ruling as to the tariff status of finished shirts exported from Israel (country "A"), which are made in part in country "A" and in part in Botswana (country "B"). Your request is on behalf of Giallo Apparel, 9 Dorset Drive, Delmar, New York.

You request confidential treatment of the name of country B and for the extensive cost and production figures provided us. Samples of two shirts have been provided: an oxford cloth boy's size with button-down collar and a women's over-sized "big shirt." We understand that these samples are not made in the two countries specified, but are provided as examples of the shirts proposed to be imported. You state that in the past your client has imported shirts that have been classified in items 379.55 and 383.47 of the Tariff Schedules of the United States (TSUS). Since September 1, 1985, those items have been renumbered to 381.56 and 384.46 respectively and bear the respective column one rates of duty of 21 and 16.5 percent ad valorem. When eligible for duty reduction under the United States-Israel Free Trade Area Implementation Act of 1985, the items would bear 14.7 percent and 11.6 percent ad valorem rates of duty.

Although your original ruling request described four possible production alternatives, you have since identified one of these as the production method to be followed. This method has the patterns made in country A and shipped with the shirt fabric to country B where the components would be cut, the collars, cuffs, pocket flaps and placket would be sewn (or faced) and the buttons sewn to the placket. All the components would then be returned to country A where buttonholing of the placket and presumably of the cuffs (and in some instances the collar) takes place prior to assembly and pressing.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

F14

Citing 19 CFR $12.130(b), you correctly note in your submission of August 13, 1985, that a textile product that consists of materials produced in more than one foreign country is considered a product of the country where it last underwent a substantial transformation or a "transformation into a new and different article of commerce." You also note that an example provided in our regulations (19 CFR $12.130(e)(1)(v)) namely, "substantial assembly by sewing and/or tailoring of all cut pieces of apparel articles which have been cut from fabric in another foreign...country...into a completed garment (e.g. the complete assembly and tailoring of all cut pieces of...shirts)" conforms to the operations expected to be undertaken in country A by your client, suggesting that the finished shirts would be a product of country A.

You responded to our request for detailed financial information by providing the name and function of the machine involved in each operation, the capital investment involved with each processing operation (by stating the cost of the machines), and the costs involved with each processing operation by stating the wage rate of each operator by occupation, whether in country A or country B. This information remains part of our file and forms the basis for our decision.

The information you provided shows that the parts of the shirt, even those faced, do not constitute a shirt when they leave country B and that the processes that take place in country A substantially transform the parts into a finished shirt which is a new and different article of commerce.

The capital investment is primarily in country A when compared to country B and bears a ratio of about 12:1. The time involved in labor applied to the garment or its parts runs in favor of country A in a ratio of about 2:1. Our regulations require an examination of time, labor, and capital, among other things, to perform an analysis of whether manufacturing processes are substantial in a given country with respect to a specific product; therefore, our focus must be on the product, itself, and what is done to it, to determine where the substantial manufacturing took place. Nevertheless, it is useful to compare the relative cost and complexity of the manufacturing steps to arrive at a country of origin determination.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

077536

G1

Taking all the factors presented into consideration, we conclude that country A is the country where the substantial manufacture of these shirts takes place. Therefore, they should be marked as having Israeli origin.

The difficulty in making a determination of country of origin will necessarily vary according to the financial facts and evidence presented. Our regulations are drafted in comprehensive language to permit relevant factors to be considered. Therefore, simple tests such as comparing the number of components assembled in one country to the number assembled in another, while easy to apply, will not necessarily lead to a correct answer.

If your client's processing or manufacturing plans change, we will endeavor to respond with a country of origin determination to specific descriptions of the new processes, as appropriate.

The claim for confidentiality will be allowed for the business and proprietary information presented. The claim of confidentiality with respect to the identity of country B will not be allowed on the grounds that the mere name or identity of a country from which goods may be lawfully imported into the United States is not a proprietary or business confidential matter.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

John K. Williamson, Esq.
Allegheny International, Inc.
Two Oliver Plaza
P.O. Box 456
Pittsburgh, Pennsylvania 15230

Dear Mr. Williamson:

In your letter of November 1, 1985, you inquire as to the tariff classification of a product known variously as the Tullen Safe-T-Snips, Tullen Snips, Tullen Kitchen Cutters and Tullen Work Cutters, from New Zealand. A sample and descriptive literature were submitted.

You indicate that Customs officers at Savannah propose to classify the snips under the provision for other scissors and shears, and blades therefor, in item 650.92, Tariff Schedules of the United States (TSUS), dutiable at the 1986 rate of 10 cents each, plus 11.6 percent ad valorem. You advance arguments that these articles are neither scissors nor shears, citing certain trade literature, but are actually snips. You state that snips are designed for cutting sheet metal, sheet brass, copper, plastic cloths, and other materials, which is what the subject articles do. Therefore, you conclude that the provision for tin snips and parts thereof in item 648.91, TSUS, dutiable at the rate of 2 cents each plus 5.2 percent ad valorem, encompasses not only conventional tin snips but snips of all kinds.

The submitted sample measures 7-1/4 inches long, has plastic handles and 2-3/4 inch long cutting blades of light gauge metal with a spring positioned so as to keep the blades open. Squeezing the handle compresses the blades. Tariff terms are normally interpreted in accordance with their common and commercial meanings, which are presumed to be the same. Although various lexicographic authorities we have consulted indicate that the term "snips" denotes a variety of hand shears used especialy to cut sheet metal, we acknowledge from the materials you have submitted, and from other sources, that the term "snips" may possibly encompass shears used to cut a variety of materials. However, the provision under consideration is for "tin" snips, in item 648.91, TSUS, which admittedly represents a narrower class or kind of merchandise. The type of hand tool classifiable in item 648.91, also referred to as metal snips or metal shears, are specially designed for cutting sheet metal. The multi-purpose Safe-T-Snips under consideration possess no special design features dedicating them to the cutting of sheet metal. Consequently, they are not classifiable as tin snips.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G3

Inasmuch as the Safe-T-Snips are a species of hand shears and are not more specifically provided for as tin snips, they are classifiable for tariff purposes under the provision for scissors or shears, in item 650.92, TSUS.

Sincerely,

Arthur P. Schaffner

Re: Application for Further Review of Norfolk Protest No. 1404-4-000008

Dear Sir:

This application for further review is against your classification of certain strip brushes under item 389.62, Tariff Schedules of the United States (TSUS), as textile articles not specially provided for of man-made fibers. The protestant is of the opinion that the merchandise should be classified as "other brooms and brushes", under item 750.70, TSUS.

ISSUE:

Whether the strip brushes are subject to classification under item 750.70, TSUS, as other brooms and brushes.

FACTS:

The strip brushes (samples provided) are imported in various lengths (3ft. to 10ft.) depending upon use and style. These strip brushes have synthetic or natural bristles supported in an aluminum or iron extrusion, essentially finished, requiring additional modifications after importation dependent upon area of use.

There appear to be many uses for these strip brushes which can be divided into three groups:

1. Weather strips used as a weather seal for doors and windows
2. Brushes (hand) for home and factory
3. Brushes (mechanical) for home and factory

GS

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

The merchandise was entered under item 771.55, TSUS, as filaments of plastics ... other than cellulosic plastics materials. On October 14, 1983, the merchandise was liquidated under the classification at entry. On January 6, 1984, however, the merchandise was reliquidated, and all items were classified under item 389.62, TSUS, as textile articles not specially provided for of man-made fibers.

DISCUSSION OF LAW:

In Nestle-Lemur Company v. United States, 37 Cust. Ct. 209, C.D. 1825 (1956), the court emphasized what it considered important in defining the term "brush" by stating:

> It is noted that the quoted definition has reference to the use of brushes, and, in the case of Keer, Maurer Co. v. United States, 32 Cust. Ct. 441, Abstract 57959, we observed that, in a general way, there was a use connotation to the term in the sense that articles embraced by the term exhibited a "brushing" action in their use. There is no question, however, but that that term as used in the tariff act provision, hereinbefore quoted, is not a use designation but is an eo nomine designation, that is to say, the test classification is not the use of the article, but its name. Under these circumstances, use, in the condition as imported, is not a necessary concomitant of articles classifiable as brushes; it is sufficient if in the condition as imported, they respond to the name of brush. We think there is no question but that the articles at bar are, in that sense, brushes.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G6

077591

The court in Nestle-Lemur had before it the first definition found in Webster's New International Dictionary, 1933, of the term "brush" which provided:

> 1. An instrument composed of bristles, or the like, set in a suitable back or handle, and used for various purposes. Brushes have different shapes and names according to their use; as clothes brush, paint brush, etc.

In accord is the definition of "brush" set forth in Webster's New Twentieth Century Dictionary, Unabridged (2nd ed. 1980) which defines "brush" as "a device having bristles, hairs, or wires fastened in a back of some sort, with or without a handle attached: brushes are used for cleaning, polishing, painting, smoothing the hair, etc."

Applying the criteria set forth in the Nestle-Lemur Company case, the strip brushes are subject to classification as brushes. The bristles are permanently attached to the metal core forming the brush strip and such brush strip is essentially finished. The brush strip is bought and sold as a brush strip and regardless of ultimate use, has the name "brush". The brush strip has the name and structure (bristles) of a brush. The court in Nestle-Lemur says "use" is not a necessary concomitant of articles classifiable as brushes - so long as they respond to the name "brush".

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

G1

077591

CONCLUSION:

The merchandise is classified under item 750.70, TSUS. Accordingly, you are directed to allow this protest. A copy of this decision should be attached to the Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffner

SUBJECT : Internal Advice Request No.83/85 Concerning Whether Certain Children's Blanket Sleepers Are Ornamented Or Not

This request for Internal Advice was initiated by C-Air Custom House Brokers & Forwarding Inc. on behalf of its clients, Bradley Imports Ltd. and the Baron Group Ltd. The inquiry concerns whether certain children's blanket sleepers made in Taiwan are ornamented or not.

FACTS:

One sample was submitted along with the internal advice request. The garment is known as style number 95429 (children's sizes 4 to 6x) by Bradley Imports and as style number 36600 (girls' sizes 7 to 14) by the Baron Group. The garment is made of 100 percent polyester knit fabric. It is a one-piece, long-sleeved garment with felt, rib knit collar and cuffs, elasticized ankles and non-skid plastic toe caps and soles. A full front opening from the neckline to the ankle is secured by a nylon zipper. A textile tab with a snap has been sewn at the neckline. The tab is approximately 1 1/2 inches wide by 2 inches long. The tab is sewn so that it covers the top 1 1/2 inches of the zipper closure. The tab is decorative and enhances the appearance of the garment.

The inquirer argues that the textile tab is functional because it prevents the wearer from being poked or stabbed in the neck by the zipper pull. He claims that the sleeper should be classified under the provision for infants' wearing apparel, not ornamented, of man-made fibers, knit, other, pajamas and other nightwear, blanket sleepers, in item 384.8632, Tariff Schedules of the United States (TSUS), dutiable at the 1986 Column 1 rate of 21.4 percent ad valorem plus 7 cents per pound.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G9

The JFK import specialist argues that the textile tab is decorative and that its primary purpose is to enhance the appearance of the sleeper. The import specialist claims that the sleeper is classified under the provision for infants' wearing apparel, ornamented, of man-made fibers, pajamas and other nightwear, blanket sleepers, in item 384.2222, TSUS, dutiable at the 1986 Column 1 rate of 28.3 percent ad valorem.

ISSUE:

Does the textile tab which covers the zipper pull constitute ornamentation?

LAW AND ANALYSIS:

The inquirer claims that the textile tab does not ornament the sleeper because the tab covers the zipper pull and prevents it from poking the wearer's neck. Since he claims that the tab is functional, he argues that the garment is not ornamented and is classified in item 384.8632, TSUS.

The JFK import specialist argues that the tab is neither insignificant nor unobtrusive on the garment. The import specialist thinks that the tab is a decorative styling feature which serves no real function on the blanket sleeper, therefore the sleeper is ornamented and is classified in item 384.2222, TSUS.

Advertisements from several department stores were included which showed that sometimes similar sleepers have the tabs and sometimes they do not. Surely if the tab was a necessary protective feature, all similar sleepers would have the tabs, especially sleepers intended for infants and small children. The ads indicate that this is not the case. Also, neither the advertisement nor the advertising on the plastic bag in which the instant merchandise is sold mention the textile tab as a protective or safety feature.

Finally, the national import specialist informs us that she discussed this matter with a domestic manufacturer of blanket sleepers. He told her that the tab does not perform a function on the garment. Instead it is perceived by the buying public as a mark of quality. He said that such a tab may have performed a function in keeping the zipper closed before self-locking zippers were available, but that the self-locking nylon zipper makes the tab unnecessary.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

G10

077589

An examination of the sample submitted proves that this is so. Once the zipper is closed, when the zipper pull is pressed flat against the zipper, the zipper pull locks in place. No tab is required to hold the pull in a flat position on the sleeper once it is locked in place, therefore the textile tab serves no real function.

Headnote 3(a)(iii) of Schedule 3, TSUS, defines textile fabric as one form of ornamentation. Textile tabs have consistently been held by Customs to be ornamentation when their primary purpose is a decorative effect. See New York letter 808988 of May 16, 1984.

We find that the textile tab is primarily decorative and that it constitutes ornamention. The sleeper is properly classified in item 384.2222, TSUS.

HOLDING:

The textile tab is ornamentation. The blanket sleeper is classified in item 384.2222, TSUS. You should inform the inquirer of this decision.

Harvey B. Fox

Ms. Renee Sonn
Branch Manager
F. W. Myers & Co., Inc.
5200 Southcenter Blvd.
Suite 14
Seattle, Washington 98188

Dear Ms. Sonn:

You have requested a tariff classification ruling, on behalf of Marcraft International Corporation, for a tool kit that you are currently importing from the Republic of China. You have submitted a brochure that includes a photograph of a tool box with 23 tools and other articles. No sample was submitted to this office; however, one of our National Import Specialists has examined a sample of the tool kit.

The tool box is described in the brochure as being of heavy gauged break resistant plastic with a large positive latch and a cantilevered storage tray. It measures 13-3/8 by 7 by 4-3/4 inches. The tools include two pairs of pliers, several nut drivers and screwdrivers, soldering tools, and a pair of safety goggles. Subpart 3E of Schedule 7, item 651.75, Tariff Schedules of the United States (TSUS), provides for "Sets (except sets specially provided for) which include two or more of the tools . . . provided for in different rate provisions of this subpart." Since the tool kit includes, at a minimum, screwdrivers and pliers classifiable under different rate provisions of Subpart 3E, it constitutes a set classifiable under item 651.75, TSUS. For a group of articles bought and sold together to constitute a set under this provision, it is not necessary that all the articles be provided for in Subpart 3E. Tanross Supply Co., Inc. v. United States, 63 Cust, Ct. 38, C.D. 3870 (1969), aff'd, in relevant part, 58 CCPA 26, C.A.D. 1000 (1970).

The rate of duty for item 651.75, TSUS, is the "rate of duty applicable to that article in the set subject to the highest rate of duty."

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G12

Headnote 5 of Subpart E, Part 3, Schedule 6, TSUS, provides: "Cases, boxes, or containers of types ordinarily sold at retail with the tools or other articles provided for in this subpart are classifiable with such articles if imported therewith." It is your position that this Headnote controls the classification of the box. We do not agree. The Tariff Classification Study Explanatory and Background Materials, Schedule 6 , p. 191, states, with regard to this headnote: "These cases, boxes, or containers are usually of a kind specially designed to contain the articles". Although the tool box advertised in your brochure is imported with the tools and other articles, it is not covered by the language of this headnote because it is not specially designed to contain these articles, but, rather, could be used for a variety of merchandise. Because of its broad usefulness, it cannot be said to be "of the type" ordinarily sold with the tools it contains. Instead, it is "of the type" that in fact is frequently imported empty and sold separately. It cannot, therefore, be classified with its contents but must be treated as an imported article for tariff purposes.

It is our determination that the tool box constitutes part of the set. The appellate court in Tanross, supra, at 31, determined that "set" indicates "'a collection of articles which naturally complement each other, and usually go together,' . . . and not being simply an aggregation of disparate articles imported together for shipping convenience." In Karoware, Inc. v. United States, 77 Cust. 112, C.D. 4681 (1976), aff'd, 65 CCPA 1, C.A.D. 1197 (1977), the appellate court, at 11, determined that "[i]f the articles fulfill the requirement of naturally complementing each other, they need not be of the same kind" in order to constitute a set under item 651.75, TSUS. A tool box and tools complement each other as parts of a set, and we have in fact determined in the past that various types of holders were parts of sets including other articles with which they were imported. In file 042746 of January 5, 1976, a wicker basket holding a variety of miniature gardening articles was determined not to be a case or container of the type ordinarily sold at retail with the contents, and was classified as an article in a set under item 651.75, TSUS.

If imported alone, the tool box would be classifiable as luggage under item 706.62, TSUS. See, for example, ORR Ruling 654-68. Headnote 2(a)(ii) in Part 1, Schedule 7, TSUS, provides that the term "luggage" includes occupational luggage cases and like containers and cases designed to be carried with the person.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G13

057651

Therefore, the rate of duty on item 706.62, TSUS, must be taken into account in determining which article in the set is subject to the highest rate of duty.

You state in your letter that the tool kit is "now being imported" by your client. You have, then, requested a ruling on a matter that is not prospective, but rather is the subject of a current transaction. Technically, this procedure is in contravention of the Customs Regulations. We caution that the Internal Advice procedures spelled out in section 177.11 of the Regulations, 19 CFR 177.11, should be used in the future when disputes arise with regard to current transactions.

Sincerely,

Arthur P. Scaffler
for Harvey B. Fox
Director, Classification
and Value Division

Mr. Dean Walcutt
President
Certified Oil Company
303 South Front Street
Columbus, Ohio 43215

Dear Mr. Walcutt:

Your letter of January 17, 1986, concerns the dutiable status of a mixture containing at least 7 percent alkylbenzenes and no more than 93 percent ethanol. It is stated that the mixture would from a designated beneficiary country under the Generalized System of Preferences. It is assumed that the mixture will be used for fuel purposes.

A mixture of ethanol and ethylbenzene, in which the alkylbenzene content is 7 percent or more by weight of the entire mixture, is classified as a benzenoid mixture in item 407.17, TSUS, (formerly 407.16). The rate of duty is 1.7 cents per pound plus 13.6 percent ad valorem, but not less than the highest rate applicable to any component material. The component with the highest rate would be ethanol under item 427.88/901.50, TSUS, dutiable at 3 percent ad valorem plus 60 cents per gallon.

Effective March 31, 1986, merchandise entered under item 407.17, TSUS, is no longer entitled to GSP benefits.

Sincerely,

Harvey B. Fox

077694

Chief, Customs Information Exchange
U.S. Customs Service
6 World Trade Center, Rm. 450
New York, New York 10038

Dear Sir:

Customs Form 6431, prepared at the port of Detroit, on September 24, 1985, concerns the difference in classification of liquid fire fighting foams, manufactured by Wormald Canada, Ottawa, Ontario, and imported by The Ansul Co., Martinette, Wisconsin, and covered by entry number 85486692, dated September 3, 1985. This difference is the eleventh listing under Canada in the list of differences furnished Headquarters.

The issue is whether fire fighting foams are classifiable as mixtures, n.s.p.f., in item 432.25 (now 432.28) or as nonenumerated articles in item 799.00, TSUS. It is noted that some Headquarters decisions classified such foam products under item 799.00, while in other decisions they were classified in 432.25.

The fire fighting foam liquids in issue are said to consist of hydrolyzed protein, hexylene glycol, inorganic salts and a fluorosurfactant.

The classification of the product depends on the chemical composition. It is noted that often fire fighting foams of this nature consist of proteinaceous material derived from cattle horns and hooves, and, while in many instances, this material may be broken down into its constituent chemical composition, since determining the composition of proteins is a tedious process, often the substances are described as having no definite chemical composition.

In considering the classification of the products in issue, if the chemical composition of the liquid protein is known, along with the identity of all the other chemical constituents in each product, then the fire fighting foams would be classifiable as chemical mixtures in item 432.25 (432.28), TSUS. However, where the composition is not clear and the complete composition of the proteinaceous matter is not identifiable, classification as a nonenumerated article in item 799.00, TSUS, is correct.

Sincerely,

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 1001-5-010306

This protest was filed against your decision in the liquidation of entry No. 1001-85-423414-5 dated July 26, 1985, covering a shipment of novelty backpacks manufactured in Korea.

FACTS:

The merchandise involved consists of the following three styles:

1) 16-BBP, Bear
2) 16-KBP, Koala
3) 16-PBP, Panda

Each of the listed styles is a novelty backpack in the form of a particular animal. The sample pack submitted measures 16 inches high and is in chief value of man-made textile materials. The head, arms and legs are fully stuffed, but the body cavity is partially stuffed. Standard backpack harness straps and fasteners are permanently sewn to the ends of the arms and legs. The pack has a carry pouch approximately 8 inches wide sewn into the back of the animal.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

AS

This merchandise was classified in liquidation under the provision for luggage of other textile materials in item 706.41, Tariff Schedules of the United States (TSUS).

The protestant claims that the article should be classified under the provision for toy figures of animate objects (except dolls): not having a spring mechanism: stuffed: valued over 10 cents per inch of height in item 737.30, TSUS.

ISSUE:

Are the novelty backpacks represented by the sample chiefly used for the amusement of children or adults?

LAW AND ANALYSIS:

Schedule 7, Part 1,Subpart D, Headnote 2(a)(i), TSUS, provides in pertinent part that "For the purposes of the tariff schedules - (a) the term "luggage' covers (i) travel goods such as * * * knapsacks, * * * and like articles designed to contain clothing or other personal effects during travel."

Schedule 7, Part 5, Subpart E, Headnote 2, TSUS, provides that "For the purposes of the tariff schedules. a 'toy' is any article chiefly used for the amusement of children or adults."

General Interpretative Rule 10(e)(i), TSUS, provides that "a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States, at or immediately prior to, the date of importation, of articles of that class or kind to which the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A6

017713

imported articles belong, and the controlling use is the chief use, i.e., the use which exceeds all other uses (if any) combined."

In a recent decision this office had occasion to rule as to the dutiable status of a Koala "candy bear" which was in chief value of man-made textile materials and measured approximately 12 inches in height. The head, arms, and legs of the bear were stuffed, but the body cavity was empty. The bear was dressed in overalls which formed the bottom half of the torso with plush fabric forming the top half. The hollow body cavity of the bear formed an interior compartment while a zipper closure across the front of the bear secured the lined compartment and a smaller pouch therein. Adjustable textile tape harness straps were attached to the rear of the overalls at the seam and at the back of the stuffed head to form armholes.

In reaching the conclusion that the "candy bear" is a toy for tariff purposes, this office took the position that the utilitarian aspect of the merchandise was incidental to its play value for the following reasons:

(1) The "candy bear" is so small as to be confined to use by 2 to 5 year old children,

(2) the amount of storage space is minimal,

(3) the "candy bear" is in fact a plaything and can provide frivolous amusement to the users. See United States v. Topps Chewing Gum, Inc., 58 CCPA 157, C.A.D. 1022 (1971). Wilson's Customs Clearance, Inc. v. United States, 59 Cust. Ct. 36, C.D. 3061 (1967), and

A7

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

077713

(4) as a practical matter the candy bear would not be chiefly used as an article of utility, i.e., for the users to carry their personal belongings during travel.

In the case of Ideal Toy Corp. v. United States, 78 Cust. Ct. 28, C.D. 4688 (1977), the court made the observation that "when amusement and utility become locked in controversy, the question becomes one of determining whether the amusement is incidental to the utilitarian purpose, or the utilitarian purpose incidental to the amusement."

In this instance, it is our position that the play value of the panda novelty backpack is incidental to its utilitarian function for the following reasons:

(1) The novelty backpack appears to be designed as a functional backpack; and

(2) the amount of storage space is sufficient as a practical matter to carry a kindergarten child's personal effects such as money, crayons or a lunch.

In view of the foregoing, it is our position that the merchandise is not chiefly used in the United States for the amusement of children. Consequently, it is classifiable under the provision for luggage of other textile materials in item 706.4144, TSUS, and dutiable at the rate of 20 percent ad valorem. The applicable textile quota number is 670. As a product of Korea this merchandise will be subject to textile quota restraints.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

The Honorable
Ed Zschau
House of Representatives
Washington, D.C. 20515

Dear Mr. Zschau:

We are enclosing a copy of our response to Mr. Ronald E. Edelstein, Corporate Customs Manager, Fujitsu America, Inc.

Mr. Edelstein raises the issue of fairness in the disposition of Fujitsu's entry of certain fiber optic cables. He states that he was not aware of Customs position until he received the amended denial of his protest, dated August 1, 1985. In order to better understand everts that took place, the relevant written documents are listed in the following chronology:

September 23, 1983	Entry 83-241800; 807 documents not submitted
October 13, 1983	Entry 84-238094; 807 documents not submitted
March 30, 1984	Request by Fujitsu for 30-day extension to produce missing documents
April 13, 1984	Form 29 issued, rejecting request for 30-day extension (Entry 83-242800)
May 9, 1984	Form 29 issued, informing Fujitsu that Entry 84-238094) would be liquidated at full appraised value because of missing 807 documentation
June 8, 1984	Entries liquidated
June 8, 1984	Assembler's statement prepared and sent by Fujitsu; received by Customs on June 13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A10

June 18, 1984	Protest 5501-4-000080 and application for further review were filed (prepared 6-14-84)
May 20, 1985	Protest and Application for further review were denied by Customs
August 1, 1985	Amended denial of protest and application for further review

The documents in this chronology do not refer to the reason stated on August 1, 1985, as to why the 807 claim was denied. However, prior to liquidation on June 8, 1984, Customs had no information from Fujitsu on the nature of the processing. The only evidence that Customs had at the time of liquidation was the fact that no 807 documentation had been submitted, and, therefore, the 807 claim was not allowable.

By the time Mr. Edelstein's statement of processing was received by Customs on June 13, 1984 (and several days later by the import specialist), Mr. Edelstein had already prepared a protest on the basis of what Customs had identified as the reason for rejection of the 807 claim.

After the import specialist, Mr. Caviness, reviewed the statement of processing, he told Mr. Edelstein that the processing was outside the scope of operations permitted under 807. This conversation was not reduced to writing. However, the change in the reason for rejection of the 807 claim was discussed with Mr. Edelstein and was sufficient to put him on notice that the protest, in its form as submitted, should have been amended. Under section 174.14 of the Customs Regulations an amended protest could have been submitted for the purpose of addressing both the substantive issue and the specific reasons for further review. No such action was taken.

The events, subsequent to the denial of May 20, 1985, are detailed in Mr. Edelstein's letters and our responses. Although further review is now precluded by law, we believe that adequate notice was given as to the issues, and that

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Mr. Edelstein was aware of and had the opportunity to use the procedures to protect his company's interests. These were not used.

If we can be of further assistance in this matter, please do not hesitate to call us.

Sincerely,

Alfred R. Boyce
Acting Assistant Commissioner
Commercial Operations

San Jose, California 95134-2017

Dear Mr. Edelstein:

This decision is our response to your letter of April 11, 1986. We summarize the essential points that you make in your letter:

1. Protest 5501-4-00080, dated June 18, 1984, was filed to correct a mistake of fact (late filing of foreign assembler's declarations).

2. The amended denial dated August 1, 1985, was the first time that the issue was raised as to whether the processing on the fiber optic cable was more than a mere assembly.

3. The amended decision did not re-evaluate the decision to deny further review, which was requested when the protest was timely filed.

4. Part 174, Customs Regulations (19 CFR Part 174), sets forth criteria for further review, and these criteria, if met, require the district director to forward the protest for further review.

5. The sequence of events and the timing of the events have precluded Fujitsu from exercising its right to administrative review, as well as its right to judicial review.

For the following reasons, we conclude that the amended denial of the protest, issued on August 1, 1985, is a valid notice of denial that started the running of the statutory period for filing a civil action, and that the denial of the application for further review was not ultra vires.

Pursuant to 19 USC 1515(a) and 19 CFR 174.30(a), the district director properly gave notice of denial with a statement of the reason for the denial. Although you state that you were never given notice (prior to the amended denial) as to the reason why 807.00 was inapplicable, the import specialist who was involved in the decision clearly remembers that he personally told you, shortly after he received your letter of June 8, 1984,

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A13

that the optical working (polishing) of the fiber optic ends was outside the purview of 807 processing. Clearly, this was notice of the specific legal issue and was sufficient for you to evaluate the adequacy of your protest (filed June 18, 1984) and to file a timely amended protest pursuant to section 174.14 of the Customs Regulations. Therefore, the claim by you that you were taken by surprise is not warranted in this case.

Secondly, a protest must be forwarded by the district director for further review under 19 CFR 174.24, if it meets the criteria. The authority to determine whether the criteria are satisfied is delegated to the district director. 19 CFR 174.23, 174.24, and 174.26. This determination requires an exercise of one's judgment in viewing all the relevant facts. The regulations also require a protestant to state with specificity the reasons why the criteria for further review are satisifed. 19 CFR 174.25. See, also, the instructions on Customs Form 19, block 9. Your protest did not allege or give specific reasons. We will not, therefore, second-guess the decision of the district director who is acting within his delegated authority.

Finally, we regret the unintentional delay in responding to your letter of August 8, 1985, (our letter of January 23, 1986, file 076857). However, our failure to respond should not have impaired your ability to file a summons. The timely exercise of one's rights is clearly identified as the responsibility of the protestant. San Francisco Newspaper Printing Co. v. United States, Slip Op. 85-108, decided October 18, 1985 (Court of International Trade).

It is our conclusion that further administrative review by Customs is not available.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

John B. Rehm, Esq.
Busby, Rehm and Leonard, P.C.
1330 Connecticut Avenue, N.W.
Washington, D.C. 20036

Dear Mr. Rehm:

Recently you asked us to change an established and uniform practice regarding the tariff classification of reusable cotton knit diapers manufactured by your client, Deltamex, S.A. de C.V. of Puebla, Mexico. In the past, such diapers have been classified under the tariff provisions for other infants' wearing apparel, not ornamented, of cotton, knit, other, other, in item 384.3497, Tariff Schedules of the United States (TSUS). Textile category 359 applies to item 384.3497, TSUS. Your client wants such diapers to be classified under the tariff provision for other underwear, not ornamented, of vegetable fibers, knit, valued over $4.00 per pound, in item 378.1540, TSUS. Textile category 352 applies to item 378.1540, TSUS.

In view of the uniform and established classification practice concerning diapers and the possibility of domestic interest in this subject (as evidenced by the fact that an agreement with Mexico was negotiated including diapers as other wearing apparel), if such a change was contemplated, it would be necessary to follow the formal change of practice procedure set forth in 19 C.F.R. 177.10(c)(2). See 19 C.F.R. 177.10(c)(1), which mandates such a procedure "when the contemplated change of practice will result in the assessment of a lower rate of duty and the Headquarters office determines that the matter is of sufficient importance to involve the interests of domestic industry."

In Customs Headquarters Ruling Letter (HRL) 047342 of December 6, 1976, we considered the same request — i.e., that Customs change its uniform and established practice of classifying diapers under the provisions for other wearing apparel to the provisions for underwear. Our conclusion in HRL 047342 was that the established and uniform practice of classifying diapers as other wearing apparel was supported "by judicial precedent, by the lexicographic definitions of underwear and by the prevalent usage of diapers as other than clothing worn under other clothes."

You argue that dictionary definitions of "diapers" and affidavits submitted by La Leche League International and by four diaper services support your position (i.e., that diapers are underwear rather than outerwear). You argue that not one of the 19 dictionaries which you consulted implied that diapers were outerwear. You also claim that four of the 19 dictionaries which you consulted specifically define diapers as "underclothing" or as "underpants."

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B1

097756

You conclude that both dictionaries and experts in the field define diapers as underwear, therefore you claim that the established and uniform practice should be changed from other wearing apparel to underwear.

In responding to your claims, we observe initially that the current uniform and established practice for diapers does not classify them as "outerwear" but as other wearing apparel. There is no tariff provision which contains the language "outerwear." The tariff provision for other wearing apparel is very broad — it encompasses diapers as well as all other clothing which has not been previously enumerated. As noted in Max M. Myres et al. v. United States, 9 Treas. Dec. 298, T.D. 26085 (1905), at 299:

> The decisions are uniform, not alone of this Board and of the lower courts, but of the Supreme Court of the United States, that the words "wearing apparel" are broad enough to cover not alone a person's outer clothing, but also to cover all articles usually worn, dress in general, including underclothing. See G. A. 289 (T.D. 10736); Arnold, Constable and Co. v. United States (46 Fed. Rep. 510, 511); Arnold, Constable & Co. v. United States (147 U.S. 494); Maillard v. Lawrence (16 How. 251).
>
> ...numerous individual articles of wearing apparel have been from time to time by the courts held wearing apparel, irrespective of whether worn next to the skin or otherwise. In Greenleaf v. Worthington (26 Fed. Rep. 303) drawers in part of wool and in part of cotton were held to be wearing apparel. Manifestly, these articles are uniformly worn next to the skin. So, in the same case, stockings composed in part of wool and in part of cotton were held to be dutiable as wearing apparel. articles uniformly worn next to the skin.

We consulted four thesauruses; none of them defined underwear as diapers. We consulted 14 dictionaries; none of them defined underwear as diapers. We doubt that there are any dictionaries which define "underwear" as "diapers." Your conclusion that "the lexocographical evidence unqualifiedly supports the conclusion that the diapers are underwear" seems unwarranted.

Even the four dictionaries which you claim define diapers as "underpants" or "underclothing" mention that diapers have an additional function — that of collecting the baby's body wastes. This additional function makes diapers more than underwear. It is an established principle of Customs law that merchandise which constitutes more than items covered by a certain tariff provision cannot be classified under that

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B2

tariff provision. See United States v. Flex Track Equipment, 59 CCPA 97, C.A.D. 1046 (1972); E. Green & Son (New York), Inc. v. United States, 59 CCPA 31, C.A.D. 1032 (1971); United States v. New York Merchandise Co., 58 CCPA 53, C.A.D. 1004 (1970). Inasmuch as diapers are more than underwear, they cannot be classified as underwear.

We have examined the affidavits which you present, but we do not find them persuasive. We note that four out of five affidavits are from diaper services, which are interested parties in this matter. The fifth affidavit is from La Leche League International, which — as we understand it — is an organization which promotes breast feeding of babies. We do not view La Leche as experts on diapers. We further note that three of the five affidavits mistakenly follow your lead in asserting that diapers are not "outerwear."

Finally, we note that tariff terms are to be construed in accordance with their common and commercial meanings, which are presumed to be the same. See United States v. Victoria Gin Co., Inc. et al., 48 CCPA 33, C.A.D. 759 (1960); Floral Arts Studio et al. v. United States, 46 CCPA 21, C.A.D. 690 (1958); United States v. C. J. Tower and Sons, 48 CCPA 87, C.A.D. 770 (1961). Congress is presumed to know the language of commerce and to have framed tariff acts so as to classify commodities according to the general usage and denomination of the trade. See Nylos Trading Company v. United States, 37 CCPA 71, C.A.D. 422 (1949).

This rule dates back as far as Hedden v. Richard, 149 U.S. 346 (1893), in which the Supreme Court cited the following rule:

> With regard to the language of commerce the general rule laid down by this court is that it must be construed, when used in laws imposing duties on importations of goods, and particularly when employed in the denomination of articles, according to the commercial understanding of the terms used.

In the same decision, the Supreme Court noted with approval the following quotation from Arthur v. Lahey, 96 U.S. 113 (1878):

> The commercial designation of an article among traders and importers, where such designation is clearly established, fixes its character for the purpose of tariff laws.... A specific designation eo nomine must prevail over general terms, and a commercial designation is the standard by which the dutiable character of the article is fixed.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

077756

Following these precepts, the Customs Court found that eggcups were not "cups" within the common meaning of the term nor within the term as used by the tariff schedules. See Ross Products, Inc. v. United States, 46 Cust. Ct. 8, C.D. 2226 (1961). The same court found that currycombs did not fall within the meaning of the term "comb" as used in the Tariff Act of 1930 and that lacquered plastic articles consisting of a snack bowl, a snack set and a two-tiered tidbit were not "serving dishes" within the meaning of item 772.06, TSUS. See Miller Harness Co., Inc. v. United States, 59 Cust. Ct. 1, C.D. 3053 (1967) and Davis Products, Inc. v. United States, 63 Cust. Ct. 87 (1969), respectively.

The Court of Customs and Patent Appeals found, in C. J. Tower and Sons v. United States, 44 CCPA 41, C.A.D. 634 (1957), that corn on the cob, with husks on, was classified as vegetables in their natural state, not specially provided for, rather than as corn or maize, including cracked corn, pursuant to a long-standing administrative practice. It also found that bicycle saddles or seats were not classified under the provision for "harness, saddles and saddlery, and parts thereof," but as "other parts of bicycles." See United States v. Andrew Fisher Cycle Co., Inc., 57 CCPA 102, C.A.D. 986 (1970).

The point of all the above-cited cases is that the tariff provision for underwear is to be interpreted according to the common and commercial meaning of underwear. While many garments are known commonly and commercially as "underwear," diapers are not. Diapers are commonly and commercially known as "diapers" rather than as underwear in the United States. Diapers are manufactured, advertised and sold as "diapers," not as underwear. Neither dictionaries nor thesauruses define "underwear" as "diapers." Indeed, because of their additional function of collecting babies' body wastes, diapers are more than underwear. We therefore find that our uniform and established practice of classifying diapers as other infant's wearing apparel is correct, and we decline to change it.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

Jamaica, New York 11438

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 1001-4-003889

This protest was filed against your decision in the liquidation on December 23, 1983, of entry No. 82-750082-2 dated June 17, 1982, covering a shipment of "Action Smurf Sets" manufactured in Italy.

FACTS:

The merchandise involved designated as "Action Set Smurf #1490501" consists of molds, modeling paste or clay, three tempera paints, varnish, paint brushes and various plastic accessories.

This merchandise was classified in liquidation under the provision for children's pigments and paints, in cakes, jars, tubes or other forms, and such pigments and paints assembled into sets with or without brushes, in any form not over 1.5 pounds net weight each: * * * Assembled into sets with or without brushes, outline drawings, stencils, water pans, or other articles in item 474.08, Tariff Schedules of the United States (TSUS).

The protestant claims that the entry in question must be deemed liquidated as entered upon the first anniversary date of said entry. The rationale for this claim is that the protestant did not receive notification of the first and second purported extensions of the liquidation period.

The protestant maintains that the components of the set should be separately classified under item Nos. 799.00, 737.45 and 474.08, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

85

ISSUE:

1. Is the entry deemed liquidated as entered by operation of law?

2. Do the components of the set constitute an entirety for tariff purposes?

LAW AND ANALYSIS:

ISSUE No. 1

The controlling statute is 19 U.S.C. 1504 which states in pertinent part:

> (b) Extension. - The Secretary may extend the period in which to liquidate an entry by giving notice of such extension to the importer, his consignee, or agent in such form and manner as the Secretary shall prescribe in regulations, if -
>
> (1) information needed for the proper appraisement or classification of the merchandise is not available to the appropriate Customs officer;
>
> (2) liquidation is suspended as required by statute or court order; or
>
> (3) the importer, consignee, or his agent requests such extension and shows good cause therefor.

19 CFR 159.12(a)(2)(b), the regulation in question states:

> (b) Notice of extension. If the district director extends the time for liquidation, as provided in paragraph (a)(1) of this section, he promptly shall notify the importer or the consignee and his agent and surety on Customs Form 4333-A, appropriately modified, that the time has been extended and the reasons for doing so.

Information before this office is that ADP records indicate that the entry was extended and notice of extension mailed to the importer of record at the address shown on the entry in the normal course of business.

ISSUE No. 2

Schedule 4, Part 9, Subpart C, Headnote 1, TSUS, provides that "The provision in this subpart for artists', students' and children's pigments and paints assembled into sets (item 474.08) covers only pigments and

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

077783

paints assembled in such container and form, and with such assortment of articles, as to be suitable for sale at retail to artists, students, or children as a paint set, kit, or color outfit."

The merchandise involved falls within the ambit of the above-cited headnote. We recognize that in classifying such merchandise consideration should also be given to the degree of assembly or construction involved in these craft sets. If the assembly or construction is considerable with the painting being minor or incidental, then a separate classification of the components may be justified. However, the molding in clay of the Smurf articles seems equal to or less than the painting effort thus requiring classification of the set under item 474.08, TSUS.

HOLDING:

The protest should be denied. A copy of this decision should be attached to your Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffner

for Harvey B. Fox
Director, Classification
and Value Division

UNITED STATES GOVERNMENT
Memorandum

DEPARTMENT OF THE TREASURY
UNITED STATES CUSTOMS SERVICE

DATE: AUG 26 1986

FILE: CLA-2 CO:R:CV:G
077815 DW

TO : Director, Entry, Procedures and Penalties Division

FROM : Director, Classification and Value Division

SUBJECT: Classification of Merchandise Entered as Ladies Knit Tops

We are responding to your memorandum dated February 21, 1986, requesting the tariff classification and quota category number of certain garments. Samples were received from the Fines, Penalties, and Forfeiture officer in New York.

Style "Tally" is a knit pullover with cap sleeves. It has a woven overlay measuring approximately three inches in width across the chest area. The overlay has several rows of horizontal quilted stitching and four rows of grommets. The pullover is considered to be an ornamented garment.

The other style, "Ringo," is a mesh knit short-sleeve pullover with rib knit armbands and epaulette-like strips on the shoulders. The shirt is imported with an abbreviated sleeveless top that has a scoop neck. The top is worn over the shirt. There are snaps on the shoulder straps which are snapped under the epaulette-like strips on the shirt. At the time of importation, June 1983, these two garments were classifiable as an entirety for tariff purposes.

The record indicates that the garments in question were ordered as men's shirts by El Dorado Fashions, Inc. a corporation that imports only men's clothing, and that the ultimate consignee of the subject garments was "Chess King," a chain of men's stores.

El Dorado is alleged to have entered and attempted to enter shipments of men's knit tops from Taiwan under the false description that they consisted of ladies' knit tops with visas for quota category 639.

The issue to be resolved is whether these garments are classifiable as men's shirts. Headnote 2, Part 6, Schedule 3, Tariff Schedules of the United States (TSUS) provides that:

> (b) Men's and boys' wearing apparel is wearing apparel for males over 6 years of age; and

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

(c) Women's and girls' wearing apparel is wearing apparel for females over 6 years of age, including wearing apparel commonly worn by either sex and not identifiable as being intended exclusively for the wear of men or boys.

To satisfy the definition of women's and girls' wearing apparel under the headnote, a garment must be either feminine apparel or must be commonly worn by either sex and not identifiable as being intended exclusively for the wear of men or boys.

The Customs Service has ruled that the construction of the garment is a factor in determining the intended sex of the wearer. See Headquarters Ruling Letter 066916 dated October 27, 1981. That ruling recognized that different specifications exist for men's and women's clothes, and that garments that were made according to men's specifications were "identifiable as being intended for the exclusive wear of men or boys."

The garments at hand were ordered as men's wear and sold to men's stores. Style "Ringo" manufactured from a mesh fabric is characteristic of a men's garment. We disagree with the conclusion of Jack Hyde, the technical expert obtained by the petitioner. He believes that the garment is an example of women's wearing apparel. It is our view that the shirt is too revealing for a woman to wear, even when it is worn with the abbreviated top. The low scooped neck and large armholes fail to provide adequate coverage. Thus, the garment is classifiable under the provisions for men's or boys' wearing apparel, and category 638 is applicable.

The same analysis applies to style "Telly." An examination of the garment supports the import specialist's classification. The overlay on the front panel at the chest area is characteristic of a men's garment. Thus, category 638 is applicable to this garment also.

Harvey B. Fox

Mr. Jeffery T. LaBombard
U.S.A. Bound Co.
50 Smith Street
Rouses Point, NY 12979

Dear Mr. LaBombard:

You have requested a tariff classification ruling for a knee orthosis that is a product of Canada and have submitted descriptive literature.

The article in question, the anterior cruciate (A. C.) knee orthosis, is a custommade brace consisting of a plastic shell with metal braces and straps. It allows room for flexion and extension, but prevents full extension of the leg and stabilizes the knee joint. It is used in the treatment of a torn knee ligament.

The A. C. knee orthosis is classifiable under the provision for orthopedic appliances, item 709.57, Tariff Schedules of the United States. The 1986 rate of duty of 6.3 percent applicable to products of Canada is scheduled to be reduced to 5.8 percent in 1987.

Mail importations are subject to the same requirements as importations by any other means. In addition to any duties that may be payable, Congress has recently authorized the Customs Service to collect a five-dollar fee in connection with preparation of documentation for dutiable mail entries. A copy of the Customs Regulations concerning mail importations and of the Federal Register notice concerning the new user fees is enclosed for your information. Additionally, the Postal Service may collect a fee upon the delivery of mail on which duty must be collected. Because of the large volume of mail, there may be some inconsistencies in the actual collection of duty; however, all importations are subject to examination, as explained in the regulations.

Sincerely,

Arthur P. Schaffer
for Harvey B. Fox

Sidney H. Kuflik, Esq.
Lamb & Lerch
Counsellors at Law
233 Broadway
New York, New York 10279

Dear Mr. Kuflik:

In a letter dated February 21, 1986, you asked that we reconsider the result reached in Headquarters Ruling letter (HRL) No. 076964c dated November 27, 1985, concerning the dutiable status of the Snugli quiet book manufactured in Korea.

In the cited ruling the Snugli quiet book was held to be classifiable under the provision for other toys, not specially provided for in item 737.95, Tariff Schedules of the United States (TSUS).

You maintain that the merchandise is properly classifiable under the provision for toy books, including coloring books and books, the only reading matter in which consists of letters, numerals, or descriptive words in item 737.52, TSUS.

The basis for your request for reconsideration is stated to be the case of RBW Inc. v. United States, -- CIT --, Slip Op. 86-8 (January 13, 1986) dealing with the tariff classification of books of crossword puzzles, word games, and "search-a-word" puzzles and HRL No. 057283 set dated September 21, 1978, concerning the tariff classification of a child's toy book.

You assert that Customs has mistakenly taken the position that the contents of the quiet book determine its classification noting that the RBW court rejected such a position when it stated that "classification on the basis of textual consideration or layout would be entirely arbitrary criteria".

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

BI

We do not agree that this line of reasoning set out by the RBW court is relevant to whether the instant merchandise is covered by item 737.52, TSUS. A fair reading of that provision shows that the contents of the article do in fact determine whether it qualifies as a toy book. For example, in order to fall within the provision the article must contain only reading matter consisting of letters, numerals, or descriptive phrases. Although the quiet book is in a book format in so far as there are "pages", this does not bring it within the purview of item 737.52, TSUS.

The result reached in HRL No. 057283 sst dated September 21, 1978, is not in conflict with the ruling on the quiet book. It should be noted that some pages in that child's toy book contain worded instructions as to how to complete the picture or puzzle.

For the reasons stated above it is our position that the result reached in HRL No. 076964 dated November 27, 1985, is correct.

Sincerely,

Thomas J. Lobred for
Harvey B. Fox

Mr. Stephen A. Sturdevant
Traffic and Distribution Manager
Laticrete International, Inc.
1 Laticrete Park North
Bethany, Connecticut 06525-3498

Dear Mr. Sturdevant:

You have requested a tariff classification ruling for merchandise to be imported from Singapore, identified as a "desk blotter calendar." A sample was submitted to our office.

The proposed importation would actually include two articles. One is a colored plastic desk pad with an inserted paperboard backing and a clear plastic overlay of the same dimensions, approximately 20-1/2 by 15 inches. A strip of plastic approximately 3-3/8 by 20-1/2 inches that is printed with some advertising is attached at the top and flips forward over the pad. The second article is a calendar of the same size, 20-1/2 by 15 inches. Separate calendar grids for each month of the year are fastened together at the top by a strip of adhesive. Each page also shows all the months of the year and some metric system conversion tables. The calendar can be slipped in under the overlay and held in place by two clear plastic strips across the outer corners of the desk pad.

Each of these two articles can be used alone, and even when the two are used together, each retains its separate identity. Thus, each is separately classifiable for Customs purposes.

The desk pad is classifiable under item 774.55, Tariff Schedules of the United States (TSUS), as an article not specially provided for, of rubber or plastics. Examination indicates that the calendar was lithographically printed. It is therefore classifiable under item 274.10, TSUS, if not over 0.020 inch in thickness, or under item 274.15, TSUS, if over 0.020 inch in thickness. Because the pages of the calendar are only loosely held together at the top with adhesive, and can be torn off easily, the calendar is not considered to consist of "permanently mounted" lithographs for purposes of Headnote 3 of Part 5, Schedule 2, TSUS. Therefore, the thickness to be measured for purposes of items 274.10 and 274.15 is that of the thinnest sheet in the calendar.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

8/3

Articles that are classifiable under items 774.55, 274.10 and 274.15, TSUS, and that are products of Singapore are entitled to duty-free treatment under the Generalized System of Preferences (GSP) upon compliance with all applicable regulations.

Sincerely,

Arthur P. Schaffer

Re: Application for Further Review of Protest No. 3801-5-002158, dated July 3, 1985

Dear Sir:

This protest concerns the tariff classification of two articles: a textile fabric and air filters made up from this fabric.

Merchandise identified as numbers FE-2504 and FE-2545 is a nonwoven textile fabric of man-made fibers backed or laminated with a woven textile scrim. No dimensions are given. The protestant claims that it is specifically provided for under item 355.25, Tariff Schedules of the United States (TSUS), as nonwoven fabric of man-made fibers. You have classified it under item 359.50, TSUS, and we are in agreement with your position. Nonwoven fabrics with laminated backings, such as the merchandise in question, are excluded from item 355.25, TSUS, and properly classifiable under item 359.50, TSUS, as other textile fabrics, including laminated fabrics, of man-made fibers. Customs has long interpreted the language in the description of articles classified under item 355.25, "... nonwoven fabrics ... whether or not coated or filled ...", to exclude laminated fabrics, and laminated fabrics are therefore classified as textile fabrics not specially provided for, including laminated fabrics, under item 359.50, TSUS. Essentially the same fabric from the same West German manufacturer, Carl Freudenberg, was held to be so classifiable in our ruling 077776 of May 6, 1986 (copy enclosed).

Merchandise identified as number MF-85, air filters, consists of the same fabric in plastic frames or holders with metal stiffeners. These articles are in chief value of the textile material. The protestant claims that they are properly classifiable under item 661.95, TSUS, in Subpart 4A of Schedule 6, as filtering and purifying machinery and apparatus and parts. However, Headnote 1(iv) to Part 4 provides that articles in chief value of textile materials are not classifiable in that part. Since the filters are in chief value of a fabric consisting of woven and nonwoven fabrics,

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

C/

laminated together, and such fabric is, therefore, not classifiable under item 355.25, TSUS, the filters are not classifiable under item 355.25, TSUS, as articles of nonwoven fabrics. Accordingly, we are in agreement with your position that the filters are properly classifiable under item 389.62, TSUS, as other articles not specially provided for, of man-made fibers, not ornamented and not knit.

You should deny this protest in full. A copy of this decision should be sent to the protestant along with your Form 19 Notice of Action.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Steven P. Kersner, Esq.
Brownstein, Zeidman and Schomer
1401 New York Avenue, N.W.
Suite 900
Washington, D.C. 20005-2102

Dear Mr. Kersner:

On behalf of Inner Secrets, you have requested a tariff classification ruling for a bandeau to be imported from Macao. Your firm has made written and oral presentations on behalf of your client.

The article of women's apparel in question is a bandeau of a woven print fabric, 65 percent polyester, 35 percent cotton. It is strapless, with a back opening secured by a plastic fastener. There is a vertical stay at each side seam and elastic all the way around both the top and bottom edges and through the center front. A tie approximately 19 inches long is stitched to the inside center front; it shapes the front and adjusts to permit more or less coverage.

You state that the article is neither a brassiere nor outerwear. Your position is that it cannot be a brassiere because it does not provide support, and that it cannot be outerwear because the fabric is "virtually see-through." You conclude that it should be classified as underwear since it is sold in underwear departments of stores.

We agree that this article is not a brassiere, for the reasons you state. However, we do not agree that it is underwear. The fact that it may be sold in underwear departments is not alone determinative of its classification for Customs purposes.

The fabric in this article is not flimsy or see-through. Fabric of this weight and type is commonly used for blouses, shorts, skirts, and dresses. Further, the article is not practical as underwear. The fabric is gathered around the entire garment, creating bulk that would not lie flat against the skin and would distort the fit of a blouse worn over it. The tie would make it difficult or impossible to button a blouse over the garment, and it would create a lump if worn under a sweater or blouse. You have suggested that the tie could be accommodated by leaving the blouse at least partially open. However, it is our position that underwear is worn under outer garments and is not seen.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C3

For the foregoing reasons it is our decision that the article is not underwear and is properly classifiable as other women's wearing apparel, not ornamented, according to the component fiber in chief value.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Mr. Bill Dorsey, Sr., President
Myraid International Trading Co.
Post Office Box 54386
Oklahoma City, Oklahoma 73154

Dear Mr. Dorsey:

This is in response to your request made to Accu-Rate International, Inc., regarding the classification of an artificial "Canadian Pine" imported from Hong Kong, Taiwan and Mainland China. The sample submitted consists of a two inch wide strip of polyvinyl chloride (PVC) which has been fringed and then entwined around a two wire twisted core to render an effect of a needle branch. The fringed two inch wide strip is considered to be a plastics material.

The merchandise is precluded from tariff classification in item 748.20, Tariff Schedules of the United States (TSUS), because that provision does not include articles consisting of parts that are not assembled "by binding with flexible materials such as wire, paper, textile material, or foil, or by gluing, or by similar methods." See Schedule 7, Part 7, Subpart B, Headnote 1(iii), TSUS. Since the branches of your artificial tree are hinged and fold upward for storage, the tree is considered assembled by the use of hardware, which is a method of assembly not for merchandise classified in item 748.20, TSUS.

This issue has been addressed in a previous Customs ruling, 076081, July 30, 1985, which held that artificial Christmas trees having parts assembled by a slip-on and hardware method of assembly are properly classifiable in item 772.97, TSUS, under the provision for Christmas ornaments, of rubber or plastics. This classification is appropriate since artificial Christmas trees, as those in this case, are commonly and commercially looked upon as belonging to the class of merchandise understood to be Christmas ornaments. Also, for this reason, item 774.45, TSUS, which provides for other artificial trees made of plastics is not an appropriate classification.

In view of the foregoing, we find that the artificial Canadian pine tree is properly classifiable under the provision for Christmas ornaments of rubber or plastics in item 772.97, TSUS, and dutiable at 5.7 percent ad valorem. Duty-free treatment is available for the importation of this product from Hong Kong or Taiwan.

Sincerely,

Ms. Angela DeGaetano
Chief, Customs Information Exchange
U.S. Customs Service
6 World Trade Center
New York, New York 10048

Dear Mr. DeGaetano:

A Customs Form 6431 dated November 7, 1985, received in this office on March 12, 1986, concerns entry No. 85-203887 dated May 30, 1985, covering a shipment of jewelry rolls manufactured in Hong Kong. This difference of opinion is listed as the last item on page 1 of the list of differences circulated as CIE M89/79, Suppl. 46 of April 1986.

The sample submitted designated as style No. C6116B is a rayon brocade purse. It has a bi-fold design and measures 5-1/2 inches by 4-1/2 inches when folded and 5-1/2 inches by 9 inches when open. This purse has two full width pouches which are each closed by a nylon coil zipper. There is a center padded ring holder with a security snap. The purse is secured by means of a nylon cord which loops around the bi-fold body holding the two sides closed. Since the jewelery is secured in separate zipper pouches and the snap ring holder, the nylon cord is merely used to hold the purse in its folded condition and can be adjusted according to the quantity contained therein. The cord secures the purse when folded.

The sending port maintains that the sample is properly classifiable under the provision for other articles not specially provided for, of textile materials, not ornamented, of man-made fibers in item 389.62, Tariff Schedules of the United States (TSUS). The rationale for this position is that the article is chiefly used in the home for storage. Also, CIE 248/67 has been cited which held that a jewelry roll of textile material is classifiable under Schedule 3, TSUS, according to component material of chief value.

We do not consider the result reached in CIE as controlling here inasmuch as the jewelry roll involved therein was approximately twice as large as the instant sample. Apparently, although there was no reasoning presented as a basis for the decision, we were satisfied that the article was not designed to be carried on the person.

Schedule 7, Part 1, Subpart D, Headnote 2(c), TSUS, provides that "the term '<u>flat goods</u>' covers small flatwares designed to be carried on the person, such as banknote cases, bill cases, billfolds, bill purses, bill rolls, card cases, change purses, cigarette cases, coin purses, coin holders, compacts, currency cases, key cases, letter cases, license cases, money cases, pass cases, passport cases, powder cases, spectacle cases, stamp cases, vanity cases, tobacco pouches and similar articles."

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C6

The sample is a type of purse which is usually sold at retail and is also used as a premium or inducement to buy a product. It is being offered as a premium inducement to purchase "Leggs" pantyhose. Advertising literature before us shows that the same class or kind of merchandise is manufactured and sold at retail as attractive travel cases or purse accessories.

It is our opinion that merchandise represented by the sample is designed to be other than a storage bag for use in the home. The overall attractive brocade design, similarity to an accessory or cosmetic purse and extra secure features demonstrate that the sample was designed to be an attractive purse accessory to be used to carry jewelry in a handbag or travel bag. It is ejusdem generis with the articles listed in Schedule 7, Part 1, Subpart D, Headnote 2(c), TSUS, and does satisfy the requirement that it be designed to be carried on the person. Thus, the question of chief use does not have to be resolved.

For the foregoing reasons, it is our position that the sample rayon brocade purse is classifiable under the provision for other flat goods of other textile materials in item 706.39, Tariff Schedules of the United States.

Sincerely,

Arthur P. Schaffer

Ms. H. K. W. Ho
Second Secretary
Hong Kong Commercial Affairs
British Embassy
3100 Massachusetts Avenue, N. W.
Washington, D.C. 20008

Dear Ms. Ho:

You have inquired as to whether a cotton polishing cloth imported as part of a shoe shine kit requires a visa in Category 369, as U.S. Customs in Seattle has told the importer. It is your position that the article in question is a toy and so should not be subject to textile licensing requirements. You have sent us a sample of the kit.

The kit consists of a tin box containing four other articles. The box, which measures about three and a half by two and a half by two and a half inches, has a hinged lid. Four holes are punched in the top for the insertion of the prongs of a metal foot rest. The articles contained in the box are a can of shoe polish, a cotton polishing cloth, a plastic combination polish applicator and shoe brush, and a plastic shoe horn.

Schedule 7, Part 5, Subpart E, Headnote 2, Tariff Schedules of the United States (TSUS), provides: "For the purposes of the tariff schedules, a '<u>toy</u>' is any article chiefly used for the amusement of children or adults." General Interpretative Rule 10(e)(i), TSUS, provides that "a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States, at or immediately prior to, the date of importation of articles of that class or kind to which the imported articles belong, and the controlling use is the chief use, i.e., the use which exceeds all other uses (if any) combined."

We think that the chief use to which the shoe shine kit would be put is a utilitarian one, the cleaning of shoes, and that any amusement value derived from its use would be only incidental. Thus we cannot agree that it is a toy. The fact that it is small, or that it could be used by a child, does not make it a toy for tariff classification purposes. We also disagree with your position that the shoe shine kit should be classified as an entirety. Each of the articles in the

C8

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

THIS DOCUMENT MAY BE RELEASED TO THE

kit has a separate identity and function, retained despite the fact that all are imported together. Therefore each article is classified separately. The box, however, if imported containing the other articles, is considered a container of the usual type ordinarily sold at retail with its contents according to General Headnote 6 (b) (i), TSUS. A separate rate of duty will not be assessed against the value of the box; rather, its cost will be counted as a part of the value of the contents.

The response your inquiry, then, is that the cotton cloth is classifiable under item 385.3000, Tariff Schedules of the United States Annotated, quota category 369.

Sincerely,

Harvey B. Fox

Stephen S. Spraitzer, Esq.
Law Offices, George R. Tuttle, P.C.
Three Embarcadero Center, Suite 1260
San Francisco, California 94111

Dear Mr. Spraitzer:

In a letter of March 13, 1986, with enclosures and exhibits, as supplemented by a letter of April 14, 1986, with attachments, you request a ruling on behalf of Arco Alaska, Inc., Anchorage, Alaska, for 14 components which will be parts of a central gas facility (CGF). Each component is a modular unit designed to perform an auxiliary function for the CGF:

Item	Description
a	Booster Compressor Aftercooler: an air to gas heat exchanger used to cool the compressed feed gas; consists of 10 bays (each containing coils and two 50 horsepower electric fan-drive motors), a power distribution center, and piping and instrumentation.
b	Stabilizer Condenser: a condenser used to condense the overhead stream from the stabilizer; consists of eight air cooler bays, each containing two coils and two fans, piping and instrumentation.
c	Firewater Skid: a module for storage of firewater and for pumping water to hydrants in the CGF; consists of a heated storage tank, pressurizing pumps, fire protection system for the structure, and a heating-ventilation-air-conditioning (HVAC) system.
d	Fired Heater: a system which provides process and building heat for the CGF; consists of three hot oil, fired heaters (natural gas), a structure housing an electrical control room and piping, and an HVAC.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C10

e and k	LTS Gas/Gas Exchangers: shell and tube heat exchanger using type 4 gas to cool feed gas; each consists of eight shell and tube exchangers and interconnecting piping.
f, g, h, and j	LTS Refrigerant Condenser: module designed to reduce temperature and condense the propane refrigerant utilized in the chillers; each consists of six induced draft bays, each with two coil sections and two fans with two-speed motors, a power distribution center with motor controls, lighting, fire detection system, and all piping and instrumentation.
m	Refrigerant Storage Tank: a tank for storage of the propane refrigerant; consists of a tank mounted on two saddles, one of which is fixed to the tank. The saddles function as the base.
o	NGL Divert and Storage Unit: this module functions as a tank for temporary storage and surge capacity for natural gas liquids; consists of a pressure vessel and a structure which houses the two pumps, inlet/outlet meters, fire detection/control system, and an HVAC.
p	Flare Manifold: a system designed to control the disposal of unwanted gases; consists of a structure housing the manifolds, valves, and other machinery to regulate the gases, the HVAC, a fire protection system, and a hoist for maintenance; flare tips, which are connected by piping to the manifold, are burners for the system and will be imported with the module.
r	Pumphouse: a module to provide storage and pumping facilities for diesel fuel and methanol injection gas; consists of two storage tanks, and a structure housing the pumps, the pump controls, a fire protection system, and the HVAC.

With the exception of item m, all of the imported modules have a base consisting, in general, of built-up I-beams, cross-ties, and stub columns which are designed to raise and support the units on pilings above the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

077955

tundra in such a manner that any heat generated in the modules will not transfer to the tundra and affect the perma-frost.

The modules will be transported by barge to location. In order to insure safe transport, a special I-beam transportation base will be welded or bolted to the skids (and then welded to the deck of a barge). These transportation bases will be removed before installation of the modules and will be scrapped.

It is your position that each one of the modules is classified as an entirety. You cite numerous administrative rulings as evidence of prior tariff treatment of similar modules as entireties. We agree with respect to items a, b, e, f, g, h, j, k, and m. For tariff purposes, these items are classifiable as entireties. That is, each module is, in itself, the functional article described under a tariff provision. All of the components (including the base or saddles) are merged into the identity of the article, i.e., a heat exchanger, a condenser, or a storage tank. United States v. Mannesmann-Meer, Inc., 54 CCPA 24, C.A.D. 897 (1966). Therefore, items a, b, e, and k, are classifiable under the provision for industrial machinery or equipment for the treatment of materials by a process involving a change of temperature, in item 661.68, Tariff Schedules of the United States (TSUS). Items f, g, h, and j, are classifiable under the provision for refrigerating equipment in item 661.35, TSUS. Item m is classified under the provision for tanks, of metal, having a capacity over 75 gallons and ordinarily installed as fixtures in industrial plants or elsewhere for storage or manufacturing use, in item 640.35, TSUS. The transportation bases for these items are the usual or ordinary types of containers within the meaning of General Headnote 6(b)(i), TSUS.

Items c, d, o, p, and r, however, are not classified as entireties because they consist of readily identifiable operational components which are housed in or situated next to a structure. Item c consists of a heated tank for water storage, and a structure which houses the equipment to maintain water pressure and pump water to hydrants located throughout the CGF. The structure also contains its own fire protection system and an HVAC system. While the functions of all these components are related, their identities are not merged into a single article. Therefore, the housing structure, together with the base, the HVAC system (including ducting), the fire protection system, and any electrical wiring or plumbing that is integral to the structure, are classifiable under the provision for other structures, of steel, in item 653.00, TSUS. The pumps and special piping related to their operation are classified under the provision for other pumps for liquids, in item 660.97, TSUS. The tank, because it contains an internal heating coil, is classifiable as a non-electrical storage water heater in item 661.65, TSUS. We note that if the HVAC is a portable or self-contained unit (not a central heating system), then it would be classified separately.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C12

079952

Item d, the fired heater module, consists of gas-fired oil heaters and a structure that houses the controls for the heaters. The heaters, and all the related controls and piping identified with the heaters in the structure, are classified as non-electrical industrial furnaces in item 661.30, TSUS. The structure together with the base, the HVAC (if a central system), and the fire protection system, is classified in item 653.00, TSUS. The electrical control room, if designed to regulate the interaction of the three heaters, is classifiable under the provision for control panels in item 685.00, TSUS.

The rationale for separate classification of the structure and the machinery in items o, p and r is the same as above. Item o, the NGL divert skid, is separately classified as follows: the base and enclosure structure, together with the HVAC and fire detection system, in item 653.00, TSUS; the tank in item 640.35, TSUS; the pumps in item 660.97, TSUS; and the flow meters in item 711.70.

In item p, the base and structure that encloses the manifold, valves, actuators, fittings, fans, motors, control system, and hoists, are classified as a structure in item 653.00, TSUS. This would include the central HVAC and fire protection systems. The hoist is classified in item 664.10, TSUS. The operational system is a pre-assembled system and functions as an entirety. It is classifiable under the provision for valves and similar apparatus for controlling the flow of gases, in item 680.27, TSUS. The flare tips are classified in item 657.25, TSUS.

Finally, in item r, the base and structure, together with any central HVAC and fire detection system, are classified in item 653.00, TSUS. The two tanks are classified in item 640.35, TSUS. The pumps are classified in item 660.97, TSUS. Any piping associated with the inherent operation of, and necessary to the completion of the tanks or of the pumps, and which is not integral to the construction of the structure itself, is classifiable accordingly with the tanks or pumps.

The transportation bases for items c, d, o, p, and r, are the usual or ordinary types of containers within the meaning of General Headnote 6(b)(i), TSUS.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Mr. Steve Kaity
Materials Manager
Strong Group, Inc.
105 Maplewood Avenue
P.O. Box 1195
Gloucester, Massachusetts 01930

Dear Mr. Kaity:

In a letter dated March 18, 1986, you inquired as to the dutiable status of a cotton bag manufactured in Taiwan. You also requested clarification of the textile category number applicable to the product. A sample was submitted for examination.

The sample is a cotton canvas bag which measures approximately 4 inches by 2 inches by 3 inches. It has a nylon coil top zipper and small woven fabric loops sewn to each end and is unlined. This bag is to be used to contain shoeshine equipment and will be marketed as a shoeshine kit.

Schedule 7, Part 1, Subpart D, Headnote 2(a)(i), Tariff Schedules of the United States (TSUS), provides that "the term 'luggage' covers — (i) travel goods, such as trunks, hand trunks, lockers, valises, satchels, suitcases, wardrobe cases, overnight bags, pullman bags, gladstone bags, traveling bags, knapsacks, kitbags, haversacks, duffle bags, and like articles designed to contain clothing or other personal effects during travel."

We view the sample cotton bag as being similar to the kitbag named as an exemplar of luggage in the cited headnote. Consequently, merchandise represented by the sample is classifiable under the provision for luggage, of textile materials, of cotton in item 706.3650, TSUSA, and dutiable at the rate of 8.2 percent ad valorem. The applicable textile category number is 369. As a product of Taiwan this merchandise is subject to quota restraints and visa requirements.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Miss H. K. W. Ho
Second Secretary
Hong Kong Office
British Embassy
3100 Massachusetts Avenue, N.W.
Washington, D.C. 20008

Dear Miss Ho:

Your letter to Mrs. Claire McDermott of the Department of Commerce was forwarded to this office for response on March 7, 1986. Your letter requests that we verify textile category 659 for a certain women's garment. A sample of the garment was also sent to this office along with your letter.

The sample in question is manufactured from a 100 percent woven acetate fabric. The garment is similar to a body suit, but it bares the entire back and shoulders. It has a red nondetachable bow tie at the chest and is trimmed with lace, both of which constitute ornamentation. The bodice of the garment is red, with a white inset at the front and three red buttons. There are two red elastic straps at the top, one of which goes around the wearer's neck and the other goes around the back, and two red elastic straps below the waist which are attached to the end of a thin strip of fabric that extends from the front of the garment through the crotch area and serves to hold the garment to the body. You state that it is designed to be worn by waitresses serving in bars and nightclubs.

According to Shirley Hargrove of the Department of Commerce, this shipment is currently being contested at our New York Seaport office, which claims that textile category number 652 applies to the garment. You believe that the garment belongs in textile category 659. You ask us to request the Department of Commerce to change its 1985 import data in categories 652 and 659 to show that 195 pounds (390 dozen) ladies' 100 percent woven acetate tuxedo outfits have been charged to category 659.

This garment lacks the coverage ordinarily required of garments worn alone; presumably it will be worn over a bodyshirt or similar garment. In any case, tariff classification as underwear is precluded because the garment is designed to be seen rather than worn under other clothing.

The "tuxedo outfit" is classified under the provision for other women's ornamented wearing apparel, of man-made fibers, not knit, in item 384.2697, Tariff Schedules of the United States, dutiable at the 1986 rate

D1

THIS DOCUMENT MAY BE RELEASED TO THE

Memorandum

DEPARTMENT OF THE TREASURY
UNITED STATES CUSTOMS SERVICE

078025

DATE: 21 MAY 1986

FILE: CLA-2:CO:R:CV:G
078025 JAS

TO : District Director of Customs
Seattle, Washington 98174

FROM : Director, Classification and Value Division

SUBJECT: Substantial Transformation of Structural Shapes;
Internal Advice 27/86

In your memorandum of March 10, 1986 (CLA-1 SE:C:D-23), you request internal advice on the issue of whether certain steel structural components of Japanese origin are cor ered to have been substantially transformed in Taiwan by eries of operations performed there, so as to be con. ered products of Taiwan for tariff purposes. A brief from counsel representing the internal advice applicant, dated March 4, 1986, supplemented by a meeting at Headquarters on March 12, 1986, at which other materials were submitted, and a follow-up brief dated April 4, 1986, complete the record.

This request concerns 18 fabricated structural units comprising the second of nine shipments, the contents of which will be used to construct the Washington State Convention and Trade Center. There is no tariff classification issue presented.

The submitted data indicates that certain hot rolled wide flange (W) H beams from Japan were shipped to Taiwan where, after preparation of shop drawings, templates (patterns), and cutting plans, they are subjected to the following processing steps: straightening to remove deformations occurring during transportion or handling, ends cut to desired lengths, cambering or controlled heating to achieve a desired convex shape, welding or bolting on of precut and drilled gussets and stiffener plates, shot blasting to remove scale and rust, inspection and packing for shipment to the job site.

THIS DOCUMENT MAY BE RELEASED TO THE

D3

Counsel cites Uniroyal, Inc. v. United States, 3 CIT 220, 542 F. Supp. 1026, aff'd. 702 F. 2d. 1022 (Fed Cir. 1983), in which the court, among other things, compared the time, labor and material costs, as well as degree of skill and expertise necessary to manufacture the initial product, with those associated with the processes in the intermediate country, in determining whether a substantial transformation in the intermediate country had occurred. Counsel then concludes, under this authority, that inasmuch as the value of the processing operations in Taiwan is 75 percent of the value of the Japanese H beams, the fabricated structural units imported into the United States must be considered products of Taiwan for tariff purposes.

In order for the Japanese H beams to be considered as having been substantially transformed in Taiwan, the record must establish that the processing operations there resulted in a product other than or materially different from the H beams of Japanese origin; that is, a new and different article must emerge from Taiwan, one having a new name, character or use. Anheuser-Busch Brewing Association v. United States, 207 U.S. 556 (1908). It is noted by the courts that a mere change in a product's name, without more, is a relatively unimportant consideration in most instances. United States v. International Paint Co., 35 CCPA 87, C.A.D. 376 (1948), National Juice Products Association, et al. v. The United States, Slip Op. 86-13 (Ct. Int'l. Trade, decided January 30, 1986).

As to character and use, there must be evidence to show that the processing in Taiwan both transforms the Japanese H beams in such a way that they are no longer the essence of the final product as imported, and also dedicates the product entering the United States to a specific use not associated with the Japanese H beams. Such evidence is lacking here. Despite the value added to the Japanese H beams by the processing in Taiwan, these H beams remain the very essence of the imported structural units. The Japanese product is not a raw material from which a finished structural unit is fabricated, but is a fully fabricated structural unit unto itself, one manufactured to specific ASTM standards. These H beams have simply been subjected to additional processing which, in our opinion, does not change their fundamental character or use.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

D4

078025

For these reasons, it is our opinion that no substantial transformation has taken place and that the fabricated structural units, the subject of this request, are to be considered as products of Japan for tariff purposes.

Harvey B. Fox

Dear Ms. Jones:

Your letter dated March 5, 1986, addressed to our New York office requesting a tariff classification of a battery operated musical book, has been referred to our office for direct reply to you.

The "My Play a Tune Book" has been described as a battery operated electronic device comprised of a keyboard permanently affixed to a music book which uses a color code to identify the eight notes on the keyboard. The book has 12 full color illustrations and 12 matching songs with words and notes. The sound of this article is produced by a single tone oscillator feeding a flat speaker which produces the tone corresponding only to the individual key being depressed.

The issue presented by your request is whether the merchandise under review may be classified as an entirety or whether the book is separately classifiable from the affixed keyboard. The issue hs been addressed recently by the Customs Service in Ruling 077514, July 16, 1986. The functions of the musical instrument and the music book appear to be co-equal in the use of this novelty item. Considering that the keyboard and music book are permanently joined together at the time of manufacture and are shipped and marketed together, we find that the subject musical book is properly classifiable as an entirety with separate classification of the batteries.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D6

In view of the foregoing, the merchandise which is the subject of your inquiry is properly classifiable under the provision for other electrical articles and electrical parts of articles, not specially provided for, in item 688.42, Tariff Schedules of the United States (TSUS), with separate classification of the batteries in item 682.95, TSUS.

Sincerely,

Arthur P. Schaffner

For Harvey B. Fox
Director, Classification
and Value Division

Re: Request for Further Review of Protest No. 3701-5-000045 dated July 23, 1985

Dear Sir:

This protest concerns your classification of tractor parts identified as bottom roller SFR 33552 and top roller R 33965 under item 692.35, Tariff Schedules of the United States (TSUS), as other tractor parts. The protestant claims that they are properly classifiable under item 692.34, TSUS, as parts for tractors suitable for agricultural use, a duty-free provision. For the reasons stated below, we have determined that the protestant's position is correct.

With regard to then-item 692.30, tractors suitable for agricultural use, and parts thereof, the Tariff Classification Study Explanatory and Background Materials, Schedule 6, at 325, states:

> Items 692.30 and 692.35 cover tractors (except platform tractors and automobile truck tractors). Item 692.30 would put on a sounder basis the existing treatment of tractors as agricultural implements under paragraph 1604 of the free list of the Tariff Act of 1930. In recent years, practically all imports of tractors have been admitted free under paragraph 1604. Tractors are mobile power units used for many purposes, including agricultural, construction, road building, etc. Attempts to distinguish so-called agricultural-type tractors from types chiefly used for non-agricultural purposes necessarily involve unrealistic distinctions. For years it was the practice to classify as agricultural implements only so-called wheel-type tractors. Within recent months a so-called half-tread tractor, said to be of special design for agricultural

D8

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

> purposes, was held to be free as an agricultural implement. Item 692.30 would change the present 'chief use' concept implicit in paragraph 1604 by providing for tractors 'suitable for agricultural use'. In view of the unrealistic distinctions which have been involved in the administration of the chief use concept, it is believed that the practical result has been more nearly a suitability test rather than one of chief use. Moreover, the suitability test is much less difficult to apply. Tractors not suitable for agricultural use are provided for in item 692.35 at the existing rate of duty of 11.5 percent ad valorem currently applicable under paragraph 372.

Further, our appellate court has held repeatedly that "suitable for use" means actually, practically, and commercially fit for such use, and that articles classified on the basis of suitability for use do not have to be chiefly used for the stated purpose. Following these guidelines, we have previously determined that the J. I. Case tractor model 850 is classifiable under item 692.34, TSUS, as suitable for agricultural use. We note the master tractor index of April 8, 1983.

General Headnote 10(ij), TSUS, provides that a provision for "parts" of an article covers a product solely or chiefly used as a part of such article. Therefore, unlike the tractors themselves, tractor parts must meet a chief use test. To be classified as parts for tractors suitable for agricultural use, any such parts must be chiefly used as parts for such tractors.

The rollers in question here are designed for use with J. I. Case tractor models 850 and 880. The model 850 is classifiable under item 692.34, TSUS, as indicated above; no information is supplied for the model 880, and it is presumed dutiable. However, inasmuch as we are satisfied that the rollers are chiefly used on the model 850, classification under item 692.34, TSUS, is warranted.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D9

078050

You should allow this protest in full. A copy of this decision should be attached to your Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffer

Kwai Chung, N.T.
Hong Kong

Dear Sirs:

This is in response to your ruling request of January 28, 1986, concerning the tariff classification of a man's boxer-style garment.

The sample submitted has an elasticized waist with a snap closure, a zippered fly-front opening and a full support liner of knit fabric.

Ruling 073387, February 17, 1984 (copy enclosed), addresses the issue presented by your case and states the principles to be followed. The resolution of whether the subject garment is shorts and therefore classifiable in item 381.6210, Tariff Schedules of the United States (TSUS), with a textile and apparel category of 347, or whether the garments are swimwear classifiable in item 381.6585, TSUS, with a textile and apparel category of 359, is the issue under consideration.

Criteria previously stated by the Customs Service for making the distinction between swimwear and shorts are discussed in Ruling 073387. Features such as heavier fabrics, pockets, cotton liners, and fly fronts are pointed out as being characteristic of multipurpose shorts and not swimwear. Ruling 073387 also states that although the fabric of the garment in question may be determinative by itself, none of the other criteria will be the sole determining factor of whether an article is classifiable as shorts or swimwear. The article of apparel should be considered as a whole, using the stated criteria for assistance in making the determination.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D11

In applying the principles set out in Ruling 073387 to the instant case, we find that the sample submitted is classifiable as multipurpose shorts. This classification is appropriate when considering the overall design of the shorts, especially the fly front and the three pockets, two of which have slanted openings.

The sample garment which is the subject of your ruling request is properly classifiable under the provision for other men's or boys' cotton shorts, not ornamented and not knit, in item 381.6210, TSUSA, with a textile and apparel category designation of 347, dutiable, if a product of Hong Kong, at 16.5 percent ad valorem.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Re: Application for Further Review of Protest No. 3801-5-002174 of July 8, 1985

Dear Sir:

This protest concerns your classification of two products, sold under the brand names Taski R-20 Plus and Taski Stripo, under items 432.25/428.47 and 430.20/428.47, Tariff Schedules of the United States (TSUS), respectively. The protestant claims that both products should be classified under item 466.30, TSUS, as synthetic detergents; or under item 493.10, TSUS, as polishing or cleaning products in immediate containers not over ten pounds each; or under item 409.30, TSUS, as products chiefly used as detergents.

Product information supplied by the importer indicates that Taski R-20 Plus is a "concentrated stripper for removing hard metal-interlock floor finishes." Taski Stripo is referred to as a "dry stripper . . . for the cleaning or stripping of floors which have been coated with acrylic emulsion or dispersion floor finish." Thus these products are more than detergents, as they contain solvents that have a functional role in stripping surfaces. Classification under items 466.30 or 409.30, TSUS, would thus be inappropriate.

Strippers of this type can be considered cleaners for tariff classification purposes. Thus, both products, if imported in immediate containers holding not over ten pounds each, are classifiable under item 493.10, TSUS. If imported in containers holding over ten pounds each, they would be classifiable as mixtures, according to their chemical composition. Taski R-20 Plus would then be classifiable under item 432.25, TSUS, with the rate of duty from item 428.47, TSUS; Taski Stripo would be classifiable under item 430.20, TSUS, with the rate of duty also from item 428.47, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

D13

You should therefore deny this protest in full, except to the extent that reclassification of the products, if imported in immediate containers holding not over ten pounds each, under item 493.10, TSUS, results in a partial allowance. A copy of this decision should be attached to your Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffler

Re: Decision on Internal Advice No. 35/86 - Classification of Gasoline Blendstock

Dear Sir:

The imported gasoline blendstock from Brazil was said to contain over 5 percent synthetically produced dutiable benzenoids. It was also stated to contain 0.13 percent sulfur. The maximum amount of sulfur allowable in unleaded gasoline under both ASTM D439 and EPA regulations is 0.10 percent by weight. Furthermore, the product was said not to conform to distillation characteristics and Reid Vapor Pressure specifications found in the former standards for motor fuel set out in T.D. 66-23(13).

Based on such specifications and in view of the synthetic benzenoid content, the product is classifiable as a benzenoid mixture in item 407.16, TSUS.

Sincerely,

Buffalo, New York 10048

FROM : Director, Classification and Value Division

SUBJECT: Internal Advice Request 9/86, Your Memorandum CLA-1-0:CV:JP of February 4, 1986

This request, which concerns the tariff classification of fiberglass tape coated with adhesive, was initiated by Phillips, Lytle, Hitchcock, Blaine & Huber on behalf of their client Bay Mills, Ltd., of Oakville, Ontario. They have proposed classification under various items of Schedules 3 and 7, Tariff Schedules of the United States (TSUS). You have determined that this article is properly classifiable under item 355.82, TSUS. For the reasons set out below, we are in agreement with your classification.

The merchandise, known as "FibaTape," is a wall repair material that can be used to cover the joints between sheets of drywall. It is an open-weave leno fabric composed of continuous filament fiberglass yarn. After the fabric is woven, one surface is coated with acrylic/acetate co-polymer dispersion, an adhesive plastics material. It is about two inches wide and comes in rolls of 65 feet or 200 feet in length. It is in chief value of the fiberglass filaments, less than 70 percent by weight of the adhesive, and less than 44 ounces per square yard in weight. Samples of the fabric with and without the coating were submitted.

Headnote 5(b), Schedule 3, TSUS, provides: "Any fabric described in Part 4C of this schedule shall be classified under Part 4C whether or not also described elsewhere in the schedules." It reflects the fact that, in general, while an article may be covered by two, or more, tariff provisions, actual classification, which will depend on other factors such as relative specificity, exclusionary headnotes, and other tariff classification principles, can be under only one provision. It resolves any uncertainty that may exist with respect to classification of fabrics described in Subpart 4C of Schedule 3 by providing specifically that preference in classification "shall" be given to items in that subpart whose descriptions cover the imported articles in question, even if those articles can also be said to be described anywhere else in the tariff schedules.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E2

001870

In Subpart 4C, item 355.82, TSUS, provides for "Woven or knit fabrics. . . of textile materials, coated or filled with rubber or plastics material. . . Of man-made fibers: . . . Other." FibaTape is a woven fabric, of continuous filament fiberglass yarn, which, by Headnote 2(c) of Part 1E, Schedule 3, is composed of man-made fibers. Headnote 2(a) of Subpart C, Part 4, Schedule 3, provides that "coated or filled" means that "any such fabric or other article has been coated or filled . . . with . . . plastics materials . . . or other substances, so as to visibly and significantly affect the surface or surfaces thereof otherwise than by change in color . . . ." In interpreting Headnote 2(a), the Customs Service has taken the position, in T.D. 81-219, that it will consider the surface of a fabric to be visibly affected by a coating or filling if, among other factors, coating or filling material causes the fabric to appear significantly more rigid than it would be if not coated or filled. Inspection of the submitted fabric samples reveals obvious differences in the rigidity of the coated and uncoated versions. The visible effect of the coating is to stabilize the fabric and prevent the easy shifting of the warp and filling yarns and resulting distortion of the fabric that can be seen in the uncoated sample. Therefore it is our position that "FibaTape" is described in item 355.82, TSUS. Since it is thus described in Subpart 4C, it must be so classified.

Counsel for the importer have suggested several alternative classifications for this article. However, even disregarding Headnote 5(b), above, we do not find these arguments persuasive. Item 338.25, TSUS, woven fabric of glass, would not be appropriate in that the fabric in question here is coated, and thus more specifically provided for under item 355.82, TSUS. Item 347.68, TSUS, narrow fabric of glass, would not be appropriate. Item 347.68 is in Subpart 4A of Schedule 3. Headnote 1 of this subpart provides that "[a]ny fabric described in this subpart and also in Subpart B or C of this part is classifiable in the said Subpart B or C." Since the coated fabric in question here is described in item 355.82, TSUS, in Subpart C, as indicated above, the latter takes precedence.

Finally, classification under item 790.55, TSUS, would not be appropriate for this article. We do not agree with counsel's interpretation of this provision that the term "flat" modifies only the terms "shapes or forms." Rather, we think that the usual and customary manner of understanding English requires the conclusion that the phrase "[s]heets, strips, tapes, stencils, monograms, and other flat shapes or forms" was intended to mean that any sheets, strips, tapes, stencils, monograms, and other shapes or forms classified under this provision must be flat. We also note that in United Mineral & Chemical Corp. v. United States, 63 Cust. Ct. 522, 523, C.D. 3946 (1969), the Customs Court stated that item 790.55 "provides for specified kinds of flat pressure sensitive articles," indicating that it was the court's interpretation that articles classified under item 790.55 must be flat as well as pressure sensitive.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E3

Further, we do not think that the leno fabric in question here is described under this provision in that it is not "flat." Leno is "[a] weaving process in which warp [lengthwise] yarns are arranged in pairs . . . . The filling is shot straight across the fabric as in a plain weave, but the warp threads are alternately twisted in a right and left hand direction, crossing before each pick [filling yarn, running from selvage to selvage at right angles to the warp] is inserted." Fairchild's Dictionary of Textiles (1967 ed.). Like leno fabrics generally, FibaTape is a lightweight, open weave, that is, the strands are widely spaced, forming a non-continuous surface. Furthermore, portions of its surface are formed by single strands, but at each intersection of a filling yarn and a pair of warp yarns, one yarn crosses over the filling yarn while the other crosses under, forming a bumpy surface measurably thicker at some points than at others. Our ruling of May 12, 1983, file 070247, indicated our position that certain pressure sensitive stickers sought to be classified under item 790.55, TSUS, were not flat within the meaning of that provision, "being three dimensional and having depressions and elevations."

For the above reasons, we conclude that FibaTape was properly classified under item 355.82, TSUS. Please notify the inquirer of this decision.

For Harvey B. Fox

078112

Mr. Brian Stuart
California Beachfront
6405 East Alondra Blvd.
Paramount, California 90723

Dear Sir:

Your letter dated February 25, 1986, requested the tariff classification of certain wearing apparel from Taiwan. A sample was submitted along with your request.

The sample is a pair of men's boxer-style shorts manufactured from a fabric that is a blend of 65 percent polyester and 35 percent cotton. It has an elasticized waist with a functional drawstring, a full support liner, an inner key pocket at the waist and two side pockets. There is a label above the left leg opening which is not considered to ornament the garment for tariff purposes.

You claim that the garment is classifiable as swimwear. And you state that plans exist to manufacture similar garments from a fabric that is a blend of 60 percent cotton and 40 percent polyester.

In determining whether men's boxer-style shorts are classifiable as shorts or as swimwear, the Customs Service has stated in a ruling dated May 2, 1984, file 073387 that:

> the term "swimwear" connotes garments which are intended for wear in water and which are predominantly used in that manner. We recognize that men's swimwear, especially in ocean beach areas, may be worn in certain commercial areas adjacent to, or in the immediate proximity of the water area by someone enroute directly to, or from, that area. Generally, however, we do not believe that swimwear has any real use other than being worn as such. Except for travel to and from the water, we believe that the use of swimwear for any activity other than swimming constitutes a fugitive use.

ES

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

In distinguishing between shorts and swimwear, the Customs Service considers, inter alia, the weight and absorbancy of the fabric and the liner.

Given the lightweight fabric of the garment and the liner's lack of absorbancy, it is our judgment that the garment is classifiable as swimming trunks in item 381.9570, Tariff Schedules of the United States (TSUSA), under category 659. Without a sample of the merchandise in cotton, we are unable to issue a ruling. It is our opinion, however, that if the sample garment is manufactured from a fabric that is in chief value of cotton, it is probably classifiable in item 381.6585, TSUSA, under category 359.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Miss Gail T. Cumins
Sharretts, Paley, Carter & Blauvelt, P.C.
80 Broad Street
New York, New York 10004

Dear Miss Cumins:

You have requested a ruling on the tariff classification of a ladies' raincoat with tie belt, Style 104, which your client, Fleet Street Ltd., expects to import from Malaysia. A sample was provided.

You claim that the coat and the belt are classified as an entirety in item 384.37, Tariff Schedules of the United States (TSUS), the provision for other women's wearing apparel, not ornamented, of cotton, not knit, coats, valued over $4 each, other. This item is dutiable at 8 percent ad valorem and is subject to textile category designation 335. You cite our decision, Headquarters Ruling Letter (HRL) 077496, February 12, 1986, designated C.S.D. 86-10, for the authority that only substantial belts are to be separately classified under the requirements of Headnote 3, to Part 6, Schedule 3, TSUS. You claim that the instant belt is not substantial and, therefore, must be classified with the coat.

The issue is whether the belt requires separate classification, or is classified with the coat as an entirety.

The instant belt is of the same woven material and color as the raincoat and is closed by tying. There are no non-textile attachments to the belt. The belt is flat and appears to be made by sewing together two pieces of the same stiff material used in the body of the raincoat. There appears to be no interfacing material between the two pieces of material to give the belt additional stiffness or body. The width is about 1-3/4 inches.

This office recently issued a ruling, part of which reconsidered the classification of textile belts of the same material as the garment with which they were imported. That ruling, HRL 077545, May 28, 1986, clarifies and modifies the ruling you cite. The application of the principles of that

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E7

ruling to the facts presented by the sample you provided dictates that the belt will continue to be classified with the coat as an entirety. Because the instant belt does not meet the standards that would require separate classification, the new effective dates are irrelevant to your client.

Your sample is being returned under separate cover.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Mr. Paul Pritchard
V.I.P. Imports, Inc.
350 Fifth Avenue
New York, N.Y. 10118

Dear Mr. Pritchard:

This is in response to your ruling request of March 17, 1986, concerning the tariff classification of a man's boxer-style garment, sample model H032. The sample that you submitted was viewed by our New York office and this ruling is based upon a description of the garment given to us from that office.

The garment has a net lining of 100 percent nylon. It has an elasticized waist with a functional drawstring threaded through two grommets and an inserted pocket at each side seam. The sample garment, known as a fish jam, is longer than the usual boxer-style shorts. The imported garments will have woven shells of either 100 percent cotton or 65 percent polyester and 35 percent cotton.

The resolution of whether the subject garments are shorts and therefore classifiable in item 381.6210, Tariff Schedules of the United States Annotated (TSUSA), with a textile and apparel category designation of 347, or whether the garments are swimwear, classifiable in item 381.6585, TSUSA, with a textile and apparel category designation of 359, is the issue under consideration.

Ruling 073387, February 17, 1984 (copy enclosed), addresses the issue presented by this case and states the principles to be followed. Features such as heavier fabrics, pockets, cotton liners, and fly fronts are pointed out as being characteristic of multipurpose shorts and not swimwear. Ruling 073387 also states that although the fabric of the garment in question may be determinative by itself, none of the other criteria will be the sole determining factor of whether an article is classifiable as shorts or swimwear. The article of apparel should be considered as a whole, using the stated criteria for assistance in making the determination.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E9

In applying the principles set out in Ruling 073387 to the instant case, we find that the sample submitted is classifiable as multipurpose shorts. This classification is appropriate when considering the overall design of the shorts and their common wearing use.

The sample garment which is the subject of your ruling request is properly classifiable under the provision for other men's or boys' cotton shorts, not ornamented and not knit, in item 381.6210, TSUSA, with a textile and apparel category designation of 347, dutiable as a product of China at 16.5 percent ad valorem.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

New England International Trading Co., Inc.
Two Summer Street
Natick, Massachusetts 01760

Dear Mr. Guirguis:

You have requested a tariff classification ruling for canned lentils that are a product of Canada.

Subpart 8B of Schedule 1, item 140.35, Tariff Schedules of the United States (TSUS), provides for dried lentils with a column 1 rate of duty of 0.15 cent per pound. However, Subpart 8C, which covers prepared or preserved vegetables, does not have a specific provision for lentils. It is our position that lentils are legumes, not beans, and so cannot be classified as beans. They must be treated as "other" vegetables and are thus classifiable under item 141.38, TSUS, with a column 1 rate of duty of 17.5 percent ad valorem.

Sincerely,

Arthur P. Schaffer

Re: Further Review of Protest No. 3001-4-000504 of July 9, 1984

Dear Sir:

This protest concerns your classification of a shipment of men's, youths', and boys' nylon/suede joggers under item 700.95, Tariff Schedules of the United States (TSUS). The protestant claims that the shoes are properly classifiable under item 700.35 or item 700.45, TSUS, as leather footwear.

In order for the shoes to be classified as leather footwear, they would have to be in chief value of leather, that is, the value of the leather would have to exceed that of each other component. Based on the cost information supplied, we have determined that the shoes in question here are not in chief value of leather.

In T.D. 78-195, the Customs Service stated that in accordance with cited judicial decisions, cost breakdowns must be accepted as accurate unless (1) the cost breakdown i incomplete, (2) the Customs Service has evidence in its possession that the cost breakdown is erroneous, or (3) the cost breakdown is so patently inaccurate on its face that Customs officers have both reason and cause to look to other reasonable factors in determining the component material of chief value.

The thrust of the instructions set forth in our telexes dated April 25 and October 15, 1984, on this matter was that importer-submitted data need not be accepted if there is tangible evidence that it is false. "Tangible evidence" was stated to include findings contained in laboratory analysis reports, investigation reports, and like reports or responses.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E12

In the case of this entry, a sample taken from the shipment, stock number 183-52936, boys' size 5, was analyzed by the Customs laboratory. Their report states that the total amount of leather in a pair of these shoes is .64 square feet. This measurement includes the leather on the exterior surface of the upper, the lasting allowance, and that leather which is not visible on the exterior surface. Component value information provided by the exporter overstates the amount of leather in these shoes as .74 square feet per pair. The resulting, lower, recalculated value of the leather in the shoe, together with the higher recalculated value of the rubber-plastics component when the labor cost for the sole is added to the other rubber/plastics costs, results in a rather wide margin for the rubber/plastics component. We conclude that this footwear was properly classified under item 700.95, TSUS.

Therefore, you should deny this protest in full. A copy of this decision should be attached to your Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur J. Schaffler

District Director of Customs
2039 Federal Office Bldg.
909 First Avenue
Seattle, Washington 98174

Dear Sir:

Re: Request for Further Review of Protest No. 3001-4-000108, dated December 2, 1983

This protest concerns the tariff classification of boys' and girls' ski parkas from Taiwan.

The merchandise was classified as follows:

1. Style 102 Girl's Nylon Parka - item 383.90
2. Style 102 Boy's Nylon Parka - item 379.95
3. Style 223 Boy's Nylon Jacket - item 379.96
4. Style 109 Girl's and Infants' Parkas - item 383.90
5. Style 109 Boy's Ski Parka - item 379.95
6. Style 300 Nylon Ski Wear - item 383.92

It is the protestant's claim that all of the garments are classifiable under the provision for garments designed for rainwear, hunting, fishing, or similar uses, in item 376.56, TSUS. This claim is based on the contention that all of the garments are designed for rainwear, hunting, fishing or similar uses and are made from fabrics which are coated or filled with rubber or plastics materials for tariff purposes. Protestant also claims that the cup test is no longer relevant when deciding on the water-proofness of a garment, and cites the decision in Pacific Trail Sportswear v. United States, Court of International Trade Slip Op. 83-45 (1983).

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E14

It is now your view that two of the styles, Nos. 109 and 300, are classifiable in item 376.56 because both garments passed the cup test and because you are of the opinion that the coating visibly and significantly affects the fabric.

With regard to the remaining two styles, Nos. 102 and 223, you have determined that style 102's fabric does not appear to have been coated sufficient to impart an effect which is different from the uncoated fabric used and style 223 failed a modified cup test.

Please note that our position concerning the cup test has changed because of the recent decision in Izod Outerwear, Div. of General Mills, Inc. v. United States, Slip Op. 85-72 (1985). There the court held that under the language of item 376.56, and Headnote 2(a), Subpart 4C, Schedule 3, TSUS, which defines the term "coated or filled," there is no requirement that the fabric comprising the garments pass the "cup test". The court concluded that in order for a garment to be classifiable in item 376.56, it must be wholly or almost wholly of coated or filled fabric and must be designed for activities that require protection from moisture or dampness.

Headnote 2(a), Subpart 4C, requires that for a fabric to be "coated for filled," the coating or filling must visibly and significantly affect the surface(s) of that fabric otherwise than by a change in color. We have examined swatches from each of the garments in question and fail to see, in any instance, where the added rubber or plastics material makes the fabric significantly stiffer, or adds a shine, luster, or dullness to the surface (T.D. 81-219), otherwise than by a change in color. Therefore, the subject garments are not coated or filled for tariff purposes and cannot be classified in item 376.56, TSUS.

Accordingly, you are directed to deny the protest in full. A copy of this decision should be forwarded to the protestant along with your Form 19 Notice of Action.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Ms. D. Incivilito
Warnacc Sourcing
90 Park Avenue, 12th Floor
New York, New York 10016

Dear Ms. Incivilito:

This is in response to your ruling request of March 21, 1986, concerning the tariff classification of men's boxer-style garments.

The resolution of whether the subject garments are shorts and therefore classifiable in item 381.6210, Tariff Schedules of the United States Annotated (TSUSA), with a textile and apparel category designation of 347, or whether the garments are swimwear, classifiable in item 381.6585, TSUSA, with a textile category designation of 359, is the issue under consideration.

The samples submitted have varying characteristics and may be considered individually for classification purposes. Criteria previously stated by the Customs Service for making the distinction between swimwear and shorts are discussed in Ruling 073387 (copy enclosed). Features such as heavier fabrics, pockets, cotton liners, and fly fronts are pointed out as being characteristic of multipurpose shorts and not swimwear. Ruling 073387 also states that although the fabric of the garment in question may be determinative by itself, none of the other criteria will be the sole determining factor of whether an article is classifiable as shorts or swimwear. The article of apparel should be considered as a whole, using the stated criteria for assistance in making the determination. Common features among the five samples submitted include an elastic waist with a functional drawstring, a coin pocket with a flap closure on the inner side of the waistband, a full support knit liner of 100 percent nylon, and two side seam inserted pockets.

Style M44 is made with a shell of 100 percent cotton and a rear inserted pocket with a zipper closure. Styles M41 and M12P have shells of 100 percent cotton. Style M127 has a shell of 55 percent cotton and 45 percent polyester and is made with two side inserted pockets. Style M3P has a shell of 100 percent nylon and two side inserted pockets.

F2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

In applying the principles set out in Ruling 073387 to your ruling request, we find that styles M41, M44, M12P, and M127 are properly classifiable under the provision for other wearing apparel, not ornamented and not knit, of cotton, in item 381.6585, TSUSA with a textile and apparel category designation of 359, dutiable, if products of Taiwan, at the rate of 9.4 percent ad valorem. Style M3P is classifiable under a similar provision for wearing apparel of man-made fibers, in item 381.9892, TSUSA, with a textile and apparel category designation of 659, with duty, if a product of Taiwan, at the rate of 4 cents per pound plus 18.8 percent ad valorem.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Ralph Fishkin, President
Stellar Industries, Inc.
2321 N. Keystone Avenue
Chicago, Illinois 60639

Dear Mr. Fishkin:

Your letter dated February 24, 1986, regarding the tariff classification of certain dry mixes you intended to produce in a foreign trade zone has been forwarded to this office for response.

The products manufactured to Department of Defense specifications are dry mixes for cakes, brownies, pancakes, sweet dough, rolls, biscuits, cornbread, donuts, cookies, icings, pudding and pie fillings, gelatin desserts, and cocoa beverages. All are essentially complete, requiring only the addition of water or milk prior to mixing and, where applicable, cooking. All are packaged in containers ranging from 1-1/2 ounces to 5 pounds, and distributed to food service facilities on military installations worldwide. Ingredient formulations are prescribed by military specifications. The sugar content varies, ranging from under 10 percent by dry weight for the pancake, roll, biscuit, and cornbread mixes, to over 65 percent for the vanilla icing mix and the vanilla and butterscotch instant desert powders (pudding and pie fillings). The information you provide shows that the gelatin dessert powder mix is in chief value gelatin.

The gelatin dessert powder mix is classifiable under the provision for edible preparations not specially provided for... of gelatin, in item 182.90, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 6 percent ad valorem. Currently, merchandise classified under item 182.90, TSUS, is not subject to quota.

The pancake, cake, brownie, dough, roll, biscuit, cornbread, donut, and cooking mixes would be classifiable in the provision for pancake flour and other flour mixes, in item 183.01, TSUS.

The icing mixes, dessert powders (pudding and pie filings), and cocoa beverage powder are classifiable under the provision for other edible preparations not specially provided for, in item 183.05, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

F4

Item 958.15, Appendix to the Tariff Schedules, subjects articles classifiable in item 183.05, TSUS, to quota restrictions if they contain over 65 percent by dry weight of sugars derived from sugar cane or sugar beets, are capable of being further processed or mixed with similar or other ingredients, and are not prepared for marketing to the retail consumers in the identical form and package in which imported. The subject vanilla icing mix and the vanilla and butterscotch instant dessert powders contain over 65 percent of such sugars. In our opinion, they will not be subject to this quota.

In Headquarters letter 553050/073278 LCS dated August 22, 1984, and 073002/073277 LCS (Legal Determination 84-0029), the quota language was held to contemplate the commercial feasibility of further processing or mixing, and aimed at bulk imports of sucrose mixtures. Wholesale purchasers could, therefore, fall within the "retail packaging" exemption from the quota when their products were contained in institution-sized packages. Hotels, bars, restaurants, taco stands, and other food service establishments have been considered to be outside the quota.

In the instant situation the purchaser is the Defense Personnel Support Center. The products are packaged in institution-sized containers, and will be used in military kitchens for preparations and serving to troops. We are of the opinion these circumstances are analogous to those "retail package" examples cited above, and the vanilla icing mix and vanilla and butterscotch dessert powders are not subject to quota in item 958.15.

Items 958.17 and 958.18 subject articles provided for in items 183.01 and 183.05, TSUS, to quota restrictions if they contain over 10 percent by dry weight of sugar, except (in relevant part) articles not principally of crystalline structure or not in dry amorphous form that are prepared for marketing to the retail consumer in the identical form and package in which imported, and cake decorations and similar products to be used in the same condition as imported without any further processing other than the direct application to individual pastries or confections.

According to the military specifications, the yellow, devil's food, gingerbread and white cake mixes, chocolate and butterscotch brownie mixes, sweet dough and donut mix, sugar, chocolate, and oatmeal cooking mixes, vanilla and chocolate icing mixes, chocolate, vanilla and butterscotch dessert powders, and the cocoa beverage powder all contain over 10 percent by dry weight of such sugars. With the exception of the cocoa beverage, all will be packaged in institution-sized containers and used in military food service facilities. However, although the language of the "retail packaging" exemption for those provisions is the same as item 958.15, it is applicable only to articles not principally of crystalline structure or <u>not</u> in dry amorphous form. All of the above products are dry mixes. The "retail packaging" exemption cannot apply. Hence, mixes containing over 10 percent sugar, classifiable in item 183.01, TSUS, will be subject to quota restrictions in item 958.17. Mixes containing over 10 percent sugar, classifiable in item 183.05, TSUS, are subject to quota restrictions in item 958.18.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

078191

As noted above, item 958.18 provides an exception to the quota for certain cake decorations and similar products. Cake and cooking icings have been considered to fall within this class of merchandise. The exception, however, applies to those products used in the same condition as imported without further processing other than the direct application to pastries. The instant products are dry icing mixes, and are not usable until mixed with water.

In summary, the gelatin dessert powder is classifiable in item 182.90 TSUS. All other mixes are classifiable in items 183.01 and 183.05, TSUS. Those dry mixes classifiable in item 183.01 or 183.05, TSUS, containing over 10 percent by dry weight of sugar are subject to quota restrictions in item 958.17 and 958.18.

Sincerely,

Arthur P. Schaffner

Runette Scherer
Import Manager
Neiman-Marcus
2727 Realty Road
Carrollton, Texas 75006

Dear Mr. Scherer:

This is in response to your ruling request of April 17, 1986, regarding the dutiable status of goods imported into the United States, and exported for the purpose of photography for advertisements and then re-imported back into the United States.

You indicate that your present plans include photographing an upcoming catalog of various wearing apparel items in Australia. The merchandise will be reimported into the United States from Australia.

In your letter you cite Ruling 717463, September 30, 1981. The principles of this ruling apply to your present situation. The removal of the merchandise to Australia is an exportation, and therefore, its return to the United States is an importation. Headnote 1, Schedule 8, Part 1, Tariff Schedules of the United States (TSUS) states that articles, absent a specific exemption, are dutiable upon importation despite the fact that duty may have been paid on a previous importation.

However, a drawback or refund may be available under the procedure of same condition drawback, the criteria of which is set forth in 19 U.S.C. 1313 and 19 CFR Section 191.141, Customs Regulations (copies enclosed). If imported merchandise is exported in the same condition as imported, 99 percent drawback or refund of duties paid on the merchandise is available.

An exemption under item 810.20, TSUS, is available if models or photographers are personally taking the articles abroad and returning with them after using them in their trade or profession. See 19 CFR Section 148.53, Customs Regulations.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Finally, any import quota and/or visa requirements, as applicable, in force at the time of re-entry of the items into the U.S., regardless of any duty implications, must be met.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Mr. William Benovitz
Ohio Valley Bag and Burlap Company
P.O. Box 504
1010 South Preston Street
Louisville, Kentucky 40201

Dear Mr. Benovitz:

You have submitted what appears to be a request for a tariff classification ruling for empty burlap bags that are a product of Italy.

The submitted sample measures approximately 16 inches by 32 inches, is open at one end, and has printing on one side.

You state that you believe that the bags are classifiable under item 385.45, Tariff Schedules of the United States (TSUS), as bags of textile materials, of vegetable fibers except cotton, not colored.

In applying the tariff statutes it is not enough to read the descriptions of the articles classifiable under each item. The headnotes to the tariff schedules are part of the law, and the descriptions must be read in conjunction with them. Headnote 2(b), Schedule 3, TSUS, provides in pertinent part:

> (b) the term 'colored,' as used in connection with . . . textile articles, means that they have been subjected to a process such as, but not limited to, dyeing, staining, painting, printing, or stenciling, in which color is imparted at any stage of manufacture to all or part of the . . . textile article. . . .

Thus the bags in question are clearly "colored" for tariff classification purposes, and are classifiable under item 385.50, TSUS, as colored bags. We sent you an identical ruling on the same type of merchandise in 1973; a copy is enclosed. The law has not been amended since that time.

F9

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

We note that you have requested a ruling on a matter that is not prospective but rather is the subject of a current transaction, that is, entry has already been made. Technically, this procedure is in contravention of the Customs Regulations. We caution that the Internal Advice procedures spelled out in section 177.11 of the Regulations, of which a copy is enclosed for your reference, should be used in the future when disputes arise with regard to current transactions.

Sincerely,

John T. Rick

Mr. Marc Wallach
Cluette YouthWear
34 West 33rd Street
New York, N.Y. 10001

Dear Mr. Wallach:

This is in response to your ruling request of March 27, 1986, concerning the tariff classification of boys' boxer-style garments.

The two samples of woven shorts which were submitted are composed of 60 percent cotton and 40 percent polyester. One style has an elasticized waist with a functional drawstring, a full support liner of knit man-made fabric, two side seam pockets and a rear inserted pocket. The rear pocket has an unsecured flap as does a coin pocket which is placed inside the waistband.

The other style also has an elasticized waist and functional drawstring and a full support liner of knit man-made fabric. It has two diagonal front inserted pockets and an unsecured coin pocket on the inside of the waistband. The garment has a fly front opening which is secured by fabric closure material and a metal snap closure at the waist.

The resolution of whether the subject garments are shorts and therefore classifiable in item 381.6210, Tariff Schedules of the United States Annotated (TSUSA), with a textile and apparel category designation of 347, or whether the garments are swimwear, classifiable in item 381.6585, TSUSA, with a textile category designation of 359, is the issue under consideration. Ruling 073387, February 17, 1984 (copy enclosed), addresses the issue present in this case and states the principles to be followed.

F11

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Features such as heavier fabrics, pockets, cotton liners, and fly fronts are pointed out as being characteristic of multipurpose shorts and not swimwear. Ruling 073387 also states that although the fabric of the garment in question may be determinative by itself, none of the other criteria will be the sole determining factor of whether an article will be classifiable as shorts or swimwear. The article of apparel should be considered as a whole, using the stated criteria for assistance in making the determination.

In applying the principles set out in Ruling 073387 to the instant case, we find that the samples submitted are classifiable as multipurpose shorts. This classification is appropriate when considering the overall design of the shorts, especially the three unsecured pockets on the first style and the fly front, metal snap closure, and slanted pocket openings on the second pair.

The sample garments which are the subject of your ruling request are properly classifiable under the provision for other men's or boys' cotton shorts, not ornamented and not knit, in item 381.6210, TSUSA, with a textile and apparel category designation of 347, dutiable, if entitled to column 1 rates of duty, at 16.5 percent ad valorem.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Mr. Shane Bronston
Vice President
International Sourcing and Countertrade Company
610 S. 3rd St.
Geneva, Illinois 60134

Dear Mr. Bronston:

This is in response to your letter of March 4, 1986, in which you request the tariff classification of a rack bar casting produced in Zimbabwe. The casting will be imported in an unfinished state, unmachined and unplated. The finished rack bar will be used as a component in a railroad or mining mechanical lift-type jack. The rack bar will be the vertical lifting member of the jack. We assume that, even in its unfinished state, the imported casting is dedicated for sole or chief use in a lift-type jack.

The Tariff Schedules of the United States, (TSUS), do not provide specifically for racks. General Headnote 10(ij), TSUS, states that "the provision for parts of an article covers a product solely or chiefly used as a part of such article, but does not prevail over a specific provision for such part." As such, it must be determined of what article described in the TSUS the rack bar is a part.

Pursuant to Webster's New World Dictionary, 2nd. Edition, 1974, a jack is defined as "any of various machines used to lift, hoist or move something heavy a short distance." That same source defines a rack as "a device for lifting an automobile for repairs from below; lift." A rack is a device within the machine, known as a jack, which is used for lifting. Therefore, the rack is part of a jack. A jacking unit, which contained a rack, has been found to be classifiable as a part of a leg-jacking system used to raise ocean drilling platforms. See I.A. 77/82.

Pursuant to General Headnote 10(h), TSUS, a tariff description for an article "covers such article ... whether finished or not finished." The subject rack bar casting, whether imported in a finished or unfinished state, is classifiable as jacks ... and parts thereof, under item 664.10, TSUS, dutiable at the rate of 2.4 percent ad valorem.

F13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Merchandise which is classifiable under item 664.10, TSUS, and is a product of Zimbabwe, may be eligible for duty-free treatment under the Generalized System of Preferences, (GSP), provided that the requirements of sections 10.171-10.175 of the Customs Regulations, (19 CFR 10.171-10.175), are met.

Sincerely,

Arthur P. Schaffer

Re: Decision on Application for Further Review of Protest No. 3901-3-000919

Dear Sir:

This protest was filed against your decision in the liquidation on August 8, 1983, of entry No. 83-680046-1 dated June 1, 1983, covering a shipment of steering wheel covers manufactured in Taiwan.

FACTS:

The steering wheel covers were classified in liquidation under the provision for articles not specially provided for, of textile materials not ornamented: of man-made fibers: pile or tufted construction in item 389.50, Tariff Schedules of the United States (TSUS).

The protestant claims that the merchandise should have been classified under the provision for other parts of motor vehicles in item 692.32, TSUS.

ISSUE:

Do steering wheel covers contribute to the safe and efficient operation of motor vehicles?

LAW AND ANALYSIS:

The protestant cites the case of Beacon Cycle & Supply Co., Inc. v. United States, 81 Cust. Ct. 46, C.D. 4764 (1978), as support for its position that the steering wheel covers are classifiable as parts of motor vehicles.

G1

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

The protestant points out that the court set out a two part test to determine whether an article constitutes a "part" of another article. The first test is that to constitute a "part" an article must be irrevocably dedicated for use with its parent article. The item must be designed solely to be used with its parent article and can have no independent function. The second test or requirement is that the "merchandise must serve a useful function in relation to the main article so that in some way it contributes to the safe or efficient operation of the article".

We agree with the protestant that the steering wheel covers meet the first test. Unquestionably, they are designed specifically for use on motor vehicles and can serve no other function. They are in fact irrevocably dedicated for use with motor vehicles.

We do not agree with the protestant that the steering wheel covers meet the second test. The argument that these covers contribute to the safe and efficient operation of a motor vehicle because they afford the user a better grip on the wheel and keep one's hands warm is not tenable. Steering wheel covers are sold as accesories and they appeal primarily to motorists who want a dressed up customized appearance to their automobile. There is no evidence that they provide a better grip of the wheel. While they may be warmer to the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G2

078216

touch than a cold steering wheel, this benefit is considered marginal because virtually all automobiles have heaters to warm the car's interior and most drivers during the initial cold period after starting would wear gloves.

In view of the foregoing it is our position that steering wheel covers are not "parts" for tariff purposes.

HOLDING:

The steering wheel covers are classifiable under item 389.50, TSUS. A copy of this decision should be attached to the Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffer

078231

TO : District Director of Customs
Seattle, Washington 98174

FROM : Director, Classification and Value Division

SUBJECT: Substantial Transformation of Structural Shapes; China Steel Structure Co., Ltd.

This decision concerns the issue of whether certain hot rolled wide flange H beams of Japanese origin are considered to have been substantially transformed in Taiwan by a series of operations performed there so as to be considered products of Taiwan for tariff purposes. A brief from counsel representing the subject company, dated April 28, 1986, supplemented by a meeting at Headquarters on April 30, 1986, at which other materials were submitted, and a follow-up letter dated May 2, 1986, make up the record in this case.

This request concerns ninety-nine (99) fabricated structural units comprising the third of eleven shipments, the total contents of which will be used to construct the Washington State Convention and Trade Center in downtown Seattle. The concerned import specialist has forwarded photographs of each of these structural units, specifically correlated by installment number and check number to the master packing list.

The same issues with respect to eighteen (18) similar components, comprising the second of the eleven shipments, were addressed in our response to Internal Advice 27/86 (078025).

The submitted data indicates that hot rolled wide flange (W) H beams from Japan were shipped to Taiwan where, after preparation of shop drawings, templates (patterns), and cutting plans, they are subjected to the following processing steps: straightening to remove deformations occurring during transportion or handling, ends cut to length, cambering or controlled heating to achieve a convex shape, welding or bolting on of drilled bracing angles, stiffener plates, and gussets, all cut from flat rolled Taiwanese plate, shot blasting to remove scale and rust, inspection and packing for shipment to the job site.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G4

078231

Counsel has previously cited Uniroyal, Inc. v. United States, 3 CIT 220, 542 F. Supp. 1026, aff'd. 702 F. 2d. 1022 (Fed Cir. 1983), and National Juice Products Association, et al. v. United States, Slip Op. 86-13 (Ct. Int'l. Trade, decided January 30, 1986), in which the court, among other things, compared the time, labor and material costs, as well as degree of skill and expertise necessary to manufacture the initial product, with those associated with the processes in the intermediate country, in determining whether a substantial transformation in the intermediate country had occurred. Counsel then concludes, under this authority, that inasmuch as the sum of the cost of the Taiwanese plate and direct labor in Taiwan is $294,818, which is significantly more than the $191,722 cost of the Japanese H beams, the fabricated structural units imported into the United States must be considered products of Taiwan for tariff purposes.

In order for the Japanese hot rolled H beams to be considered as having been substantially transformed in Taiwan, the record must establish that the processing operations there resulted in a product other than or materially different from the H beams of Japanese origin; that is, a new and different article must emerge from Taiwan, one having a new name, character or use. Anheuser-Busch Brewing Association v. United States, 207 U.S. 556 (1908). A mere change in a product's name, without more, is a relatively unimportant consideration in most instances. United States v. International Paint Co., 35 CCPA 87, C.A.D. 376 (1948). As to character and use, however, there must be evidence to show that the processing in Taiwan transforms the Japanese H beams in such a way that they are no longer the essence of the final product as imported.

With respect to the structural units which comprise the third shipment presently under consideration, we have identified fourteen (14) such units which, in our opinion, have not met this test. The value added to these units in Taiwan is relatively minimal when compared to the value of the Japanese H beams. More importantly, the H beams are clearly recognizable in and remain the very essence of these 14 components. The additional processing is not substantial and does not change their fundamental character. These 14 structural units which we find not to have been substantially transformed in Taiwan are identified as follows:

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

65

Installment Number	Check Number
3-1A	BRD-V13
3B	5A49-1
3B	BR8-H51
3-1B	6A9-1
3-1C	BRF-V15
3-1C	T20-1
3-1C	T20-2
3-1C	T20-9
3-1C	6A61-1
3-1C	T20-1
3-1C	RAG-1
3-1D	BRL-H8
3-1D	T19-11
3-1D	T19-6
PCB	6CP36-1

With respect to the remaining eighty-five (85) structural units under consideration, we are satisfied that the substantiality of the cutting, bolting/welding of the drilled angles, stiffener plates, gussets, and built-up support sections, all fabricated from Taiwanese flat rolled plate, among other processing operations, sufficiently transforms the multi-purpose hot rolled H beams of Japanese origin into specifically identifiable structural components dedicated for use in one, particular building. The built-up support sections are structural sections similar in appearance to the H beams. Attachment of these sections to the H beams results in fabricated units designed to support other load bearing members. By virtue of the extensive processing operations in Taiwan, the Japanese H beams have been precision engineered into structural units capable of withstanding far greater stresses than the H beams themselves. Moreover, the total weight of these structural units in many instances is significantly greater than the weight of the Japanese H beams. The imported components have lost the identifying characteristics of the Japanese hot rolled H beams, and have taken on significantly new attributes which dedicate them to an exclusive use. This conclusion is reinforced by the fact that these structural units would be reduced to scrap and sold, if not used in the structure as intended. For these reasons, the remaining 85 structural units in the third shipment, correlated by installment number and check number to the master packing list, are to be considered products of Taiwan for tariff purposes.

078232

This ruling concerns the textile category applicable to certain towels.

ISSUE:

The issue presented by the subject towels is whether those towels are dish towels and are, therefore, includable in category 369, or whether those towels are within a class of towels other than dish towels and includable in textile category 363.

FACTS:

The submitted sample is a cotton towel with terry pile on both sides. It is rectangular in shape and measures approximately 15 by 25 inches. The towel is all white except for three parallel blue stripes, approximately 1 inch apart, that run lengthwise down the center portion on each side.

Prior to the importation of the subject merchandise the importer sought assistance from the local Customs office concerning the textile quota category applicable to the merchandise. A Customs import specialist advised the importer that the subject merchandise would be classifiable as dish towels, in item 366.2420, Tariff Schedules of the United States Annotated (TSUSA), with duty at the rate of 11.7 percent ad valorem, and subject to restraints applicable to textile category 369. That opinion, given in writing, was clearly accompanied by the words "Advisory only." Based on

68

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

that opinion, the importer ordered the towels in question and obtained a visa for category 369 from the Government of Pakistan. The merchandise is now being denied entry because it is not accompanied by a category 363 visa.

LAW AND ANALYSIS:

Since hand towels and dish towels fall within the same general size ranges and are similar in appearance, the distinction between the two is one of use. In accordance with General Headnote 10(e)(i), TSUSA, a provision controlled by use, other than actual use, is governed by the chief use in the United States of the class or kind to which the imported articles belong. It is our experience that terry dish towels in the United States usually contain designs or pictures which make them more conducive for use in a kitchen. The three blue lines down the center of the subject towels do not appear to serve that purpose. To the contrary, we are advised by our National Import Specialist that the subject merchandise belongs to a class or kind chiefly used as hand towels.

In addition, although category 369 is, in essence, a basket category, dish towels, bar mops, and shop towels are specifically named in statistical classifications as falling within that category. All other cotton terry towels are includable in textile category 363. Therefore, any cotton terry towels of the same general size as the imported merchandise which are not identifiable as being chiefly used as shop towels, bar mops, or dish towels, fall within category 363. In this instance, it appears that, at best, the subject

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

G9

merchandise may be a multi-use article. As such, it is not one of the named towels and is includable in category 363.

In regard to the advisory "ruling" the importer obtained from a Customs import specialist, what the importer actually received was an opinion that was clearly designated "Advisory." Part 177, Customs Regulations (19 CFR, Part 177) sets forth the procedures which allow interested parties to obtain from the Customs Service formal rulings that may be relied upon. As a matter of course, to assist importers, Customs import specialists routinely give advisory opinions, but they are indicated as such and are not binding on the Customs Service.

HOLDING:

The subject merchandise is classifiable, assuming it is valued over 45 cents each and over 1.45 cents per pound, in item 366.2460, TSUSA, and subject to restraints applicable to textile category 363.

Mr. Bruce R. Kindler
President
Kinco International, Inc.
P.O. Box 02345
Portland, Oregon 97202-0345

Dear Mr. Kindler:

This is in response to your letter of March 24, 1986, and your follow-up correspondence of July 15, 1986, in which you request the tariff classification of certain leather articles. You state that the merchandise is for the industrial welding market and not for general fashion use. Literature depicting garments and other articles is provided. You suggest classification of all designated merchandise as articles, not specially provided for, of leather: other, under item 791.90, Tariff Schedules of the United States (TSUS), dutiable at the rate of 0.5 percent ad valorem.

The majority of the articles in question are garments. These include leather cape sleeve and bib combinations, separate leather cape sleeves, detachable bibs, full jackets, jacket sleeves, aprons and spats. These are made from cowhide and are advertised to provide "maximum protection and durability." Also included in the literature is a leather rod holder, designed for carrying electrodes.

Leather workman's aprons have been found to be wearing apparel in that they have a major function in the protection of clothing. They are not worn solely for protection against injury. See C.I.E. 184/61. The illustrated garments, including the cape sleeve and bib combination, cape sleeve, detachable bib, jacket, jacket sleeve, waist style apron, bib apron, split leg apron and spats, are, therefore, wearing apparel and would be classifiable as wearing apparel, not specially provided for, of leather, other: other, under item 791.76, TSUS, dutiable at the rate of 6 percent ad valorem.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G11

The rod holder is not a garment and would be classifiable as an article, not specially provided for, of leather, other, under item 791.90, TSUS, dutiable at the rate of 0.5 percent ad valorem.

Sincerely,

for Harvey B. Fox
Director, Classification
and Value Division

Ms. Grace Chan
L. Kee & Company, Inc.
530 Forges Boulevard
South San Francisco, California 94080

Dear Ms. Chan:

You have requested the tariff classification and quota status of certain bed sheets.

You state that finished cotton sheets that are products of the United States are exported to China where lace or embroidery is sewn on the sheets. The embroidered sheets then are exported to the United States.

The sheets which are considered to be ornamented by the embroidery or lace designs are classifiable under the provision for other bedding ornamented: sheets and pillowcases, of cotton in item 363.0130, Tariff Schedules of the United States Annotated (TSUSA), if napped, or if not napped in item 363.0135, TSUSA, dutiable at the rate of 25.5 percent ad valorem.

Headnote 2, Part 1, Schedule 8, TSUS, provides that any product of the United States which is returned after having been advanced in value or improved in condition abroad, shall be a foreign article for the purposes of the Tariff Act of 1930, and is subject to duty unless otherwise prescribed.

This merchandise is not eligible for an exemption or partial exemption from duty under items 806.20, TSUS, or 807.00, TSUS. Since sewing of embroidery or laces to finished bed sheets constitutes neither a repair nor an alteration, item 806.20, TSUS, is foreclosed, because it applies only to articles that are returned to the United States after repairs or alterations are made abroad.

Item 807.00, TSUS, is applicable to exported fabricated United States components that are designed to be fitted with other components in an assembly process, with no operations performed thereon except the attachment of the components to form the imported merchandise. Sewing embroidery or lace on the sheets does not constitute an assembly of separate components; therefore, item 807.00, TSUS, would not apply.

Under section 12.130(c), Customs Regulations, which involves the country of origin of textile and textile products for import restraint purposes, merchandise which falls within the purview of Headnote 2, Part 1, Schedule 8, TSUS, may not upon its return to United States, be considered a product of the United States. Thus, the sheets require a visa from China for category 361.

G13

THIS DOCUMENT MAY BE RELEASED TO THE
PUBLIC _____

We have considered your request to mark these bed sheets "Made in U.S.A., ornamented in China". It is our view that marking the bed sheets in such a manner is unacceptable. In our opinion, an appropriate label would be "Made in" or "product of China, U.S.A. fabric". We caution, however, that you should request another ruling from Customs if you decide to use a different label.

Your second proposal involves cotton material from the United States that is sent to China where it is cut and sewn into bed sheets and pillows. The bed sheets and pillows are embroidered and exported to the United States. The sheets are classifiable in item 363.0130, TSUSA, if napped or if not napped in item 363.0135, TSUSA. The pillowcases are classifiable in item 363.0110, TSUSA, if napped or if not napped in item 363.0115, TSUSA, with duty at the rate of 25.5 percent ad valorem. The articles should be marked "Made in China" or "Product of China". The sheets and pillowcases require visas from China for categories 361 and 360, respectively.

Due to the frequent changes to the statistical suffixes (the last two digits of the item number) and the applicability of import restraints, you should contact your local Customs office prior to the importation of this merchandise to determine its current status.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

078247

District Director of Customs
555 Battery Street
San Francisco, California 94126

Dear Sir:

Re: Decision on Application for Further Review of Protest No. 2809-5-000274

This protest was filed against your decision in the liquidation on January 4, 1985, of entry No. 84-260624-8, dated August 10, 1984, covering a shipment of brass plated hall trees manufactured in Taiwan.

This ruling concerns the correct tariff classification of the brass plated hall trees produced in Taiwan.

FACTS:

The merchandise is described on the invoice as "BP800 brass hall trees" manufactured by Sunlyson Industrial Corporation in Taipei, Taiwan. At the time of entry, the merchandise was classified under the provision for furniture and parts thereof, not specially provided for, of copper, in item 727.65, Tariff Schedules of the United States (TSUS). This provision is eligible for Generalized System of Preferences (GSP) duty-free entry for articles manufactured in Taiwan.

Upon obtaining a sample of the merchandise, the San Francisco import specialist determined that the "brass hall trees" were actually "brass plated hall trees." The merchandise was re-classified and liquidated under the provision for furniture and parts thereof, not specially provided for, other, in item 727.70, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A3

078247

ISSUE:

Are the brass plated hall trees properly classified as furniture, copper, in item 727.65, TSUS, or as furniture, other, in item 727.70, TSUS?

LAW AND ANALYSIS:

The protestant's broker argues that the merchandise should be classified as furniture of copper in item 727.65, TSUS. He encloses a component of chief value breakdown from the manufacturer, which states as follows:

Steel Tubing	U.S. $3.36
Polish and Plate	5.37
Brass Plated Hardware	1.25
Packing	.20
Inland Shipping	.10
Bank Charge	.15
Profit	.32
Total cost -	$10.75

The San Francisco import specialist maintains that "furniture of copper" refers to copper furniture and to solid brass furniture. Solid brass is an alloy, usually of 65 percent copper and 35 percent zinc, which is in chief value and in chief weight of copper. The import specialist asserts that brass plated furniture (like the instant hall tree) is made of steel tube that is electromechanically plated with a very thin (.0003937 inch) coat of decorative brass plate, of which only 65 percent is copper. He cites Modern Electroplating, 3rd edition (1974), edited by Frederick A. Lowenheim and published by John Wiley and Sons, in support of his position.

A4

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

We note that the manufacturer's value statement incorrectly combines the cost of the brass plate and the polishing. This error means that the value statement is incorrect.

In an additional brief dated June 30, 1986, the protestant's attorney concedes that the figure for the brass polish and plate includes not only the cost of the brass but the labor for plating and polishing the hat tree. She admits that without the labor costs, the brass portion of the hat tree costs less than the steel tubing. She argues that it is not the cost of the "raw" brass, but the cost of the brass which has been plated and polished on the steel tubing which should be used as the cost of the brass.

The proper method of determining component material of chief value is to ascertain the costs of the separate parts or component materials to the manufacturer at the time they are in such condition that nothing remains to be done to them except put them together. See United States v. Jovita Perez, et al., 44 CCPA 35, C.A.D. 633 (1957). In the instant case, the point at which nothing remains to be done to the components except put them together is the point at which the "raw" brass and the steel tubing are still separate entities, therefore the cost of the brass and the steel tubing must be compared at this point. The "brass plating and polishing" labor costs are simply the labor costs of combining the two

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078247

15

components; they cannot be counted as part of the value of either component alone. When the cost of the brass and the cost of the steel tubing are compared, the cost of the steel tubing far exceeds the cost of the brass, therefore the hat tree cannot be classified as furniture of copper.

It is Customs' experience that the component of chief value of brass plated furniture from Taiwan is always the base metal inasmuch as the plating has a minimal value. Based on the fact that the attorney concedes that if the labor costs are disregarded, the brass portion of the hall tree costs less than the steel tubing and upon Customs' experience, we find that the brass plated hall tree is classifiable under the provision for furniture, other, in item 727.70, TSUS, and not under the provision for furniture of copper, in item 727.65, TSUS.

HOLDING:

The instant brass plated hall tree is classifiable in item 727.70, TSUS. You should deny the protest in full. A copy of this decision should be attached to your Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffer

Mr. Richard G. Lamb
President
Mainland Windsurfing Hawaii, Inc.
P.O. Box 40119
Santa Barbara, California 93140

Dear Mr. Lamb:

In a letter dated May 2, 1986, you inquired as to the dutiable status of a nylon mast cover which you intend to import from Hong Kong and Taiwan. A sample was submitted for examination.

The sample produced in Hong Kong measures approximately 13 feet in length and 10.5 inches at its widest dimension. There is a zipper closure running from the bottom to approximately its midsection. At the point of closure, there are two plastic zippers with attached textile braided loops. Stitched to the back portion at each end at the hem is a woven textile loop. Screen printed at one end on the front is the Windsurfing Hawaii logo.

Schedule 7, Part 1, Subpart D, Headnote 2(a)(ii), Tariff Schedules of the United States (TSUS), provides that "For the purposes of the tariff schedules — (a) the term '<u>luggage</u>' covers — (ii) brief cases, portfolios, school bags, photographic equipment bags, golf bags, camera cases, binocular cases, gun cases, occupational luggage cases (physicians', sample, etc.), and like containers and cases designed to be carried with the person, except handbags as defined herein."

Although the mast cover, containing a mast for a "windsurfer surfboard," is said to be used solely for the protection of such item from the elements, its protective feature serves no more or less than any other travel or carrying bag. However, it is designed, despite its length, for transporting its contents from the home to the beach and from beach to beach, etc. In fact, the textile loops (one attached to each back end) can be utilized in securing the cover, with its contents, during travel. Furthermore, we do not consider the presence of handles as a determining factor as to whether an article is designed for luggage purposes.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A7

Inasmuch as the mast cover appears to be designed to protect its contents during travel, it is our position that it is properly classifiable under the provision for luggage of other textile materials in item 706.4152, TSUSA, and dutiable at the rate of 20 percent ad valorem. The applicable textile category number is 670. As a product of Hong Kong it is not currently subject to quota restrictions. However, this merchandise exported on or after August 1, 1986, is subject to visa requirements.

Sincerely,

John T. Lall

Daniel A. Pinkus, Esq.
Assistant Chief Counsel
International Trade Litigation
26 Federal Plaza
New York, N.Y. 10278

Re: Heraeus-Amersil, Inc. & United States,
Slip Op. 86-41, Court No. 80-9-01501

Dear Mr. Pinkus:

In your letter of May 8, 1986 (JDD:ta NR60505-1), you solicit our opinion on the advisability of appealing the captioned decision.

In accordance with a detailed stipulation of fact, the merchandise at issue is precious metal contact tape wound in continuous lengths onto reels. It is designed for and used only as contacts in contact cluster springs and transfer cluster springs used in certain telephone relays. Using the weld-then-cut application method, a length of the subject tape is welded to the tips of each of the springs of the clusters, then cut to the correct length to form a contact.

In confirming classification as parts of relays, in item 685.90, Tariff Schedules of the United States (TSUS), the court rejected the Government's claimed classification of the tape as a material, under the provision for other rolled precious metal, semimanufactured, in item 605.66, TSUS. The court's decision was apparently based on two factors: (1) the tape was designed for and dedicated to an exclusive end use, and (2) it is subjected to minor post-importation processing which the court found to be the equivalent of a simple assembly.

On page 41 of Slip Op. 86-41, the Heraeus-Amersil trial court recited the longstanding rule on the issue of material versus unfinished articles:

THIS DOCUMENT MAY BE RELEASED TO THE
PUBLIC ____

> The rule*** recognizes the fact that most small articles are not produced as individual or separate products * * *. The rule of decision is therefore established that where such articles are imported in the piece and nothing remains to be done except to cut them apart they shall be treated for dutiable purposes as if already cut apart and assessed according to their individual character or identity. This follows, however, only in case the character or identity of the individual articles is fixed with certainty and in case the woven piece in its entirety is not commercially capable of any other use (emphasis added).

United States v. Buss & Co., 5 C.C.A. 110, 113, T.D. 34138 (1914).

The merchandise before the Buss court was woven cotton fabric in running lengths, having the appearance of ordinary cotton tape. However, at regular intervals there appeared cross marks or ridges to indicate the points at which the article may be cut into individual coat hangers. Thus, individual coat hangers, in unfinished form, were clearly identifiable in the material.

The rationale of the court in United States v. Nylonge Corporation, C.D. 2144, aff'd, C.A.D. 764 (1960), cited in Heraeus-Amersil, in holding certain compounds of non-acetate cellulose to be finished or partly finished cellulose sponges, is somewhat more difficult to discern because of the uniqueness of the merchandise. The sponge blocks there were oval and rectangular in shape. The trial court found that the utility of the sponges lay in their absorptive capacity. Such capacity of the imported sponge blocks was found to be sufficient for the products to be used as sponges. The cutting to size did not make the imported product any more or less a sponge.

The decision in J.E. Bernard & Co. v. United States, 50 Cust. Ct. 41, C.D. 2386 (1963), appears to more closely follow the Buss rule. There, 100 to 500 ft. of steel bands or strips in coils which by a milling process had teeth cut in them in such a way to meet the requirement for use as a bandsaw blade, were held to be classifiable as steel band saws, finished or further advanced. However, testimony was adduced to the effect that the teeth were cut in such a way, from 2 to the inch to as many as 32 to the inch, so that

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

078275

after importation lengths could be cut to accomodate a particular bandsaw. In this context, the number of teeth per inch were used to determine the particular blade length to be cut. This is analogous to the cross marks or ridges in Buss.

In our opinion, the decision in Doherty-Barrow of Texas, Inc, v. United States, 3 C.I.T. 229 (1982), cited with approval in Heraeus-Amersil, represents an unwarranted diversion from the Buss rule (referenced in the body of the decision). There, the competing provisions were the one for bale ties made from strip, in 642.93, versus the provision for steel strip, in item 609.03. The merchandise was made to rigid chemical specifications and tensile strength, dedicating it to use only to make steel cotton bale ties. Except for cutting to length, no further post-importation processing was required. We believe the court erred because what they found to be fixed with certainty was the identity and character of the steel strip and not that of the individual bale ties because there were no individual bale ties identifiable. We do admit, however, that the decision in Doherty-Barrow may have been partly the result of the unique provisions involved, and the fact the material was made to rigid specifications as to chemical composition and tensile strength. Note the court's statement at page 232:

> For a bale tie to be "made from" strip under item 642.93, TSUS, some manufacturing process is implied which transforms strip steel into bale ties, whether finished or unfinished. Both finished and unfinished manufactured products must be sufficiently processed to a point where they possess characteristics distinguishing them from the material from which they are made. American Import Co. v. United States, 26 CCPA 72, 75-76, T.D. 49612 (1938).

This statement obscures, or perhaps ignores, the fact that individual ties were not identifiable in the material. Note as well The Harding Co. et al. v. United States, 23 CCPA 250, T.D. 48109.

Despite the foregoing, we agree that Doherty-Barrow, supra, and to a lesser extent R.W. Smith and John D. Winchester A/C Doherty Petroleum Co., Inc. v. United States, C.D. 2250, rev'd C.A.D. 806 (1962), and J.E. Bernard, supra,

A11

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078275

represent a significant, though erroneous, divergence from the original Buss rationale. This being so, we concur in your opinion that an appeal in this case would be fruitless.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

078300

District Director of Customs
Buffalo, New York 142302

Re: Decision on Application for Further Review of Protest No. 0901-5-825622

Dear Sir:

This protest was filed against your decision in the liquidation on September 20, 1985, of entry No. 85-446534-1 dated September 4, 1985, covering a shipment of suspensions for helmets manufactured in Canada.

FACTS:

Certain energy absorbing suspensions for helmets were classified in liquidation under the provision for other wearing apparel (including rainwear) not specially provided for, of rubber or plastics in item 772.31, Tariff Schedules of the United States (TSUS).

The protestant asserts that the suspensions are properly classifiable under the provision for other articles not specially provided for, of rubber or plastics in item 774.55, TSUS.

ISSUE:

Are the suspensions considered parts of headwear for tariff purposes?

LAW AND ANALYSIS:

The suspension attaches to a helmet and fits over the crown of the head. It is used as a support for the helmet and to provide comfort and safety for the wearer.

Schedule 7, Part 1, Subpart B, headnote 1(a), TSUS, provides that "the term '<u>headwear</u>' includes hats, caps, berets, bonnets, hoods, and all other head coverings, of whatever material composed (including bodies, forms, plateaux, manchons, and shapes for headwear), designed for human wear,

A13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

except infants' knit headwear, but does not include mufflers, scarves, shawls, mantillas, veils, and similar articles; hair nets; hair ornaments; or wigs and similar articles."

This headnote has been interpreted by Customs to include only articles of headwear that are complete or substantially complete in themselves. The headnote does not include "parts" of headwear. The suspension is an essential part of the helmet and not a casual, auxiliary or optional accessory. Inasmuch as parts of headwear have traditionally been classified as wearing apparel, it is our view that classification of the merchandise under item 772.31, TSUS, was appropriate.

HOLDING:

The protest should be denied. A copy of this decision should be attached to the Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffer

Mr. Jerome Sachs
Doris Trading Corporation
45 West 36th Street
New York, New York 10018

Dear Mr. Sachs:

You have requested the country of origin of dyed shop towels that will be cut and hemmed in Cyprus from fabric woven in China or Pakistan. A sample of the dyed shop towel was submitted along with your request dated April 7, 1986.

The production process involves sending fabric from China or Pakistan to Cyprus where it is marked and cut to size. After the edges are finished by overlock stitching, the towels which are linked together must be separated. Following the manufacturing process, the shop towels are dyed. You have indicated that the Cyprus operation requires approximately a $100,000 investment. The machines involved in Cyprus include (1) yard folding machines (2) cutting tables and (3) 15 yamato sewing machines. You state that 15 out of the 20 employees are skilled workers.

In determining the country of origin of textiles and textile products that consist of materials produced or derived from, or processed in, more than one country, the imported article is considered to be a product of that country where it last underwent a substantial transformation. A textile or textile product is considered to have undergone a substantial transformation if it has been transformed by means of substantial manufacturing or processing into a new and different article of commerce.

Our regulations concerning the country of origin of textiles state that fabric that is woven in a country is usually considered to be a product of that country. See section 12.130(e)(1)(iii), Customs Regulations. Thus, the fabric in question which is woven in China or Pakistan is a product of either country, unless it undergoes a substantial transformation in Cyprus. Under section 12.130(e)(2)(ii), Customs Regulations, cutting to length or width and hemming or overlocking fabrics which are readily identifiable as being intended for a particular commercial use does not result in a substantial transformation. The merchandise before us fits

81

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

squarely within this proscription. In terms of time, labor, and complexity, the cutting to size and stitching performed in Cyprus are minor processing operations. Thus, dyeing the fabric in Cyprus is insufficient to result in a change in the country of origin. Considering all these factors, it is our view that the essence of the shop towel is the fabric woven in China or Pakistan.

In a recent ruling dated October 24, 1985, file 076879, this office ruled that the country of origin of shop towels was the country where the fabric is woven. Our analysis in the instant case leads us to a similar conclusion. Thus, the instant shop towels are products of China or Pakistan.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Dear Doctor Waider:

Your letter of April 30, 1986, concerns the tariff status of your product Sodium Omadin or Sodium Pyrion.

The chemical name of the product is given as natrium (sodium)-z-pyridinthiol-n-oxid(e).

Information available to Customs indicates that this product is chiefly used as a bactericide. As such it would be classifiable under the provisions for other anti-infective agents in item 411.96, Tariff Schedules of the United States. The rate of duty is 8.1 percent ad valorem.

Sincerely,

Arthur P. Schifflin
Chief, General
Classification Branch

Mr. Richard M. Polinsky
President
Clayton Enterprises
12381 Ross Ridge
St. Louis, Missouri 63146

Dear Mr. Polinsky:

Your letter dated December 31, 1985, addressed to our New York office concerning the dutiable status of a simulated pearl necklace imported packed in a satin brocade purse has been referred to this office for a direct reply to you. A sample of the necklace and purse manufactured in Taiwan was submitted for examination.

You suggest that the purse is dutiable as an entirety with the string of pearls because it is intended to be protective packaging for the contents.

Schedule 7, Part 1, Subpart D, Headnote 2(c), Tariff Schedules of the United States (TSUS), provides that "the term '<u>flat goods</u>' covers small flatwares designed to be carried on the person, such as banknote cases, bill cases, billfolds, bill purses, bill rolls, card cases, change purses, cigarette cases, coin purses, coin holders, compacts, currency cases, key cases, letter cases, license cases, money cases, pass cases, passport cases, powder cases, spectacle cases, stamp cases, vanity cases, tobacco pouches, and similar articles."

The satin brocade purse imported with the string of pearls is not merely packaging of the pearls but rather is "ejusdem generis" with the purses listed in the above-cited headnote. The sample purse is designed to be carried on the person. It is a container which derives its name from the item it is designed to contain. It is of a type usually sold at retail separately as a flat good. Whether the instant string of pearls is imported with the purse is not determinative as to the tariff classification of the merchandise.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B4

It is our position that the simulated pearl necklace imported packed in a satin brocade purse does not constitute an entirety for tariff purposes. When combined, the jewelry and the purse do not form a new entity; instead they retain their individual identities. It should also be noted that the purse cannot be considered as a container ordinarily sold at retail with its contents because as many purses are sold with jewelry as are sold without.

The sample purse, whether or not imported with the string of pearls, is classifiable under the provision for flat goods of textile materials, other in item 706.3900, TSUSA, and dutiable at the rate of 20 percent ad valorem. The applicable textile category number is 670-F. As a product of Taiwan the purse is subject to quota restraints and visa requirements.

Sincerely,

Arthur P. Schaffner

Chief, Customs Information Exchange
6 World Trade Center
Room 450
New York, New York 10048

Dear Sir:

Customs Form 6431 executed at the port of Houston, Texas, concerns the entry in September 1980 of Sipernat 22, a product of Degussa AG, Frankfurt, West Germany and imported by Degussa Corporation, Teterboro, New Jersey.

The product is understood to be a synthetically produced amorphous silica. The question is whether it is classifiable as a silica, n.s.p.f., in item 523.11, TSUS, as an inorganic compound in item 423.00, TSUS, or an inorganic acid in item 416.45, TSUS.

Since synthetically produced amorphous silicas do not have the physical or chemical properties of the mineral silica, they would not be classifiable as the mineral silica in item 523.11. In addition, since its existence as silicic acid, based on bound water and adsorbed water content, is open to question, classification in item 416.45 is not established.

Therefore, a synthetic amorphous silica with bound water content of 6 percent or less, is classifiable as an inorganic compound in item 423.00. However, Customs has found that an established and uniform practice of classification existed to classify synthetically produced amorphous silica as silica, n.s.p.f., in item 523.11, TSUS, if entered prior to September 24, 1984 (T.D. 84-130).

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B6

Accordingly, the merchandise in question would be classifiable in item 523.11, TSUS.

Sincerely,

Arthur P. Schiffrin
Chief, General
Classification Branch

Washington, D.C. 20008

Dear Miss Ho:

Re: Your Reference #177/85

Your letter dated April 15, 1986, requested the tariff classification and category designation of a certain garment.

The submitted sample is a woven garment manufactured from a fabric that is 80 percent polyester and 20 percent cotton.

You state that Cutler Ridge Textile Inc. imported these garments at New York Seaport covered by entry No. 892555-7. It appears that Customs required an export license for category 641, whereas it is your opinion that the garments were correctly licensed as sleepwear in category 651.

On inspection of the sample, it is our judgment that the garment is used for sleeping, and is not classifiable as a shirt. It is classifiable in item 384.9440, Tariff Schedules of the United States Annotated, and requires an export license for category 651.

A copy of this letter will be sent to the Commerce Department along with your request for Commerce to adjust the 1986 import data in categories 641 and 651 to reflect that the shipment in question has been entered and charged to category 651.

In accordance with your request, the sample garment will be returned separately.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Re: Decision on Application for Further Review of Protest No. 3801-6-000339

This protest was filed against your decision in the liquidation on December 27, 1985, of entry No. 79-138214 dated March 29, 1979, covering a shipment of athletic footwear.

The athletic shoes involved were classified in liquidation under the provision for other footwear which is over 50 percent by weight of fibers and rubber or plastics with at least 10 percent by weight being rubber or plastics and having uppers of which not over 90 percent of the exterior surface area is rubber or plastics in item 700.60, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 20 percent ad valorem.

Pursuant to Schedule 7, Part 1, Subpart A, headnote 3(b), TSUS, the athletic shoes involved were appraised on the American selling price of the domestically produced Brooks Super Villanova which was $12.60 less 2 percent packed.

The protestant argues that appraisement on the American selling price of the Super Villanova is in error because that shoe is not similar to the import. However, the arguments presented are moot inasmuch as the entry involved is part of the compromise agreement reached with Adidas pursuant to 19 U.S.C. 1617. In accord with that agreement bill No. 40181367 was cancelled or should have been cancelled.

The protest should be denied. A copy of this decision should be attached to the Form 19 Notice of Action to be sent to the protestant.

Sincerely,

John T. Lall

078358 TLL

078358

Ronald W. Gerdes, Esq.
1511 K Street, N.W.
Suite 525
Washington, D.C. 20005

Dear Mr. Gerdes:

This is in reply to your letter dated May 22, 1986, requesting Customs determination of the correct country of origin for certain milk products your client has imported but not yet entered.

The facts involved in your ruling request are not particularly unusual or in dispute. You state that your client has imported sweetened condensed milk from Trinidad through the port of Miami. Apparently, there is no dispute that the merchandise is classifiable under item 115.35, Tariff Schedules of the United States (TSUS). No formal entry had been made of the goods as of Thursday, May 22, 1986.

The ingredients used in the manufacture of sweetened condensed milk are Canadian milk powder, local fresh milk, local sugar, lactose, Canadian butter oil (anhydrous milk fat), and vitamins.

The product is derived when milk powder is tipped into a closed turbo mixer to which fresh milk and water are added. The dissolved powder and fresh milk are then added to a sugar and butter oil mixture which is then pumped through a Brogli mill to grind away any traces of undissolved powder which may be in suspension. This solution is then passed through a filter which further removes any undissolved milk powder particles.

The mixed product is then pumped into a stainless steel tank from where it goes to the pasteurizer at a temperature of 110 C°. The solution leaving the pasteurizer then goes into a sterilized holding vat and then into a vacuum (condenser) where water is removed. After the correct quantity is removed and the product is the desired consistency and viscosity, it is transferred into an Antonius cooler where the product is cooled down before entering a sterilized storage tank to be readied for filling.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

B10

From the storage tank the product flows by gravity to an aseptic filling room where cans are filled with the product. After filling, the product goes to a can washer where any spilled milk on the outside of the can would be washed before going to a labelling machine and a can packer. At all stages during the manufacturing process bacteriological tests are carried out to ensure that all quality parameters are strictly adhered to.

It is your contention that the sweetened condensed milk is properly a product of Canada. You base this conclusion on the argument that the Canadian milk powder has not been substantially transformed by manufacturing into a product of Trinidad. In support of this position you place primary reliance on the case National Juice Products v. United States, Slip. Op. 86-113, 1986, wherein the court considered the question of whether foreign manufactured orange juice undergoes a substantial transformation in becoming frozen concentrated orange juice and reconstituted orange juice. You suggest that the finding of no substantial transformation in that case requires the same conclusion in the case before us. We disagree.

It is a well-settled principle of Customs law that in order for a substantial transformation to be found, a new article having a new name, character, and use, must emerge from the processing. United States v. Gibson-Thomsen Co. Inc., 27 C.C.P.A. 267, C.A.D. 98 (1940). Various criteria have been relied on by the courts to determine whether there is a substantial transformation. A recent pronouncement on this issue in the area of country of origin marking is contained in Uniroyal Inc. v. United States, 3 C.I.T. 220, 542 F. Supp. 1026 (1982), aff'd, 702 F. 2d 1022 (Fed. Cir. 1983), in which the court considered the complexity and cost of the processing operations and whether the essence of the article has been changed by such processing. In Uniroyal, the imported article was a shoe upper. The outsole was attached in the United States. The court found that there was no substantial transformation because it would be misleading to allow the public to believe that a shoe is made in the United States when the entire upper, which is the very essence of the completed shoe, is made in Indonesia and the only step in the manufacturing process performed in the United States is the attachment of an outsole.

Other factors that have been considered include whether the processing significantly enhances the value of the article undergoing the processing, United States v. Murray, 621 F. 2d 1163 (1st Cir. 1980). No matter how the test is applied, the courts recognize that each case must be decided on its own particular facts.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078558

In National Juice Products, supra, the court stressed the approach set forth in Uniroyal and Murray, when it stated:

> Under recent precedents, the transition from producers' to consumers' goods is not determinative. Plaintiffs must demonstrate that the processing done in the United States substantially increases the value of the product or transforms the import so that it is no longer the essence of the final product. United States v. Murray, 621 F. 2d 1163, 1170 (1st. Ct. 1980) (Chinese glue blended with other glues in Holland were not substantially transformed because although it was transformed from a processors' good to an end-users' good there was no evidence that the glue had increased in value. Uniroyal, 3 CIT at 224 and 222, 542 F. Supp. at 1030 and 1028 (imported upper was "the very essence of the completed shoe," court also found the attachment of uppers to outsoles "significally less costly" than the process of manufacturing the upper).

In rejecting plaintiffs' claims that a substantial transformation had occurred, the court emphasized the minimal nature of the increase in value by stating:

> Plaintiffs in the instant case offer evidence that they claim demonstrates that domestic manufacturing substantially increased the value of the product from the manufacturing concentrate stage to the retail product stage. Contrary to plaintiffs' claim, however, the evidence offered indicates that the manufacturing concentrate constitutes the majority of the value of the end products. In fact, according to plaintiffs' evidence, the values added to the products involved here by the addition and blending of the orange essences, orange oil, and water, and related product range from 6.68 to 7.57 percent. This increase in value may be significant with regard to other products, but here the sum of all of the activities contributing to the added value are relatively minor, much like the addition of the soles in Uniroyal. In fact, plaintiffs' evidence shows that the addition of the oils and essences, the primary basis for plaintiffs' claim that substantial transformation has occurred, contributes only 1.75 to 1.86 percent to the value of the end products.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078358

In the case before us, the processing operations involved are anything but minor. Since some of the information furnished us is said to be confidential in nature, we will not disclose it in the body of the ruling; however, it may be said that the value of the finished product has been significantly enhanced in Trinidad. For instance, the value of the local milk and sugar exceed the value of the Canadian milk powder and butter oil. Further, there can be little doubt that the essence of the product, sweetened condensed milk, has been enhanced by the addition of the sugar. In fact, it is the presence of the sugar which makes this product distinguishable from unsweetened condensed milk. See for instance, the definitions for "sweetened condensed milk" and "plain condensed milk" set forth on page 355 of Judging Dairy Products by Nelson and Trout 1964, which states:

> Sweetened condensed milk. Sweetened condensed milk, also known as "condensed milk," likewise is concentrated under vacuum at about the same ratio as evaporated milk, but differs from that product in that it contains about 40 to 45 percent added sugar for preservation.
>
> Plain condensed milk. Plain condensed milk is equivalent to evaporated milk except that it has not been sterilized and is marketed in bulk.

Accordingly, under these circumstances, we have no alternative but to consider the sweetened condensed milk to be substantially transformed in Trinidad.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Champlain, New York 12919

Dear Mr. Deloria:

Your letter dated January 28, 1986, addressed to our New York office concerning the tariff classification of a variety of decorative non-flexible, foamed or expanded polyurethane moldings manufactured in Canada, has been referred to this office for a direct reply to you.

Representative samples and descriptive literature covering a variety of plastic moldings, cornices, ceiling medallions and appliques, used as home decorative articles were submitted for examination. These articles are made in various sizes and shapes. We have been informed that other decorative moldings identified in the literature as items ML-901 and ML-899 are finished articles cut to size.

It is our position that these moldings are classifiable under the provision for other household articles not specially provided for, of rubber or plastics in item 772.15, Tariff Schedules of the United States, and dutiable at the rate of 4 percent ad valorem.

Sincerely,

Arthur P. Schaffer

Mr. Ronald L. Rapaport
Metal Film Company, Inc.
1717 Patterson Plank Rd.
North Bergen, New Jersey 07047

Dear Mr. Rapaport:

This is in further response to your request for a reconsideration of the tariff classification of certain metallic yarns.

In our ruling dated May 9, 1986, file No. 077727, we stated that Lurex® yarns are not classifiable as metalized yarns in item 312.30, Tariff Schedules of the United States (TSUS), because they are not in chief value of tinsel wire or lame. We determined that the appropriate classification for the subject merchandise was under the provision for monofilaments in item 309.03, TSUS.

For years, the classification of Lurex® yarns has been a settled area in Customs jurisprudence. In affirming the decision of the trial court in Kaplan Products and Textiles Inc. v. United States, 51 CCPA 2 C.A.D. 828 (1963), the court ruled that yarn dyed jacquard satin brocade cloth with metal gold yarn was not classifiable as a woven fabric in chief value of tinsel wire, metal thread, or lame. Specifically, the court stated that a sheet of aluminum foil that is bonded between two sheets of transparent cellophane and slit into narrow widths is not considered to be lame for tariff purposes. We have enclosed a copy of that court decision. Your attention is directed to page 6 where the court quotes testimony from the trial to demonstrate that the aluminum-cellophane strips at bar were not within the ambit of the term "lame" for tariff purposes.

With specific reference to your claim that Customs has been permitting significant quantities of metallic yarn to enter the United States under the trademark Lurex®, we have examined the files of the Entry, Licensing and Restricted Merchandise Branch of the Customs Service in Washington, D.C., and the New York Regional Library, and have discovered that there is no record of the Lurex® trademark. It follows that Customs has not been enforcing this trademark. For Customs to protect a trademark, it must be registered with U.S. Customs Service in Washington, D.C., which will distribute the trademark to all ports. A copy of the regulations concerning the recordation of trademarks is enclosed for your information.

Sincerely,

Myron H. Nordquist, Esq.
Kelly, Drye & Warren
1333 New Hampshire Avenue, N.W.
Washington, D.C. 20036

Dear Mr. Nordquist:

This is in reply to your letter dated November 13, 1985, regarding the status of tuna caught abroad. The particulars of this venture are outlined, as follows:

(a) A U.S. flag purse seiner vessel will catch tuna in the Exclusive Economic Zone of Indonesia;

(b) thereafter, the vessel will land its catch on Indonesian territory for processing. This procesing will include cooking the tuna, cutting the fish into tuna loins, then glazing and freezing the fish;

(c) a U.S. flag reefer vessel will transport the tuna loins from Indonesia to Guam, where the fish will be thawed and packaged with U.S. manufactured oil into U.S. manufactured tins; and, finally,

(d) the filled tins will be packaged in U.S. manufactured boxes and then transferred on either U.S. flag or foreign flag vessels to various U.S. ports to be entered for consumption.

Based on the foregoing description, you ask three questions, which we will restate and answer in order.

1. Will the cans of tuna in the venture described above be "Products of an American Fishery" for purposes of 19 C.F.R. 10.78(d)?

Response: The cans of tuna produced in the venture described above would not be considered products of an American fishery for purposes of 19 C.F.R. 10.78(d).

Section 10.78(d) provides, in part "Products of American fisheries shall be entitled to free entry although prepared, preserved, or otherwise changed in condition, provided the work is done at sea by the master or crew or owner of the fishery or by persons employed by and under the supervision of the master or owner of the fishery."

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C2

Additionally, this section provides that fish (with the exception of several nontuna species) which are "the product of an American fishery landed in a foreign country and there not further advanced than beheaded, eviscerated, packed in ice, frozen and with fins removed, shall be entitled to free entry, whether or not such processing is done by the American fishery."

In addition, it should be noted that Headnotes 1 and 2, Subpart A, Part 15, Schedule 1, Tariff Schedules of the United States (TSUS), which define the scope of Products of American Fisheries set forth in items 180.00, 180.10, and 180.20, TSUS, provide:

1. An American fishery, for the purposes of this subpart, is a fishing enterprise conducted under the American flag by vessels of the United States on the high seas or in foreign waters in which such vessels have the right, by treaty or otherwise, to take fish or other marine products and may include a shore station operated in conjuction with such vessels by the owner or master thereof.

2. None of the items in this subpart shall apply to fish, fresh, chilled, or frozen, in the form of fillets, steaks, or slices substantially free of bone (including any of the foregoing divided into sections), if produced in a foreign country, or its territorial waters, in whole or in part with the use of the labor of persons who are not residents of the United States.

In reviewing your proposal, it is in conflict with 19 CFR 10.78(d) because the proposed processing operation includes more than beheading, eviscerating, packing in ice, freezing and with fins removed. Additionally, your proposed appears to be in conflict with the above-cited Headnote 2.

2. Would the cans of tuna be "Products of an American Fishery" if the tuna were caught by a Korean flagged vessel instead of a U.S. flagged purse seiner vessel?

Response: Tuna taken by Korean flag vessel would not be considered to be products of an American fishery.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

077299

An American fishery, as defined in Part 15A of Schedule 1, Tariff Schedules of the United States (TSUS), "is a fishing enterprise conducted under the American flag by vessels of the United States on the high seas or in foreign waters in which such vessels have the right, by treaty or otherwise, to take fish or other marine products and may include a shore station operated in conjunction with such vessels by the owner or master thereof."

Noting this definition, it has long been held by the Courts that the identity of fish as products of American fisheries is determined (all other regulations complied with) at the time of their taking, — that is, these must be fish taken by American flag vessels. See, for example, Procter & Gamble Manufacturing Co. v. United States (No. 3488), 61 T.D. 45578 (1932) in which the Appelate Court defined the term "fishery," with reference to the provision for products of American fisheries, as "any enterprise conducted by vessels flying the flag and manned by seamen of the United States. United States v. Reading, 1 Ct. Cust. Appls. 515, T.D. 31534." See also E. E. Kelly & Co. v. United States, 3 Cust. Ct. 135, C.D. 219 (1939), in which the Court ruled that fish, taken by a vessel of alien registry, were not entitled to duty-free entry as products of American fisheries.

Since the fishing vessels in this second situation would be Korean flag vessels, rather than American flag vessels, the fish taken could not be considered products of American fisheries.

3. If the cans of tuna were not "Products of an American Fishery" for purposes of 19 C.F.R. 10.78(d), what is the country of origin of these products under the postulated fact that the fish are caught by a U.S. flag vessel?

Response: Without more detailed information about the nature of the processing or packing operations, we are unable to issue a ruling regarding country of origin. We can tell you, however, that the canned tuna in all likehood would be considered a product of Indonesia.

In addition, we note that you state that after the processed and frozen tuna is transported to Guam for canning, the canned product "will be transported by U.S. flagged or foreign vessels to U.S. ports for marketing." Under 46 U.S.C. 877, the coastwise laws, which generally prohibit the transportation of merchandise or passengers between points in the United States embraced in the coastwise laws by any but United States-built, owned, and properly documented vessel, apply to Guam. Pursuant to 46 U.S.C. 12105(b), however, a vessel for which a registry is issued by the United States Coast Guard may be employed in trade with Guam. A foreign-built, United States-owned vessel may be issued a registry (46 U.S. 12102).

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

076399

C4

With regard to a related matter, we note that 46 U.S.C. 251(a), which generally prohibits the landing in a port of the United States by a foreign-flag vessel of fish or fish products caught or taken on the high seas, does not apply to Guam.

Sincerely,

Arthur P. Schaffer

Tex-Thai Impex
P.O. Box 79782
Houston, Texas 77279

Dear Ms. Hudson:

Your letter dated May 7, 1986, addressed to our New York Office concerning the tariff classification of a ladies' travel case made in Thailand, has been referred to this office for a direct reply to you. A sample was submitted for examination.

The sample is a jewelry purse which is said to be 65 percent polyester and 35 percent cotton by weight. It measures approximately 9.5 inches by 6.5 inches when unfolded and 4.5 inches by 6.5 inches when folded. The purse contains, along its width, two interior pouches with nylon zipper closures and a center padded ring holder with a textile loop closure. There is an open interior pouch running along its length. When folded, it is secured by a velcro closure.

The sample, assumed to be in chief value of man-made fiber, is classifiable under the provision for flat goods of textile materials, other in item 706.3900, Tariff Schedules of the United States Annotated (TSUSA), and dutiable at the rate of 20 percent ad valorem. The textile category is 670. As a product of Thailand, it is not currently subject to quota restraints or visa requirements.

Item 706.3900, TSUSA, is currently subject to a countervailing duty order, investigation No. C-549-401 from Thailand. Importers are therefore required to post a cash deposit or bond equal to 1.23 percent ad valorem for the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C6

subject merchandise if entered or withdrawn from warehouse, for consumption, on or after March 12, 1985. For further information contact Barbara Tillman of the Office of Investigations, International Trade Administration, Department of Commerce, Washington, D.C. 20230.

Your sample is being returned under separate cover.

Sincerely,

For Harvey B. Fox
Director, Classification
and Value Division

Ms. Shelia Rasimowicz
Johnson & Johnson
Baby Products Company
Sillman, New Jersey 08558

Dear Ms. Rasimowicz:

Your letter dated June 3, 1986, requested the tariff classification of an article described as a "Star Teether". A sample teether and a "Play and Learning Guide" which is published in the United States were submitted with the request.

The sample consists of a plastic star that surrounds a rattle, spinner. The article serves as a teether, a rattle and a toy.

It is our judgment that the instant article satisfies the definition of a toy in Headnote 2, Subpart E, Part 5, Schedule 7, TSUS, in that it is chiefly used for the amusement of children. In this regard, Customs classified a similar combination toy and teether as a toy in Headquarters Ruling Letter 064555 dated June 14, 1980.

Thus, the instant merchandise is classifiable as a toy in item 737.95, TSUS, and is dutiable at the rate of 8.3 percent ad valorem.

Sincerely,

Arthur P. Schifflin
Chief, General
Classification Branch

078429

TO : District Director of Customs
Seattle, Washington 98174

FROM : Director, Classification and Value Division

SUBJECT: Substantial Transformation of Structural Shapes; [redacted]

In a letter dated June 2, 1986, counsel for [redacted] has asked that we reconsider the tariff status of a fabricated structural unit currently in Customs custody which is scheduled for use in construction of the Washington State Convention and Trade Center. A blueprint of this structural unit and other technical data were submitted.

The unit under consideration is identified under installment number 3B, check number BR8-H51. In a memorandum to you, dated May 21, 1986 (078231), we held that this structural unit, along with thirteen (13) other units comprising part of the third of 11 total shipments of similar structural components, had not been substantially transformed in Taiwan. Unit BR8-H51 was held to be a product of Japan for tariff purposes and would require an appropriate export certificate prior to its release from Customs custody.

Our May 21, 1986, memorandum indicates that hot rolled wide flange (W) H beams from Japan were shipped to Taiwan where, after preparation of shop drawings, templates (patterns), and cutting plans, they are subjected to the following processing steps: straightening to remove deformations occurring during transportation or handling, ends cut to length, cambering or controlled heating to achieve a convex shape, welding or bolting on of drilled bracing angles, stiffener plates, and gussets, all cut from flat rolled Taiwanese plate, shot blasting to remove scale and rust, inspection and packing for shipment to the job site.

With respect to unit BR8-H51, the submitted blueprint depicts an article made from 2 wide flange (W) H beams, one 51 ft. 5-3/8 inches long and the other 4 ft. 9-7/16 inches long and slightly narrower in width, butt welded together. The total weight of the Japanese H beams is 32,614 lbs. At 12 points along the length of this unit, six on each side, are welded a series of drilled bracing angles and stiffeners, all cut from flat rolled Taiwanese plate, in box-like configurations. Two similar though slightly more sophisticated built-up configurations appear at equal distances from

C9

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

each end of the H beam. Each consists of two larger, 1-1/2 inch thick flat rolled plates of Taiwanese origin welded perpendicular to the H beam. An identical plate, drilled, is similarly welded to each of the perpendicular plates. It is stated that these angles and stiffeners represent 70 pieces of Taiwanese origin, and reflect a 7 percent weight increase or 1.2 tons of added material. It is further stated that 564 man-hours (480 in direct fabricating) were expended in Taiwan on unit BR8-H51. Finally, material and labor estimates from U.S. fabricators who bid unit BR8-H51, when converted to Taiwanese dollars, are said to represent a value added of 80 percent. Counsel orally confirmed the accuracy and verifiability of these figures by telephone on June 17, 1986.

Under the authority of Uniroyal, Inc. v. United States, 3 CIT 220, 542 F. Supp. 1026, aff'd. 702 F. 2d. 1022 (Fed Cir. 1983), and National Juice Products Association, et al. v. United States, Slip Op. 86-13 (Ct. Int'l. Trade, decided January 30, 1986), cited in counsel's original submission, the conclusion is reached that the Japanese hot rolled H beams must be considered as having been substantially transformed in Taiwan so that the resulting fabricated structural unit, BR8-H51, is a product of Taiwan for tariff purposes.

As previously stated in our May 21 memorandum, in order for the Japanese hot rolled H beams to be considered as having been substantially transformed in Taiwan, the record must establish that the processing operations there resulted in a product other than or materially different from the H beams of Japanese origin; that is, a new and different article must emerge from Taiwan, one having a new name, character or use. Anheuser-Busch Brewing Association v. United States, 207 U.S. 556 (1908). A mere change in a product's name, without more, is a relatively unimportant consideration in most instances. United States v. International Paint Co., 35 CCPA 87, C.A.D. 376 (1948). As to character and use, however, there must be evidence to show that the processing in Taiwan transforms the Japanese H beams in such a way that they are no longer the essence of the final product as imported.

The percent weight added in Taiwan is a relevant, though not controlling factor. Such added weight, though, is negligible. However, the man-hours expended in Taiwan to fabricate unit BR8-H51, and the number of angles and stiffeners of Taiwanese origin added, would suggest a substantial processing. More importantly, what must emerge from the processing is a new and different article of commerce, one having a distinctive name, character or use. In our opinion, there is sufficient evidence to show that the processing in Taiwan transformed the Japanese H beam in such a way that it is no longer the essence of the final product as imported. The attachment of the built-up support sections to the H beam results in a fabricated unit designed to support other loadbearing members. The extensive processing in Taiwan has transformed the butt welded Japanese H beam into a precision engineered structural unit capable of withstanding far greater stresses than the H beam itself. Structural unit BR8-H51 has lost the identifying characteristics of the Japanese H beam and has taken on significantly new attributes which dedicate it to an exclusive use in a particular building.

C10

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

078429

For these reasons, we are of the opinion that the fabricated structural unit designated ESB-851 has been substantially transformed in Taiwan and is to be considered a product of Taiwan for tariff purposes.

John T Rick

Washington, D.C. 20008

Dear Miss Ho:

Re: Your Reference - HK35/86

Your letter dated April 29, 1986, requested the tariff classification of wool knit headbands.

It appears that wool knit headbands were entered at Los Angeles Seaport. Customs required a license for category 469, whereas it is your view that the headbands were licensed correctly in category 459.

We have examined the wool headbands. It is our view that such merchandise is worn in cold weather and is used both to cover the ears and provide warmth to them. They are classifiable as other women's wearing apparel, not ornamented, of wool in item 384.5950, Tariff Schedules of the United States Annotated (TSUSA), if valued not over $5.00 per pound, or in item 384.6396, TSUSA, if valued over $5.00 per pound.Both tariff provisions require export licenses from Hong Kong for category 459.

A copy of this letter will be sent to the Commerce Department along with your request for Commerce to adjust the 1985 import data to reflect that the shipment in question has been entered and charged to category 459.

Sincerely,

Harvey B. Fox
Director, Classification
and Value Division

Mr. David M. Thomas
D. M. Thomas, Inc.
W62 N 262 Washington Avenue
Cedarburg, Wisconsin 53012

Dear Mr. Thomas:

Your letter dated May 12, 1986, addressed to our New York office concerning the dutiable status of a cloth book entitled "My Quiet Book," has been referred to us for a direct reply to you.

The sample is a cloth book measuring 8 inches by 10 inches. Each page consists of an activity such as tying shoe laces, zippering, buttoning, opening doors, telling time, different fabric textures etc. Most of the pages of the book contain phrases describing the activity. The presence of text distinguishes this book from other book type toys without text.

It is our opinion that this merchandise is classifiable under the provision for toy books, including coloring books and books the only reading matter in which consists of letters, numerals, or descriptive words in item 737.52, Tariff Schedules of the United States (TSUS), and entitled to duty-free treatment.

Sincerely,

Arthur J. Schaffer

Re: Decision on Application for Further Review of Protest No. 3801-6-000300

Dear Sir:

This protest was filed against your decision in the liquidation on December 6, 1985, of entry No. 8586347 dated September 26, 1985, covering a shipment of circular, plastic, pressure sensitive discs manufactured in Canada.

FACTS:

The merchandise involved is a circular, plastic, pressure sensitive, three dimensional disc measuring 4-1/4 inches in diameter. It was classified in liquidation under the provision for sheets, strips, tapes, stencils, monograms, and other flat shapes or forms, all the foregoing articles (except articles provided for in item 790.50) which are pressure sensitive with or without protective liners, and whether or not in rolls in item 790.55, Tariff Schedules of the United States (TSUS).

The protestant claims that the merchandise is properly classifiable under the provision for other articles not specially provided for, of rubber or plastics in item 774.55, TSUS.

ISSUE:

Whether the circular, plastic, three dimensional disc is flat within the purview of that term as used in item 790.55, TSUS?

C14

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

078490

LAW AND ANALYSIS:

In the case of Norman Jensen, Inc. v. United States, 84 Cust. Ct. 76, C.D. 4846 (1980), the court adopted a Webster's Third New International Dictionary (1966) definition of the word "flat" which reads as follows:

1. Having or marked by a continuous surface that is horizontal or nearly so without significant curvature or inclination or without noteworthy elevations or depressions.

In the case of United Mineral and Chemical Corporation v. United States, 63 Cust. Ct. 522, C.D. 3946 (1969), the court referring to a quote from the Explanatory Notes to Schedule 7 of the Tariff Classification Study, November 15, 1960, concerning the scope of item 790.55, TSUS, stated that "the cellophane, friction, rubber and plastic tapes referred to are well known articles which, we note, have firm, level, smooth surfaces that are "flat" within the common understanding of the term."

You choose to be guided by the Jensen court's definition of the term "flat" rather than the interpretation of the scope of that term set forth in United Mineral, supra. Following the definition set forth in Jensen, supra, which you believe is more definitive you would regard the disc as being "flat" for tariff purposes.

It is our view that the definition of the term "flat" and the interpretation of the scope of that term as used in 790.55, TSUS, in the cited cases complement each other.

We are of the opinion that the Jensen court's definition of the term "flat" is appropriate but the reference in United Mineral, supra, to the Explanatory Notes gives us a clearer idea of what Congress intended by the use of the term "flat" in item 790.55, TSUS.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D1

078490

We note that the disc in issue has been invoiced and described by the importer as a "three dimensional" article (as opposed to a two dimensional, or flat article). While it could be argued that the disc is essentially flat and thus within the scope of item 790.55, TSUS, such a viewpoint would in our opinion be based on subjective impressions and would certainly lead to inconsistent classifications of similar or identical merchandise depending on the perception of the classifier.

Following the ejusdem generis rule and noting United Mineral, supra, we believe that the shapes covered by 790.55, TSUS, should be flat, thin and about the thickness of scotch tape.

In conclusion, it is our opinion that only those products which are similar to cellophane, friction, rubber and vinyl tapes are flat within the purview of item 790.55, TSUS. Consequently, the circular disc in issue being three dimensional cannot be considered a flat shape or form for tariff purposes.

HOLDING:

Circular plastic discs represented by the sample are classifiable under item 774.55, TSUS. The protest should be allowed. A copy of this decision should be attached to the Form 19 Notice of Action to be sent to the protestant.

Sincerely,

Arthur P. Schaffer
for Harvey B. Fox
Director, Classification
and Value Division

Detroit, Michigan 48226-2568

Re: Decision on Review of Protest No. 3801-5-002768, on the Classification of Frozen Reindeer Meat

Dear Sir:

The petitioner maintains that the merchandise, frozen reindeer meat, is classifiable under item 106.55, TSUS, as other frozen game animal meat. Customs classified it under item 106.75, TSUS, other frozen meat, valued over 30 cents per pound.

It is contended by the petitioner that the meat is from a free-roaming tundra herd of reindeer that are considered game animals. However, information from Canadian officials is to the effect that reindeers were introduced into Canada to be herded and farmed by the Inuit, as a source of industry in the region. An encyclopedia excerpt refers to reindeer as domestic animals. Additional information was to the effect that reindeer was introduced into Alaska to make the Eskimo self sufficient. The 1929 Summary of Tariff Information points out that reindeer meat is not a game variety, but does have a distinctive flavor, and a quality midway between high-grade beef and lamb. Under the Summaries of Trade and Tariff Information (1968) the meat of game animals is described as that of animals of the kind hunted and killed for sport or food, including rabbit, deer meat and the meat of animals such as anletope, bear, elk and moose. Additional information was to the effect that herds of reindeer are ranched commercially and are not hunted or killed for sport.

"Game" is defined as wild animals collectively, or any wild animal hunted or taken for sport or for its meat. The court has pointed out that in considering "wild" and "domestic" animals, domestic refers to the character of the animal rather than training. T.D. 37831.

D3

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____.

It is concluded that reindeer are not game animals but are "ranched" and raised for food and other economic reasons, similar to the manner in which cattle are raised. Therefore, frozen reindeer meat is classifiable in item 106.75, TSUS. You are directed to deny the protest in full. A copy of this decision should be furnished to the petitioner with the Form 19 Notice of Action.

Sincerely,

Arthur P. Schaffner

3100 Massachusetts Avenue, N.W.
Washington, D.C. 20008

Dear Miss Ho:

Re: Your Ref. HK34/86

We are responding to your letters dated April 14, and April 24, 1986, concerning four shipments of women's garments detained at the port of Los Angeles and two shipments of women's garments detained at the port of Seattle, Washington.

The garment involved in all six shipments is a halter top. Customs has detained the shipments because they lack export licenses for categories 338/9, whereas it is your view that they were correctly licensed in category 359.

It is our view that the garment in question is neither a blouse nor a tank top, because it does not extend to the waist or provide full coverage to the wearer's body. Thus, it is classifiable as a top in item 384.3438, Tariff Schedules of the United States Annotated, and requires an export license from Hong Kong for category 339.

Pursuant to your request, the sample garment will be returned under separate cover.

Sincerely,

Harvey B. Fox

Mr. Peter Kovacs
Vice President, Marketing
Kelco
8355 Aero Drive
San Diego, California 92123-1718

Dear Mr. Kovacs:

This is in response to your request of June 9, 1986, made as a domestic interested party pursuant to the provisions of section 516(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1516(a)). Specifically, you inquire as to the classification of and rate of duty being imposed on propylene glycol alginate being imported from Canada, West Germany and Japan.

The reaction of propylene oxide with alginic acid (a seaweed derivative) produces propylene glycol alginate, a food additive used as a stabilizer, thickener and emulsifier. Literature which you provide indicates that the product is commonly used to maintain foam in beer.

Headnote 2(a) of Schedule 4, Tariff Schedules of the United States (TSUS), defines the term "compounds" as follows:

> Substances occurring naturally or produced artificially by the reaction of two or more ingredients, each compound --
>
> (i) consisting of two or more elements,
>
> (ii) having its own characteristic properties different from those of its elements and from those of other compounds, and
>
> (iii) always consisting of the same elements united in the same proportions by weight with the same internal arrangement.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D8

The subject product fits the noted tariff definition in that it is produced artificially by the reaction of two ingredients. A new chemical bond is formed. Propylene glycol alginate consists of two or more elements and clearly has properties different from its elements or other compounds. We are advised that the product maintains a chemical uniformity in its molecular structure thereby fulfilling the requirement of having the same internal arrangement. See Chemirad Corporation v. United States, 65 Cust. Ct. 137, C.D. 4067 (1970).

Propylene glycol alginate is classifiable as alcohols, polyhydric (including glycols, polyglycols, and polyols) ... : Other: other, under item 428.47, TSUS, dutiable at a rate of 12.3 percent ad valorem.

Sincerely,

Arthur P. Schaffner

Mr. John M. Ryan
Customs Administrator
3M Center, Customs/Import Transportation
Department
P.O. Box 33250
St. Paul, Minnesota 55133

Dear Mr. Ryan:

In your letter of April 1, 1986, you requested a tariff classification for a sandal which your firm plans to import from Mexico. You submitted a sample along with your letter.

The sample submitted consists of a sole of ethylene vinyl acetate coated on the top with a special reusuable adhesive which holds the sandal on the wearer's foot without an upper. You feel that the sandal should be classified under the provision for other footwear, other, other, in item 700.95, Tariff Schedules of the United States (TSUS).

This sandal is all plastic. It does not have a rubber or plastic foxing-like band. It is a form of slip-on footwear in that it is held to the foot without the use of laces or buckles or other fasteners.

In view of the foregoing, the sandal is classified under the provision for footwear which is over 50 percent by weight of rubber or plastics or over 50 percent by weight of fibers and rubber or plastics with at least 10 percent by weight being rubber or plastics, other footwear, footwear of the slip-on type, in item 700.59, TSUS, dutiable at the 1986 Column 1 rate of 37.5 percent ad valorem.

We have referred a copy of your letter to the Entry, Licensing and Restricted Merchandise Branch for reply with regard to the country of origin marking question.

Sincerely,

for Harvey B. Fox
Director, Classification
and Value Division

Daniel A. Pinkus, Esq.
Assistant Chief Counsel
International Trade Litigation
26 Federal Plaza
New York, New York 10278

Re: S. Madill, Ltd. v. United States
Civil Action No. 77-12-04978

Dear Mr. Pinkus:

In your letter of June 11, 1986 (file ENM:ml MR 664.10-6), you requested our position on the classification of certain self-propelled yarders and parts of these yarders. Our position, explained to Mr. Maurer on July 14, is confirmed by this letter.

Concerning the classification of a self-propelled yarder as a motor vehicle in item 692.16, TSUS, we affirm the basic position taken in our ruling of June 2, 1978 (file 054990, I.A. 164-77), that the mobile article usually and customarily transports itself from work area or job site to another non-adjacent work area or job site. As pointed out by Mr. Maurer, however, the identification of "work site" and "non-adjacent work site" presents a major problem. Therefore, additional factors must be weighed: existence of a truck or automobile type of chassis; separate cab and controls for operation of the transport unit; road speed of the mobile article; and other features that are characteristic of automobile trucks.

In this case, it is our opinion that none of the crawler-based mobile yarders are classified in item 692.16. Not only are they usually transported, they do not have any features that are characteristic of automobile trucks. On the other hand, the Madill 046 rubber tire mounted yarder, the 071-R rubber tire mounted yarder, and possibly the 009 "S" series rubber tire mounted yarder have a top speed of 22 miles per hour or more, have the appearance of a truck chassis with equipment mounted on the bed, and have the capability of movement from site to site. Therefore, absent clear evidence to the contrary, we would continue to classify these in item 692.16, TSUS.

Concerning the classification of parts of these yarders, it is our position that, with the exception of those parts that are specific to the truck chassis of a mobile yarder classified in item 692.16, all parts of the yarder, spar, or mobile base would be classified, applying the standard rules of classification, either under item 666.00, TSUS, under a specific provision pursuant to General Interpretative Rule 10(ij), or under item 870.45, TSUS, if applicable. Parts of the truck chassis would be classified as parts of motor vehicles or under a specific provision, if applicable.

If you have any questions, please call John Valentine, FTS 566-8181. We are enclosing the brochures and materials sent to you by the Department of Justice and forwarded to us with your letter of May 2, 1986 (file EWM:ta MR 664.10-6).

Sincerely,

Arthur P. Schaffer

Mr. Nicholas C. Tolerico
Acting Director
Office of Agreement Compliance
United States Department of Commerce
International Trade Administration
Washington, D.C. 20230

Dear Mr. Tolerico:

Your letter dated June 26, 1986, addressed to our New York office concerning the tariff classification of certain types of decorative nails, has been referred to this office for a direct reply to you.

Two furniture nails were submitted with your letter. Each is of the two piece construction. One nail is entirely of steel with a brass plating. The other nail has a head said to be of solid brass and a steel shank. Information before us is that the chief weight of the brass headed nail is brass. Noting that brass costs much more than steel, it follows that the nail is in chief value of brass.

The nail with the brass head is classifiable under the provision for nails, of base metal: of two or more pieces, of copper in item 646.34, Tariff Schedules of the United States (TSUS), and dutiable at the rate of 5.5 percent ad valorem.

The all steel nail is classifiable under the provision for nails, of base metal: of iron or steel: of two or more pieces in item 646.32, TSUS, and dutiable at the rate of 2.3 percent ad valorem.

Sincerely,

(Signed Arthur P. Schifflin

Patton, Boggs & Blow
2550 M Street, N.W.
Washington, D.C. 20037

Dear Mr. Fisher:

In your letter of July 18, 1986, you request information on the classification and rate of duty of a toner pursuant to section 516 of the Tariff Act of 1930, as amended.

You state that you represent Aunyx Corporation, a domestic manufacturer of toner used in copier machines, and that their toner competes directly in the market place with toner manufactured by Canon Inc., of Tokyo, Japan. Both the domestic toner and the imported one are described as an electrically resistive, negative-charging, monocompetent toner. The Canon product is said to consist of about 38 percent iron oxide, and 58 percent terpolymer of styrene, maleic anhydride and 2 ethylhexylacrylate, with small amounts of amorphous silica, cerium dioxide and a chrome complex in a silicone compound.

A product with the composition as stated above would be classifiable under benzenoid plastics materials: concentrated dispersions of pigments in plastics materials in item 408.44, TSUS. The rate of duty is 6.4 percent. Classification of this product is based on the composition as given. Classification of individual imports will be based on stated composition and/or analysis of a sample.

Sincerely,

Arthur P. Schaffner

[redacted]

Dear [redacted]

In your letter of April 1, 1966, you describe your proposal to import U.S.P. grade CHLORAMPHENICOL in bulk into the Virgin Islands, where it would be mixed with a small proportion of lactose and magnesium stearate, and used to fill two-piece hard shell gelatin capsules. Free entry into the United States would be sought for the capsules under the provisions of General Headnote 3(a), Tariff Schedules of the United States.

The possible relationship between the proposed process and the tableting which you now conduct has been carefully considered. However, we are not able to equate the filling of gelatin tablets with the pressing of materials into tablets. Accordingly, the preparation of CHLORAMPHENICOL capsules from imported bulk CHLORAMPHENICOL which has been mixed with a diluent and a lubricant would not be considered to result in articles manufactured or produced in the Virgin Islands within the meaning of General Headnote 3(a), Tariff Schedules of the United States.

Sincerely yours,

(Signed) LESTER D. JOHNSON

Commissioner of Customs

[redacted]

APR 7 1966

Dear [redacted]

Your letter of March 30, 1966, refers to faced buttons which are drilled in the Virgin Islands and imported to the United States.

General headnote 3(a), Tariff Schedules of the United States, provides, in part, for free entry into the United States of articles manufactured or produced in an insular possession of the United States (such as the Virgin Islands) from materials the growth, product, or manufacture of any such possession, or of the customs territory of the United States, or of both, which do not contain foreign materials to the value of more than 50 percent of their total value. You inquire how this percent is computed.

The test for determining whether an article produced or manufactured in an insular possession contains foreign materials to the value of more than 50 per centum is set forth in section 7.8(d) of the customs regulations. This section provides in substance that such determination is made by comparing the actual purchase price of the foreign materials (excluding certain materials entitled to free entry into the United States), plus the cost of transportation to the insular possession (but excluding any duties and taxes assessed by the insular possession and any charges which may accrue after landing), and the final appraised value in the United States of the article determined in accordance with section 402, Tariff Act of 1930, as amended.

Copies of the above-cited references are enclosed.

Sincerely yours,

(Signed) E. J. DOYLE

DEC 08 1975

VES-3-02-R:CD:C
101845 DJF

District Director of Customs
San Juan, Puerto Rico 00903

Dear Sir:

This is in reply to your letter of September 17, 1975, which you forwarded with correspondence and enclosures from [redacted] acting on behalf of [redacted] owners of the [redacted] asking whether the vessel may remain in San Juan from 0800 January 17, 1976, until 1600 January 18, 1976, a stay exceeding 24 hours. You ask our advice regarding the proposed overstay.

The vessel carries approximately 400 students on round-the-world educational voyages. It is scheduled to depart Port Everglades, Florida, on January 3, 1976, and return to Port Everglades on January 31, 1976, via various Caribbean and South American ports.

Section 4.80a(a)(2), Customs Regulations, imposes a 24-hour limitation on the number of hours a vessel may remain in a coastwise port on a voyage touching nearby foreign ports and passengers on the vessel from other coastwise ports may go ashore temporarily without violating the coastwise laws. However, section 4.80a(b) provides that a vessel touching at a foreign port other than a nearby foreign port, such as the South American port of La Guaira shall not be deemed to be engaged in coastwise trade in the absence of evidence to the contrary. Therefore, passengers boarding in Port Everglades on January 3, 1976, and going ashore in San Juan as described will not be deemed landed in San Juan contrary to title 46, United States Code, section 289.

Sincerely yours,

[redacted]

J. P. Tebeau

[redacted]

Dear [redacted]

Your letter of November 3, 1975, requests an advisory ruling under section 4.80a(d), Customs Regulations, on a proposed cruise itinerary for the [redacted] The vessel is of Liberian registry.

The vessel will depart Port Everglades, Florida, on February 7, 1976, and following an itinerary which includes a visit to South America, arrive in Los Angeles, California, on February 25, 1976. There will be no stops at United States ports of call during the voyage.

Enclosed is a copy of section 4.80a, Customs Regulations (19 C.F.R. 4.80a), which is interpretive of title 46, United States Code, section 289.

Cartagena, Colombia, is a port on the South American mainland. It is therefore a foreign port other than a nearby foreign port. In the absence of evidence that coastwise transportation is the primary object of the voyage, passengers boarding at Port Everglades and disembarking at Los Angeles will not be deemed to have been landed at a coastwise port in violation of title 46, United States Code, section 289.

Sincerely yours,

(Signed) J. P. TEBEAU

[redacted]

Dear [redacted]

Your letter of November 5, 1975, to the District Director of Customs, Los Angeles, about proposed cruises on the Panamanian [redacted] from San Diego to Avalon, Catalina Island, Ensenada, Mexico, and return has been forwarded to us for a ruling as to whether the primary object of the cruises would be considered to be coastwise transportation. Such requests for rulings may be submitted directly to Headquarters in accordance with section 177.2, Customs Regulations (19 C.F.R. 177.2).

On each cruise the vessel would originally embark all passengers at San Diego, proceeding thence to Avalon (10 hours), Ensenada (10 hours), and back to San Diego, where all passengers would ultimately disembark.

Section 4.80a, Customs Regulations, copy enclosed, provides in significant part:

> (a) A foreign vessel which takes a passenger on board at a port in the United States..... will be deemed to have landed that passenger in violation of the coastwise laws (46 U.S.C. 289) if:
>
> .....
> .....

[redacted]

(4) The passenger goes ashore at any port other than the port at which he embarked if coastwise transportation is the primary object of the voyage.

Since, on the proposed voyages, the vessel will stop for the same length of time at one California port and one foreign port, it appears that the primary object of the voyages would not be coastwise transportation and passengers going ashore temporarily at Avalon and ultimately disembarking at San Diego would not be deemed landed in violation of the coastwise laws at either port.

Sincerely yours,

(SIGNED) J. P. TEBEAU

VES-3-02-R:CD:C
101919 BJF

[redacted]

Dear Sir [redacted]

This is in reply to your letter of November 24, 1975, in which you request an advisory ruling on a proposed cruise of a foreign-flag vessel of the Bahama Cruise Line.

It is intended that the vessel will transport persons from New Orleans to Philadelphia, with a stopover at Nassau or Bermuda. In Philadelphia, the passengers would attend the 41st International Eucharistic Congress between August 1, 1976, and August 8, 1976. During that time the vessel would serve as a hotel for the cruise passengers.

Title 46, United States Code, section 289, prohibits foreign vessels from transporting passengers between ports and places in the United States, either directly or by way of a foreign port. Section 4.80a, Customs Regulations, a copy of which is enclosed, interprets that statute. You will see that section 4.80a(a)(2) states that a passenger will be deemed to have been landed in violation of the coastwise laws if he goes ashore, even temporarily, at another coastwise port on a voyage to such a port if the vessel touches at a nearby foreign port and remains in the coastwise port for more than 24 hours. New Orleans and Philadelphia are both coastwise ports. Nassau and Bermuda are both nearby foreign ports within the purview of section 4.80a(c).

101919

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E8

Inasmuch as the coastwise transportation of passengers between New Orleans and Philadelphia would be the primary object of the voyage, it is prohibited by section 289. Of course, mere use of the vessel in Philadelphia as a hotel, with no transportation of passengers by the vessel, would not be prohibited by the coastwise laws.

In accordance with the Act of December 27, 1950 (64 Stat. 1120), the provisions of section 289 may only be waived in the interest of National Defense (by the Secretary of Defense). We must therefore advise you that we see no means of accommodating you in this matter.

Sincerely yours,

(Signed) J. P. TEBEAU

[redacted]

Dear [redacted]

Your letter of December 8, 1975, asks for an advisory ruling under Part 177, Customs Regulations, as to whether certain travel agents and cruise promotional personnel might cruise from Galveston, Texas, to Tampa, Florida, aboard the Greek-flag [redacted]

You state that the cruise will permit the passengers to become familiar with the shipboard operations of a cruise line and that the cruise is also a recognition of the passengers' efforts in promoting cruises.

The definition of the term "passengers" in section 4.50(b), Customs Regulations (copy enclosed), includes any person carried on a vessel who is not connected with the operation of the vessel, her navigation, ownership, or business. It has been in effect for more than 50 years. We are not aware of any ruling in effect that travel agents being transported as observers so that they could better sell and promote the services of a foreign vessel touching coastwise points are not considered passengers. The cruise personnel and travel agents in the situation you describe are not connected with the business of the vessel within the meaning of section 4.50(b), Customs Regulations.

Accordingly, title 46, United States Code, section 289, which prohibits the transportation of passengers between points embraced within the United States coastwise laws on foreign vessels, would preclude the contemplated cruise. Passengers embarked at Galveston, Texas, would be deemed landed in Tampa, Florida, in violation of section 289.

Sincerely yours,

[redacted]

[redacted]

Dear [redacted]

This is in reply to your letter of December 16, 1975, in which you requested an advisory ruling under Part 177, Customs Regulations, on the proposed cruise itinerary of the British-flag [redacted]. We also acknowledge receipt of your telegram of March 4, 1976, providing us with additional details of the proposed itinerary.

The cruise is tentatively scheduled to begin at 1500 hours on June 16, 1976, in San Francisco and arrive at Los Angeles at 1300 hours on June 17. The vessel will then leave Los Angeles on June 17 at 1900 hours (a 6 hour stop) and proceed to Victoria, B.C. (7 hours), Juneau (7 hours), Skagway (10 hours), Sitka (7 hours), Prince Rupert (3 hours), Vancouver, B.C. (20 hours), San Francisco (5 hours), and then to Los Angeles, where the cruise will terminate. Passengers will embark at San Francisco and Los Angeles and, in all cases, disembark at their ports of embarkation. The vessel will remain in no coastwise port for longer than 10 hours, calling at 4 nearby foreign ports and six United States ports, including the ports at which the voyage begins and ends. A total of 30 hours will be spent in nearby foreign ports and 35 hours will be spent in domestic ports. The vessel will not call at any Alaskan port in coordination with a special event.

You are familiar with section 4.80a, Customs Regulations. It states (section 4.80a (a)(4)) that a passenger will be deemed to have been landed in violation of the coastwise laws (46 U.S.C. 289) if coastwise transportation is the primary object of the voyage. While the vessel will call temporarily at certain Alaskan ports as described, with the passengers permitted to go ashore, the primary object of the overall voyage is not considered to be coastwise trade, since the vessel's voyage is equally directed at calling at foreign ports.

101945

JAN 21

VES-3-02-R:CD:C
101973 F

Reviewing Officers

Attorney, Carrier Rulings Branch R:CD:C

Possible 46 U.S.C. 289, 19 U.S.C. 1202 violations of the [redacted] yacht. Penalties case, Providence, 75-0502-18.

The [redacted] is a foreign documented pleasure craft owned by a foreign corporation which we infer is wholly owned by citizens of the United States.

The vessel cruised United States waters with a cruising permit. It carried six persons who allegedly contributed to the cost of running the vessel and who helped to sail it (this makes a crew of 7-8 on a 64 foot schooner yacht). All aboard shared a common purpose in desiring to attend the America Cup Races. In arranging for the cruise, the petitioner-master used a prospectus, selectively mailed, stating, inter alia, "If you wish to charter [redacted] send a deposit...." An accompanying brochure describes the subject cruise as "our first split the costs ocean (cruise).... These will be working cruises...."

101973

The vessel was constructively seized under 19 U.S.C. 1592 on the basis that it was subject to entry as merchandise, being offered or used for charter purposes in the United States, but was not so entered. The vessel is also alleged to have been used in violation of its cruising license by carrying passengers in violation of 46 U.S.C. 289. The penalty notice merely specifies a 19 U.S.C. 1592 violation, so the question before Carrier Rulings is whether the vessel was so used in the United States as to make it subject to entry (having been offered either for sale or charter).

There was no 46 U.S.C. 289 violation since we have previously held that persons connected with the operation of the ship are not considered passengers within the meaning of the coastwise laws. It is true that this case is differentiated by an added circumstance, the passing of consideration from the crew to the master as a condition of being allowed to work aboard; however, the evidence establishes that each individual actually functioned as a regular working member of the crew; he cannot also be considered a passenger.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

F1

As to whether the vessel was offered for charter, charters can be broken down into two types; perhaps oversimplified below:

1. A bareboat charter involves leasing the vessel without a crew to the lessee. That does not apply here since the master and his wife continued to function as crew.

2. A time charter, in which there is a contract for transportation for hire, and the owner provides the personnel to run the vessel.

The corporate owner is probably an alter ego of the master. The master arranged for the crew; however, CIRCULAR: VES-6-MS, dated May 12, 1961 (which is primarily directed toward charter questions as applied to document violations), makes a relevant assumption when it states that "(Customs and Coast Guard) have agreed that when the owner...surrendered to the charterer anything less than the complete control and management of the yacht, the result was ...a time charter."

In this case, the evidence shows that the master (owner?) chose the itinerary, and picked all those aboard, kept full control of the vessel at all times and required all aboard to assist in the operation of the vessel. Thus, no element of a charter appears to exist or to have been advertised. There is no precedent holding that mere transportation of nonregular members of the crew suffices to establish a charter agreement. Absent a charter arrangement, either solicited or actual, there is no violation.

Thank you for allowing us to review this case.

Signed

B. James Fritz

AUG 23 1976

VCS-3-TS-R:CD:C
802045 H

[redacted]

Dear [redacted]

Your letter of March 16, 1976, discusses and asks certain questions about problems encountered by the [redacted] in connection with the use of very large crude carriers (VLCCs) in bringing cargoes of oil to the United States.

You state that, under present practice, the VLCCs often stand off the coast and have their cargo, in whole or in part, lightered off by smaller vessels and that, in some cases, when a VLCC has been lightened sufficiently to permit it to enter port, it then will do so and complete the unlading. Your understanding is that, under existing requirements, the VLCC, when entering a port of the United States, would be required to take a State pilot and to enter and clear with Customs as a vessel engaged in the foreign trade of the United States; but that any lightering vessel, if undocumented or under enrollment and license or license, would not be required to enter and clear, although required to account to Customs for the foreign cargo on board. You ask for confirmation that your understanding with respect to Customs requirements is correct, and you wish to be advised whether such a lightering vessel is regarded "as engaged in the foreign trade of the United States."

A VLCC arriving in territorial waters would be required to report arrival as a vessel arriving from a foreign port or place and to enter: if foreign, as a foreign vessel arriving within the limits of a Customs collection district; if American, as a vessel arriving in the United States from a foreign port or place. In such case, a vessel lightering cargo from the VLCC would be considered engaged in coastwise trade, since it would be transporting merchandise between points in the United States, and would have to be qualified to engage in that trade. Since the American lightering vessel would have foreign merchandise for which entry had not been made, it would be required to report arrival, and the merchandise to be unladen would be subject to the same merchandise entry requirements as are applicable to any foreign merchandise imported into the United States.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

F 3

If the VLCC anchored outside territorial waters, it would not at that time be subject to vessel reporting or entry requirements. A vessel lightering cargo from the VLCC to the United States in these circumstances would not be considered engaged in coastwise trade. Such a lightering vessel would be required to report arrival: if foreign, as a foreign vessel arriving from a foreign port or place or from a domestic port from which it had proceeded to the VLCC; if American, as an American vessel carrying foreign merchandise for which entry had not been made. A foreign lightering vessel would be required in such case to make entry as a vessel arriving within the limits of a Customs collection district. An American lightering vessel would not be required in such a case to make entry as a vessel.

While the Customs Service has no immediate occasion or reason to determine whether American or foreign lightering vessels, when they lighter foreign cargo from a VLCC anchored on the high seas outside territorial waters to points in the United States, are engaged in foreign trade for the purposes of any navigation laws administered by it, we can say that merchandise landed from such lightering vessels would be subject to all the merchandise entry requirements applicable to foreign merchandise landed directly from a vessel arriving from a foreign port or place in foreign trade.

However, with respect to the withdrawal from a Customs bonded warehouse, free of duty and internal-revenue tax, of "supplies...of...vessels... actually engaged in foreign trade...," under title 19, United States Code, section 1309, we have held that lighters moving between a port in the United States and a VLCC outside territorial waters are not actually engaged in the foreign trade, while the VLCC would be so engaged.

What documentation is appropriate for an American vessel lightering cargo from a VLCC positioned outside territorial waters is a matter within the jurisdiction of the United States Coast Guard, to which the function of documenting vessels was transferred from the Customs Service by Treasury Department Order No. 167-31 (32 F.R. 2463), effective February 24, 1967. As you are aware, the Coast Guard also administers statutes relating to pilotage, including title 46, United States Code, section 364.

Sincerely yours,

(SIGNED) J. P. TEBEAU

[redacted]

Dear [redacted]

Your letter of April 27, 1976, to the Secretary of the Interior concerning your difficulty in traveling to the United States by vessel in a direct route has been forwarded to this agency as the Customs Service is responsible for administering the coastwise laws. You state that because the condition of your health prohibits your flying, you are compelled to travel to the United States by vessel. However, because of the cabotage laws you advise you are unable to board a vessel in Puerto Rico for transportation directly to the United States, but must instead travel to St. Thomas, Virgin Islands, and board another vessel for the United States at that port.

You state that because of the condition of your health, it is very difficult for you to travel to the United States by having to first go to the Virgin Islands. You therefore ask permission for your family and you to board vessels bound for and to disembark foreign vessels arriving from the United States at San Juan, Puerto Rico.

Title 46, United States Code, section 289, prohibits a foreign vessel from transporting passengers between ports in the United States. That statute provides for a penalty against the vessel owners in the amount of $200 for each passenger transported and landed. In the circumstances, there is no administrative authority which would permit an exception to or waiver of this law.

In view of the foregoing, we must advise that we cannot grant your request.

If you have not already done so, we suggest you contact the Puerto Rican Maritime Shipping Association in San Juan, which may be of assistance to you.

Sincerely yours,

(Signed)

J. P. Tabeau
Director
Carriers, Drawback and Bonds Division

The Honorable
Jaime Benitez
House of Representatives
Washington, D.C. 20515

Dear Mr. Benitez:

Your letter of June 22, 1976, previously acknowledged by us, enclosed a copy of a letter from [redacted] of Guaynabo, Puerto Rico, to the Secretary of the Interior regarding his difficulties in traveling from Puerto Rico to the United States.

[redacted] letter to the Secretary of the Interior was referred to the Customs Service for reply, and we answered [redacted] in a letter of July 20, 1976. A copy of our reply [redacted] is enclosed.

We invite your attention to H.R. 1238, introduced on January 14, 1975, and pending before the House Committee on Merchant Marine and Fisheries. This bill, if enacted, would amend title 46, United States Code, section 289, to permit foreign vessels, under certain conditions, to transport passengers between United States coastwise ports when such transportation would not involve direct and immediate competition with vessels of the United States qualified to engage in the coastwise trade.

Please let us know if you need any further information on the matter.

Sincerely yours,

(Signed) Leonard Lehman

102376

Dear [redacted]

This is in response to your letter of November 23, 1976, concerning our ruling of November 18, 1976, that metal cargo containers with liners, used for the transportation of threads and yarns, qualify as "instruments of international traffic" within the meaning of section 322(a), Tariff Act of 1930, as amended. We stated that the cargo containers referred to could be identified by a metal plate stating "Cargotainers: [redacted] attached on one side because such a plate was attached to the sample submitted to us. You inquire if the ruling designates as instruments of international traffic only those cargo containers manufactured by [redacted]

The reference to the metal plate attached to the cargo container is to assist the Customs officers at the port of entry in identifying the cargo containers as those articles which were designated as instruments of international traffic by our ruling of November 18. It is not intended to preclude identical cargo containers purchased from other manufacturers and bearing different identification plates from being treated as instruments of international traffic under that ruling.

A copy of this letter is being sent to the District Director of Customs at Buffalo, New York.

Sincerely yours,

J. P. Tebeau
Director
Carriers, Drawback and Bonds Division

[redacted]

Dear [redacted]

This refers to your letters of September 23 and November 26, 1976, relating to the proposed documentation and exclusive use of a foreign-built vessel for research purposes.

Enclosed is a copy of our reply to your letter of September 23, 1976. In your letter of November 26, 1976, concerning the same subject matter you enclosed a copy of a reply, dated November 1, 1976, which you received from the United States Coast Guard, in which the use of a foreign-built vessel for "training purposes" was mentioned.

We are unable to advise you whether a foreign-built vessel may be used for "training purposes," as distinguished from a use solely for research, unless you furnish us detailed information as to the proposed activity. We would point out, however, that use of a foreign-built vessel for the transportation of students between points in the United States, or on a cruise wholly within the territorial waters of the United States, could under certain circumstances be considered in violation of the coastwise laws.

Accordingly, if you are considering using the vessel for "training purposes," it is suggested that you write to us again, describing specifically the intended use, including whether any proposed curriculum is approved by an appropriate accrediting organization.

Sincerely yours,

For ALFRED G. SCHOLLE

Alfred G. Scholle

VES-3-02-R:CD:C
102813 CH

[redacted]

Dear [redacted]

Your letter of April 20, 1977, states that the [redacted] left Los Angeles on February 25, 1977, on a 100-day round-the-world "Semester-at-Sea" student project conducted by the Institute of Shipboard Education and is due back at Baltimore on or about June 5, 1977, when most of the passengers ultimately will be disembarked. From Baltimore the [redacted] will proceed to Fort Lauderdale (6 hours), Port-Au-Prince, Haiti (15 hours), Cartagena, Colombia (34 hours), Cristobal, Canal Zone (18 hours), Acapulco, Mexico (35 hours), Mazatlan, Mexico (13 hours), and thence to Los Angeles. You ask whether additional passengers may be embarked at Baltimore and Fort Lauderdale for ultimate disembarkation at Los Angeles. No passengers originally embarked at Baltimore ultimately would be disembarked at Fort Lauderdale.

Section 4.80a, Customs Regulations (19 CFR 4.80a) provides in significant part:

> (a) A foreign vessel which takes a passenger on board at a port in the United States.... will be deemed to have landed that passenger in violation of the coastwise laws (46 U.S.C. 289) if:
>
> * * * *
>
> (3) The passenger severs his connection with the voyage at another coastwise port on a voyage which touches no foreign port other than a nearby foreign port; or
>
> (4) The passenger goes ashore at any port other than the port at which he embarked if coastwise transportation is the primary object of the voyage.

102813

F14

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

(b) In the absence of evidence that coastwise transportation is the primary object, a foreign vessel engaged on a voyage touching or originating at any foreign port other than a nearby foreign port shall not be deemed to be engaged in the coastwise trade and may, without penalty, disembark a passenger at any coastwise port: Provided, that that passenger has proceeded or will proceed with the vessel to a foreign port other than a nearby foreign port.

Cartagena, as a port on the mainland of South America, is a foreign port other than a nearby foreign port within the meaning of section 4.80a. Between Fort Lauderdale and Los Angeles the vessel will stop at 4 foreign ports for from 10 to 35 hours, a total of 97 hours. Clearly the primary object of the voyages from Baltimore and Fort Lauderdale to Los Angeles will not be coastwise transportation. Passengers may therefore be originally embarked on the [redacted] at Baltimore and Fort Lauderdale and ultimately disembarked from it at Los Angeles without penalty under title 46, United States Code, section 289.

Sincerely yours,

[redacted]

Dear [redacted]

Your letter of May 31, 1977, asks for an advisory ruling under section 4.80a(d), Customs Regulations, as to certain proposed 1977 Canada/Alaska cruises on the [redacted] operated by [redacted]. You state that the proposed cruises are similar to approved cruises for the 1973, 1975, and 1976 seasons, which were the subject of Headquarters rulings.

The proposed cruises will last 14 days, with all passengers originally embarking and ultimately disembarking at San Francisco. The vessel will proceed from San Francisco to Vancouver, B.C. (33 hours), Nanaimo, B.C. (minimum of 8 hours), Ketchikan (6 hours), Juneau (8 hours), Sitka (8 hours), Victoria, B.C. (28 hours), and thence back to San Francisco. The vessel will thus spend a minimum of 69 hours in three Canadian ports and 22 hours in three Alaskan ports. The schedule will be repeated seven times commencing from San Francisco on June 4 on the first cruise and arriving at San Francisco September 10 on the last cruise.

Since the itinerary of these cruises will include the same number of stops in foreign ports as in intermediate coastwise ports of call (three each), with more than three times the total time spent in the foreign ports as in the intermediate coastwise ports, it seems clear that coastwise transportation would not be the primary object of these cruises. Accordingly, passengers originally embarking and ultimately disembarking at San Francisco could go ashore temporarily at Ketchikan, Juneau, and Sitka as proposed without penalty under the coastwise laws (see section 4.80a(a)(4), Customs Regulations). If such passengers ultimately disembarked at any of the Alaskan ports, penalties would be incurred (see section 4.80a(a)(3),

102874

G2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Customs Regulations). If the disembarkation of such passengers was deemed necessary because of an emergency, a petition requesting relief from the penalties could be filed under title 46, United States Code, section 320.

Sincerely yours,

(Signed)

J. P. Tobeau
Director
Carriers, Drawback and Bonds Division

[redacted]

Dear [redacted]

This is in reply to your letter of August 19, 1977, in which you request a ruling as to whether any laws administered by this agency would preclude [redacted] a Norwegian reporter, from being transported between United States ports on Norwegian vessels. It is intended that [redacted] will travel between, and land at, various United States ports for the purpose of writing articles concerning Norwegian shipping, crew conditions and other matters relating to the Norwegian maritime and mariner.

The Customs Service is of the opinion that an accredited newspaper reporter traveling on a foreign vessel in order to write a story based in whole or in part on her observations in the course of the voyage is closely enough connected with the operations of the vessel that she is not to be considered a passenger within the meaning of section 4.50, Customs Regulations. Hence her transportation between two points in the United States embraced within the coastwise laws shall not be considered in violation of title 46, United States Code, section 289.

103005

Sincerely yours,

(SIGNED) J. P. TEBEAU

[redacted]

Dear [redacted]

This is in reference to your letter of November 28, 1977, asking for our comments on the proposed operation of a vessel to be built in Canada and owned by a yacht club. The vessel would act as a pilot boat escorting vessels from Canada through the Intercoastal Waterway to Florida in the fall and return in the spring. Yacht club members not bringing boats to Florida would be carried on board and use the vessel while in the United States. The vessel would be operated from club dues with food and drink being purchased by members ashore. You state the vessel would be registered as a pleasure yacht.

Although it could be said that the club members would be owners of the vessel by virtue of their membership in the club, it is our opinion that under the facts presented the members carried on board who will not be part of the ship's crew would be passengers within the meaning of title 46, United States Code, section 289. This statute prohibits the transportation of passengers by a foreign vessel between ports or places within the United States, under a penalty of $200 for each passenger so transported and landed. As we pointed out in our letter to you of November 2, 1977, copy enclosed, such cruises, involving the embarkation and disembarkation of passengers at various United States ports, constitute engagement in the coastwise trade and may only be accomplished by vessels documented under the laws of the United States for that purpose.

Sincerely yours,

J. P. Tebeau
Director
Carriers, Drawback and Bonds Division

[redacted]

Dear [redacted]

We regret the delay in answering your letter of January 24, 1978, asking permission for the wife and son of [redacted] to travel coastwise on the Singaporean [redacted] on each call of the vessel while [redacted]s in command. On its current voyage the vessel is scheduled to arrive at Boston on February 8, proceeding thence to New York, Baltimore, Norfolk, and back to Europe.

Title 46, United States Code, section 289, provides:

> No foreign vessel shall transport passengers between ports or places in the United States, either directly or by way of a foreign port, under a penalty of $200 for each passenger so transported and carried.

However, a "passenger," for purposes of the navigation laws administered by the Customs Service, including the coastwise laws, is defined in section 4.50(b), Customs Regulations, as "any person carried on a vessel who is not connected with the operation of such vessel, her navigation, ownership, or business." The wife and son of [redacted] while traveling with him on the [redacted] will, accordingly, not be considered passengers within the meaning of the coastwise laws and their transportation between coastwise ports will not be violative of the coastwise laws.

103279

Sincerely yours,

Director
Carriers, Drawback and Bonds Division

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

REPLY TO: COMMISSIONER OF CUSTOMS, WASHINGTON, D.C. 20229

Thomas J. Kelley
Assistant Director
Protective Operations
United States Secret Service
Department of the Treasury
Washington, D.C. 20223

VES-3-02:RCD:C
103312 FC

Dear Mr. Kelley:

This refers to your letter of February 22, 1978, in which you state that the United States Secret Service will assume protective coverage for [redacted] Malaysia, at Honolulu, Hawaii, on March 28, 1978. [redacted] will depart Honolulu on the same date on the [redacted] and arrive at San Francisco, California, on April 1, 1978. In order to fulfill your protective responsibilities, you state it will be necessary to have one of your agents [redacted] accompany the [redacted] on board the ship.

Your understanding that title 46, United States Code, section 289, prohibits a foreign vessel from transporting passengers between United States ports is correct. However, since your agent will be acting in the official performance of his duties, you ask that he be considered connected with the business of the vessel and therefore not a "passenger." The [redacted] would then not be in violation of section 289, nor liable for the $200 fine prescribed in that section.

A "passenger" is defined in section 4.50(b) of the Customs Regulations (19 CFR 4.50(b)) as any person carried on a vessel who is not connected with the operation, navigation, ownership, or business of the vessel.

A Secret Service agent who is transported on a foreign vessel for the purposes stated in your letter is not a "passenger" within the meaning of either title 46, United States Code, section 289, or section 4.50(b) of the Regulations. Therefore, no liability under section 289 would accrue to the [redacted] for the transportation of such agent.

A copy of this letter is being sent to each of the appropriate Customs officials at the ports involved.

Sincerely yours,

[redacted]

103324 CH
X 102146-100178
102874-102460

Dear [redacted]

Your letter of March 3, 1978, asks for an advisory ruling under section 4.80a(d), Customs Regulations, as to seven proposed 1979 Canada/Alaska cruises on the [redacted] operated by [redacted] These cruises are similar to approved cruises for the 1973,1975,1976, and 1977 seasons, which were the subject of Headquarters rulings.

On each cruise the vessel would proceed from San Francisco to Vancouver (29 hours), Ketchikan (6 hours), Juneau (12 hours), Skagway (13 hours), Sitka (8 hours), Victoria (28 hours), and back to San Francisco. The vessel would thus spend 39 hours in 4 United States ports and 57 hours in 2 Canadian ports. You say that, except in an emergency, passengers would not be permitted to terminate their voyage in any port other than their port of embarkation.

The Customs Service has taken the position that, unless the total time to be spent in foreign ports is no less than the time to be spent in United States ports, and the number of foreign ports to be stopped at is no less than the number of United States ports to be stopped at (apart from a passenger's port of original embarkation and ultimate disembarkation) the object of the passenger's voyage will not be deemed to beas much to visit and spend time in foreign ports as to visit and spend time in United States ports and we must, accordingly, conclude that the primary object of their voyage will be coastwise transportation.

While on the proposed cruises the time spent in Canadian ports would be considerably longer than the time spent in United States ports, the vessel would stop at only 2 Canadian ports as against 4 United States ports. We must, accordingly, conclude that the primary object of these voyages would be coastwise transportation. Penalties under title 46, United States Code, section 289 would thus be incurred as to any passengers going ashore at any of the Alaskan ports.

103324

Sincerely yours,

[redacted]

J. P. Tebeau
Director
Carriers, Drawback and Bonds Division

[redacted]

Dear [redacted]

Your letter dated March 30, 1978, asks us to confirm that certain proposed 1979 Canada/Alaska cruises of the [redacted] operated by [redacted], will be in compliance with title 46, United States Code, section 289, and section 4.80a, Customs Regulations.

On each cruise the vessel would proceed from San Francisco to Nanaimo (10 hours), Vancouver (17 hours), Juneau (12 hours), Skagway (13 hours), Sitka (8 hours), Victoria (28 hours), and back to San Francisco. The vessel would thus spend 33 hours in 3 United States ports and 55 hours in 3 Canadian ports. You say that, except in an emergency, passengers would not be permitted to terminate their voyage at any port other than their port of embarkation.

In our opinion coastwise transportation would not be the primary object of these voyages and passengers may go ashore temporarily at intermediate coastwise ports without violating title 46, United States Code, section 289.

Sincerely yours,

J. P. Tebeau
Director
Carriers, Drawback and Bonds Division

[redacted]

Dear [redacted]

This is in response to your letter of May 10, 1978, concerning ocean cruise itineraries planned by your client, [redacted] with the first cruise to begin on July 3, 1978. The vessel to be used is the [redacted] a Panamanian flag vessel.

Title 46, United States Code, section 289, provides that no foreign vessel shall transport passengers between ports or places in the United States, either directly or by way of a foreign port. Section 4.80a, Customs Regulations (19 C.F.R. 4.80a) states when a foreign vessel is deemed to have landed a passenger in violation of section 289.

In your letter you state that some cruises will leave New York and return without touching any foreign port or other domestic port. Other cruises will be voyages from New York to Halifax, Nova Scotia, and return. Since passengers will not go ashore at any domestic port other than the port of embarkation, these cruises would not constitute coastwise transportation and would not violate section 289.

In the third situation discussed in your letter, the voyage will originate at New York; the vessel will then proceed to Martha's Vineyard where the passengers would be allowed ashore during a seven hour stay at that port; then the vessel will proceed to Halifax, Nova Scotia, allowing the passengers to go ashore during a 24 hour stop at that port; it will then proceed to New York for discharge of all passengers. Since the passengers will be allowed ashore at only one United States port, other than the port of embarkation, for shopping and incidental sightseeing during a stay of less than 24 hours at the port, the primary purpose of the above-described

Wolf Haber, Esq.
Assistant General Counsel (ALFO)

21 JUL 1978

Chief Counsel

Request from OMB re draft report of the Special Representative for Trade Negotiations on H.R. 8715, regarding foreign-built inflatable rafts.

This responds to your request of July 6, 1978, with reference to the OMB request for comments on the Special Representative for Trade Negotiations report on H.R. 8715, "To provide for the transportation within the United States of passengers in foreign-built inflatable rafts, and for other purposes."

Similar bills, H.R. 5476, H.R. 5534 and S. 1076, have been introduced to exempt inflatable boats used in river running from the restrictions of the coastwise laws. Our comments on H.R. 5476 and S. 1076 have been previously forwarded to you, copies attached hereto.

Since the subject comments relate primarily to the liberalization of trade measures, a policy matter within the responsibility of the Special Representative for Trade Negotiations, we believe no comment should be made by the Customs Service on this aspect of the bill. However, we note that the comments concern hovercraft as well as inflatable rubber boats. We believe any comments on the bill should relate only to the matter covered by the bill, in this case inflatable rubber rafts.

(Signed) Richard H. Abbey

[redacted]

Dear [redacted]

In your letter of December 28, 1978, you refer to our ruling of April 17, 1978, addressed to Mr. Tozzoli, Director, Marine Terminals, Port Authority of New York and New Jersey, relating to certain proposed passenger-car ferry services to be offered passengers in the United States. You enclosed several advertising layouts which you plan to use in connection with the car-ferry services and ask for our comments.

We have reviewed the proposed advertising layouts and it is our opinion that the use of the advertising layouts would not adversely affect our ruling of April 17, 1978.

Sincerely yours,

J. P. TEBEAU

MAR 26 1979

Dear [redacted]

This responds to your letter of January 24, 1979, in which you requested a temporary waiver of the coastwise shipping prohibition in the Jones Act (46 U.S.C. 883) on behalf of [redacted] to permit the use of a foreign vessel to transport crude oil from Apra Harbor, Guam, to Honolulu, Hawaii.

The Department of Energy (DOE) has advised me that it concurs that the waiver should be granted, if Commerce determined that the waiver was necessary to expedite this shipment. Commerce has indicated that if a United States flag vessel was used a delay would result.

The Department of Commerce has advised me that there was no United States flag tanker, in Guam, available to carry this cargo. Contracting for the closest United States flag carrier would involve a delay. Because of this it voiced no objection to granting a waiver of the Jones Act for the single shipment of this crude oil.

The Department of Defense (DOD) has advised me that, in this case, the crude oil is used to manufacture jet fuel necessary to maintain military readiness. DOD thus supports your request for waiver.

I have, therefore, found that the waiver you requested is presently necessary in the interest of national defense. Pursuant to the Act of December 27, 1950 (64 Stat. 1120), ~~I hereby grant your request to waive~~ the restrictions against engaging in the coastwise trade imposed on the [redacted] by Section 883 of Title 46 of the United States Code, for this single shipment of crude oil, are waived.

103819

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

A3

We have notified appropriate officials of the United States Customs Service of this grant, waiver.

Sincerely,

DEPARTMENT OF THE TREASURY

U.S. CUSTOMS SERVICE

WASHINGTON

25 JUL 1979

VES-3-04-R:CD:C
103961 TL

This ruling is the response to a request as to whether electronic equipment can be tested and demonstrated to people on board a foreign-built vessel during a ride in United States territorial waters without violating coastwise laws.

ISSUE:

Whether a foreign-built vessel can be used to take persons on rides entirely within United States territorial waters to demonstrate electronic equipment without violating title 46, United States Code, section 289.

FACTS:

The owner of a vessel built in Taiwan wishes to demonstrate electronic equipment on this vessel during a short ride in territorial waters of the United States.

LAW AND ANALYSIS:

Generally speaking, only vessels which have been built in and documented under laws of the U.S. may engage in coastwise trade. Coastwise trade includes the transportation of merchandise or passengers between points in the U.S. It also includes the carriage of passengers entirely within U.S. waters, even though they are returned to the point of departure.

If the electronic equipment is carried on board the vessel for demonstration purposes only, it is considered to be "merchandise" as that term is used in section 883 of title 46. Section 883 prohibits the coastwise transportation of merchandise in a foreign-built vessel, which involves the lading of merchandise at one point embraced within the coastwise laws and the unlading of this merchandise at another such point. A "passenger" is defined in section 4.50 of the Customs Regulations as a person carried on a vessel who is not connected with the operation, navigation, ownership or business of the vessel. Accordingly, the people carried on this vessel to observe the demonstration are "passengers".

Thus, the vessel cannot take passengers on board at one U.S. point to observe the equipment and discharge them at another such point. Nor can the vessel so transport the demonstration equipment. It also cannot take the passengers on a ride entirely within U.S. territorial waters, even though they are discharged at the port of departure, as this is also considered to be coastwise trade.

AS

REPLY TO: COMMISSIONER OF CUSTOMS, WASHINGTON, D.C. 20229

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

103961

HOLDING:

The carriage of passengers entirely within United States territorial waters is considered coastwise trade, even though the passengers embark and debark at the same port or place, and a foreign-built vessel is prohibited from engaging in such activity. Similarly, a foreign-built vessel is prohibited from taking passengers on board at one port or place in the United States, carrying them entirely within territorial waters, and discharging them at another such port or place.

There is, however, no law administered by this agency which would prohibit the vessel from taking the passengers on board at a point in the U.S. and, after a voyage through waters beyond the territorial jurisdiction of the U.S. (three miles), returning to the same point to discharge the passengers. Additionally, it is not necessary to unlade the equipment at the termination of every demonstration ride, so long as when it is eventually unladed, it is at the point where it was laded.

George C. Steuart
Acting Director
Carriers, Drawback and Bonds Division

Commander Michael J. Jacobs
District Legal Officer
Fourteenth Coast Guard District
Prince Kalanianaole Federal Building
300 Ala Moana Boulevard
Honolulu, Hawaii 96850

Dear Commander Jacobs:

Your letter of May 17, 1979, requests our recommendation of reference materials which explain the coastwise trade laws in a comprehensive fashion. We wish that such works did exist to recommend. The operation of these laws has been essentially a product of the interpretations of the Customs Service of which you have already been apprised. Nevertheless, we will try to briefly describe the coastwise trade laws so that you may investigate them further should you desire to do so.

The prohibitions of the coastwise trade laws may be simply stated. Foreign-flag, foreign-built, or vessels once under foreign registry may not engage in the coastwise trade. Section 4.80(a), Customs Regulations, defines coastwise trade generally as the transportation of passengers or merchandise between points in the United States embraced within the coastwise laws, including points within a harbor, or merchandise for any part of the transportation. A passenger is any person carried on a vessel who is not connected with her operation, navigation, ownership, or business (19 CFR 4.50(b)). Merchandise includes goods, wares, and chattels of every description and merchandise the importation of which is prohibited (19 U.S.C. 1401(c)). The Customs Service has ruled that material without economic value of which the owner would be deprived by forfeiture, is not merchandise within the meaning of 46 U.S.C. 883.

The Customs Service considers the coastwise laws to be 19 U.S.C. 1588 and 46 U.S.C. 289, 316, and 883. Other statutory provisions which relate to the coastwise trade are:

> 19 U.S.C 81e; 46 U.S.C. 11, 13, 121 (third paragraph, first sentence), 251(a) (first sentence, 289a, 289b, 319, 725, 802(a), 808, 877, and 883-1; and 48 U.S.C. 1405c(d) and 1664.

A1

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

The coastwise trade law prohibitions extend to points in the United States, including Districts, Territories and possessions unless otherwise exempted. Further, 43 U.S.C. 1333(a)(1) makes the coastwise laws applicable to artificial islands on the Outer Continental Shelf and all installations and certain other devices permanently or temporarily attached to the seabed for the purpose of extracting natural resources, and 33 U.S.C. 1518 may be construed as making the coastwise laws similarly applicable to deep-water ports.

The coastwise laws are expressly inapplicable to:

American Samoa (48 U.S.C. 1664);
U.S. Virgin Islands (48 U.S.C. 1405c(d) and Executive Order 9170);
Canton Island (Presidential Proclamation 3215);
Commonwealth of the Northern Marianas (48 U.S.C. 1681 note), except with respect to the activities of the United States Government and its contractors in the Northern Marianas Islands (subject to the qualification that 46 U.S.C. 883 does not apply to property of the United States government, 26 Opinions of the Attorney General 415, 426 (1907)).

The coastwise laws are also inapplicable to the Trust Territory of the Pacific Islands and the Panama Canal Zone.

The applicability of any of these statutes to a specific factual situation involves a number of considerations which we may not concisely summarize here. Thus we caution against speculation or the issuance of advice on the meaning of the coastwise laws and encourage anyone with a question about the interpretation of specific sections to contact us directly.

Sincerely,

This ruling concerns the proposed use of a foreign vessel to transport passengers from one U.S. port to Canadian and Alaskan ports and back to the port of embarkation.

ISSUE:

Whether coastwise trade is the object of a voyage pursuant to section 4.80a(a), Customs Regulations, where passengers are transported from a United States port to three Canadian ports for a total of 42 hours and to three Alaskan ports for a total of 22 hours and back to the port of embarkation.

FACTS:

Passengers would be transported in a foreign flag vessel from San Francisco to three Canadian and three American ports. The passengers will be permitted ashore as follows: Vancouver, 16 hours; Nanaimo, 11 hours; Victoria, 15 hours; Ketchican, 6 hours; Juneau, 8 hours; and Sitka, 8 hours. Forty-two hours would be spent in the Canadian ports and twenty-two hours would be spent in the American ports. Except for an emergency, passengers are not permitted to terminate their voyage at any port other than their port of embarkation.

LAW AND ANALYSIS:

This cruise itinerary indicates that more time is spent in Canadian than American ports. Additionally, the number of Canadian ports visited is equal to the number of American ports visited. Thus, in our opinion coastwise transportation of these passengers is not the primary object of the voyage and passengers may go ashore temporarily at intermediate coastwise ports without violating title 46, United States Code, section 289.

HOLDING:

The primary object of a voyage in which passengers are transported to three Canadian ports to spend forty-two hours and three American ports to spend twenty-two hours is not coastwise transportation. Passengers may go ashore temporarily at the American ports without violating title 46, United States Code, section 289.

Dear Mr

This is in response to your letter requesting whether the Jones Act prohibits either living aboard a Canadian-built barge and buying fish from an anchored position within the state waters of Alaska or using the barge to transport the fish over waters within the 3 mile limit of Alaska.

Section 177.2(b)(5), Customs Regulations (copy enclosed), provides that a request for a Customs Service ruling must include a statement whether, to the knowledge of the person submitting the request, the same transaction or one identical to it has ever been considered or is currently being considered by any Customs Service officer, or whether to the knowledge of the person submitting the request, the issues involved have ever been considered or are currently being considered by the U.S. Customs Court, the U.S. Court of Customs and Patent Appeals, or any court of appeal therefrom. If the requested ruling is with respect to one of a series of similar and related transactions, this fact shall also be stated. We cannot issue a binding ruling without the above required statement. We are however, furnishing the following general information which may be helpful.

Title 46, United States Code, section 883, commonly known as the Jones Act, prohibits with certain exceptions, the transportation of merchandise by water, or by land and water, between points in the United States embraced within the coastwise laws, either directly or via a foreign port, or for any part of the transportation, in a vessel not qualified to engage in the United States coastwise trade. We have held that a foreign-built processing vessel is not precluded by laws administered by the Customs Service from operating within the territorial waters of the United States if the vessel is not harvesting or transporting fish, but is used solely to receive, process and store fish harvested by properly documented United States flag vessels. Any transportation in such a vessel of merchandise (fish or fish products) between points within the territorial waters (3 mile limit) to a United States port would be prohibited by section 883.

A/0

We have also held that a coastwise transportation of merchandise is not consumated until merchandise which has been laden at one coastwise point is unladen at a second coastwise point. If fish were laden on a processing vessel at one point in the territorial waters and transshipped to another vessel at another point in the territorial waters, a coastwise transportation would have been consumated. The transportation would not have been a coastwise transportation only if the transshipment took place either at the same point where the processing vessel received the fish or at a point on the high seas.

We hope you find the information furnished helpful. If you desire a binding ruling, please send the statement specified in this letter.

Sincerely,

/s/ B. J. Fritz

104532 MKT

John G. Gissberg
Assistant Attorney General
State of Alaska
420 L Street, Suite 100
Anchorage, Alaska 99501

Dear Mr. Gissberg:

Your letter of April 17 which modifies letters of March 13 and April 2, 1980, from [redacted] of your office, requested a ruling on the application of the Jones Act (title 46, United States Code (U.S.C.), section 883) and the Nicholson Act (46 U.S.C. 251(a), second sentence) to foreign-flag vessels used to transport and land in the United States or abroad, fish transferred from United States vessels on the high seas, the territorial waters of the United States or the internal waters of Alaska.

Specifically, you contemplate several ways to operate three types of vessels to catch and deliver salmon to United States processing plants. The catching vessels will be United States-flag vessels of less than 5 net tons that are manned by United States citizens or resident aliens. United States-flag, coastwise-qualified, transporting vessels will receive salmon directly from the United States catching vessels. Foreign-flag transporting vessels will deliver salmon received from the United States transporting vessels to United States ports or onshore processing plants. The transfers of salmon from United States transporting vessels to foreign transporting vessels may occur in the internal waters of Alaska, in United States territorial waters, or in the 3-to-200 mile fishery conservation zone (FCZ).

You present six options for the fishing operations:

1. U.S. catcher vessels harvest salmon inside the territorial sea or the FCZ. The salmon are taken to internal waters and unladen to a U.S. transport vessel. The U.S. transport vessel unlades the fish to a foreign transport vessel that is in internal waters.

[a.] Is there any violation of U.S. Customs laws if the foreign transport vessel takes these salmon to a U.S. port? [b.] Is there any violation if the foreign transport vessel takes the salmon to a foreign port?

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

Before we address the specific questions you ask, which we have labelled a. and b. for convenience, we wish to point out that by administrative precedent, vessels of less than 5 net tons, owned by United States citizens or by resident aliens, may engage in the American fisheries, including operations in territorial waters (T.D. 56382(6)). The ownership of the vessel is the controlling factor rather than by whom it is manned. The permissibility of using vessels manned by United States citizens or by resident aliens would depend upon whether the ownership of the vessels satisfies the requirements of T.D. 56382(6).

Furthermore, we remind you that the engagement of foreign vessels in fishing activities in the FCZ is a subject within the jurisdiction of the Department of Commerce under the Fishery Conservation and Management Act of 1976 (FCMA). In addition, any questions you have regarding the eligibility of a vessel for documentation for the fisheries is within the jurisdiction of the United States Coast Guard.

Our responses to your specific questions are as follows:

a. Yes. If the foreign transport takes these salmon to a United States port, the vessel would violate section 883 of title 46. Section 883 prohibits the transportation of merchandise between points in the United States embraced within the coastwise laws, including points within a harbor, if the merchandise is transported directly between those points or via a foreign port, for any part of the transportation by a vessel of foreign-build, under foreign-flag, or a vessel once under foreign registry (section 4.80, Customs Regulations; 19 CFR 4.80). "Merchandise" includes goods, wares, and chattels of every description and includes fish (19 U.S.C. 1401(c)). When landed after its transportation on a foreign vessel during any part of its transportation between coastwise points, the salmon would be subject to the penalty of forfeiture or a monetary amount equal to its value.

b. No. No violation of any laws administered by the Customs Service would occur merely because the foreign vessel transports the salmon from the internal waters of Alaska to a foreign port.

2. Same as #1, but the U.S. transport vessel unlades the salmon to the foreign transport vessel while in territorial seas.

a. Yes. This activity would violate section 883 for the reasons stated in the answer to 1a.

b. No. No violation of any laws administered by the Customs Service would occur merely because the foreign vessel transports the salmon from United States territorial waters to a foreign port.

DOCUMENT MAY BE RELEASED TO THE

3. Same as above, but the U.S. transport vessel unlades the salmon to the foreign transport vessel in the FCZ.

a. Yes. Section 883 prohibits the transportation of merchandise by a foreign vessel for even part of the movement of the merchandise between coastwise points. The coastwise transportation would begin when the salmon is transferred to the United States vessel in the internal waters of Alaska and would be completed when the foreign vessel lands the fish at a coastwise point other than the place of lading.

The activity would also violate the Nicholson Act (46 U.S.C. 251(a), second sentence) which provides that:

> Except as otherwise provided by treaty or convention to which the United States is a party, no foreign-flag vessel shall, whether documented as a cargo vessel or otherwise, land in a port of the United States its catch of fish taken on board such vessels on the high seas or fish products processed therefrom, or any fish or fish products taken on board such vessel on the high seas from a vessel engaged in fishing operations or in the processing of fish or fish products.

The Nicholson Act prohibits the use of foreign-flag vessels to land in Alaskan territorial waters fish or fish products transferred to it on the high seas. This does not preclude the use of foreign-flag vessels to transport fish or fish products between points on the high seas if they will be landed by properly documented vessels of the United States. However, if this transportation is part of a movement between points in territorial waters, it would be prohibited by section 883 of title 46 as noted above.

b. No. No violation of any laws administered by the Customs Service would occur merely because the foreign vessel transports the salmon from the FCZ to a foreign port.

4. Same as above, but the U.S. transport vessel unlades the salmon to the foreign transport vessel in waters beyond the FCZ.

a. Yes. The vessel would violate the Nicholson Act for the reasons stated in the second paragraph of the answer to 3a.

b. No. No violation of any laws administered by the Customs Service would occur merely because the foreign vessel transports the salmon from the high seas beyond the FCZ to a foreign port.

5. The U.S. catcher boats unlade salmon they caught to the U.S. transport vessel in the FCZ. The U.S. transport vessel makes a record of the purchase and unlades the salmon to a foreign transport vessel in the FCZ. Under existing U.S. Customs laws, can the foreign vessel transport the salmon to a U.S. port?

THIS DOCUMENT MAY BE RELEASED TO THE

No. This activity would be prohibited by section 883 and section 251(a), second sentence, as described in the answer in 3a. above.

6. Would the answers to any of the above hypotheticals be changed if the foreign transport vessel stopped in the FCZ and transferred the salmon to a U.S. transport vessel for delivery to a U.S. processing plant?

Yes. The answers to the questions in 3a. and 4a. would be changed. No violation of the Nicholson Act section 251(a), second sentence, would occur in 3a or 4a. However, a violation of section 883 would still exist in 3a as described in its answer.

7. Under what emergency conditions, if any, can a foreign transport vessel obtain permission to enter a U.S. port in violation of the Jones Act or Nicholson Act to unlade fish for the purpose of preventing spoilage or waste?

Section 4.96(g), Customs Regulations, provides that:

> A...vessel which arrives in the United States in distress shall be subject to the usual requirements applicable to foreign vessels arriving in distress. While in the United States, supplies, equipment, or repairs may be secured, but, except as specified in the next sentence, fish shall not be landed unless the vessel's master, or other authorized representative of the owner, shows to the satisfaction of the district director that it will not be possible, by the exercise of due diligence, for the vessel to transport its catch to a foreign port without spoilage, in which event the district director may allow the vessel upon compliance with all applicable requirements, to land, transship, or otherwise dispose of its catch.

When the arrival of a vessel in distress is not apparent, the Customs Service has previously relied upon a verification by the United States Coast Guard that the vessel has indeed arrived in distress. The Coast Guard limits this determination to whether the arrival is a result of a force majeure (33 CFR 124.10(a)(3), 124.10(b)(6), 124.14(d)).

The Fifth Circuit has found that in the ordinary meaning of the phrase:

DOCUMENT MAY BE RELEASED TO THE PUBLIC

B1

A vessel is in distress when in a state of danger or necessity, "as from want of provisions or water," etc. (Webst. Dict.); or "in a situation of misfortune or calamity, as a steamer in distress" (Stand Dict.). A vessel, of course, is also in distress when wrecked, and needing salvage service;... The Saehelm, 99 F. 456, 458 (5th Cir. 1900).

If you have any further questions, please do not hesitate to contact us again.

Sincerely

[redacted]

Dear [redacted]

Your letter of May 5, 1980, to [redacted] concerning the use of a vessel to carry six or less passengers for hire on Michigan waters, was forwarded to us for a reply on whether the use of the vessel discussed in your letter is coastwise trade.

Section 177.2(b)(5), Customs Regulations, provides that a request for a Customs Service ruling must include a statement whether, to the knowledge of the person submitting the request, the same transaction or one identical to it has ever been considered or is currently being considered by any Customs Service office or whether, to the knowledge of the person submitting the request, the issues involved have ever been considered or are currently being considered by the U.S. Customs Court, the U.S. Court of Customs and Patent Appeals, or any court of appeal therefrom. If the requested ruling is with respect to one of a series of similar and related transactions, this fact shall also be stated.

Section 177.2(b)(2)(iv), Customs Regulations, provides that if the transaction involves a vessel, the request for a ruling should include information relating to place of build and nationality of registration and, if to be used in waters under the jurisdiction of the United States, the exact place or places of intended use, if known. If the request for a ruling involves a determination as to whether or not the primary objectof a cont of a contemplated voyage would be considered to be coastwise transportation in violation of 46 U.S.C. 289, the request should completely identify the voyage, including the proposed time of arrival at and departure from every port on the itinerary and any coordination of the voyage with special events at coastwise ports, and should be accompanied by samples, if available, of brochures, advertising, and other information that may be relevant to a determination of the primary object of the proposed voyage.

We cannot issue a binding ruling without the above required statement and information. We are, however, furnishing the following general information which may be helpful.

104767

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B5

11 UG 1980

Title 46, United States Code, section 289, and other statutes (see e.g., 46 U.S.C. 11) prohibit unqualified vessels, foreign vessels, and vessels lacking proper documentation from transporting passengers between places in the United States either directly or by way of a foreign port.

We have ruled that the transportation by a foreign-built vessel of passengers to the high seas or foreign waters and back to the port of embarkation is not considered coastwise trade (see, 29 Opinion of the Attorney General 318 (1912), copy enclosed). However, we have also ruled that if the vessel does not proceed beyond the territorial waters of the United States, transportation of the passengers will be considered coastwise trade. It should also be noted that the carriage of offshore fishing parties for hire, whether or not trips extend beyond territorial waters, is considered coastwise trade. Treasury Decision 55193(2), copy enclosed.

Upon receipt of a further inquiry containing the above required information and statement, we will be pleased to issue a ruling on this matter.

Sincerely,

B. J. Fritz
Chief
Carrier Rulings Branch

This ruling concerns the use of foreign vessels lying off the U.S. coast for the storage of Alaskan crude.

ISSUES:

Whether foreign vessels located off the coast of the United States may be used for temporary storage of Alsakan crude prior to its delivery to refineries on shore.

FACTS:

Due to a shortage of onshore facilities for the storage of Alaskan crude, it is proposed to transport the crude from Alaska and transfer the crude from the transporting vessel into foreign tankers located in the Gulf of Mexico off the coast of the United States. When onshore storage facilities become available, the crude would be discharged from the foreign vessel onto a coastwise-qualified vessel for transportation to the onshore facilities. The foreign storage vessels would remain within a specific location in the Gulf.

To ensure a safer operation, when the crude is both transferred onto a storage vessel and transferred from it, the vessels involved will necessarily be underway.

LAW AND ANALYSIS:

Title 46, United States Code, section 883 (Jones Act), generally prohibits the transportation of merchandise between U.S. coastwise points, or any part of such transportation, in a foreign vessel. A vessel used solely for the temporary storage of merchandise being transported in coastwise trade is not considered to be itself used for such transportation. The movement underway of a storage vessel incidental to the safe transfer of merchandise onto and off of that vessel would not be considered a transportation of the merchandise within the prohibition of section 883.

HOLDING:

There is no law administered by the Customs Service which would prohibit the use of a foreign vessel stationed off the coast of the United States from being used solely for the temporary storage of Alaskan crude

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

being transported in the coastwise trade. Further, the movement underway of a storage vessel during loading and unloading operations is not considered a movement in coastwise trade, provided the movement is solely to facilitate the safe transfer of the crude and not to transport it.

This ruling concerns the application of the coastwise laws to the movement of a foreign storage vessel from its permanent station, for safety purposes, during the transfer of Alaskan oil.

ISSUE:

Whether the movement of a foreign storage vessel from its permanent station, solely for safety purposes, during the transfer of Alaskan oil, would result in a violation of title 46, United States Code, section 883 (46 U.S.C. 883)?

FACTS:

Your company plans to station a foreign vessel on the high seas to store Alaskan oil. Transfers to and from the storage vessel may be accomplished while the storage vessel is moving slowly. This movement would afford greater safety in the transfer operation. After the transfers, the storage vessel would return to its permanent station. The storage vessel would receive oil from and transfer it to only coastwise-qualified vessels.

LAW AND ANALYSIS:

Section 883 of title 46, prohibits the transportation of merchandise between points embraced within the coastwise laws, either directly or via a foreign port, or for any part of such transportation in a vessel. However, the Customs Service has previously ruled that the movement of a storage vessel at a slow speed during transfer operations, solely to assure greater safety in the transfer, would not constitute any part of a coastwise transportation of oil, provided that the storage vessel has a permanent location from which it moves to lade and unlade the oil.

HOLDING:

The movement of a foreign storage vessel from its permanent station, solely for safety purposes, during the transfer of Alaskan oil, would not result in a violation of 46 U.S.C. 883, provided the vessel returns to the location at which it began to lade the oil immediately after the transfer is accomplished, and that no oil is transferred from the vessel except at or in the immediate vicinity of that permanent station.

EFFECT ON OTHER RULINGS:

This decision follows Customs Service letter ruling VES-5-02-RRUCDC 104744 CH, dated September 12, 1980.

DEPARTMENT OF THE TREASURY U S CUSTOMS SERVICE CORRESPONDENCE APPROVAL AND CLEARANCE Form 100 (11-15-73)

MAR 0 5 1981

VES-3-02-CO:R:CD:C
105033 HS

The Honorable
Bob Dole
United States Senator
444 S.E. Quincy
Topeka, Kansas 66683

Dear Senator Dole:

This is in response to your letter dated January 12, 1981, to the Department of Commerce, enclosing a letter from [redacted] The Department of Commerce forwarded your letter and its enclosure to the Customs Service for reply.

[redacted] asks whether a Canadian-built vessel "rented" (chartered) by his company to Canadian citizens for an agreed amount for 6 months may be operated in United States waters in Florida or Texas for the winter.

He also asks whether his company may "sell time-shares" on a Canadian-built vessel to Canadian citizens for specified amounts: $5,000 for 2 weeks, $8,000 for 1 month, or $17,000 for 2 months. The vessel would be used in United States waters during the winter. The purchasers of the time-shares would pay approximately $90 per week into a fund to cover insurance, repairs, and replacement and maintenance expenses, and would pay for dockage, fuel, pumpouts, etc., while aboard. [redacted]. would be responsible for moving the vessel back and forth between Canada and the United States.

Foreign-built vessels generally may not engage in the United States coastwise trade, which is defined as the transportation of passengers or merchandise between points in the United States embraced within the coastwise laws. Customs considers the coastwise trade to include the carriage of passengers entirely within territorial waters (including points within a harbor), even though the passengers may disembark at the point of original embarkation and touch no other coastwise point; and the carriage of fishing parties for hire, even if the vessel proceeds beyond territorial waters and returns to the point the passengers originally embark. Section 4.50(b), Customs Regulations (19 CFR 4.50(b)), defines a "passenger", within the meaning of the coastwise laws, as "any person carried on a vessel who is not connected with the operation of such vessel, her navigation, ownership or business."

It is a long-established Customs policy, however, that a charterer under a bona fide bareboat charter arrangement, as distinguished from a time or voyage charter arrangement, is considered to be the "owner" of the vessel for the duration of the charter period, and not a passenger. Therefore, a foreign-built vessel under bareboat charter is not deemed to be engaged in coastwise trade when used solely for pleasure purposes.

105033

C2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Customs applies the following guidelines in determining whether an agreement is a bona fide bareboat charter:

> The nature of a particular charter arrangement is a question of fact to be determined from the circumstances of each case. Under a bareboat or demise charter, the owner relinquishes complete management and control of the vessel to the charterer. On the other hand, if the owner retains any degree of management or control, however slight, the charter is a time or voyage charter, and the vessel is deemed to be engaged in trade. The crux of the matter is whether complete management and control have been wholly surrendered by the owner to the charterer so that for the period of the charter, the charterer is in effect the owner. Although a charter agreement on its face may appear to be a bareboat or demise charter, the manner in which its covenants are carried out and the intention of the respective parties to relinquish or to assume complete management and control are also factors to be considered.

Customs has not established guidelines to determine whether a purchaser of a time-share in a vessel, as described by [redacted] is a "passenger" within the meaning of section 4.50(b) or is an "owner". In arriving at such a determination, consideration would be given, among other things, to whether the purchaser of a time-share in fact obtained title to an undivided proportional interest in the vessel, whether title to the whole of the vessel was vested in time-share purchasers, the degree of control over the vessel's operation exercised by the time-share purchasers and the manner in which that control was exercised, and the arrangements made to satisfy the cost of operating the vessel.

There is insufficient information in [redacted] letter to enable us to determine whether a charterer or the purchaser of a time-share in the circumstances he describes may be considered a passenger as the term is defined in section 4.50(b). If he will furnish us copies of any proposed agreements, together with full details of the manner in which those agreements are to be carried out and the activities in which the vessel will engage, we will issue a binding ruling as to whether the proposed arrangements are in accord with the laws and regulations administered by Customs.

If we can be of any further assistance to you in this or any other matter, please feel free to contact us.

Sincerely,

(Signed) DONALD W. LEWIS

[redacted]

Alfred R. De Angelus
Assistant Commissioner
(Regional Operations)

105033

APR 1981

VES-3-02
CO:R:CD:C
105100 PH

This ruling is an advisory ruling, pursuant to section 4.80a(d), Customs Regulations, as to whether or not certain proposed cruise itineraries of a Liberian-flag vessel would be considered to be coastwise trade in violation of 46 U.S.C. 289.

ISSUE:

Whether certain Alaskan cruise itineraries of a Liberian-flag vessel, originating and terminating in Vancouver, British Columbia, constitute coastwise trade in violation of 46 U.S.C. 289.

FACTS:

The inquirer states that his company will be using the Liberian-flag vessel SS UNIVERSE to offer a number of Alaskan cruises during the summer of 1981. The itineraries proposed are as follows:

1. Embark Vancouver, British Columbia, May 24, June 21, July 12, and August 9; Prince Rupert, British Columbia (5 hours); Juneau (9 hours); Glacier Bay-cruising (2 hours); Homer (3 hours); Anchorage (20 hours); Columbia Glacier-cruising (2 hours); Valdez (3 hours); Sitka (7 hours); Ketchikan (5 hours); disembark Vancouver June 7, July 5, July 26, and August 23, respectively.

2. Embark Vancouver August 22; Prince Rupert (5 hours); Sitka (7 hours); Homer (8 hours); Anchorage (20 hours); Columbia Glacier-cruising (2 hours); Valdez (8 hours); Juneau (15 hours); Glacier Bay-cruising (10 hours); Ketchikan (5 hours); disembark Vancouver September 6.

3. Embark Vancouver June 7, June 1[illegible], July 5, and August 2; Wrangell (4 hours); Juneau (12 hours); Skagway (8 hours); Ketchikan (5 hours); disembark Vancouver June 14, June 21, July 12, and August 9, respectively.

LAW AND ANALYSIS:

Title 46, United States Code, section 289, prohibits the transportation of passengers by a foreign vessel between ports or places in the United States, either directly or by way of a foreign port, under a penalty of $200 for each passenger so transported and landed. Section 4.80a, Customs Regulations (19 CFR 4.80a), interprets section 289.

105100

C4

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

We have ruled previously that Alaskan cruises with itineraries such as these, originating and terminating at a nearby foreign port, are not considered coastwise trade in violation of section 289, provided the passengers continue with the vessel for the full cruise.

If it is contemplated that any passenger will either join or leave the cruise at an Alaskan port, however, a ruling as to the applicability of section 289 to the specific case should be obtained.

HOLDING:

The cruise itineraries for a Liberian-flag vessel, as described in this ruling, originating and terminating in Vancouver, British Columbia, would not constitute coastwise trade in violation of 46 U.S.C. 289, provided that the passengers continue with the vessel for the full cruise.

EFFECT ON OTHER RULINGS:

None.

(Signed) Alfred G. Scholle

Alfred G. Scholle

24 JUN 1981

VES-2-15-CD:R:CD:C
105117 MS

[redacted]

[redacted] letter of April 2, 1981, regarding the application of the [redacted] propulsion [redacted] sisted jack-up mobile deck platform.

[redacted]

[redacted] deck platform will be [redacted] from its original construction site to a drilling location [redacted] as an extended deck for a U.S.-documented drilling rig while the rig is drilling for oil, gas, and other minerals either within the territorial waters of the United States or upon and adjacent to the United States Continental Shelf and the Outer Continental Shelf.

The platform will be carrying the navigation, drilling, and operating crews and other personnel employed on the drilling rig, equipment for installation or use aboard the drilling rig, replacement parts and consumable and non-consumable supplies for use or consumption aboard the drilling rig or in the wells it drills, including fuel, lubricants, commisary stores, drill pipe, oil well tubular goods, wellhead fixtures, drilling mud, and chemicals. Normally, all crews, equipment, and stores will be those of the owner or operator of the drilling rig or its subcontractors. On occasion, however, at the request of the oil company for whom the drilling rig conducts drilling services, drilling equipment and supplies and personnel of the oil company may be placed on board the deck platform and there employed in connection with the drilling services.

The drilling platform will be towed between drilling locations and other points offshore and to other points on or near shore for the purposes of drydocking, repairing, cleaning or other maintenance, or berthing during inactive periods. The platform may also be towed to points on the high seas or to foreign waters. At these times the deck platform will have a crew apart from the drilling rig crew. Any tows will be accomplished by tugboats which will be U.S.-documented.

THIS DOC[illegible] [illegible]SED TO THE PUBLIC _____

C6

During periods while the deck platform is used in connection with the drilling rig, it will be attached to the seabed by its legs. During such periods, crews, equipment and stores will be transported to and from the drilling rig and the deck platform by support vessels qualified to engage in the coastwise trade and by helicopters.

While the deck platform is used in connection with the drilling rig at a drilling location it is possible that certain elements of crews, equipment and stores of the drilling rig will be off-loaded from the deck platform for housing or storage on production platforms or other fixed structures, or removed from such production platforms or other fixed structures and loaded on the deck platform.

The coastwise laws generally prohibit the transportation of passengers or merchandise on a foreign vessel between coastwise points. Points embraced within the coastwise laws include all points within the territorial waters of the United States as well as, pursuant to 43 U.S.C. 1333(a), all artificial islands, installations and devices permanently or temporarily attached to the seabed of the Outer Continental Shelf erected thereon for the purpose of exploring for, developing, or providing resourses therefrom. A drilling rig attached to the Outer Continental Shelf would be considered a coastwise point.

Of course, if a vessel is U.S.-documented and U.S.-built, it may carry passengers and merchandise between coastwise points. From your letter we are unable to determine whether the deck platform will be coastwise-qualified. Even though built in a United States shipyard, a vessel may still be considered to be foreign-built. It is our understanding that the Coast Guard considers a vessel assembled in the United States of major components which are foreign- built to be a foreign-built vessel, and therefore will not document the vessel to engage in coastwise trade. You should also be aware that a vessel must be owned by a citizen to engage in coastwise trade and if owned by a corporation, at least a 75 percent interest in the corporation must be owned by a citizen. Also, note that pursuant to 46 U.S.C. 319, a vessel of 5 or more tons could be fined if found to be engaging in trade without a license. As the Coast Guard's views are of primary importance in these matters, we suggest that the Chief, Merchant Vessel Documentation Division, U.S. Coast Guard, 2100 V Street, S.W., Washington, D.C. 20593, be contacted.

If the deck platform is not coastwise-qualified, 46 U.S.C. 289 would prohibit the carriage on the platform of crewmembers of a drilling rig between the drilling rig, if attached to the Outer Continental Shelf or located within territorial waters, and another coastwise point, such as a shipyard. Section 4.50(b), Customs Regulations (19 CFR 4.50(b)) defines a "passenger" as any person carried on a vessel who is not connected with its operation, navigation, ownership or business. While Customs considers crewmembers and scientific personnel on a vessel in the operation or business of the vessel to not be passengers under 46 U.S.C. 289, the crewmembers of the rig would be considered passengers of the deck platform.

THIS DOCUMENT MAY BE [illegible] TO THE PUBLIC _____

C1

100117

Similarly, carriage of equipment and stores of a drilling rig attached to the Outer Continental Shelf or located within territorial waters, on a non-coastwise-qualified deck platform between the rig and another coastwise point would be considered a violation of 46 U.S.C. 883. While Customs considers the legitimate equipment and stores of a drilling vessel for use during a drillling operation to not be merchandise under 46 U.S.C. 883, equipment and stores of the drilling rig would be considered merchandise on the deck platform.

A non-coastwise-qualified vessel may carry passengers and merchandise from a coastwise point to a place on the high seas or to a foreign place.

If the deck platform attaches to the Outer Continental Shelf, the platform itself becomes a coastwise point and supply vessels carrying crew and equipment to the platform would have to be coastwise-qualified. The Director, Bureau of Consumer Protection, Civil Aeronautics Board, Washington, D.C. 20428 should be consulted concerning the applicability of the air cabotage laws (49 U.S.C. 1508(b)) to helicopters carrying crew and equipment between coastwise points.

Finally, off-loading passengers or merchandise from one stationary structure to another stationary structure would not be considered coastwise trade.

While we hope the information furnished in this letter is helpful, this letter is not a binding ruling. Customs cannot issue a binding ruling without the statements required in section 177.2 of the Customs Regulations. Note particularly sections 177.2(b)(5) and 177.2(b)(2)(IV). Upon receipt of the required statements, we will issue a binding ruling on the proposed operation of the deck platform.

Sincerely,

/s/ J. C. Laderberg

Jerry C. Laderberg
Acting Chief
Carrier Rulings Branch

[redacted]

Dear [redacted]

This is in response to your letter of April 21, 1981, concerning faculty members for the [redacted] to be held aboard the [redacted] in July 1981.

You state that [redacted] are faculty members for the seminar, that their spouses will accompany them, and that the spouses will assist in the seminar by taking attendance and setting up equipment. In your previous inquiry concerning this seminar, to which we responded on November 10, 1980, you indicated that faculty members and their spouses would not be charged for passage. The voyage will originate in San Francisco, visit several United States and Canadian ports, and terminate in Los Angeles. You state that prior commitments prevent [redacted] and their spouses from boarding and leaving the vessel at the same United States port. Instead, the [redacted] would board in San Francisco and leave in Sitka, and the [redacted] would board in Sitka and leave in Los Angeles.

Title 46, United States Code, section 289, prohibits a foreign vessel from transporting passengers between ports or places in the United States, either directly or by way of a foreign port. Section 4.50(b) of the Customs Regulations (19 CFR 4.50(b)) defines a "passenger" as "any person carried on a vessel who is not connected with the operation of such vessel, her navigation, ownership or business".

Under the circumstances outlined, we are of the opinion that [redacted] and their spouses will be sufficiently connected with the business of the vessel within the meaning of section 4.50(b), Customs Regulations, so that none of them will be deemed a "passenger" as that term is used in 46 U.S.C. 289. Accordingly, no violation of the coastwise laws will occur should [redacted] and their spouses leave the vessel at a United States port other than the United States port at which they boarded the vessel.

Sincerely,

(Signed) Alfred G. Scholle

JAN 26 1982

VES 13-18 CO:R:CD:C
105378 JL

This ruling concerns the application of 19 U.S.C. 1466(e) to certain movements of an oceanographic research vessel.

ISSUE

1. Would the entry of a vessel into the U.S. Virgin Islands be considered entry into a port of the United States within the meaning of 19 U.S.C. 1466(e)?

2. Will the discharge of passengers from an oceanographic research vessel onto another vessel outside of Puerto Rico interrupt the two-year period specified in 19 U.S.C. 1466(e)?

FACTS

An American-flag oceanographic research vessel has been operating outside the United States since March, 1981. Its owner asks whether the entry of the vessel into Saint Thomas, Virgin Islands, or the discharge of passengers to another vessel "without formal entry into Puerto Rico" will toll the running of the two-year period specified in 19 U.S.C. 1466(e).

LAW AND ANALYSIS

19 U.S.C. 1466, the vessel repair statute, provides for a 50 percentum, ad valorem, duty on the costs of foreign repairs, parts, and equipment purchases for certain American-flag vessels. Subsection (e) of section 1466 provides for an exemption from duty on such costs incurred after the initial six months of the vessel's foreign voyage when the vessel is a "special purpose" vessel and the entire voyage lasts more than two years.

19 U.S.C. 1401(h) states as follows:

> The term "United States" includes all Territories and possessions of the United States except the Virgin Islands, American Samoa, Wake Island, Midway Islands, Kingman Reef, Johnston Island, and the Island of Guam.

Since 19 U.S.C. 1401 specifically states that the definitions provided therein apply to subtitle III of Title 19, United States Code, and section 1466(e) is part of subtitle III, then the entry of a vessel into the U.S. Virgin Islands would not be deemed an entry into a port of the United States so as to toll the running of the two-year period.

Regarding the contemplated contact with Puerto Rico, the question arises as to whether the discharge will occur inside or outside the territorial waters.

105378

C10

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

RETAIN IN FILE

Customs has consistently ruled that where a vessel comes to rest in United States waters and there is direct or indirect contact with the mainland (e.g.; a smaller boat taking persons ashore), the vessel is deemed to have arrived in the United States. See T.D. 75-298. Accordingly, if the discharge of passengers from the subject vessel is accomplished inside the territorial waters of Puerto Rico, the vessel will be deemed to have arrived in the United States and, consequently, the running of the period of the vessel's voyage for purposes of 19 U.S.C. 1466(e) will have terminated at that point in time. See also, sections 4.2(b), and 4.6, Customs Regulations; 19 U.S.C. 1433 (requiring report of arrival).

HOLDINGS

1. The U.S. Virgin Islands are not a part of the United States for purposes of 19 U.S.C. 1466(e).

2. The discharge of passengers from a vessel inside the territorial waters of Puerto Rico would constitute an arrival of that vessel in the United States so as to toll the running of the vessel's foreign voyage within the meaning of 19 U.S.C. 1466(e).

EFFECT ON OTHER RULINGS

None.

MAY 24 1982

VES-13-18-CO:R:CD:C
105414 LLB

This ruling concerns potential duty liability arising under title 19, United States Code, section 1466, in regard to the extensive refurbishing of a passenger vessel in a foreign shipyard.

ISSUE:

Whether various operations to be performed upon a passenger vessel in a foreign shipyard in order to convert it to a luxury cruise ship might be dutiable under section 1466?

FACTS:

The inquirer plans to take an American-built passenger liner, which has been out of service for some years, to a foreign shipyard for a complete overhaul and re-fit. The planned changes are extensive and every element of the vessel will be affected by the changes. Estimates of the cost of the refurnishing program range up to 90 million dollars. Planned alterations and modifications to the vessel include the following:

1. Entirely new deck areas will be added to the vessel.

2. Replacement of virtually all windows on the vessel for purposes of style.

3. Replacement of all interior and exterior deck coverings to conform to the general design theme.

4. Modification to all interior doors to conform with laws and regulations concerning fireproofing, etc., as well as to conform with the general design theme.

5. Install new ladders, staircases, and elevators to conform with new fire zone requirements.

6. All new deck areas will be fitted with drains, pipes, fire extinguishing equipment, etc.

7. New electrical power system will be added to the new as well as the renovated spaces.

8. New lighting system will be installed in new and renovated areas.

9. Insulation and sheathing will be added throughout which will conform to fire code requirements.

105414

C12

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

10. Ventilation, heating, and air conditioning systems will be installed throughout new portions of the vessel, with existing equipment being relocated and re-engineered.

11. Fire detection and extingishing equipment will be installed in all new areas, and existing equipment will be tested. Smoke detection devices will be installed throughout the vessel. A new central display panel, used to pinpoint fires, will be installed.

12. Existing navigation aids and equipment will be replaced with new apparatus.

13. The vessel will be completly outfitted with life-saving equipment with the exception of lifeboats. The existing lifeboats will be updated in line with Coast Guard requirements.

14. The commissary, galley, and pantry areas will be completely re-designed and re-equipped.

15. A new laundry facility with all necessary connections will be installed as will several new launderette facilities and a dry cleaning facility.

16. Hospital and dispensary facilities will be updated, with new offices for the surgeon and nurse.

17. New ice water and ice machine rooms and equipment will be installed.

18. New hardware will be installed in new areas, keeping all existing hardware in place. (i.e., door locks, signs, etc.).

19. Existing passenger bathrooms will be up-dated with new fixtures, floor coverings, etc., new bath areas will be similarly equipped.

20. A new Coast Guard approved sewerage system will be installed.

21. Much of the existing stateroom furnishings will be replaced and/or re-finished. All new areas will be fully furnished.

22. All non-furniture related interior items are to be re-newed or replaced.

C13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

23. Decorative work, such as statues, carvings, art work, mirrors, draperies, etc., will be added.

24. Two tennis courts, two racquetball courts, facilities for scuba instructions, and a 1/3 kilometer running track will be installed. The scuba appartus will generally consist of standard scuba gear. Electronic games will also be provided.

25. The five existing bars will be refurbished and five new bars will be added. Computer billing machines will also be installed in each bar.

26. Seven food service areas will be developed and outfitted (tables, chairs, etc.).

27. Three new swimming pools and a hot tub will be installed, together with all necessary pumps, water lines, etc.

28. Six existing lifeboats will be replaced with new covered launches. A new power lifting system will be installed to handle these launches. The new lifeboats will include all necessary boat gear, life jackets, lines, etc.

29. Eleven existing elevators will be repanelled, and one additional elevator will be installed. Several existing elevator shafts will be extended.

30. Some 20,000 square feet of area on three decks will be cleared of existing subdivisions and the area will be outfitted to become a shopping mall, to include all necessary air conditioning, ventilation, lighting, machinery, and security systems.

31. Most of the existing telephone system will be removed and a new system integrating the phones with television and a central computer system will be installed. The existing wiring will be utilized wherever available.

32. A complete closed circuit television system, with receivers, will be installed. Recorders, cassette files, etc., will be provided.

33. A full computer system designed to handle virtually all necessary shipboard control functions will be installed. Ticketing, navigation assistance, and inventory control are among the specified functions to be performed. The equipment will include printers, transmitters, memory discs, drives, readers, etc.

105414

C14

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

34. Some 3,000 tons of permanent ballast in the form of drillers mud will be pumped aboard.

35. Boilers, machinery, and equipment will be opened, inspected and where necessary, repaired.

36. The main galley will be rearranged and new equipment will be installed.

37. Fuel, water and ballast tanks, will be opened for cleaning and inspection.

38. Fin stabilizers will be installed.

39. A bow thruster unit will be installed.

40. The two inboard propellers will be replaced fuel for efficiency reasons.

41. The vessel will be drydocked to accomplish the fin stabilizer, bow thruster, and propeller operations.

42. The aluminum superstructure will be painted (painting for marine environment preservation is not required).

43. Existing lifeboats, davits, and winches will be cleaned and prepared for Coast Guard inspection.

44. All preservatives will be removed.

45. Pump packing and seals, and carbon packing and seals on turbines will be replaced (these were removed when the vessel was laid-up).

46. All condensers, coolers, heaters, etc., will be closed-up (covers were removed at the time of lay-up).

The file indicates that many of the above-enumerated changes or additions are to be accomplished for the purpose of achieving design theme consistency, or in order to comply with safety or design codes and regulations.

LAW AND ANALYSIS:

Section 1466 provides in pertinent part for payment of duty in the amount of 50 percent ad valorem on the cost of foreign repairs to vessels documented under laws of the United States to engage in the foreign or coasting trade, or vessels intended to engage in such trade.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

LAW AND ANALYSIS:

A leading case in the interpretation and application of section 1466 is United States v. Admiral Oriental Line et al., T.D. 44359 (1930). That case distinguished between equipment and repairs on one hand and permanent additions to the hull and fittings on the other, the former being subject to duty under section 1466. The Court in Admiral Oriental, supra, stated that permanent additions are:

> ... those appliances which are permanently attached to the vessel, and which would remain on board were the vessel to be laid up for a long period ... [and] are material used in the construction of the vessel within the meaning of the statute. (quoting 27 Op. Atty. Gen. 228).

For purposes of section 1466, dutiable equipment has been defined as:

> ... portable articles necessary or appropriate for the navigation, operation, or maintenance of a vessel, but not permanently incorporated in or permanently attached to its hull or propelling machinery, and not constituting consumable supplies. Admiral Oriental, supra, (quoting T.D. 31450, 1941).

It should be noted that the fact that a change or addition of equipment is made to conform with a new design scheme, or for the purpose of complying with the requirements of statute or code, is not a relevant consideration. Therefore, any change accomplished solely for these reasons, and which does not constitute a permanent addition to the hull and fittings of the vessel, would be dutiable under section 1466.

Any new areas added to the vessel, that is, bulkheads, permanent ballast, decks, staterooms, bars, storerooms, etc., are considered to be qualifying additions to the hull and fittings. Likewise, the extension of existing services into new areas would also be free of duty. This would include piping, air conditioning, ventilation, electrical service, glazing, etc., as well as final finishing for the new areas (such as painting).

On the other hand, among the dutiable operations would be providing furniture for any of the areas (new and old); providing new electronic navigation equipment; providing new lifesaving apparatus, to include lifejackets, floats, inflatables, flares, rings, etc.; adding household type laundering machines; outfitting

105 414

D2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

the doctor's, nurse's, and surgeon's facilities with portable medical apparatus; providing portable mirrors, statues, and art work; providing silverware, etc., for food service areas; refurbishing existing lifeboats and supplying new lifeboats; supplying telephone instruments and television sets; providing computer apparatus; painting of existing areas of the vessel; and replacing worn packing seals.

The classification of the items detailed above is necessarily made on a conditional basis. Owing to the massive scope of the planned conversion project and the difficulity of determining exactly what is contemplated in each of the listed steps, a specific determination is best reserved until the refurbished vessel 's entered. The Customs officials at the port where the vessel rrives will make such determination.

OLDING:

The above-enumerated items which would be considered permanent additions to the hull and fittings, as detailed above, would not be considered dutiable operations pursuant to section 1466. Those items which are repairs not related to casualty, or amount to installation of equipment as contemplated in the statute, as set forth above, would be dutiable under section 1466 at the rate of 50 percent ad valorem.

VES-3-01-CO:R:CD:C
105644 JM

105644

This decision concerns the applicability of the coastwise laws to cable-laying operations by a foreign-built vessel.

ISSUE:

Whether the use of a foreign-built vessel to lay cable between points in the United States and to land surplus cable violates title 46, United States Code, section 883.

FACTS:

Cable will be laden aboard the subject foreign-built vessel at Newington, N.H. and will be transported to Wilmington, N.C. via Port Everglades, Florida, Newington, N.H. and St. Thomas, Virgin Islands. Approximately 1,100 nautical miles of cable will be laid between Vero Beach and St. Thomas, Virgin Islands. The operator of the vessel asks whether a coastwise violation will occur if the unused portion of the cable, as much as 40 natuical miles in length, (less than 5% of the cable laden on the vessel), is unladed at a United States port other than the port at which the cable was laden aboard the vessel.

LAW AND ANALYSIS:

Title 46, United States Code, section 883 provides in pertinent part that, "no merchandise shall be transported ... between points in the United States, including Districts, Territories and possessions thereof embraced within the coastwise laws, either directly or via a foreign port, or for any part of the transportation, in any other vessel than a vessel built in and documented under the laws of the United States...."

The Customs Service has held that the sole use of a vessel to lay cable between points in the United States does not violate the coastwise laws. Such cable is not only laid, and not "transported," between points in the United States, but is also being used in furtherance of the primary mission of the cable-laying vessel and is therefore similar to vessel equipment. Headquarters has ruled that equipment laden on a vessel at a coastwise point and used by the vessel for reasons relating to the operation of the vessel may be later unladen at a second coastwise point without violation of 46 U.S.C. 883. The use of the equipment between American ports will have broken the continuity of the transportation between American ports. This rule applies to any small amount of similar equipment (5% or less of the equipment) that was laden for use but was not in fact needed during the operation of the vessel.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D1

While the use of the cable in connection with the operation of the cable-laying vessel does not violate the coastwise laws, the transportation and landing of cable that was not placed on the vessel to be used in a cable-laying operation, other than cable retrieved to be repaired, at a port in the United States other than at the port at which the cable was laden aboard the vessel constitutes a violation of 46 U.S.C. 883.

HOLDING:

A foreign-built vessel which transports cable used by the vessel in a cable-laying operation is not engaged in the coastwise trade of the United States. If up to 5% of the cable laden on a vessel and intended for use in a cable-laying operation is not used, it may be unladen at a second point in the United States without violation of title 46, United States Code, section 883. Such cable will be treated at the time of unlading as equipment of the vessel. However, if after loading cable at a place in the United States, a foreign-built vessel transports (i.e., does not lay out the cable between places) and lands the cable, other than cable to be repaired, at a second place in the United States, the vessel will be considered to have transported merchandise in the coastwise trade in violation of section 883.

DEPARTMENT OF THE TREASURY U. S. CUSTOMS SERVICE CORRESPONDENCE APPROVAL AND CLEARANCE Form 190 (11-15-73)

JUL 1 1982

VES-3-15-CO:R:CD:C
105698 PH

This ruling concerns the application of the coastwise laws to the transportation of a United States-flag jack-up drilling rig on a foreign-flag submersible barge between points outside United States territorial waters on the outer continental shelf.

ISSUE:

Are the coastwise laws violated when a United States-flag jack-up drilling rig is towed on a foreign-flag submersible barge from a point more than 40 miles off the shore of Alaska to a point more than 3 miles off the shore of Long Beach, California?

FACTS:

The inquirer represents the owners of a United States-flag jack-up drilling rig located more than 40 miles off the shore of Alaska in Norton Sound. The owners of the drilling rig intend to transport it to a drilling site more than 3 miles off the shore of Long Beach, California. The drilling rig is to be transported on a foreign-flag submersible barge. The inquirer requests a ruling that the proposed transportation is not in violation of the coastwise laws.

LAW AND ANALYSIS:

Title 46, United States Code, section 883, in part, prohibits the transportation of merchandise between points in the United States embraced within the coastwise laws, either directly or via a foreign port, or for any part of the transportation, in any other vessel than a vessel built in and documented under the laws of the United States and owned by citizens of the United States. The Customs Service has long held that points in the territorial waters of the United States are points in the United States embraced within the coastwise laws. The territorial waters of the United States do not extend beyond the territorial sea, defined as the belt, 3 nautical miles wide, adjacent to the coast of the United States and seaward of the territorial sea baseline (Treasury Decision 78-440).

Section 4(a) of the Outer Continental Shelf Lands Act of 1953, as amended by the Outer Continental Shelf Lands Act Amendment of 1978 (43 U.S.C. 1333(a)) (the Act), provides, in part, that the laws of the United States are extended to the

D11

THIS DOC[illegible] MAY BE RELEASED TO THE PUBLIC _____

subsoil and seabed of the outer continental shelf (shelf) and to all installations and other devices permanently or temporarily attached to the seabed which may be erected thereon for the purpose of exploring for, developing, or producing resources therefrom to the same extent as if the shelf were an area of exclusive Federal jurisdiction located within a state. The 1978 amendment to section 4(a) of the Act substituted "and all installations and other devices permanently or temporarily attached to the seabed" for "and fixed structures."

Treasury Decision 54281(1), publishing an abstract of a Customs decision dated December 11, 1956, stated, in part, that the coastwise laws are extended to mobile rigs during the period they are secured to or submerged onto the seabed of the shelf. Subsequent rulings applied the same principles to drilling platforms, artificial islands, and similar structures.

In ruling letter VES-3-15 RRUCDC 104880 JL, October 2, 1980 (published as Customs Service Decision 81-95), Treasury Decision 54281(1) was expanded so that the Customs and navigation laws, including the coastwise laws, apply to devices such as a buoy marker submerged onto or attached to the shelf for the purpose of resource exploration operations, and to a well casing with attendant accessory systems, when submerged into the seabed of the shelf. The basis for expanding Treasury Decision 54281(1) was the 1978 amendment to section 4(a) of the Act.

Our October 22, 1980, ruling letter was modified by ruling letter VES-3-15 CO:R:CD:C 104983/104880 JM, February 26, 1981. In this ruling, we held that a point at which no buoy marker is submerged onto or attached to the shelf and no well has been sunk into the seabed is not a coastwise point even if there are buoys or wells in the general vicinity.

We assume, for purposes of this ruling, that the drilling rig was attached to the shelf at the point off the Alaska shore from which it is being transported and, therefore, that it is being transported from a coastwise point. If the drilling rig is being transported to a point at which there is an installation or device submerged onto or attached to the seabed of the shelf (see ruling letter of October 22, 1980, as modified by that of February 26, 1981), the transportation would be between two points subject to the coastwise laws and prohibited if by the foreign-flag barge. If the drilling rig is being transported to a point at which there is no installation or device submerged onto or attached to the seabed of the shelf, the transportation would not be between two points subject to the coastwise laws and would not be prohibited if by the foreign-flag barge.

D12

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

The inquirer should be aware that if the points between which the drilling rig is being transported are both coastwise points and the coastwise laws require the barge upon which it is being transported to be coastwise-qualified, 46 U.S.C. 316(a) would require that the vessel towing the coastwise-qualified barge be a United States-owned and properly documented vessel. (See ruling letter VES-3-15/VES-10-03 CO:R:CD:C: 105063 PH, May 6, 1981 (published as Customs Service Decision 81-214): and Treasury Decision 54600(57.)

HOLDING:

The coastwise laws are violated when a United States-flag jack-up drilling rig is towed on a foreign-flag submersible barge from a point more than 40 miles off the shore of Alaska (assumed to be a point subject to the coastwise laws) to a point more than 3 miles off the shore of Long Beach, California, if there is an installation or device submerged onto or attached to the outer continental shelf at the latter point; but those laws are not violated if there is no installation or device submerged onto or attached to the outer continental shelf at the latter point.

EFFECT ON OTHER RULINGS:

None.

[redacted]

[redacted]

[redacted]

SEP 14 1962

VES 3-06 CO:R:CD:C
105722 DHR

This ruling concerns the carriage of passengers by a foreign-built vessel on round-trip voyages out of a U.S. port.

ISSUE:

Whether a foreign-built vessel may carry passengers on round-trip voyages originating and terminating at the same U.S. port, if the passengers do not go ashore at any U.S. port other than the port of embarkation.

FACTS:

It is proposed to carry passengers on round-trip voyages out of Detroit, Michigan, on a foreign-built, foreign-flag vessel. The passengers would not go ashore, even temporarily, at any other port than the port of embarkation--Detroit.

LAW AND ANALYSIS:

Title 46, United States Code, section 289, prohibits the transportation of passengers on a foreign-flag vessel. Pursuant to 46 U.S.C. 651 only vessels which are built in the United States, generally speaking, may be documented to engage in the coastwise trade, i.e., the transportation of passengers or merchandise between points in the United States.

HOLDING:

1. A foreign-built, U.S.- flag vessel may be used to carry passengers on "voyage to nowhere" out of the port of Detroit without violating the coastwise laws, provided the vessel traverses foreign territorial waters during the course of the voyage.

2. A foreign-flag vessel may be used to carry passengers on "voyages to nowhere" out of the port of Detroit without violating the coastwise laws, subject to the same condition as in 1., above.

3. A cruising license issued to a foreign vessel allows the vessel to arrive at and depart from ports in the United States without the necessity of complying with the usual Customs formalities so long as the vessel is "used and employed exclusively as a pleasure vessel." (See 46 U.S.C. 104.) The use to which the vessel is proposed to be put would be considered trade and the vessel would no longer be entitled to such license.

105722

D14

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

4. If the subject vessel engages in trade, its cruising license will be rendered invalid and it will be subject to all the reporting requirements to which any vessel engaged in trade is subject.

5. As indicated in paragraph 4, whether or not the cruising permit is surrendered, the vessel will be subject to all reporting requirements upon its engaging in trade. There is no authority to waive the navigation laws except when in the interest of national defense (sec. 1,2, 64 Stat. 1120). Therefore, the vessel would be required to report arrival (19 U.S.C. 1433) and make entry (19 U.S.C. 1435), including the filing of a manifest (19 U.S.C. 1431, 1432). A vessel which is not bound to a foreign port or place is not required to obtain clearance. A vessel which intends merely to traverse foreign waters during the course of a voyage is not considered to be bound to a foreign port or place.

(Signed) Edward B. Gable, Jr.

SEP 16 1982

VES-3-15-CO:R:CD:C
105794 PH

105794

This ruling concerns the applicability of the coastwise laws to a point on the United States outer continental shelf at which an oil well has been plugged because it has been determined to be non-productive.

ISSUE:

Whether a plugged or capped oil well on the United States outer continental shelf is a point subject to the coastwise laws?

FACTS:

The inquirer represents the owners of a United States-flag jack-up drilling rig located more than 40 miles off the shore of Alaska in Norton Sound. The owners of the drilling rig intend to transport it to a drilling site more than 3 miles off the shore of Long Beach, California. The drilling rig is to be transported on a foreign-flag submersible barge.

In a ruling dated July 1, 1982 (file VES-3-15-CO:R:CD:C 105698 PH), we ruled that the coastwise laws are violated when a United States-flag jack-up drilling rig is towed on a foreign-flag submersible barge from a point more than 40 miles off the shore of Alaska (assumed to be a point subject to the coastwise laws) to a point more than 3 miles off the shore of Long Beach, California, if there is an installation or device submerged onto or attached to the outer continental shelf at the latter point; but those laws are not violated if there is no installation or device submerged onto or attached to the outer continental shelf at the latter point.

In a request for a ruling supplementing our July 1, 1982, ruling, the inquirer submits additional information about the point from which the drilling rig is to be transported. That point is to be plugged and abandoned as a non-producing well. The procedure for plugging a non-producing well is described in an affidavit by the inquirer's client as set forth below.

After a determination is made that the well is a non-producing well, a cement plug is set at the bottom of the smallest diameter string of casing cemented in the well. This plug extends up into the casing and down into the uncased open hole in the earth below the casing. A second plug is then set at approximately mid-depth in the well, on top of a mechanical sealing component which is placed inside the smallest diameter

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

E2

casing. A third plug is then set approximately 200-500 feet below the mud line inside the smallest diameter casing. All casings are then severed at a point approximately 5-15 feet below the mud line so that nothing of the well is left protruding above the point at which the casings were severed. The rig is jacked down into the water until it is in a floating mode and the legs have been raised up from the seabed. Nothing remains behind protruding up from the seabed or in the water to identify where the drilling had taken place.

The inquirer requests a ruling that the point on the United States outer continental shelf from which the drilling rig is transported, as described above, is not a point subject to the coastwise laws.

LAW AND ANALYSIS:

Title 46, United States Code, section 883, in part, prohibits the transportation of merchandise between points in the United States embraced within the coastwise laws, either directly or via a foreign port, or for any part of the transportation, in any other vessel than a vessel built in and documented under the laws of the United States and owned by citizens of the United States. Section 316(d) of title 46, with certain exceptions not here relevant, prohibits the engagement in salvaging operations by a foreign vessel "... on the Atlantic or Pacific coast of the United States, in any portion of the Great Lakes ... or in territorial waters of the United States on the Gulf of Mexico ...." The Customs Service has long held that points in the territorial waters of the United States are points in the United States embraced within the coastwise laws. The territorial waters of the United States do not extend beyond the territorial sea, defined as the belt, 3 nautical miles wide, adjacent to the coast of the United States and seaward of the territorial sea baseline (Treasury Decision 78-440).

Section 4(a) of the Outer Continental Shelf Lands Act of 1953, as amended by the Outer Continental Shelf Lands Act Amendment of 1978 (43 U.S.C. 1333(a)) (the Act), provides, in part, that the laws of the United States are extended to the subsoil and seabed of the outer continental shelf (shelf) and to all installations and other devices permanently or temporarily attached to the seabed which may be erected thereon for the purpose of exploring for, developing, or producing resources therefrom to the same extent as if the shelf were an area of exclusive Federal jurisdiction located within a state. The 1978 amendment to section 4(a) of the Act substituted "and all installations and other devices permanently or temporarily attached to the seabed" for "and fixed structures."

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E3

105794

Treasury Decision 54281(1), publishing an abstract of a Customs decision dated December 11, 1956, stated, in part, that the coastwise laws are extended to mobile rigs during the period they are secured to or submerged onto the seabed of the shelf. Subsequent rulings applied the same principles to drilling platforms, artificial islands, and similar structures.

In ruling letter VES-3-15 RRUCDC 104880 JL, October 22, 1980 (published as Customs Service Decision 81-95), Treasury Decision 54281(1) was expanded so that the Customs and navigation laws, including the coastwise laws, apply to devices such as a buoy marker submerged onto or attached to the shelf for the purpose of resource exploration operations, and to a well casing with attendant accessory systems, when submerged into the seabed of the shelf. The basis for expanding Treasury Decision 54281(1) was the 1978 amendment to section 4(a) of the Act.

Our October 22, 1980, ruling letter was modified by ruling letter VES-3-15 CO:R:CD:C 104983/104880 JM, February 26, 1981. In this ruling, we held that a point at which no buoy marker is submerged onto or attached to the shelf and no well has been sunk into the seabed is not a coastwise point even if there are buoys or wells in the general vicinity.

In a telegram dated July 27, 1979 (file VES-5-13/VES-10-01/VES-10-02-R:CD:C 104099 JL), we ruled that the use of a foreign-flag vessel in salvage operations and the removal of a drilling rig located on the outer continental shelf is prohibited by 46 U.S.C. 316(d).

Our October 22, 1980, ruling letter was predicated upon a factual situation in which the locations of activity (the points on the outer continental shelf where the merchandise and/or passengers were to be unladed) were "... either operational locations which are sites selected for drilling and marked by buoys attached to the seabed, or locations where a well has been drilled and casings and pipes are in place in the seabed awaiting the placement of a production platform or vessel for the extraction of the mineral deposit." Our July 27, 1979, telegram pertained to "... salvage operations and wreck removal of the rig which sustained a blowout ...."

In the case at hand, the drilling rig will be transported from a well that has been concluded to be non-producing and has been sealed. Thus this case is distinguished from our October 22, 1980, ruling letter. There is no apparent circumstance in this case which would result in the application of the statute covering coastwise salvage (46 U.S.C. 316(d)) and so this case is

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

E4

105794

also distinguished from our July 27, 1979, telegram. (See definitions of "salvage" and related terms in de Kerchove's International Maritime Dictionary (1954 edition), pages 622 and 623, and Black's Law Dictionary (1968 edition), page 1506.) A non-producing well that has been sealed or plugged as described in the affidavit is not, in our opinion, an installation or other device attached to the seabed of the outer continental shelf for the purpose of exploring for, developing, or producing resources therefrom so that it would be a coastwise point by virtue of 43 U.S.C. 1333(a). Accordingly, we conclude that the abandoned and plugged well from which the drilling rig is to be transported is not a point subject to the coastwise laws.

105794

HOLDING:

A plugged or capped oil well on the United States outer continental shelf, plugged as described in this ruling, is not a point subject to the coastwise laws.

EFFECT ON OTHER RULINGS:

Ruling letter VES-3-15 RRUCDC 104880 JL, October 22, 1980 (C.S.D. 81-95), and telegram VES-5-13/VES-10-01/VES-10-02-R:CD:C 104099 JL, July 27, 1979, distinguished.

SEP 14 1982

VES-3-02-CO:R:CD:C
105800 JM

This ruling concerns the use of a foreign-flag vessel to transport passengers between points in the United States.

ISSUE:

Whether the cruise itineraries described in this ruling violate 46 U.S.C. 289?

FACTS:

The inquirer requests a ruling as to whether the following itineraries proposed for a foreign-flag vessel would violate 46 U.S.C. 289.

1. The vessel would leave Port Everglades, Florida, on Thursday: touch at Nassau, Bahamas, on Friday (10 hrs): touch at Tampa, Florida, on Sunday (14 hrs) and return to Port Everglades, on Tuesday.

2. The vessel would leave Nassau, Bahamas, on Friday: touch at Tampa, Florida, on Sunday (14 hrs) and proceed to Port Everglades, Florida, where the passengers would disembark.

The passengers will go ashore for sightseeing at ports touched on the proposed cruises.

LAW AND ANALYSIS:

Title 46, United States Code, section 289, provides that no foreign vessel shall transport passengers between ports or places in the United States, either directly or by way of a foreign port, under a penalty of $200 for each passenger so transported and landed.

Section 4.80a(a), Customs Regulations (19 CFR 4.80a(a)), which is interpretative of 46 U.S.C. 289, provides, in pertinent part, that a foreign vessel which takes a passenger on board at a port in the United States will be deemed to have landed that passenger in violation of the coastwise laws if:

4. The passenger goes ashore at any port other than the port at which he embarked if coastwise transportation is the primary object of the voyage.

105800

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E6

In applying subparagraph (4) to section 4.80a(a) to cruises that originate and terminate at the same coastwise port, the Customs Service has taken the position that, in the absence of other evidence of the primary object of the voyage, if the total time spent in nearby foreign ports is equal to or more than the time spent in coastwise ports, and the number of nearby foreign ports visited is equal to or more than the number of coastwise ports visited (apart from a passenger's port of original embarkation and ultimate disembarkation), the primary purpose of the passenger's voyage will not be deemed to be coastwise transportation.

For purposes of section 4.80a, a nearby foreign port is defined as any port in North America, the West Indies (including the Bahamas Islands), or the Bermuda Islands. A port in the Virgin Islands is also treated as a nearby foreign port for purposes of section 4.80a.

In a previous ruling, we ruled that a passenger may embark at a nearby foreign port, then proceed to a United States port, where the passenger went ashore temporarily, and leave the vessel at a second United States port without violating the coastwise laws.

HOLDING:

1. On cruise 1, the vessel will call at one United States port for 14 hours (other than the passenger's port of original embarkation and ultimate disembarkation) and one nearby foreign port for 10 hours. Since the time spent in the United States port is more than the time spent in the foreign port, the primary purpose of cruise 1 will be considered to be coastwise transportation. Accordingly, if a passenger goes ashore at Tampa, a United States port other than the passenger's original port of embarkation and ultimate disembarkation, a violation of 46 U.S.C. 289 will occur.

2. The cruise itinerary covered by cruise 2 of the inquiry would not violate the coastwise laws.

EFFECT ON OTHER RULINGS:

None.

JAN 24 1983

VES-3-02 CO:R:CD:C
105932 PH

This ruling concerns the applicability of the prohibition against the transportation of passengers between ports or places in the United States, in 46 U.S.C. 289, to the proposed cruise itinerary of a foreign-flag vessel.

ISSUE:

Whether the passengers on the cruise described in this ruling are transported in violation of 46 U.S.C. 289 and section 4.80a, Customs Regulations.

FACTS:

The inquirer requests a ruling as to whether the following itinerary for a foreign-flag vessel would violate the coastwise laws or Customs Regulations thereunder.

It is proposed that the vessel depart Port Everglades, Florida, on a Friday, touch on Sunday at Tampa (9 hours), Tuesday at Grand Cayman Island (5 hours), Wednesday at Cozumel Island (12 hours), and return to Port Everglades on Friday. Passengers will embark at Port Everglades on January 20, 1984, and while ashore in Tampa, Grand Cayman Island, and Cozumel Island, will participate in prearranged excursions. All passengers will disembark at Port Everglades on January 27, 1984.

In addition to requesting a ruling as to whether the proposed itinerary violates the coastwise laws, the inquirer asks whether the coastwise laws would be violated if any passengers on the cruise disembarked at Grand Cayman Island or Cozumel Island.

LAW AND ANALYSIS:

Title 46, United States Code, section 289, provides that no foreign vessel shall transport passengers between ports or places in the United States, either directly or by way of a foreign port, under a penalty of $200.00 for each passenger so transported and landed.

Section 4.80a(a), Customs Regulations, which is interpretative of 46 U.S.C. 289, provides, in pertinent part, that a foreign vessel which takes a passenger on board at a port in the United States will be deemed to have landed that passenger in violation of the coastwise laws if:

REPLY TO: CHIEF, CARRIER RULINGS BRANCH

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

105-932

JAN 24 1983

* * * *

(3) The passenger severs his connection with the voyage at another coastwise port on a voyage which touches no foreign port other than a nearby foreign port; or

(4) The passenger goes ashore at any port other than the port at which he embarked if coastwise transportation is the primary object of the voyage.

In applying subparagraph (4) of section 4.80a(a), the Customs Service has taken the position that, in the absence of other evidence of the primary object of a voyage, if the total time spent in foreign ports is not less than the total time spent in coastwise ports, and the number of foreign ports visited is not less than the number of coastwise ports visited (apart from a passenger's port of original embarkation and ultimate disembarkation) the primary object of the passenger's voyage will not be deemed to be coastwise transportation.

In the cruise itinerary under consideration, the vessel will touch at three ports other than the port of embarkation and disembarkation. Two of the ports are nearby foreign ports (see 19 CFR 4.80a(c)) at which the vessel will touch for a total of 18 hours and one is a United States port at which the vessel will touch for 9 hours. In the absence of evidence to the contrary, we conclude that the primary object of the cruise is not coastwise transportation and the passengers may go ashore temporarily at Tampa. Of course, if any of the passengers ultimately disembark at Tampa, the coastwise laws will be violated (19 CFR 4.80a(a)(3)). The coastwise laws will not be violated by any of the passengers on this cruise ultimately disembarking at Grand Cayman Island or Cozumel Island.

HOLDING:

The passengers transported by a foreign-flag vessel on a cruise originating in Port Everglades, touching for 9 hours at Tampa, 6 hours at Grand Cayman Island, 12 hours at Cozumel Island, and returning to Port Everglades are not transported in violation of 46 U.S.C. 289. The passengers may go ashore temporarily at Tampa because the primary object of the cruise is not considered to be coastwise transportation.

EFFECT ON OTHER RULINGS:

None.

[redacted]

Dear [redacted]

This is with reference to your letter of September 30, 1983, in which you set forth the following voyage itinerary of the [redacted] for 1984 for our confirmation that it will not be in violation of the coastwise laws (46 U.S.C. 289):

PORT	ARRIVE	DEPART	Time In Port
NEW YORK		SAT. AUG. 25, 1984-72M	-
BERMUDA	MON. AUG. 27, 9 AM	TUE. AUG. 28, 1984-NOON	27 HRS.
CAPE CANAVERAL	THU. AUG. 30, 7 AM	THU. AUG. 30, 1984-4PM	9 HRS.
NEW YORK	SAT. SEPT. 1, 10 AM		

Pursuant to the provisions of section 4.80a(a)(2), the proposed cruise as described in your letter would be in violation of no law administered by the Customs Service, provided no passenger departs from the cruise at Cape Canaveral, i.e., all the passengers continue back to New York.

Sincerely,

(Signed) Kathryn C. Peterson

MAR 5 - 1984

VES-13-18-CO:R:CD:C
106418 GOB

106418

This ruling concerns an application for relief from duties on the cost of foreign repairs or equipment assessed pursuant to title 19, United States Code, section 1466.

ISSUE:

Whether certain work related to a container stowage arrangement resulted in equipment, which is dutiable pursuant to 19 U.S.C. 1466, or a permanent addition to the hull and fittings, which is non-dutiable.

FACTS:

The evidence of record indicates that the work related to a container stowage arrangement. The applicant contends that the arrangement is a modification of its stacking frame design and therefore is duty-free.

LAW AND ANALYSIS:

Title 19, United States Code, section 1466, provides in pertinent part for payment of an ad valorem duty of 50 percent of the cost of equipment purchased in a foreign country for a vessel documented under the laws of the United States to engage in the foreign or coastwise trade.

Numerous court cases have distinguished between vessel equipment and additions to the vessel's hull and fittings, with the former ordinarily being portable objects and the latter being those things of a permanent character attached to the hull which would remain on board if the vessel were to be laid up for a long period. See, e.g., Southwestern Shipbuilding Co. v. United States, T.D. 40934 and United States v. Admiral Oriental Line et al., T.D. 44359.

In T.D. 78-170 we held that certain portable stacking frames were vessel equipment and were dutiable pursuant to 19 U.S.C. 1466.

In this case the applicant has not submitted sufficient evidence to establish that the work constitutes permanent additions to the hull and fittings. We believe that the container stowage arrangement is removable and therefore constitutes equipment rather than a permanent addition to the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

E12

hull and fittings. We note that although the evidence of record is insufficient to so establish, the changes made to the fourth tier stacking frames may constitute permanent alterations which would be duty-free if separately invoiced.

HOLDING:

We are of the opinion that the work relating to the container stowage arrangement resulted in equipment, the cost of which is dutiable.

APR 4 - 1984

VES-3-21-CO:R:CD:C
106447 PH

106447

This ruling concerns the applicability of the coastwise laws to the use of a foreign-flag vessel as a cement storage vessel.

ISSUES:

1. May a foreign-flag vessel, docked alongside a pier in the United States on a continuous basis, receive foreign cement into its hold for storage purposes and pump the cement onto shore into a small silo for truck loading?

2. May a foreign-flag vessel be towed to a location more than 3 miles from the shore of the United States where it receives foreign cement and then be towed back to shore where it pumps the cement onto shore into a small silo for truck loading?

FACTS:

The inquirer, a Florida corporation, request a ruling on two alternative methods of storing cement on a foreign-flag vessel. In the first method, the vessel would be docked alongside the pier on a continuous basis with foreign cement being discharged into the hold of the vessel for storage purposes and the vessel pumping the cement onto the shore into a small silo for truck loading. In the second method, the vessel would be loaded with cement in the same manner but more than 3 miles from shore. On both movements (we assume this refers to the movement of the vessel to the point more than 3 miles from shore and the movement of the vessel from that point back to shore) the vessel would not have a crew but would be moved solely by a tug.

LAW AND ANALYSIS:

Title 46, United States Code, section 883, (46 U.S.C. 883), provides, in part, that no merchandise shall be transported between points in the United States embraced within the coastwise laws, either directly or via a foreign port, or for any part of the transportation, in any vessel other than a vessel built in and documented under the laws of the United States and owned by persons who are citizens of the United States. Section 289 of title 46 (46 U.S.C. 289), as interpreted by the Customs Service, prohibits the transportation of passengers between points in the United States embraced within the coastwise laws, either directly or by way of a foreign port, in a non-coastwise-qualified vessel (see above). The coastwise towing statute, 46 U.S.C. 316(a), prohibits the use of a non-coastwise-qualified vessel (see above)

THIS DOCUMENT MAY BE RELEASED TO THE
PUBLIC _____

21

to tow any vessel other than a foreign-flag vessel, or a vessel in distress, from any port or place embraced within the coastwise laws of the United States to another such port or place, or for any part of such towing.

For purposes of the coastwise laws, a point in United States territorial waters is considered a point embraced within the coastwise laws. The territorial waters of the United States consist of the territorial sea, defined as the belt, 3 nautical miles wide, adjacent to the coast of the United States and seaward of the territorial sea baseline.

The Customs Service has consistently ruled that the use of a non-coastwise-qualified vessel as a storage facility in United States territorial waters does not violate the coastwise laws, or any other laws administered by the Customs Service, provided that the vessel remains stationary. Customs also has held that if the vessel is being loaded or unloaded and must be moved to another location because of stress of weather or other reason involving the vessel's safety, subsequently is returned to the same point to continue its loading or unloading, and loads or unloads no merchandise at any other point in the United States, the coastwise laws are not violated. Accordingly, the first method of cement storage proposed by the inquirer, in which the vessel would be docked alongside the pier on a continuous basis with foreign cement being discharged into the hold of the vessel for storage purposes and the vessel pumping the cement onto the shore into a small silo for truck loading, would not violate the coastwise laws.

The coastwise merchandise statute (46 U.S.C. 883) does not prohibit the transportation by a non-coastwise-qualified vessel of merchandise from a non-coastwise point outside territorial waters to a point in the United States. The coastwise towing statute (46 U.S.C. 316(a)) does not prohibit the towing by a non-coastwise-qualified vessel of a foreign-flag vessel between coastwise points. In the second method of cement storage proposed by the inquirer, the storage vessel is to be towed to a location more than 3 miles from shore where it will receive foreign cement. The storage vessel is then to be towed back to shore where it will pump the cement onto land. Assuming that the location where the storage vessel will receive the cement is outside United States territorial waters, this method of cement storage would not violate the coastwise laws.

The inquirer should be aware that the storage vessel, if it is arriving from a foreign country to begin its operation as a storage vessel, will be subject to vessel report-of-arrival and entry requirements, as well as tonnage taxes. If the second

F2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

106477

method of cement storage is used, the vessel may be subject to these and other vessel requirements (see Federal Register Notice of October 14, 1983 (48 FR 46808), concerning the application of entry and clearance requirements to vessels engaged in lightering operations on the high seas). Whichever method of cement storage is used, the foreign cement will also be subject to Customs entry and duty. Copies of the sections of the Customs Regulations concerning the foregoing vessel requirements are enclosed. For specific information on these requirements, we suggest that the inquirer contact his local Customs office.

HOLDINGS:

1. A foreign-flag vessel, docked alongside a pier in the United States on a continuous basis, may receive foreign cement into its hold for storage purposes and pump the cement onto shore into a small silo for truck loading without violating the coastwise laws.

2. A foreign-flag vessel may be towed to a location more than 3 miles from the shore of the United States where it receives foreign cement and then be towed back to shore where it pumps the cement onto shore into a small silo for truck loading without violating the coastwise laws, assuming that the offshore location where it receives the foreign cement is outside United States territorial waters.

EFFECT ON OTHER RULINGS:

None.

U.S. CUSTOMS SERVICE
WASHINGTON

MAY 3 - 1984

REFER TO
VES-3-06/VES-10-03
CO:R:CD:C 106553 PH

106553

This ruling concerns the proposed use of a foreign-built vessel for transportation, towing, and anchor handling in support of a mining operation in a remote area of the United States.

ISSUE:

1. May a foreign-built vessel be used to transport mining equipment, tools, food, supplies, miners, and fuel between points in the United States?

2. May a foreign-built vessel be used to tow a dredging barge between points in the United States?

3. May a foreign-built vessel be used to set and change the location of anchors as necessary for a dredging barge in United States waters?

4. May a foreign-built vessel be used to transport ore to various ports in Alaska or Washington from the site in the United States where the ore is mined?

FACTS:

The inquirer, an Alaskan lumber company, requests advice on its proposed use of a foreign-built vessel in a mining operation in a remote area. The inquirer states that the vessel is 120' x 32' x 6' and has a house aft, a bow ramp, and fuel storage tanks amidships.

The inquirer states that the vessel would be used to -- (1) carry equipment, tools, food, supplies, miners, and (with Coast Guard approval) fuel; (2) tow a dredging barge to a mining location; (3) set and change the location of anchors as necessary for the dredging barge; and (4) transport ore from the mining operation to various ports in Alaska or Washington. For purposes of this ruling, we assume that the place from which the vessel would be transporting equipment, etc., or towing the dredging barge, and the site of the mining operation are in the United States. The inquirer states that the vessel will not be used for hire or any other use not legally permitted.

The inquirer also requests advice on the steps necessary to transfer ownership, enter United States waters, and any other problems he might encounter.

FS

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

LAW AND ANALYSIS:

Title 46, United States Code, section 883, (46 U.S.C. 883), provides, in part, that no merchandise shall be transported between points in the United States embraced within the coastwise laws, either directly or via a foreign port, or for any part of the transportation, in any vessel other than a vessel built in and documented under the laws of the United States and owned by persons who are citizens of the United States. Section 289 of title 46 (46 U.S.C. 289), as interpreted by the Customs Service, prohibits the transportation of passengers between points in the United States embraced within the coastwise laws, either directly or by way of a foreign port, in a non-coastwise-qualified vessel (see above). The coastwise towing statute, 46 U.S.C. 316(a), prohibits the use of a non-coastwise-qualified vessel (see above) to tow any vessel other than a foreign-flag vessel, or a vessel in distress, from any port or place embraced within the coastwise laws of the United States to another such port or place, or for any part of such towing.

For purposes of the coastwise laws, a point in United States territorial waters is considered a point embraced within the coastwise laws. The territorial waters of the United States consist of the territorial sea, defined as the belt, 3 nautical miles wide, adjacent to the coast of the United States and seaward of the territorial sea baseline.

The vessel under consideration may not engage in the coastwise trade because it is foreign-built. As a non-coastwise-qualified vessel, the vessel may not transport between United States coastwise points mining equipment, tools, or supplies, food for the miners, the miners themselves, or fuel. The vessel may not be used to tow a dredging barge between United States coastwise points unless the dredging barge is a vessel documented under a foreign flag or a vessel in distress. The vessel may not be used to transport ore between the mining operation and ports in Alaska or Washington.

For purposes of this ruling, we have assumed that the place from which the vessel under consideration would transport the mining equipment, etc., or tow the dredging barge, and the site of the mining operation are in the United States. If either or both of these locations are not in the United States, the transportation of mining equipment, etc., and the towing of the dredging barge would not be between coastwise points and could be performed by a non-coastwise-qualified vessel such as that

F6

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

under consideration. If the site of the mining operation is not in the United States, the transportation of the ore between that site and ports in Alaska or Washington would not be between coastwise points and also could be performed by a non-coastwise-qualified vessel such as that under consideration.

Customs has ruled that the use of a vessel in moving anchors for vessels located in United States territorial waters does not constitute coastwise trade. Accordingly, the vessel under consideration may be used to set and change the location of anchors as necessary for a dredging barge, even if the anchor handling operation occurs in United States territorial waters.

If the vessel under consideration is brought into the United States from a foreign country, its master will be required to report its arrival to Customs within 24 hours after arrival (19 U.S.C. 1433; section 4.2 Customs Regulations) and make entry of the vessel within 48 hours after arrival (19 U.S.C. 1434 or 1435; section 4.3 et seq., Customs Regulations). The vessel will be subject to tonnage taxes (usually $.02 or $.06 per net ton, depending on the foreign port from which the vessel is arriving; see section 4.20 et seq., Customs Regulations). The vessel may also be subject to permit to proceed requirements, when moving between ports of the United States, and vessel clearance, when departing the United States for a foreign port. Copies of sections of the Customs Regulations on the foregoing requirements are enclosed for the information of the inquirer. The inquirer may obtain further information on these requirements from his local Customs office.

This ruling does not address questions pertaining to the vessel documentation and safety requirements administered by the United States Coast Guard. The letter transmitting this ruling contains the address to which inquiries on these subjects may be sent.

HOLDINGS:

1. A foreign-built vessel may not be used to transport mining equipment, tools, food, supplies, miners and fuel between points in the United States.

2. A foreign-built vessel may not be used to tow a dredging barge between points in the United States unless the dredging barge is a vessel documented under a foreign flag or a vessel in distress.

F1

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

106553

3. A foreign-built vessel may be used to set and change the location of anchors as necessary for a dredging barge in United States waters.

4. A foreign-built vessel may not be used to transport ore to various ports in Alaska or Washington from the site in the United States where the ore is mined.

EFFECT ON OTHER RULINGS:

None.

TELEX NO. 32-9430

INFO: R.C., PACIFIC REGION
D.D., SEATTLE, WASHINGTON

REURTELEX MAY 3, 1984, (YOUR REF: H-1100-1500-674; OUR REF: 106796), CONCERNING USE OF UNITED STATES-BUILT, FLAG, AND OWNED BUT NON-COASTWISE-QUALIFIED JETFOIL PASSENGER VESSEL ARIES (OUR RULINGS 105587 (C.S.D. 82-115) AND 105909 (C.S.D. 83-52) ALSO CONCERNED THIS VESSEL) TO TRANSPORT AMBASSADORS OF SIX ASIAN NATIONS WITH THEIR STAFFS FROM TACOMA TO SEATTLE AS PART OF THE HOSPITALITY FURNISHED THE AMBASSADORS ON THEIR VISIT TO THE SEATTLE AREA. THE AMBASSADORS AND THEIR STAFFS WOULD BE TRANSPORTED BY A BUS OF THE INQUIRER FROM THEIR HOTEL IN SEATTLE TO TACOMA. THE ROUND-TRIP TRANSPORTATION WOULD BE PROVIDED BY THE INQUIRER FREE OF CHARGE. IN addition TO THE AMBASSADORS AND THEIR STAFFS, PERSONNEL OF THE PORTS OF TACOMA AND SEATTLE, AND OF THE INQUIRER, WOULD BE TRANSPORTED.

106796

THE INQUIRER STATES THAT THERE IS A LONG-RANGE SALES ASPECT TO THE TRANSPORTATION BY THE JETFOIL BECAUSE

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC

THE SOME COUNTRIES OF THE AMBASSADORS ARE REGARDED AS SALES PROSPECTS AND ONE OF THE COUNTRIES HAS TAKEN DELIVERY ON ONE JETFOIL VESSEL, CONTRACTED FOR FOUR OTHERS, AND ENTERED A LICENSE AGREEMENT FOR CO-PRODUCTION. THE INQUIRER REQUEST A RULING THAT THE PROPOSED NON-REVENUE V.I.P. DEMONSTRATION WOULD NOT VIOLATE THE COASTWISE LAWS OR, AS A LESS DESIRABLE ALTERNATIVE, THAT A BRIEF DEMONSTRATION TRIP ORIGINATING AND RETURNING TO THE SAME POINT IN TACOMA OR SEATTLE WOULD NOT VIOLATE THE COASTWISE LAWS.

AS NOTE COMPLETELY DESCRIBED IN C.S.D.'S 82-115 AND 83-52, ALSO CONCERNING THIS VESSEL, THE COASTWISE LAWS PROHIBIT THE TRANSPORTATION OF MERCHANDISE OR PASSENGERS BETWEEN UNITED STATES COASTWISE POINTS IN A NON-COASTWISE-QUALIFIED VESSEL. GENERALLY, THIS PROHIBITION HAS BEEN INTERPRETED TO APPLY TO THE TRANSPORTATION OF PASSENGERS ON A NON-COASTWISE-QUALIFIED VESSEL WHEN THE VOYAGE IS ENTIRELY WITHIN UNITED STATES TERRITORIAL WATERS, EVEN THOUGH THE PASSENGERS ARE EMBARKED AND DISEMBARKED AT THE SAME COASTWISE POINT AND THE VESSEL TOUCHES AT NO OTHER COASTWISE POINT DURING THE VOYAGE. HOWEVER, THIS PROHIBITION DOES NOT APPLY TO SUCH A VOYAGE ENTIRELY WITHIN TERRITORIAL WATERS WHEN THE PURPOSE OF THE VOYAGE IS TO

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

106 796

F11

DEMONSTRATE THE VESSEL. THIS "DEMONSTRATION" EXCEPTION HAS BEEN LIMITED TO DEMONSTRATION VOYAGES ORIGINATING AND TERMINATING AT THE SAME POINT BECAUSE TRANSPORTATION OF PERSONS BETWEEN DIFFERENT COASTWISE POINTS, EVEN ON A VOYAGE DESCRIBED AS A DEMONSTRATION VOYAGE, IS ITSELF CONSIDERED EVIDENCE OF A PURPOSE OTHER THAN DEMONSTRATION OF THE VESSEL.

ACCORDINGLY, WE CONCLUDE THAT THE JETFOIL VESSEL UNDER CONSIDERATION MAY NOT BE USED TO TRANSPORT THE AMBASSADORS AND THEIR STAFFS FROM TACOMA TO SEATTLE, A VOYAGE ENTIRELY WITHIN TERRITORIAL WATERS, BUT IT MAY BE USED TO TRANSPORT THE AMBASSADORS AND THEIR STAFFS ON THE ALTERNATIVE BRIEF DEMONSTRATION TRIP ORIGINATING AND RETURNING TO THE SAME POINT IN TACOMA OR SEATTLE, ASSUMING THAT THE VESSEL DOES NOT TOUCH AT ANY OTHER COASTWISE POINT DURING THE COURSE OF THE DEMONSTRATION TRIP. THE INQUIRER SHOULD BE AWARE THAT ALTHOUGH PERSONS CONNECTED WITH THE OPERATION, NAVIGATION, OWNERSHIP, OR BUSINESS OF THE VESSEL (E.G., THE CREW, CORPORATE OFFICIALS OF THE VESSEL OWNER, AND PERSONS NECESSARY TO

106976

F12

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

CONDUCT THE DEMONSTRATION) MAY ALSO BE TRANSPORTED ON THE ALTERNATIVE BRIEF DEMONSTRATION TRIP, TRANSPORTATION ON THE ALTERNATIVE DEMONSTRATION TRIP OF ANY PERSON OTHER THAN THE AMBASSADORS AND THEIR STAFFS, OR ANY PERSON NOT CONNECTED WITH THE OPERATION, NAVIGATION, OWNERSHIP, OR BUSINESS OF THE VESSEL, WOULD BE PROHIBITED BY THE COASTWISE LAWS (SEE C.S.D.'S 82-115 AND 83-52).

106803

REURTELEX MAY 10, 1984 (OUR REFERENCE 106803), CONCERNING ALTERATION OF THE ITINERARY OF A CRUISE PROPOSED BY EXPLORATION HOLIDAYS AND CRUISES. OUR RULING VES-3-02-CO:R:CD:C 106722, SENT TO YOU ON APRIL 16, 1984, HELD THAT A CRUISE BETWEEN VANCOUVER OR VICTORIA, BRITISH COLUMBIA, AND AN ALASKAN PORT, WHICH INCLUDES CALLS AT FIVE INTERVENING UNITED STATES PORTS, WOULD VIOLATE THE COASTWISE LAWS, BUT SUCH A CRUISE WHICH INCLUDES CALLS AT THREE INTERVENING UNITED STATES PORTS WOULD NOT VIOLATE THE COASTWISE LAWS.

YOU NOW STATE THAT BECAUSE OF THE NATIONAL PARK SERVICE'S POLICY OF LIMITING ENTRY PERMITS TO GLACIER BAY, THE CRUISE VESSEL WHICH WAS THE SUBJECT OF OUR APRIL 16 RULING CANNOT SECURE AN ENTRY PERMIT ALLOWING IT TO CRUISE THE WATERS OF

F14

1 3

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

GLACIER BAY NATIONAL PARK. IT IS PROPOSED THAT A UNITED-STATES-BUILT DAY EXCURSION VESSEL, OWNED BY THE UNITED STATES-OWNED COMPANY WHICH OPERATES THE CRUISE VESSEL, TAKE PASSENGERS FROM THE CRUISE VESSEL INTO GLACIER BAY AND RETURN THEM TO THE CRUISE VESSEL WITHOUT USING ANY DOCK FACILITY. THIS EXCURSION CRUISE WOULD LAST APPROXIMATELY 8 HOURS. YOU STATE THAT YOU DO NOT CONSIDER THIS TO BE AN INTERVENING UNITED STATES PORT BUT MERELY AN EXTENSION OF THE CRUISE AND REQUEST A FAVORABLE RULING.

GENERALLY, THE TRANSFER OF PASSENGERS OR MERCHANDISE FROM ONE VESSEL TO ANOTHER IN UNITED STATES TERRITORIAL WATERS IS CONSIDERED A "LANDING" BY CUSTOMS. IN THIS CASE THERE ARE UNUSUAL CIRCUMSTANCES. A PERMIT TO CRUISE IN GLACIER BAY CAN NOT BE SECURED FOR THE CRUISE VESSEL BECAUSE OF THE RULES OF ANOTHER GOVERNMENT AGENCY. PASSENGERS WILL BE TRANSFERRED TO A VESSEL OWNED BY THE CRUISE OPERATOR FOR AN EXCURSION CRUISE IN TERRITORIAL WATERS LIMITED TO APPROXIMATELY 8 HOURS. WE ASSUME, FOR PURPOSES OF THIS TELEX, THAT THE PASSENGERS WILL NOT SET FOOT ON LAND DURING THIS EXCURSION CRUISE. BASED ON THE FOREGOING, THE TRANSFER TO AND THE CRUISE IN GLACIER BAY ON THE DAY EXCURSION VESSEL WILL NOT BE CONSIDERED AN INTERVENING

106903

G1

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____.

UNITED STATES PORT, FOR PURPOSES OF OUR APRIL 16, 1984, RULING. WE EMPHASIZE, HOWEVER, THAT THE DAY EXCURSION VESSEL MUST BE COASTWISE-QUALIFIED (SEE 46 U.S.C. 883), OR ITS TRANSPORTATION OF THE PASSENGERS WILL VIOLATE THE COASTWISE LAWS, AND THAT OUR APRIL 16 RULING STILL STANDS.

IN OUR TELEPHONE CONVERSATION ON MAY 9, 1984, [redacted] OF YOUR COMPANY DISCUSSED THE PART OF OUR APRIL 16 RULING WHICH HELD THAT A CRUISE WHICH INVOLVES CALLS OF NO MORE THAN 24 HOURS AT THREE INTERVENING UNITED STATES PORTS WOULD NOT VIOLATE THE COASTWISE LAWS. MR. REYNOLDS ASKED WHETHER THE REFERENCE TO 24 HOURS MEANS 24 HOURS IN ALL OF THE THREE PORTS OR IN EACH OF THE PORTS. THIS CONFIRMS THAT THE SUBJECT REFERENCE MEANS THAT EACH OF THE CALLS AT THE THREE UNITED STATES PORTS MAY BE NO LONGER THAN 24 HOURS.

[redacted]

Dear [redacted]

This is with reference to your letter of May 18, 1984, in which you ask for an exception to the coastwise laws in order for the foreign passenger vessel [redacted] to carry the Mayor and City Council of New London, Connecticut, and travel agents from Newport, Rhode Island, to New London. The vessel would arrive in Newport from Nova Scotia and would then proceed to New London to embark on a cruise.

Section 289, title 46, United States Code, prohibits the transportation of passengers between ports of the United States on foreign vessels. The Customs Regulations define a "passenger" in this context as "any person carried on a vessel who is not connected with the operation of such vessel, her navigation, ownership, or business." The connection must be direct and immediate, not a remote or hypothetical connection or a connection related only to future voyages. The Customs Service has consistently held that, while travel agents may be tangentially connected with the business of a vessel, in that they may encourage future travel on that vessel, they are not directly enough connected with the business of the vessel to be classified as other than passengers. Consequently, the proposed transportation of the travel agents would be in violation of the statute, even though the cruise line would receive no revenue from it.

The Mayor and City Council will be traveling on board the vessel to promote New London as a cruise port. Therefore, their transportation will be connected with the business of New London, and not the business of the GALILEO. Accordingly, the proposed transportation of the Mayor and City Council would also be in violation of the statute.

106823

G3

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

There is no general authority to waive the coastwise laws except under the Act of December 27, 1950 (note preceding section 1, title 46, United States Code), which provides for waivers necessary in the interest of national defense. It follows that the Customs Service has no authority to permit the proposed transportation.

Sincerely,

(Signed) Edward B. Gable, Jr.

OCT 11 1984

REFER TO
VES-13-18 CO:R:CD:C
106961 JM

106961

This ruling concerns a petition for relief from duty under 19 U.S.C. 1466 on the cost of foreign repairs to an American-flag vessel.

ISSUE:

Whether duties on the cost of repairs effected to meet safety requirements administered by the U.S. Coast Guard are subject to remission under 19 U.S.C. 1466(d)(1).

FACTS:

The subject vessel arrived in the United States on March 13, 1980, at New Orleans, Louisiana, from Wellington, New Zealand. Vessel Repair Entry 80-269390-3 was filed covering repairs to the vessel in foreign countries.

The petitioner claims that repairs to the radars, the gyro compass and the radio aerial were effected to comply with safety requirements administered by the U.S. Coast Guard as set forth in 33 CFR 26.03(a), 164.35(d) and (e) and 164.37(a). The petitioner has furnished no evidence concerning the cause of the failure of the articles repaired aboard.

LAW AND ANALYSIS:

Title 19, United States Code, section 1466, provides in pertinent part for payment of an ad valorem duty of 50 percent of the cost of foreign repairs to a vessel documented under the laws of the United States to engage in the foreign or coastwise trade. Subsection 1466(d)(1) provides that the Secretary of the Treasury is authorized to remit or refund such duties if the owner or master of the vessel furnishes good and sufficient evidence that the vessel was compelled by stress of weather or other casualty to put into such foreign port to make repairs to secure the safety and seaworthiness of the vessel to enable her to reach her port of destination.

In C.S.D. 79-272, we denied relief from duty on the purchase of fire extinguishers to comply with regulations governing the carriage of flammable or combustible liquids because the purchase was not compelled by stress of weather or other casualty. In like manner, the repairs to the subject vessel were effected to comply with safety requirements administered by the U.S. Coast Guard but were not necessitated by stress of weather or other casualty.

G6

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

HOLDING

Duties on the cost of repairs effected to meet safety requirements of the U.S. Coast Guard are not remissible under 19 U.S.C. 1466(d)(1) in the absence of proof that such repairs were necessitated by stress of weather or other casualty. Accordingly, remission of duty on the cost of repairs to the radars, gyro compass and radio aerial is denied.

JAN 4 - 1985

REFER TO
VES-3-12 CO:R:CD:C
107122 ESA

107122

[redacted]

Dear [redacted]

This is in reference to your letter dated October 2, 1984, requesting information concerning the use of vessels in the transportation of sludge to an ocean dumping cite approved by the Environmental Protection Agency 106 miles from New York. Specifically you inquire as to any restrictions that would apply to such vessel, such as, where it was built, its manning and its flag.

Generally, title 46, United States Code section 883, provides, in pertinent part, that no merchandise shall be transported between points in the United States embraced within the coastwise laws, either directly or via a foreign port, or for any part of that transportation, in any vessel other than a vessel built in and documented under the laws of the United States. The restriction of the coastwise trade to an American flag vessel as provided in section 883 only applies if the material transported is "merchandise" and the "merchandise" is transported between points in the United States.

A point in the United States includes the territorial waters 3 nautical miles wide, adjacent to the coast of the United States and seaward of the territorial sea baseline, charts of which are maintained by the U.S. Coast Guard and are available for inspection in accordance with 33 C.F.R. 1.10-5(b).

If material is transported from one point to another within the territorial jurisdiction of the United States and dumped for the sole purpose of disposing of it, material will not be considered "merchandise" and its transportation will not be considered coastwise trade. If the material is transported from one point to another within the territorial jurisdiction of the United States for a purpose other than just disposing of it, such as for land fill, the material will be considered "merchandise" and its transportation will be deemed coastwise trade.

G8

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

107122

Thus, if the sludge is to be dumped beyond the territorial limits, or if transported only for disposal, the coastwise restriction set forth is section 883 cited above will not apply.

Sincerely,

Kathryn C. Peterson

APR 18 1985

REFER TO
VES-3/VES-10-02
CO:R:CD:C 107283 PH

107283

[redacted]

Dear [redacted]

Your letter of November 30, 1984, concerns your intended operation of wood barges on the inland waters of Puget Sound to build rock bulkheads. You state that one barge would be used as a crane barge and two other barges would be used to move rocks to private beaches where the barges would be beached. The rocks would be placed on the beach to prevent erosion. You ask if this construction work constitutes coastwise trade requiring documented barges.

Title 46, United States Code, section 883 (46 U.S.C. 883), provides, in part, that no merchandise shall be transported between points in the United States embraced within the coastwise laws, either directly or via a foreign port, or for any part of the transportation, in any vessel other than a vessel built in and documented under the laws of the United States and owned by persons who are citizens of the United States. The Customs Service has consistently held that this statute applies to movements of merchandise between points in United States territorial waters, including points within a harbor or lake. Customs has ruled that "merchandise," for purposes of 46 U.S.C. 883, includes anything of value, including refuse and other articles used to create an island or jetty or to otherwise create additional land area.

Accordingly, transportation of the rocks between the point of their recovery in Puget Sound and the point where they are beached would be considered coastwise transportation of merchandise within the purview of 46 U.S.C. 883 requiring coastwise-qualified vessels.

If the crane barge does not transport the rocks and only moves them by operation of the crane on the barge, it will not be considered to be engaged in coatwise transportation and will not need to be documented. However, under 46 U.S.C. 292, (the dredging statute) it will be required to be built in the United States. We are enclosing a copy of our ruling VES-3-12

Myron H. Nordquist, Esq.
Herrick & Smith
1800 Massachusetts Avenue, NW.
Washington, D.C. 20036

Dear Mr. Nordquist:

Your letter of March 4, 1985, concerning the applicability of the coastwise laws to an ocean incineration vessel, was forwarded to this office by the United States Coast Guard for direct reply. In your letter, you ask if a foreign-built, United States-flag ocean incineration vessel that went from a United States port to the high seas and back to the same United States port would violate the Jones Act.

Title 46, United States Code, section 883 (46 U.S.C. 883, often called the Jones Act), was amended by section 502 of the Fisheries Amendments of 1982 (96 Stat. 1949, 1954-1955) by the addition of a provision that:

> For purposes of this section, after December 31, 1983, or after such time as an appropriate vessel has been constructed and documented as a vessel of the United States, the transportation of hazardous waste, as defined in section 6903(5) of title 42, from a point in the United States for the purpose of the incineration at sea of that waste shall be deemed to be transportation by water of merchandise between points in the United States ....

In response to your letter, we are enclosing a copy of our ruling VES-3-15-CO:R:CD:C 106545 PH, January 20, 1984, which is still in effect and which interprets this provision.

Sincerely,

Kathryn C. Peterson

SEP 3 - 1985

CO:R:CD 107579 EBG

Mr. Peter J. Luciano
Executive Director
Transportation Institute
923 Fifteenth Street, NW.
Washington, D.C. 20005

Dear Mr. Luciano:

Reference is made to your issue of CURRENTS for August 1985. In the article entitled "Outer Continental Shelf," the statement is made that "The Customs Service has frequently favored the use of foreign-flag vessels when called upon to make a ruling."

I am very surprised that your publication would include the above-quoted statement. It is simply not true.

I have worked as closely as I can with representatives of the Transportation Institute for many years. I had assumed that you were well aware of the countless times we have [illegible] rulings the use of foreign-flag vessels in various operations. It is totally incorrect to say that we have "frequently favored" the use of foreign-flag vessels. What we do is apply the navigation laws enacted by the Congress. Where Congress has provided that a certain use of a foreign-flag vessel is against the law, we have always ruled that the proposed use is prohibited.

With regard to the applicability of the Jones Act (46 USC 883) to drilling rigs and other installations and devices on the Outer Continental Shelf, we are guided by section 4(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1333(a)(1)). Under that law, we have prohibited the use of foreign-flag vessels on numerous occasions and for many years (our first published ruling was Treasury Decision 54281(1), dated January 9, 1957). When in December 1984 we were asked to determine whether the Jones Act applied to a foreign-flag warehouse vessel simply anchored to the Shelf, we concluded that such a vessel could not be said to be covered by the language of section 4(a) of the Outer Continental Shelf Lands Act, which reads in part "all installations and other devices permanently or temporarily attached to the seabed, which may be erected thereon for the purpose of ...." There is no statutory definition or legislative history to indicate that the words "which may be erected thereon" could apply to a vessel simply anchored to the shelf. However, as stated in your article, we did state that we would welcome Congressional clarification on the issue. After the Congress informed us that the above-quoted statutory words were meant to apply to an anchored vessel when it is

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

G13

being used to supply drilling rigs on the Shelf, we determined that the Jones Act did apply to such an anchored vessel.

I hope this clarification of our position will be helpful.

Sincerely,

(Signed) Edward B. Gable, Jr.

DEPARTMENT OF THE TREASURY
U.S. CUSTOMS SERVICE
WASHINGTON

JUL 11 1985

REFER TO
VES-3
CO:R:CD:C 107723 PH

[redacted]

In your letter of June 14, 1985, you request a ruling on the applicability of the coastwise laws to certain transportation of liquified petroleum gas (LPG). The LPG will be transported by a foreign-flag vessel from one United States port to another United States port where it will be transshipped to a second vessel for transportation to and delivery at its ultimate foreign destination.

You contend that the first part of this movement, even though it is between two points in the United States, would not violate the Jones Act because it would be part of a continuous voyage with an intended destination outside the United States. You enclose a copy of a legal opinion prepared by your attorneys supporting this position.

Title 46, United States Code, section 883, (46 U.S.C. 883), often called the Jones Act, provides, in part, that no merchandise shall be transported between points in the United States embraced within the coastwise laws, either directly or via a foreign port, or for any part of the transportation, in any vessel other than a vessel built in and documented under the laws of the United States and owned by persons who are citizens of the United States. In interpreting this provision, Customs has consistently held that transportation of merchandise between two points in the United States by vessel (i.e., the loading of the merchandise at one point in the United States and the transportation to and unloading or transshipment of the merchandise at another point in the United States) is coastwise transportation subject to the provisions of 46 U.S.C. 883, even if the merchandise is to be transported foreign from the second United States point (see, e.g., Customs Service Decision (C.S.D.) 84-2, copy enclosed).

In C.S.D. 84-2, we thoroughly considered this issue. We ruled that the transportation by foreign-flag vessel of coal from a port in the United States to a point in territorial waters where the coal was transshipped to another vessel for transportation foreign was coastwise trade. Our position has not changed.

A3

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Therefore, the first leg of the movement you propose (i.e., the transportation by foreign-flag vessel of the LPG from one United States port to another United States port for transshipment to another vessel for transportation foreign) is coastwise trade and would be prohibited.

We note that the cases and court rulings referred to in your attorney's legal opinion concern the transportation between United States points via a foreign or non-coastwise point. Because 46 U.S.C. 883 specifically applies to such transortation (i.e., "either directly or via a foreign port, or for any part of the transportation"), the continuity of the voyage is, of course, not broken by the mere transshipment at a foreign port.

Sincerely,

Kathryn C. Peterson
Chief
Carrier Rulings Branch

SEP 18 1985

[redacted]

Dear [redacted]

With your letter July 10, 1985, you enclosed a copy of your proposed itinerary for the foreign-flag cruise vessel [redacted] during the 1986 Alaska season. You request confirmation that the itinerary complies with the coastwise laws.

On the northbound portion of the itinerary, the vessel would depart from Vancouver, British Columbia, cruise Misty Fjords, call at Ketchikan, Juneau, and Skagway, Alaska, cruise Yakutat, Columbia Glacier, and College Fjord, and disembark passengers at Whittier, Alaska. On the southbound portion of the itinerary, the vessel would depart from Whittier, cruise College Fjord, Columbia Glacier and Yakutat, call at Skagway, Juneau, and Ketchikan, cruise Misty Fjords, and disembark passengers at Vancouver. We assume that passengers would only join the northbound portion of the itinerary at Vancouver and that passengers originally embarking at any Alaskan port would only disembark (i.e., permanently leave the vessel) at Vancouver.

This itinerary will not violate the coastwise passenger statute (46 U.S.C. 289), as interpreted under the newly amended Customs Regulations issued thereunder (19 CFR 4.80a) (see Treasury Decision 85-109, published in the Federal Register on July 1, 1985 (50 FR 26981)).

Sincerely,

(Signed) Kathryn C. Peterson

The Regional Commissioner of Customs
Houston, Texas 77061

Dear Sir:

I have your letters of January 15, and February 14, 1969, transmitting a petition and supporting documents from [redacted] their attorneys, filed under section 4.14(k), Customs Regulations. The petition requests review of your decision of January 8, 1968, which denied an application claiming relief under section 258, title 19, United States Code, in connection with foreign repairs declared on vessel repair entry V-835, dated July 18, 1967, relating to the [redacted]

The petitioner claims that at 5 P.M. on January 24, 1967, a tube failure in the atmospheric condenser led to flooding and heavy salt contamination in the main plant. Tank flooding was noted, the system stopped and repairs and decontamination steps were then undertaken. Twenty-two hours later, at 3 P.M. on January 25, the boilers were fired and steam leaks were noted. Boiler use was discontinued and further repairs were undertaken, following which steam was again raised. Immediately thereafter a blown tube again forced a shutdown of the plant. In short, a series of repairs while the vessel lay at anchor at Aruba and during several hours after she was underway finally resulted in her being towed into Curacao for repairs. The American Bureau of Shipping surveyor's report stated that the [redacted] was inspected while at anchor off Curacao and was found to require steam line and equipment repairs as well as electrical equipment repairs, basically resultant from salt contamination.

Past experience of the Bureau has demonstrated that boiler repairs are not uncommon occurrences. Generally, work of this description is regarded as maintenance in nature as distinguished from repairs which are attributable to stress of weather or other casualty within the meaning of section 258, title 19, United States Code. While it is recognized that the damage may have been a serious and extraordinary event, as stated in the petition dated May 21, 1968, we nevertheless remain unconvinced by the evidence presented that the repairs are not traceable to

TREASURY DEPARTMENT

BUREAU OF CUSTOMS

WASHINGTON

CIRCULAR: VES-5-MA
JUL-9-1964

199566

To: All Principal Customs Field Officers

Subject: VESSELS; Exemptions from making entry

References: Section 441(4), Tariff Act of 1930, as amended; Section 4.3, Customs Regulations; and Bureau Circular VES-5-MA, September 13, 1963.

1. PURPOSE

This is to inform you of a recent ruling which permits the landing of a crewmember's immediate family from a vessel which arrives at a port for the purpose of lading bunkers, sea stores, or ship's stores, without causing the vessel to lose the exemption from entry which it may otherwise qualify for under section 441(4) of the tariff act.

2. BACKGROUND

The Bureau has been advised that some foreign countries permit the families of crewmembers to accompany the crewmembers on voyages for certain periods without the payment of passenger fare. In some instances, when the vessels call at United States ports for the purposes allowed under section 441(4), the families have expressed their desire to disembark.

A "passenger," for the purposes of the entry and clearance requirements, is defined in section 4.50(b) of the Customs Regulations as any person carried on a vessel who is not connected with the operation of such vessel, its navigation, ownership, or business. Further, the Bureau has held that a crewmember's immediate family, accompanying him aboard the vessel without the payment of fare, will not be considered passengers. Consequently, under the circumstances these persons may go ashore in the United States without causing the vessel to lose any exemption from entry which it may otherwise qualify for under section 441(4).

3. ACTION

A vessel which arrives at a port in any collection district, whether in distress or for the purpose of lading bunkers, sea stores, or ship's stores only, will not lose the exemption to which it is otherwise entitled under the provisions of section 441(4), Tariff Act of 1930, merely because a crewmember's immediate family, accompanying the crewmember aboard the vessel without the payment of fare, is landed.

Mr. Fred R. Boyett
Regional Commissioner of Customs
New York, New York 10004

Dear Mr. Boyett:

T. D. 56549-T, authorizing the allowance of drawback on (1) white nylon staple fibers, (2) white acrylic staple fibers, and (3) white polyester staple fibers; all the foregoing either crimped or uncrimped and cut to variable specified lengths manufactured under the provisions of section 1313(b), title 19, United States Code, by Star Fibers, Inc., Cohoes, New York, at its Ridgefield, South Carolina, factory with the use of (1) white nylon thread waste, (2) white acrylic thread waste, white acrylic clip waste, and cut white acrylic thread waste, and (3) white polyester waste, white polyester clip waste, and cut white polyester thread waste, is hereby amended to cover such articles manufactured by the said company at its above factory with the use of white nylon feeder yarn or tow, drawn or undrawn; white polyester feeder yarn or tow, drawn or undrawn; and white acrylic tow, drawn or undrawn.

There is enclosed, approved, a copy of the manufacturer's supplemental drawback statement subscribed to on November 16, 1972 (page 2 amended December 11, 1972), requesting the foregoing action and containing the manufacturer's proposals as to the procedures it will follow and the records it will keep. Such records shall include those prescribed in section 22.5(a)(1) through (6) of the Customs Regulations.

The quantity of imported white nylon feeder yarn or tow; white polyester feeder yarn or tow; and white acrylic tow, or of such merchandise manufactured under drawback regulations, of the required kind and quality, which may be designated as the basis for the allowance of drawback hereunder, shall not exceed a quantity of each class of merchandise, respectively, equivalent to the quantity of such merchandise of the same kind and quality as that designated which was used in the manufacture of the exported articles, as shown by an abstract of the manufacturing records which shall be filed with the drawback entry.

A10

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

200403

Drawback may be allowed hereunder, upon compliance with the law and regulations, on the articles covered hereby which are manufactured on and after September 1, 1972, and exported on and after September 7, 1972. Exportation shall be made within 3 years after importation of the imported merchandise.

There are enclosed an extra copy of the manufacturer's drawback statement and of this authorization, which may be furnished with the first drawback claim filed hereunder to the special agent in charge pursuant to section 22.4(g) of the Customs Manual.

Sincerely yours,

J. P. [redacted]

Dear [redacted] . T.D. 74-149-C

You are hereby authorized to allow drawback upon compliance with the provisions of section 1313(b), title 19, United States Code, and Part 22 of the Customs Regulations, on zinc alloy slabs manufactured by Keeler Brass Company, Grand Rapids, Michigan, at its factories located at Grand Rapids, Lake Odessa and Cedar Springs, Michigan, with the use of zinc ingots, and on automotive and furniture parts manufactured under the provisions of section 1313(b) by the said company at its above factories with the use of zinc alloy slabs.

There are enclosed, approved, copies of the manufacturer's drawback statements subscribed to on February 12 and 26, 1974, requesting the foregoing action and containing the manufacturer's proposals as to the procedure it will follow and the records it will keep. Such records shall include those prescribed in section 22.5(a)(1) through (6) of the Customs Regulations.

There is also enclosed a letter dated January 23, 1974, from Keeler Brass Company of Canada, Grand Rapids, Michigan, in which it transfers its drawback rights to Keeler Brass Company.

The quantity of imported zinc ingots, or of such merchandise manufactured under drawback regulations, of the required kind and quality, which may be designated as the basis for the allowance of drawback hereunder, shall not exceed a quantity thereof equivalent to the quantity of such merchandise of the same kind and quality as that designated which appears in the zinc alloy slabs, as shown by the schedule on page 2 of the manufacturer's drawback statement of February 12, 1974.

The quantity of zinc alloy slabs manufactured under drawback regulations, of the required kind and quality, which may be designated as the basis for the allowance of drawback hereunder, shall not exceed a quantity thereof equivalent to the quantity of such merchandise of the same kind and quality as that designated which appears in the exported articles, as shown by an abstract of the manufacturing records which shall be filed with the drawback entry.

DEPARTMENT OF CUSTOMS CORRESPONDENCE APPROVAL AND CLEARANCE Form 100 (5-72)

201017

OCT 7 1976

MAR-1-03 R:CD:D LO
206865

[redacted]

Dear [redacted]

This is in reply to your letter dated June 22, 1976, regarding a proposed bonded warehousing operation.

You state that you are presently involved in the following duty-free operations:

1. Operating a duty-free tobacco and liquor shop at John F. Kennedy International Airport in New York for passengers flying overseas.

2. Supplying United Nations, Embassies, and Consulates for personnel entitled to Diplomatic privileges, bonded tobacco and liquor products for their personal use.

3. Supplying steamships and airlines with bonded tobacco and liquor for vessel supply.

4. Exporting to various countries.

You state you are presently expanding your product line to include gourmet food products. One of the most asked for items is liqueur and wine-filled candies. It is your understanding that this product may not be imported for consumption in the United States. However, you are of the opinion that it may be imported and stored in a bonded warehouse for exportation. Therefore, you are requesting a ruling pertaining to this product and the manner in which it may be withdrawn from warehouse in conjunction with your various operations.

In this regard, importations of food products into the United States are subject to the requirements of the Federal Food, Drug, and Cosmetics Act (21 U.S. Code 301, et seq.). Confectionery containing any alcohol other than less than one-half of one percent by volume of alcohol derived from flavoring extracts is, within the meaning of section 342 of the act (21 USC 342(d)(2)),

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

A14

[redacted]

adulterated food. As such, liquor-filled candies may not be imported into the United States (21 USC 381 (a)).

The U.S. Customs Service has been informed by a representative of the Food and Drug Administration that the importation of liqueur or wine-filled candies into the United States under any of the commercial operations described by you would be prohibited pursuant to the Federal Drug and Cosmetic Act, regardless of the fact that consumption would not occur within the United States. Though the character of the operation may affect the duty status of imported merchandise, it would not serve to make an otherwise illegal importation legal.

Consequently, as the articles you seek to import are prohibited, they could not be entered into a Customs bonded warehouse because title 19, United States Code, section 1557(a) only authorizes the entry of merchandise "subject to duty" into a Customs bonded warehouse. Accordingly, your request is denied.

Sincerely yours,

J. P. Tebeau

[redacted]

Reference: Your letter of April 11, 1978, concerning [redacted]

Dea[redacted]

A DC-10 aircraft owned and operated by [redacted] a British corporation, enters the United States in international traffic. The plane then proceeds to the [redacted] factory for maintenance and repair work lasting in excess of two weeks. You ask legal decisions on two issues:

(a) Is a temporary importation under bond (TIB) entry necessary or may the work be performed with the plane remaining in international traffic?

(b) If TIB entry is necessary, may the TIB bond be cancelled in such manner that the plane may depart the United States in international traffic?

The first issue presented is whether or not an aircraft which is entered into the United States for the purposes of undergoing major repairs and modifications is subject to treatment as imported merchandise, for which appropriate Customs entry must be made. In this regard section 6.2(d)(1) of the Customs Regulations provides in relevant part as follows:

> Aircraft are subject to Customs entry when brought in for repairs or when otherwise treated as imported articles.

That a TIB is not required in those instances where temporary repairs, or repairs involving stays of short duration, are effected to an aircraft, is based upon the Customs view that the aircraft has not actually been withdrawn from international traffic. Not being withdrawn from international traffic, such aircraft will not be considered to have been imported within the meaning of section 6.2(d)(1) of the Customs Regulations. There is no doubt that aircraft not ordinarily used as instruments of international traffic would be considered imported merchandise no matter how short the intended stay in the United States for the purposes of being repaired. It is Customs view that withdrawal of aircraft from regular service for considerable periods of time is not in consonance with the customary exceptions from the application of Customs laws that the Secretary of the Treasury is authorized to grant pursuant to 19 U.S.C. 1322(a).

103288/209262

B2

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

[redacted]

We therefore hold that Customs practice of requiring TIB's for aircraft ordinarily used as instruments of international traffic but which are withdrawn from such traffic is proper, and is in fact required by section 6.2(d)(1) of the Customs Regulations.

We come now to the second issue. Section 113.55(a) of the Customs Regulations defines exportation as "a severance of goods from the mass of things belonging to this country with the intention of uniting them to the mass of things belonging to some foreign country." This means that to export its plane Laker must sever it from the mass of things of this country and intend to unite it to the mass of things belonging to Britain.

The job which the DC-10 performs for Laker is to fly in international traffic. It is not therefore possible to unite it with the mass of things in Britain by keeping it confined to the British Isles. In its regular course of duty the plane perhaps spends as much time in the United States as in Britain. To determine to what country a plane in international traffic is united we do not look to see where it is parked but rather to the flag it flies and the registration it carries.

The definition of exportation makes it clear that intent is vital for exportation. Laker must intend to sever its plane from the United States and unite it to Britain. The question is how does Laker manifest this intent.

In practice this will mean that after maintenance and repair work on a plane is completed, the plane's captain will offer Customs the opportunity to inspect his plane with its British flag and its British registration. He will state to Customs that he is ready to assume command of the plane which will reenter international traffic under the British flag. Thereupon the plane is exported for TIB purposes and Customs will cancel the TIB bond.

This ruling revokes Treasury Decisions 54619(4), 54619(6), 54644(4) as well as the two underlying letter rulings dated June 16, and July 3, 1958, on which these Treasury Decisions were based.

Sincerely yours,

Leonard Lehman

103288/209262

05 JUL 1984

DRA-1-CO:R:CD:D
217098 R

217098

[redacted]

Dear [redacted]

We have reviewed your request for reconsideration on our decision (215973) of June 10, 1983.

Classification for tariff purposes is not determinative of same kind and quality. There are two different statutes involved: 19 U.S.C. 1202 and 19 U.S.C. 1313. Further, the request for internal advice is not a ruling. Internal Advice 64-77 dealt solely with the issue whether the steel coated with zincromet would qualify for treatment under item 806.30, TSUS.

As you point out in your letter of October 21, 1983, the Drawing Quality Aluminum Killed Steel is not interchangeable with the other steels except in the sense that a purchaser generally will accept a better quality product in satisfaction of an order for one of inferior quality. Interchangeable connotes mutual substitution.

Accordingly, we adhere to the positions expressed in our letter of June 10, 1983.

Sincerely,

George C. Steuart

Reference: Decision on Application for Further Review of Protests No. 3201-4-000041, 3201-4-000044, and 3201-4-000051

Dear Sir:

The above captioned protests and applications for further review were filed against rate advances imposed on various lots of jet fuel manufactured in a foreign trade zone (FTZ) from privileged foreign (PF) crude oil and subsequently mixed with imported finished jet fuel.

ISSUE:

The issue raised is whether the mixing of imported finished jet fuel, dutiable at a rate of 1.25 cents per gallon, with jet fuel manufactured from PF crude oil in a FTZ and dutiable at a rate of 0.25 cents per gallon results in a loss of their respective identities and imposition of duty based on the hightest rate applicable to the mixed components.

FACTS:

Finished foreign jet fuel was admitted to a FTZ with the status of PF. The tanker cargo tanks were gauged prior to discharge into shore tanks in the FTZ containing jet fuel manufactured in the FTZ. The shore tanks were gauged prior to receipt of finished foreign jet fuel discharged from the tanker. After the finished foreign jet fuel was discharged into the shore tanks, the shore tanks were again gauged and compared with the initial gauges of the tanker and shore tanks to determine any gain or loss resulting from the mixture of the two jet fuels. Both the imported foreign jet fuel and the jet fuel manufactured in the FTZ from PF status crude oil are said to be assigned zone lot control numbers and identified and tracked through storage and eventual shipment from the FTZ by the zone lot inventory control system.

Zone lot control numbers assigned to crude oil used to manufacture jet fuel in the FTZ and zone lot control numbers for finished foreign jet fuel admitted to the FTZ are shown respectively, on CF 7502 and CF 214, and recorded on CF 5215.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B5

Transfers from the FTZ are said by the Protestant to be done on a first-in, first-out (FIFO) basis without regard to zone status and intended use, i.e., the oldest zone lot is transferred first even though it may mean transferral of a finished foreign jet fuel zone lot for a domestic delivery despite the availability of finished domestic jet fuel which may be in a newer zone lot. Recording of the transferral is made on CF 5215 until all of the product in a given zone lot is used. Of course, a specific product may be exhausted before the entire lot is used. Transfers are also recorded and duty-paid using CF 7505.

Mixing of finished foreign jet fuel and jet fuel manufactured in the FTZ is done because tankage is not sufficient to maintain the finished foreign jet fuel separately from jet fuel manufactured in the FTZ and also to blend jet fuels having different specifications to result in a jet fuel mixture meeting the requirements of the customer.

Protestant contends that that portion of the jet fuel transferred from the FTZ to Customs territory for consumption that was produced in the FTZ from PF crude oil is dutiable at the rate of 0.25 cents per gallon (the crude rate) since PF status once attained cannot be abandoned.

The opposing contention is that General Headnote 7(a), Tariff Schedules of the United States (TSUS), applies and that contrary to their assertion the mixing was done by the Protestant without known volumes resulting in a mixture in which the components lost their identity. The law then requires assessment of duty based on the highest rate applicable to the mixed compoents. Further, it is contended that the Protestant did not comply with the provisions of General Headnote 7(b), TSUS.

Finally, two of the protests note that assessments for additional duty were made on October 31 and December 1, 1983, before and after the existence of ZL A-2043, and on December 1, 1983, after ZL A-2032 was closed.

LAW AND ANALYSIS:

General Headnote 7(a) (19 U.S.C. 1202), provides that:

> Whenever articles subject to different rates of duty are so packed together or mingled that the quantity or value of each class of articles cannot be readily ascertained by Customs officers (without physical segregation of the shipment or the contents of any entire package thereof), by one or more of the following means:

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B6

218442

(i) sampling,

(ii) verification of packing lists of other documents filed at the time of entry, or

(iii) evidence showing performance of commercial settlement tests generally accepted in the trade and filed in such time and manner as may be prescribed by regulations of the Secretary of the Treasury.

the commingled articles shall be subject to the highest rate of duty applicable to any part thereof unless the consignee or his agent segregates the articles pursuant to subdivision (b) hereof.

Privileged foreign merchandise in a FTZ is merchandise that, pursuant to 19 U.S.C. 81c and 19 CFR 146.41, has been classified and appraised and had duties and taxes determined as of the date application for privileged status is filed. Once attained, a status of privileged foreign cannot be abandoned (19 CFR 146.41(e)).

C.S.D. 82-152 authorized the mixing of known volumes of jet fuel with the retention of the zone status of the components of the mixture when the proportions of the components in the mixture have been determined by independent volume measurements prior to their being mixed. Subsequently, by letter dated April 11, 1983 (215284) the authorization was extended to motor gasoline, diesel fuel, and residual fuel oil. By letter dated December 14, 1984 (217575), to the District Director, Honolulu, it was pointed out that the intent of C.S.D. 82-152 was that measurements of the components of a mixture be made in a rational and consistent manner and not that any specific order or procedure be followed.

In our view the components of the mixtures the subject of these protests were measured in a rational and consistent manner and their transfers from storage for export or consumption were documented in a manner sufficient for the components to maintain their identity.

Using the documents in protests 3201-4-000041 and 3201-4-000044, the sequence is as follows:

1. On October 9, 1983, a shipment of 17,837,241 gallons of crude oil was imported and admitted to the FTZ in PF status as zone lot (ZL) A-2032. Between October 9 and October 24, 1983, there was

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B7

218442

produced from this crude oil 2,998,532 gallons of jet A-1 fuel. This jet A-1 was placed in a storage tank, still identified as ZL A-2032.

2. On October 9, 1983, a shipment of 11,389,764 gallons of crude oil was imported and admitted to the FTZ in PF status as ZL A-2023. Between October 9 and October 24, 1983, there was produced from this crude oil 2,092,616 gallons of jet A-1 fuel. This jet A-1 was placed in a storage tank, still identified as ZL A-2033.

3. On November 11, 1983, a shipment of 7,835,568 gallons of finished jet A-1 was imported and admitted to the FTZ in PF staus as ZL A-2043. It was placed in the same storage tank as the 5,091,148 gallons of jet A-1 of ZL A-2032 and ZL A-2033.

4. The Protestant states that prior to discharge of the finished jet A-1 from the tanker, both the tanker and the shore storage tank (containing ZL A-2032 and ZL A-2033, jet A-1) were gauged and that after receipt of the cargo the shore tank was again gauged. There were, therefore, measurements of the components of the mixture both before and after mixing. There is no controversy over the quantity admitted, entered for consumption, or exported, only over the applicable rate of duty on the quantity entered for consumption.

5. It is known that a total of 12,926,716 gallons of jet A-1 were placed in the storage tank between October 9, 1983 and November 11, 1983, composed of ZL A-2032 (2,998,532), ZL A-2033 (2,092, 616), and ZL A-2043 (7,835,568). On the basis of the submitted Customs Forms 5215 and 7505 the transfers from the 3 ZLs were as follows ("Ex" means exported):

Permit date 1983	A-2032 Lot open 10/9	A-2033 Lot open 10/9	A-2043 Lot open 11/11
10/31		44,973

11/22		49,172	
11/24	186,010 Ex	316,695 Ex	
11/25		134,199	
11/27			1,275,244 Ex
12/1	262,064	42,820	
	2,998,532	2,092,616	7,835,568

Out of ZL A-2032, 2,546,978 gallons were exported and 451,554 gallons were entered for consumption. Out of ZL A-2033, 1,395,405 gallons were exported and 697,211 were entered for consumption. All of ZL A-2043 was exported. ZL A-2032 and ZL A-2033 (which were composed of products in addition to jet A-1) were closed on December 8, 1983; ZL A-2043 was closed on December 1, 1983.

Because the jet fuels comprising ZL A-2033 and ZL A-2043 were in the same tank, they were mixed and could not be physically separated. However, this fact alone does not mandate application of General Headnote 7, TSUS. In Amoco Oil Co. v. U.S., CIT 1984 (Slip Op. 84-6), 584 F. Supp. 581 (1984), the Court stated:

> Futhermore, a reading of General Headnote 7 establishes that its application is limited to two conditions: (1) that the articles involved be subject to different rates of duty; and (2) that the quantity or value of those articles cannot be ascertained.
>
> * * *
>
> Where the quantity and value of the merchandise, as well as the rate or duty, have been determined, it is unncessary to reach beyond the pertinent statutory provisions and apply General Headnote 7(a).

U.S. Industrial Chemicals, Inc. v. U.S., C.D. 1458 (1952), involved a quantity of molasses imported in bulk from the Dominican Republic and Cuba. The molasses from the two countries, which was dutiable at different rates, was mixed together in the tanks of the importing vessel and was unladen in a mixed condition. The highest rate of duty was applied against the entire shipment under section 508, Tariff Act of 1930 (the predecessor of General Headnote 7, TSUS).

After a thorough discussion of the facts the Court stated:

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

218442

> It goes without saying that the two different portions of the cargo of molasses in controversy herein could not have been physically separated after being commingled. The law does not exact the impossible and neither does it demand a quality of proof beyond peradventure of doubt ... [B]ut here we have documentary evidence of the number of pounds of molasses laden on board ship in the Dominican Republic and also that laden on board ship in Cuba.

218442

The Court went on to hold that the portion of molasses imported from Cuba could be readily ascertained by the Customs officers by utilizing the documents available and that assessment of the higher rate of duty on the entire cargo was not justified.

General Headnote 7(a) is not applicable here. The quantity of jet A-1 and its source has been determined by documentary evidence. For example, in protest 3201-4-000044, the documents submitted for ZL A-2033 indicate 697,211 gallons of jet A-1 were entered for consumption; although it is contended that the jet A-1 has lost its identity the rate advance (from 0.25 cents per gallon to 1.25 cents per gallon) is $6,972.11 or 697,211 x 1.00 cents suggesting there is no disagreement as to quantity. We are satisfied that ZL A-2032 contained 2,998,532 gallons of jet A-1 manufactured from PF crude oil; that ZL A-2033 contained 2,998,532 of jet A-1 manufactured from PF crude oil; and the ZL A-2043 was composed of 7,835,568 gallons of foreign finished PF jet A-1.

However, the Protestant in its description of the blending operation states that "Withdrawals from the zone are done on a FIFO basis without regard to status and intended use. That is, the oldest zone lot is withdrawn first even though it may mean withdrawal of a finished foreign jet fuel zone lot for a domestic delivery despite the availability of domestic product which may be in a newer zone lot."

FIFO accounting was authorized for FTZs by C.S.D. 81-62. That decision held that the significant date for FIFO is the date of admission into the zone. ZL A-2032 was opened on October 9, 1983; ZL A-2033 was opened on October 9, 1983 (but on the basis of the lot number, after ZL A-2032); and ZL A-2043 was opened on November 11, 1983.

Following straight FIFO, and on the basis of the documents submitted with protests 3201-4-000041 and 44, the sequence should have been as follows:

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B10

	A-2032	A-2033	A-2043
Total A-1	2,998,532	2,092,616	7,835,568
Permit date

11/16		105,399	
11/16		1,089,251 Ex	322,279 Ex
11/17			3,733,459 Ex
11/19			98,291
11/19			1,415,335 Ex
11/22			49,172
11/24			186,010 Ex
11/24			316,695
11/25			134,199
11/27			1,275,244 Ex
12/1			262,064
12/1			42,820

The jet A-1 component of lots A-2032 and A-2033 was exhausted on November 11 and November 16, respectively; lot A-2043 was exhausted and closed on December 1. Accordingly, 563,219 gallons of jet A-1 (234,463 gallons from A-2032 and 327,756 gallons from A-2033) manufactured from PF crude oil were entered for consumption and are dutiable at a rate of 0.25 cents per gallon; 903,241 gallons of finished imported jet A-1 were entered for consumption and are dutiable at a rate of 1.25 cents per gallon.

It is noted that three transfers occurred on November 16; the order of the transfer for consumption and the transfers for exportation is not apparent from the documents submitted. The results will change if the transfer for exportation occurred before the transfer for consumption. If records of Customs or the Protestant do not establish to your satisfaction the chronological order of the transfer for consumption and the transfers for exportation, the order of transfer will be deemed to be that which results in the maximum collection of revenue. That is, transfers for consumption on that day will be deemed to be from the imported finished jet A-1, to the extent available, and transfers for exportation on that day will be deemed to be from the jet A-1 manufactured from PF crude oil, to the extent available.

B11

THIS DOCUMENT MAY BE RELEASED TO The PUBLIC ____

218442

In view of our interpretation of the sequence under straight FIFO, Protestant's comments relating to assessments for additional duty made on October 31 and December 1, 1983, with respect to ZL A-2043, and on December 1, 1983, with respect to ZL A-2032, are not relevant.

Protest 3201-4-000051 involves similar facts but different ZLs, namely A-2046 and A-2055. ZL A-2046 included jet A-1 manufactured from PF crude; ZL A-2055 was composed of finished foreign jet A-1. ZL A-2046 was opened on November 14, 1983, but no transfers of jet A-1 occurred before December 6, 1983; ZL A-2055 was opened on December 8, 1983. The jet A-1 component of ZL A-2046 was 1,943,215 gallons; ZL A-2055 was composed of 5,450,205 gallons. On straight FIFO the sequence of transfers should have been as follows:

	A-2046	A-2055
Total A-1	1,943,215	5,450,205
Permit date		
12/6	361,172	
12/8	1,278,508 Ex	
12/8	7,895	
12/16	292,962 Ex	
12/16	2,678 Ex	
12/16		803,612
12/22		2,464,340 Ex
12/30		754,253 Ex
1/2		800,339 Ex
1/3		627,661 Ex

The jet A-1 component of ZL A-2046 was exhausted on December 16. ZL A-2055 was exhausted and closed on January 3. Accordingly, 369,067 gallons of jet A-1 manufactured from PF crude oil in ZL A-2046 were entered for consumption and are dutiable at a rate of 0.25 cents per gallon; 803,612 gallons of finished imported jet A-1 in ZL A-2055 were entered for consumption and are dutiable at a rate of 1.25 cents per gallon.

It is noted that three transfers occurred on December 16; the order of the transfer for consumption and the transfers for exportation is not apparent from the documents submitted. The results will change if the transfer for consumption occurred before the transfers for exportation. If records of Customs or the Protestant do not establish to your satisfaction the chronological order of the transfer for consumption and the transfers for exportation, the order of transfer will be deemed to be that which results in the maximum collection of revenue. That is, transfers for consumption on that

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

B12

218442

day will be deemed to be from the imported finished jet A-1, to the extent available, and transfers for exportation on that day will be deemed to be from the jet A-1 manufactured from PF crude oil, to the extent available.

The Protestant also notes that while in the past it has used a straight FIFO accounting system in making entry of petroleum products it reserves the right to use a selective FIFO system, citing letter ruling 216658, also published as C.S.D. 84-42 and Legal Determination 84-0073.

If by a selective FIFO system Protestant means that it intends to identify transfers for consumption on a FIFO basis to jet A-1 manufactured in the zone and to identify transfers for exportation on a FIFO basis to imported finished jet A-1, such action is precluded by the ruling cited. When foreign merchandise is imported and mixed with fungible merchandise produced in a zone, transfers may not be accomplished at the discretion of the person making the transfers.

Inventory accounting in such circumstances may be effected using either FIFO as approved in C.S.D. 81-62, or "foreign-first" as approved by C.S.D. 83-30. In addition, Customs will entertain other proposals, which, like the foregoing, account for transfers in a fixed, definite order or sequence. A system in which the person making the transfers would account for the merchandise at its discretion is arbitrary in the context of the Foreign-Trade Zones Act and is not acceptable as a method of inventory identification thereunder.

Holding:

The mixing of imported finished jet fuel (jet A-1) with PF status in a FTZ with finished jet fuel (jet A-1) manufactured in the FTZ from imported crude oil with PF status does not result in a loss of their respective identities where the quantities of each component can be readily ascertained by utilization of the documents available.

On the basis of the foregoing, we are of the opinion that the quantities of jet A-1 manufactured in the FTZ from PF crude oil and dutiable at the rate of 0.25 cents per gallons in each of the protests was readily ascertainable from the quantities of imported finished jet A-1 with which it was mixed, and which was dutiable at the rate of 1.25 cents per gallon, from the documents available.

It is our further opinion that a straight FIFO system of accounting for transfers, as authorized by C.S.D. 81-62, was not observed.

B13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

218442

Therefore, the protests are allowed to the extent that, consistent with the foregoing, recalculation of the duty due on jet A-1 entered for consumption in each of the protests shows collection of any excess duties. The protests are denied to the extent that such recalculation shows that there has been no collection of excess duties.

Sincerely,

Edward B. Gable, Jr.
Director, Carriers, Drawback
and Bonds Division

DEPARTMENT OF THE TREASURY
U.S. CUSTOMS SERVICE
WASHINGTON, D.C. 20229

16 MAY 1986

REFER TO

BON-1-CO:R:CD:D
218637 WR

ISSUES:

1. When is the final determination made on the admissibility of imported merchandise with respect to the Customs bond obligations on redelivery, destruction, exportation, or any other performance that might be required to comply with the laws governing admission into the United States?

2. What is the time limit in section 113.62(d) of the Customs Regulations for the Customs Service to demand redelivery of merchandise?

FACTS:

No facts were presented.

LAW AND ANALYSIS:

Apparently some confusion exists with respect to the proper Customs officer to decide questions with respect to bond matters. This should not be the case since Congress required all Agencies to publish a list of the Agency employees from whom, and the methods whereby, the public may obtain information, make submittals or requests, or obtain decision. 5 U.S.C. 552(a)(1)(A). Pursuant to that legislative requirement, the Commissioner of Customs published Customs Delegation Order No. 1 (Revision 1) as T.D. 69-126 (34 F.R. 8208). Under that order, as amended by T.D. 72-321 (37 F.R. 25060), the Director, Carriers, Drawback and Bonds Division, was made responsible for decisions relating to legal questions on bonds. It seems obvious that an interpretation of the language in a customs bond is best characterized as a decision relating to a legal question on a bond.

In the past some laws expressly provided that the issue of admissibility of merchandise was to be decided within a specific time interval from the date of entry. An example of this procedure was illustrated in the case of V.G. Nahrgang v. U.S., T.D. 47134 (Cust. Ct., 1934). In that case the court discussed the law and regulations of the Food and Drugs Act of June 30, 1906, as amended, as they related to the importation of food. Under

C1.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

section 11 of that Act, the Secretary of the Treasury was required to deliver samples of imported foods and drugs to the Secretary of Agriculture on the latter's request and to notify the importer of that delivery. The importer had a statutory right to appear before the Secretary of Agriculture to give testimony on the issue of admissibility before a decision to exclude was made. The section went on to provide that after the hearing, if the Secretary of Agriculture determined the food to be adulterated or falsely labeled, the Secretary was to refuse admission and notify the importer of that refusal. At that point the Secretary of the Treasury was to act to destroy any of the merchandise which was not exported by the importer.

The regulations promulgated under section 11 of the Act required Customs to show the Food and Drug Administration (FDA) all invoices on the imported food or drugs as soon as the importer made entry. The FDA officer was required either to stamp the invoices "no sample desired" or to request samples. On the same day that samples were requested, Customs was required to notify the importer that samples were to be taken and that the rest of the shipment was to be held intact pending notice of the result of the inspection and analysis. If no violation was disclosed by the inspection and analysis, the FDA officer was required to notify the importer of that fact in writing, with a copy to Customs. If the FDA officer tentatively determined that the shipment was in violation, a notice of the violation was to be sent to the importer to enable the importer to present evidence in opposition. One day after the hearing, if there is a finding of a violation, or if the importer failed to respond, the importer was to be notified of the refusal to admit.

It can be seen that within a definite time period shortly after entry, the importer and its surety knew whether the bond condition with respect to admissibility was satisfied.

The situation is less clear when the legal basis for the prohibition does not specify a definite time for the final determination of inadmissibility to the importer. A review of the relevant statutes suggests that the final determination on admissibility must occur before the entry is liquidated.

The first import exclusion law, the Act of June 26, 1848, C. 70, 9 Stat. 237, required all drugs, medicines, medicinal preparations, and chemical preparations used as medicine to be examined and appraised in reference to their quality, purity, and fitness for medical purposes before being released from

218637

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

C2

Customs custody. Under section 3 of that Act, the examiner was required to notify the importer of any adulteration or unfitness. Under section 4, the importer had a right to call for a reexamination to show that the examiner's return was erroneous. If there was no request for reexamination or if the report of the reexamination supported the examiner's finding, that decision to exclude became final.

The Act of June 26, 1848 was codified into Rev. Stat., sects. 2933-2937. An illustration of this law's operation is in T.D. 18223 (Bd. Gen. App. 1897). Article 325 of the Customs Regulations of 1857 required the appraiser to make a special report to the collector if the appraiser found any article in the package that was prohibited by law from entry. Article 349 of those Regulations provided that if no appeal was taken by the importer the appraisement was final and conclusive. See also Articles 1241 and 1249 of the Customs Regulations of 1899.

218637

The change from that law to the current law had its genesis in a report to Congress by the Tariff Commission which suggested certain changes to the Customs administrative laws. Report of the U.S. Tariff Commission Upon the Revision of the Customs Administrative Laws (1918). At pages 116 through 119, the Commission suggested a proposed section 102 to replace the provisions in Rev. Stat. sections 2912, 2914, 2915, 2916, 2933, 2935, 2936, 2937, 2938, 2939, and 2942. The pertinent portion of suggested section 102 provided:

> No imported merchandise required by law or regulations made in pursuance thereof to be inspected, examined, or appraised, shall be delivered from Customs custody, except as otherwise provided in this act, until the same has been inspected, examined or appraised and is reported by the appraiser to have been truly and correctly invoiced and found to comply with the requirements of the statutes of the United States.

Suggested section 103 proposed to make the decision of the appraiser final on all parties unless a written appeal for reappraisement was made within 30 days by the collector or within 10 days after notice by the importer. All appeals were to be sent to the Board of General Appraisers for a hearing. The proposed section provided for further judicial proceedings. No action having been taken on the 1918 report, the procedure was brought

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

C3

again to the attention of Congress during the 1921 tariff hearings. Hearings on General Tariff Revision before the Committee on Ways and Means, 66th Cong. 4163-4181 (February 15, 1921).

The language suggested by the Tariff Commission was set forth as section 507 of H.R. 7456, 67th Cong. 1st Sess. The Senate and House conferees on the bill made various clerical changes, including renumbering the section from 505 to 499. Conference Report, H. Rept. 1223, 67th Cong., 2d Sess., 52, 53 (1922) and Conference Report, H. Rept. 1207, 67th Cong., 2d Sess., 155 (1922). As section 499, the relevant text of H.R. 7456, 67th Cong., 2d Sess. provided:

> Sec. 499. Examination of Merchandise. Imported merchandise required by law or regulations made in pursuance thereof to be inspected, examined, or appraised, shall not be delivered from Customs custody, except as otherwise provided in this Act, until it has been inspected, examined, or appraised and is reported by the appraiser to have been truly and correctly invoiced and found to comply with the requirements of the law of the United States.

That language was enacted in law as section 499 of the Tariff Act of 1922 (Act of September 21, 1922, 42 Stat. 965). The language was repeated as section 499 of the Tariff Act of 1930 (Act of June 17, 1930, 46 Stat. 728). The Customs Administrative Act of 1938 (Act of June 25, 1938, 52 Stat. 1084) struck out the words "except as otherwise provided in this Act" and substituted the words "except under such bond or other security as may be prescribed by the Secretary of the Treasury to assure compliance with all applicable laws, regulations, and instructions which the Secretary of the Treasury or the Customs Service is authorized to enforce." The change in language was initiated by the Customs Service and was explained by Mr. Clinton M. Hester, Assistant General Counsel, Treasury Department, at the Hearings before the Committee on Ways and Means on H.R. 6738, 75th Cong., 1st Sess., 39, 85, and 86 (May 24, 1937):

> In the 1922 Tariff Act there was a provision, section 486, which authorized the immediate release from Customs custody of the portions of shipments not required for examination.

THIS 'UMENT MAY BE RELEASED TO THE
PUB

c4

218637

In the 1930 Act this special provision was repealed.

The purpose of this proposed amendment is to reinstate that special provision of the act of 1922, and thus provide expressly for requiring a bond to assure compliance with all laws and regulations applicable to the goods released before examination of the retained packages.

An analysis of the proposed Customs Administration Bill that appears to have been prepared by the Customs Service more completely explained the change in the following manner:

Section 13. Section 499 of the Tariff Act of 1930 (U.S.C. 1934 ed., title 19, sec. 1499) prohibits the release of any merchandise required to be inspected, examined, or appraised until it has been inspected, examined, or appraised "except as otherwise provided in this Act." The phrase "except as otherwise provided in this Act" has reference to section 633 of the Act (U.S.C. 1934 od., title 19, sec. 1623). Section 436 of the Tariff Act of 1922 (42 Stat. 962) which was repealed by the Act of 1930, specifically authorized the release of imported merchandise under bond conditioned upon compliance with all laws and regulations applicable to the importation of merchandise. Section 623 of the Act of 1930, which was intended to supersede section 436 of the Act of 1922, authorizes the Secretary, among other things, to exact such bonds as he may deem necessary under certain conditions, but this authority is limited by its terms to bonds for the protection of revenue and to assure compliance with the customs laws and regulations. In view of this limitation the Secretary's authority in some cases to release merchandise under bond when no customs question is involved is questionable.

It is thereof believed to be desirable that the Secretary have express statutory

218637

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

cs

> authority to release merchandise not required for inspection, examination, or appraisement upon the filing of a bond to assure compliance with all laws and regulations governing the admission of the merchandise into the commerce of the United States. The proposed amendment is designed to accomplish this purpose.

The language was incorporated into section 13 of H.R. 8099, 75th Cong., 1st Sess. H. Rept. 1429, 75th Cong., 1st Sess., 1, 4 (1937). Section 13 of that bill was redesignated as section 14 but the language was not changed. S. Rept. 1465, 75th Cong., 3d Sess., 9 (1938) and H.R. 8099, 75th Cong., 3d Sess.

Under Treasury Department Order No. 165-17, T.D. 56464 (1965), the office of appraiser of merchandise was abolished. Section 301 of the Customs Courts Act of 1970 (Act of June 2, 1970, Pub. L. 91-271, 84 Stat. 289) in recognition of that change, amended section 499 of the Tariff Act of 1930, as amended, by changing the word "appraiser" to "appropriate Customs officer." The statutory change was viewed as implementing the authority granted to the Secretary of the Treasury under Reorganization Plans No. 1 and No. 26 to delegate performance and responsibility for any of the functions within the Customs Service. H. Rept. 91-1067, 91st Cong., (1970), reprinted in 1970 U.S. Code Congressional and Administrative News 3188, 3210 and 3218. Clearly, the change made to section 499 of the 1930 Tariff Act by the Customs Court Act of 1970 was not a change in the scope of the appraisement function. 1970 U.S. Code Congressional and Administrative News 3211.

The language of section 499 makes the determination of admissibility a part of the appraisement function. The Customs Regulations show that the issue of admissibility was to be settled as part of the appraisement function.

Article 453 of the Customs Regulations of 1884 required the appraiser to report the existence of any merchandise in an importation that was prohibited from entry. The same requirement was set by article 833 of the 1890 Customs Regulations, article 1249 of the 1899 Customs Regulations, article 867 of the 1908 Customs Regulations, article 583 of the 1915 Customs Regulations, article 701 of the 1923 Customs Regulations, article 774(d) of the 1931 Customs Regulations, article 772(d) of the 1937 Customs Regulations, and 19 CFR 12.4 (1938 ed.) (2 F.R.

218637

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

c6

1446ff). In the Customs Regulations of 1943 (8 F.R. 8099 ff), section 8.22 provided for the designation of merchandise to be examined pursuant to section 499, Tariff Act of 1930, as amended. As noted above, that statute required merchandise to be inspected, examined, or appraised, and reported by the appraiser to have been found to comply with the requirements of the laws of the United States.

Until the Customs Court Act of 1970, an importer had the ability to challenge the appraiser's findings before liquidation and unless the appraisement was held to be valid, any liquidation based on an invalid appraisement was itself held to be null and void. James S. Kean v. U.S., 20 CCPA 388, T.D. 46186 (1932), Pistorino and Co., Inc. v. U.S. 2 Cust. Ct. 222, CD 127 (1939), reh. den. 2 Cust. Ct. 684 (1939) New York Merchandise Co. v. U.S., 15 Cust. Ct. 72, CD 945 (1947). The case of U.S. v. A.N. Deringer, Inc., 66 CCPA 50, CAD 1220 (1979) shows that appraisement must proceed liquidation and include a decision on admissibility even after the changes made by the 1970 Act. In that case food was imported from Canada which required labels under the food and drug laws. In one of the entries, the importer was notified of the labeling nonconformity and of the detention to await a hearing. The importer did not appear at the hearing and a formal notice of refusal was issued. Customs, on one of the entries involved in the case, liquidated the entry before the formal notice of refusal was issued. The Court found the liquidation to be premature. 66 CCPA 50 at 55. However, the importer failed to protest the liquidation timely. The court held that the failure to protest timely meant that the importer's complaint against the illegal liquidation was properly dismissed on the ground of lack of jurisdiction. 66 CCPA 50 at 56. It seems obvious from the discussion that the court did not believe that an entry could be liquidated legally until after a decision was made on the admissibility of the merchandise in the entry. The case is particularly enlightening because it involved an entry that was made after the Customs Courts Act of 1970 was enacted which had eliminated the separate appraisement challenge procedure in the interest of streamling administrative and judicial review of protests. The stated purpose of that Act was to develop a single, continuous procedure for deciding all issues in any entry of merchandise and not to change the scope of the appraisement function. H. Rept. 91-267, 91st Cong. (1970) reprinted in 1970 U.S. Code Congressional and Administrative News 3194, 3196, 3210, and 3211. It is equally clear that Congress recognized that a final appraisement had been a condition precedent to a legal liquidation, and the change simply

218637

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

c1

did away with the interlocutory right to contest the appraisement before the liquidation. 1970 U.S. Code Congressional and Administrative News 3210.

Another illustration of the principle that the decision on admissibility was part of the appraisement function is in the case of U.S. v. W. X. Huber, 41 CCPA 69, CAD 531 (1953). Article 315 of the Customs Regulations of 1937, which applied to the entry, provided that if the collector determined from the appraiser's report or otherwise that an importation of merchandise was not entitled to admission into United States commerce, the collector was to promptly demand return of the merchandise. The Article also provided that all demands for redelivery were to be made within 20 days after the appraiser's report. The bond given by the importer repeated those provisions. Two shipments of merchandise were entered; one shipment was entered on June 19, 1940, and the other shipment was entered on August 13, 1940. On July 9, 1940, and August 21, 1940, the appraiser notified the collector that appraisement was being withheld because of a value investigation. The Government argued that the appraiser's report referred to in the regulations and the bond was the report of the appraiser when he completed his appraisement of the merchandise. The importer argued that the earlier tentative report of the appraiser was the report which started the running of the 20-day period for Customs to demand redelivery. The lower court, in W. X. Huber v. U.S., 29 Cust. Ct. 92, CD 1451 (1952), agreed with the importer and the United States appealed. The appellate court reversed, holding that only a final report of the appraiser had any legal significance. See 41 CCPA 69 at pages 72 and 73. It is clear that the final decision with respect to the appraisement function included the final decision on admissibility and that decision had to be made before there could be a valid, legal liquidation.

From 1848, when Congress enacted the Act of June 26, 1848, which expressly provided that drugs, medicines, and related articles were, before leaving the Custom-house, to be examined and appraised, as well in reference to their quality, purity, and fitness for medical purposes, as to their value and identity specified in their invoice, to the present enactment of 19 U.S.C. 1499 which requires all imported merchandise to be inspected, examined or appraised, and found to comply with the requirements of the laws of the United States, it is clear that Congress intended the determination of admissibility to take place as a part of appraisement and to be done before liquidation. In short it seems obvious that the word "appraise" meant

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C8

218637

to judge and analyze the worth, significance or status of the imported merchandise rather than in the narrow sense of determining only the worth of the imported goods. Websters Third New International Dictionary (unabridged), G and C Merriam Company, 1968.

The next point is the binding effect of a liquidation if the Customs Service discovers after the expiration of the time for protest that the merchandise should not have been allowed admission into J.S. commerce. Assuming there is no fact which would support a finding of probable cause to suspect fraud in the entry which would trigger 19 U.S.C. 1521 and that no protest was filed on any ground so as to justify a reliquidation, the plain words of the statute, 19 U.S.C. 1514, would bind the Government to the liquidation.

The court cases offer further confirmation that a mistake in the liquidation process can be corrected only by one of the statutory methods set forth in 19 U.S.C. 1514. Consequently, once the protest period expires without a protest being filed, the courts will not consider the legality of the liquidation. A good example of the judicial position on this point is the case of John S. Phipps v. U.S., 22 CCPA 595, T.D. 47601 (1935). In that case, an importer entered on June 21, 1930, a necklace valued at $29,100. While at the appraiser's stores, the necklace was manipulated by removing the precious stones. Duty was assessed for the separated precious stones and mountings at $2,116 on August 28, 1930. On that same date the duty was paid. Although the court did not find any liquidation stamp on the entry documents, the court did find that the entry papers were stamped as paid. The court found that the entry apparently was liquidated on August 28, 1930, although it noted that the entry papers contained a liquidation stamp dated July 27, 1931, and for purposes of the decision it treated that date as the liquidation date. 22 CCPA 595 at 597. The court found that the Customs Service reappraised the entry on September 29, 1930, and on September 30, 1930, made a demand on the importer for $818 as additional duty based on the ground that the appraiser had no authority to permit the manipulation of the necklace under 19 U.S.C. 1562 while it was in the appraiser's stores. When the importer refused to pay the additional duty that was demanded, the then Acting Commissioner of Customs entered the dispute. On February 28, 1933, that official directed the collector to cancel the liquidation of the entry and send a notice of appraisement to the importer. The lower court held that the so-called second appraisement, the purported cancellation of the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

218637

liquidation, and the last notice of appraisement were null and void because no action was taken by the Government within the then existing 60-day period on expiration of which the liquidation became final even though that liquidation may have been based on an illegal act. 22 CCPA 595 at 601. The appellate court affirmed the lower court quoting 19 U.S.C. 1514 and stating:

> We confess our astonishment at the action of the Acting Commissioner of Customs in February, 1933, directing the collector at New York to cancel his liquidation of July 27, 1931, and ordering the collector to issue the notice of appraisement here involved, dated May 8, 1933. This order of the Acting Commissioner of Customs was clearly in violation of law.

At page 602 of the decision, the court said:

> ... the liquidation of July 27, 1931, had become final and was not open to question after the expiration of 60 days from the date thereof. (emphasis supplied)

To the same effect was an earlier decision of the court in Gallagher and Asher v. U.S., 21 CCPA 313, T.D. 46832 (1933). In that case a notice of appraisement, which was required to be sent to the importer to make the appraisement final, was not sent. The Customs Service liquidated the entry without sending that statutorily required notice. However, the importer failed to protest the liquidation within the protest period. The Government contended that the failure to protest timely even on the liquidation's legality barred further inquiry into that liquidation. The trial and appellate courts agreed with the Government.

In the case of McKesson Wholesale Drug Co. v. U.S., T.D. 46955 (Cust. Ct. 1934) the facts involved a reliquidation after the time period on the original liquidation expired. However, the concept of finality remains the same. On the original liquidation the collector assessed a certain amount as duty. The then existing 60-day protest period expired without any protest being filed. Thereafter, the collector reliquidated the entry at a higher rate of duty and demanded the excess from the importer. The importer contended that once the protest period

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

C10

218637

expired, the collector was without authority to open the entry. The court agreed. Other cases that reach this same conclusion are Gulbenkian v. U.S., 186 F. 133, 135, T.D. 31732 (2nd Cir. 1911); U.S. v. Mexican International R. Co., 151 F. 545, 547, T.D. 28182 (5th Cir. 1907), and cases cited therein; Hambro Automotive Corp. v. U.S. 66 CCPA 113, 117, CAD 1231 (1979); Saji and Kariya Co. et al. v. U.S., 9 Ct. Cust. Apps 78, 82-84, T.D. T.D. 37945 (1919), and Alberta Gas Chemicals, Inc. v. U.S., 515 F. Supp 780, 785, 1 CIT 312 (1981). In this latter case the court considered the general rule governing the effect of time periods. If it expressly required an Agency to act within a time period and specified a consequence for a failure to act, it was considered to be mandatory. It seems clear that the statutory scheme set up under 19 U.S.C. 1514 is precisely that type of statutory time limit. A failure to demand redelivery or a failure to exclude prior to liquidation would bind the Government to those failures once the liquidations became final.

In other cases, the question of admissibility turned on the classification of the imported articles. In each of these cases, the courts held that because admissibility had to be determined before liquidation, an importer had the right to protest twice: at the time the decision to exclude was made and at the time the entry was liquidated. U.S. v. A. N. Deringer, Inc., 66 CCPA 50, CAD 1220 (1979); Schenley Distillers, Inc. v. U.S., 65 Cust. Ct. 651, 653, CD 4152 (1970); Border Brokerage Co. v. U.S., 43 Cust. Ct. 226, 230, CD 2131 (1959) rev'd. on other grounds 48 CCPA 10, CAD 754 (1960); A. N. Deringer, Inc. v. U.S., 37 Cust. Ct. 166, 168, CD 1818 (1956), and Alberta Gas Chemicals, Inc. v. U.S. 84 Cust. Ct. 217, 225, C.R.D. 80-1 (1980). These cases simply would not support a view that admissibility could be decided after the entry was liquidated. The question of admissibility is subsumed within the liquidation.

A corollary issue is the effect of the change made by Act of October 3, 1978, Pub. L. 95-410, 92 Stat. 902, to 19 U.S.C. 1504. Under 19 U.S.C. 1504, an entry shall be deemed liquidated within 1 year from the date of entry unless a proper extension is made. The statute requires notice of suspension to be given to the importer and the importer's surety. This provision has been considered by the Court of International Trade. In the case of Pagoda Trading Co. v. U.S., CIT Slip. Op. 85-87 (August 27, 1985) (Appeal docketed) the court held that because the Government failed to give proper notice the entry was liquidated by operation of law. The Government contended that there was actual notice which rendered the failure to give formal

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C11

218637

notice harmless. Regardless of the outcome of that case, it seems obvious that a liquidation by operation of law under 19 U.S.C. 1504 will become final unless timely protested. That is, it will be binding on all parties once the protest period expires unless 19 U.S.C. 1521 comes into play.

The final point is the effect of 19 U.S.C. 1521 on a liquidation that becomes final by operation of 19 U.S.C. 1514. That is, should the liquidation be treated as tentative until the 2-year period under 19 U.S.C. 1521 expires since there is always a possibility that a Customs officer may have probable cause to suspect fraud in an entry and thereby reliquidate that entry? In C.S.D. 80-138, the Customs Service held that liquidation of an entry constituted waiver of a demand for the production of a missing document. The decision also held that bond liability ended when the 2-year period of 19 U.S.C. 1521 ended. An argument might be made that because the bond obligation could be asserted within that 2-year period, a reliquidation under 19 U.S.C. 1521 was not needed in order to assert a demand for redelivery after the liquidation. In short, that analysis would treat the liquidation as something less than final. The courts have taken a different view. In the case of Bertrose Co. v. U.S., 12 Ct. Cust. Appls. 19, T.D. 39893 (1923) the court held that a reliquidation under section 21 of the Act of June 22, 1874 (18 Stat. 190), a predecessor of 19 U.S.C. 1521, was an abandonment of all prior liquidations. As an abandonment, the court in effect would treat those prior liquidations as never having been made. There had to be a reliquidation and that reliquidation had to be based on an allegation of fraud. Unless those two criteria were met, the liquidation was final. See also U.S. v. Parkhurst and Co. et. al., 12 Ct. Cust. Appls. 370, T.D. 40522 (1924) with regard to the finality of a liquidation on the Government and the effect of a reliquidation. The court in McKesson Wholesale Drug Co. v. U.S., T.D. 46955 (Cust. Ct. 1934) considered the effect of section 521 of the Tariff Act of 1922, the immediate predecessor of 19 U.S.C. 1521. In that case the court held that in order to disregard the finality of a decision made under 19 U.S.C. 1514, there had to be a reliquidation and that reliquidation had to be based on the ground of fraud. In the case of John S. Phipps v. U.S., 22 CCPA 595, 602 T.D. 47601 (1935), the court held that 19 U.S.C. 1521 does not hold a liquidated entry "open"; the court decided that the statute applies only if the entry is reliquidated because the collector finds probable cause to believe there is fraud in the case. Where there is no charge of fraud and no evidence of fraud, the statute does not apply. The case

218637

C12

of Sweet Briar, Inc. v. U.S., 73 Cust. Ct. 93, CD 4558 (1974) holds that there must be a finding of probable cause to believe fraud exists and that the court will examine the basis of that finding. In Guy B. Barham Co., etc. v. U.S., 35 CCPA 138, CAD 385 (1947), the collector attempted to reliquidate an entry of tobacco four months after the original liquidation because the collector was unaware, at the time of liquidation, that the entry exceeded the relevant quota for tobacco. The court ruled at page 140 that a stipulation that "no fraud was disclosed or has ever been suspected" rendered 19 U.S.C. 1521 inapplicable. The court held that the attempted reliquidation was void ab initio. See also A. N. Deringer, Inc. v. U.S., 59 Cust. Ct. 148, CD 3101 (1967), which held that there is no presumption of correctness to a reliquidation under 19 U.S.C. 1521 and that the Government must show the existence of probable cause to suspect fraud in order for the reliquidation to be valid. The concept that a valid reliquidation renders the original liquidation void can be seen in the cases of U.S. v. New Drinks, Ltd, 14 Ct. Cust. Appls. 16, T.D. 41530 (1926) and Miyako Hotel Co. v. U.S., Abs. 29188 (Cust. Ct. 1934). In both cases, the importers protested the original liquidation and those protests were accepted by the Customs Service. In both cases the reliquidations went beyond the matter protested and the importers protested the reliquidations. The importers argued that the Customs Service was limited to the matters protested in the original liquidations. The courts disagreed with those arguments. The courts ruled that a protest suspends the statute of limitations and that any matter involving the same merchandise may be considered in the reliquidation. In short, it is as though the original liquidations did not exist for the Government or the importer. See also U.S. v. Pensterer, 12 Ct. Cust. Appls. 410, 413, T.D. 40586 (1924) which held that an importer who did not protest the original liquidation could protest a reliquidation because a reliquidation is regarded as an abandonment of all prior liquidations.

To summarize, the decision as to whether an article is admissible must be made before liquidation of the entry in which the article was imported. After liquidation upon expiration of the protest period further consideration of the matter is barred unless there is a valid reliquidation under 19 U.S.C. 1521 or other law. The mere possibility of a reliquidation under 19 U.S.C. 1521 or any other law does not have any effect on the finality of a liquidation. Once the protest period expires, the liquidation binds all parties, and it is too late to consider

218637

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

the issue of admissibility under the Customs laws even if there is evidence to show that the merchandise should not have been admitted.

The second issue concerns the interpretation of the sentence "It is understood that any demand for redelivery will be made no later than 30 days after the date that the merchandise was released or 30 days after the end of the conditional release period (whichever is later)" in section 113.62(d) of the Customs Regulations. This provision is part of the bond obligations of an importer and the importer's surety.

Section 151.113(f) of the Customs Regulations provides that a demand for redelivery shall not be made after the liquidation of the entry becomes final. Section 141.0a of the Customs Regulations provides that unless the context requires otherwise or a different definition is prescribed the following terms shall have the meanings indicated when used in connection with the entry of merchandise. Paragraph(i) of section 141.0a states that released conditionally means any release from Customs Custody before liquidation.

218637

In view of the above discussion on the finality of liquidation, the provision of 19 CFR 141.113(f), that a Customs officer shall not demand redelivery of any merchandise in an entry on which liquidation has become final, is an acknowledgement that issues with respect to an entry on which there has been a finalized liquidation simply are not within the power of the Customs Service to act upon, absent facts to show fraud in the entry. The language in 19 CFR 141.0a(i) does not purport to affect the meaning of bond language which is set forth in another Part of the Customs Regulations. In any event, the provision in 19 CFR 141.0a(i) merely states a general truism; that is liquidation of an entry, when that liquidation becomes final, closes all issues on that entry, absent fraud, for the Government and the importer.

If the bond language read "It is understood that any demand for redelivery will be made no later than 30 days after the date that the merchandise was released" there could be no doubt as to the extent of the period for the Customs Service to demand redelivery. Is it possible that the term "conditional release period" in the additional phrase "or 30 days after the end of the conditional release period" refers to the liquidation? If the provisions in 19 CFR 141.0a(i) and 141.113(d) were intended to control the last phrase of the bond language in issue, the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

C14

terms "end of the conditional release period" can only refer to the liquidation of the entry. Since the bond language contains the parenthetical "whichever is later", such an interpretation would make the entire first clause meaningless because a period that ended 30 days after liquidation would always be subsequent to a period that ended 30 days after release.

Another problem caused by this interpretation is that it expressly allows a redelivery demand to be sent 30 days after the end of the conditional release period, or in other words, after liquidation. A decision on the entry that is made after the liquidation occurs contradicts the concept of finality that is inherent in a liquidation of an entry. There is no legal significance to a tentative liquidation. Either the liquidation embodies a final decision on all aspects of an entry by the appropriate Customs officer against which a protest may be filed or it is not a liquidation within the meaning of 19 U.S.C. 1500 and 1514. See U.S. v. Nils A. Boe, 64 CCPA 11, 17, CAD 1177 (1976); U.S. v. Franklin Sugar Refining Co., 137 F 677, T.D. 26316 (E.D.Pa. 1905); and Wesendonck Lorenz Co. v. U.S., T.D. 18634 (Bd. Gen. App. 1897).

Assuming that a proper interpretation of the bond language would give meaning to both parts of the phrase in issue, the question is whether another time limit exists in the Regulations. An example of such a provision is 19 CFR 12.80(e)(2). Under that provision, unless a district director receives notification of approval from the Administrator, National Highway Traffic Safety Administration, within 180 days after entry, the district director is supposed to demand the redelivery of any vehicle subject to the National Traffic and Motor Vehicle Safety Act of 1966, as amended. The provision was promulgated as T.D. 78-478. With respect to the redelivery issue the stated purpose was to provide more effective administration and enforcement of the law. The Customs officials who submitted comments complained that the possibility of unlimited periods for decisions on admission had led to a backlog of open Customs entries. It is clear that by the use of the word "open" those commenting officials were referring to unliquidated entries. The establishment of a definite deadline in the provision was intended to curb that problem. That is, within a known period of time Customs officers could expect that the vehicle would be eligible for admission or it had to be excluded. Thereafter, the normal processing of the entry would not be subject to any further delay. The needs of the Administrator, National Highway Traffic Safety Administration, in examining the vehicle, the Customs Service in

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

D1

218637

liquidating the entry and collecting any supplemental duties due, if any, and the importer in completing the importation were thought to have been met by the provision.

It seems obvious that the phrase "or 30 days after the end of the conditional release period" was intended to cover those definite dates as set forth in 19 CFR 12.80(e)(2) rather than the date of liquidation, when all conditional releases end. Only by such an interpretation does the first part of the phrase have any possibility of being employed with respect to an entry of merchandise.

Finally, the applicable rules of contract construction support the interpretation that the words "end of the conditional release period" refer to periods such as the 180-day period found in 19 CFR 12.80(e)(2) rather than to liquidation. One rule of construction is that all parts of a contract are to be given effect and an interpretation which gives a reasonable meaning to all provisions is preferred to one which leaves a portion of the contract useless or meaningless. 4 Williston, A Treatise on the Law of Contracts, section 619 (3rd. Ed., 1972) and Stearns, The Law of Suretyship, section 2.4 (5th. Ed. 1951). If the words "the end of the conditional release period" refer to the liquidation of the entry, the first part of that provision, "no later than 30 days after the date that the merchandise was released" becomes useless and meaningless as a limitation. If the words "end of the conditional release period" is interpreted to refer to the 180-day period in 19 CFR 12.80(e)(2) and similar periods, both parts of the bond provision have meaning.

A Customs bond is to be interpreted in accordance with the Customs laws and regulations. 4 Williston, A Treatise on the Law of Contracts, section 625 (3rd. Ed. 1972); U.S. v. De Visser, F. 642, 648 (S.D. N.Y. 1882); U.S. v. Dieckerhoff, 202 U.S. 303, 309-310 (1905); Simmons v. U.S., 120 F. Supp. 641, 646 (M.D. Pa. 1954); and U.S. v. Gissel, 353 F. Supp. 768, T.D. 83-86 (1973), aff'd. 493 F. 2d. 27 (5th. Cir. 1974), cert. den. 419 U.S. 1012. If the Words "the end of the conditional release period" are interpreted to mean liquidation then the statutory scheme for processing an entry of merchandise set by 19 U.S.C. 1499, 1500, and 1514 will be frustrated. The statutory procedure insures that all imported goods will be examined, appraised, classified, duties fixed on them, and the entry which contained those goods liquidated, in that order, and that that liquidation will be a final decision. See H. Rept. 91-267, reprinted in 1970 U.S. Code Congressional and Administrative

218637

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

D2

News 3194, 3196, 3210, and 3211. If any decision to demand redelivery or to exclude merchandise can be made up to 30 days after the so-called liquidation, that liquidation cannot be characterized as a final decision. An interpretation which leads to those results cannot be described as being in accordance with the Customs laws and regulations. On the other hand, an interpretation that the conditional release period refers to a period such as that set forth in 19 CFR 12.80(e)(2) does not conflict with the concept of finality in a liquidation or the concept that appraisement includes a decision on admissibility and becomes part of the liquidation decision and can be viewed as being in accordance with the Customs laws and regulations.

HOLDINGS:

1. Unless a specific prior period is otherwise provided, liquidation of an entry comprises the final determination on the admission of merchandise into the United States.

2. The words "end of the conditional release period" in 19 CFR 113.62(d) refers to time limits such as the 180-day period in 19 CFR 12.80(e)(2) and does not refer to the liquidation of the entry.

Whether C.S.D. 83-96 (Headquarters letter dated June 1, 1983, file FOR-1-CO:R:CD:D 215870) has been effectively overruled by section 146.71 of the revised Customs foreign-trade zone (FTZ) regulations (T.D. 86-16, 52 Fed. Reg. 5040, 5061-5062).

FACTS:

C.S.D. 83-96 (Ruling 215870) basically permits a component, mistakenly included in an entry of merchandise from a foreign-trade zone, to be retained in the zone in privileged domestic status, a separate entry being filed for the particular component actually used in the merchandise removed therefrom.

LAW AND ANALYSIS:

C.S.D. 83-96 relates to merchandise in a zone which is desired to be entered, duty-paid, and thereafter retained in the zone, whereas section 146.71 is actuated by an intent actually to remove merchandise from a zone. There is thus no contradiction between the ruling which is limited in scope, and the regulation.

Furthermore, there is nothing in the regulatory language or the responses to the comments to the revised FTZ regulations indicating an intent to overrule C.S.D. 83-96.

HOLDING:

C.S.D. 83-96 is hereby reaffirmed.

Edward B. Gable

The Collector of Customs

Chicago 7, Ill.

Sir:

You are hereby authorized to allow drawback upon compliance with the provisions of section 313(a), title III, Tariff Act of 1930, and the drawback regulations (Part 22, Customs Regulations of 1943), on cured, sorted, and packed, or cured, sorted, bleached, dyed, and packed Brazil nuts produced by Robert L. Turner Company, Chicago, Ill., with the use of Brazil nuts in the shell imported in bulk.

The producer has filed a sworn statement subscribed to on June 14, 1949, in accordance with the provisions of section 22.4(h), Customs Regulations of 1943, describing the methods which it will follow and the records which it will keep for the purpose of establishing that the articles described therein have been produced with the use of properly identified imported merchandise in accordance with the provisions of section 313(a) of the tariff act and the regulations (sec. 22.4). The producer shall follow the methods described and shall keep the records outlined in this sworn statement, a copy of which is enclosed for your information.

The records shall show, as to each lot of articles produced hereunder for exportation with benefit of drawback, the lot number and the date or inclusive dates of production, the identity of the imported Brazil nuts used, the quantity and description of the Brazil nuts obtained, and the quantity and identity of the imported merchandise appearing in the exported products. A sworn abstract of the production records shall be filed with the drawback entry.

The drawback allowance shall not exceed the duty paid, less 1 per centum thereof, on the quantity of imported Brazil nuts appearing in the exported products, as shown by a sworn abstract of the production records.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Honorable Joseph P. Rostenkowski
Collector of Customs
Chicago, Illinois 60607

Dear Mr. Rostenkowski:

You are hereby authorized to allow drawback upon compliance with the provisions of section 313(b) of the Tariff Act of 1930, as amended, and Part 22 of the Customs Regulations, on pen points and pens manufactured by W. A. Wheaffer Pen Company, Fort Madison, Iowa, with the use of 24kt and 14kt gold bar stock, palladium silver bar stock, and 24kt gold in pellet form.

There are enclosed, approved, copies of the manufacturer's drawback statement subscribed to on September 16, 1960, and its supplemental drawback statement subscribed to on April 13, 1964, requesting the foregoing action and containing the manufacturer's proposals as to procedures it will follow and records it will keep. Such records shall include those prescribed in section 22.5(a)(1) through (6) of the Customs Regulations.

The quantity of imported gold or palladium silver of the required kind and quality, which may be designated as the basis for the allowance of drawback hereunder, shall not exceed a quantity of gold or palladium silver, respectively, equivalent to the quantity of such merchandise of the same kind and quality as that designated, which appears in the exported articles, as shown by the schedule annexed to the supplemental statement of April 13, 1964.

Drawback may be allowed hereunder, upon compliance with the law and regulations, on the articles covered hereby which are manufactured on and after April 6, 1960, and exported on and after June 14, 1960. Exportation shall be made within five years after importation of the imported merchandise.

In accordance with the recommendation of the investigating agent, the first claim for drawback filed under this authorization shall be forwarded to the customs agent in charge, Chicago, Illinois, for verification.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

279480

017.62

279480

APR 1 1955

Dear [redacted]

Reference is made to your letter of March 22, 1955 [redacted] requesting information regarding the dutiable status of certain goods said to be produced in the Virgin Islands as follows:

> "a corporation of the Virgin Islands imports raw materials worth $5.00 from Spain which would be subject to duty in the United States and are subject to duty in the Virgin Islands. Virgin Islands labor to the extent of $10.00 is used to fabricate this material into a product having a market value of $17.50, which product is then exported to the United States. Does the product enter the United States duty free?"

You ask particularly whether the product is excluded from duty-free entry by reason of the fact that the entire material used in making the product was derived from Spain and is a type of material which is dutiable when imported into the United States.

The Bureau, of course, cannot ascertain with certainty from the information disclosed whether the work performed in the Virgin Islands on the foreign materials constitutes a production or manufacture within the meaning of those terms as used in section 301, Tariff Act of 1930, as amended by the Customs Simplification Act of 1954. However, it will assume that a production or manufacture has taken place for purposes of answering the primary question presented.

The test for determining whether a product or manufacture of the Virgin Islands is entitled to duty-free entry into the customs territory of the United States is not dependent upon the quantity of foreign material used in making the product. It is possible for such an article to be made entirely from foreign materials or no foreign materials and yet be entitled to duty-free treatment as a Virgin Island product.

The test for determining the dutiable status of a Virgin Island product is described in section 7.8(d) of the Customs Regulations as follows: "In determining whether an article produced or manufactured in any such insular possession contains foreign materials to the value of more than 50 per centum, a comparison shall be made between the actual purchase price of the foreign materials (excluding any material which at the time such article is entered, or withdrawn

D8

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

from warehouse, for consumption in the United States, may be imported into the United States from a foreign country, other than Cuba or the Philippine Republic, free of duty), plus the cost of transportation to such insular possession (but excluding duties and taxes, if any, assessed by the insular possession and any charges which may accrue after landing), and the final appraised value in the United States determined in accordance with section 402, Tariff Act of 1930, as amended, of the article brought into the United States." A copy of section 402 is enclosed for your convenience.

If the "actual purchase price" of all the foreign materials in question is $5 and the dutiable value of the Virgin Island product is $17.50, the product would be entitled to duty-free entry under the method of determination employed in the preceding paragraph.

Very truly yours,

Customhouse Brokers; Transfer of books and records.

LEGAL DETERMINATION 3532-02

SEP 20 1977

BRO 3-06 R:Z:E
304888 W

District Director of Customs
New Orleans, Louisiana 70130

Dear Sir:

This is in reference to your memorandum of August 16, 1977, requesting a ruling as to whether you have authority to authorize X to transfer their customhouse broker's records from their New Orleans office to their Houston office upon temporarily ceasing operations at the port of New Orleans, which you state was effective as of August 15, 1977. We note that the few minor discrepancies noted during X's last audit in January 1977, were resolved and that there are no outstanding obligations due to the government from X.

As you point out, section 111.23(a), Customs Regulations, requires that those books and papers which the regulations require a broker to keep, other than powers of attorney, must be retained within the Customs district to which they relate for at least six years after the date of entry. We interpret this provision to allow for transfer of X's records to the port of Houston only upon X's actual surrender of its license for District 20, Region 5. Under this interpretation, X will be required to re-apply for a new corporate customhouse broker's license for an additional district, the Customs District of New Orleans, if the firm desires to return to New Orleans at a later date to transact Customs business there.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ——

D13

Furthermore, the records pertaining to New Orleans must actually and in fact be retained by Novo at Houston for the prescribed time set forth in section 111.23(a). Novo will also be required to retain all powers of attorney, revoked powers of attorney and letters of revocation thereof for the time periods specified in section 111.23(a) for those records.

Sincerely yours,

(Signed) Harvey B. Fox

[redacted]

Dear [redacted]

This is in reference to your letter of January 13, 1975, in which you request a ruling concerning the classification, rate of duty, and appraisement of automobiles assembled in a foreign-trade subzone to be established as an adjunct to a foreign-trade zone within the Port of Hampton Roads, Virginia. It is our understanding that both domestic and foreign parts are to be used in the assembly process.

Passenger automobiles are provided for in item 692.10, Tariff Schedules of the United States, with duty at the rate of 3 percent ad valorem.

Parts for passenger automobiles are classifiable under item 692.27 TSUS, with duty at the rate of 4 percent ad valorem unless the part is specifically provided for elsewhere in the Tariff Schedules. Bodies and chassis for passenger automobiles are provided for in item 692.22, TSUS, with duty at the rate of 3 percent ad valorem.

We are enclosing for your information a list containing common automobile parts which are specifically provided for in the Tariff Schedules and which are classifiable elsewhere than under item 692.27, TSUS. It should be noted that this list is advisory only. Questions on the classification of specific articles should be directed to Headquarters, U.S. Customs Service.

When passenger automobiles are assembled in a foreign-trade zone combining privileged domestic components (section 146.22 and 146.24, Customs Regulations), nonprivileged foreign components (section 146.21 and 146.23), and domestic labor, duty will be assessed at a rate applicable to passenger automobiles (section 146.48(e)). In determining dutiable value, the total cost of the labor expended in the zone in combining the components shall be distributed to the privileged domestic and nonprivileged foreign components in accordance with their relative value. The dutiable value of the assembled automobiles

shall equal the sum of the dutiable value of the nonprivileged foreign components prior to manipulation and a proportionate part of the cost of manipulation attributed to the nonprivileged foreign components (T.D. 53493(2), dated February 26, 1954, copy enclosed).

When passenger automobiles are assembled combining privileged domestic components, privileged foreign components, and domestic labor, duty will be assessed at the rates applicable to the foreign components at the time of filing the application for privileged treatment of foreign components (section 146.21(c)(3)(i)). Dutiable value will equal the value of the foreign components at the time of their exportation, without addition for labor performed in the foreign-trade zone (section 146.21(c)(3)(i)).

A copy of Part 146, Customs Regulations, relating to foreign-trade zones, is also enclosed for your information.

Sincerely yours,

(Signed) Salvatore E. Caramagno

E3

MAR 27 1981

CLA-2:RRUCV
542412 BLS
TAA# 20

542412

[redacted]

Dear [redacted]

This is in reference to ruling letter TAA #16, our file No. 542144, dated February 4, 1981, which was addressed to you.

It has been brought to our attention that the second paragraph on page 2 is subject to several interpretations. In order to avoid a multiplicity of interpretations on an important issue at an early date in the application of changes made by the Trade Agreements Act of 1979, we are amending our response to you. Accordingly, please substitute the following, designated TAA #20, for TAA #16. We regret any inconvenience this change may cause you.

In your letter dated May 29, 1980, you asked whether certain costs incurred by your company will be considered dutiable assists under section 402, Tariff Act 1930, as amended by the Trade Agreement Act (TAA) of 1979.

You advise that the merchandise entered through the port of Del Rio, Texas, under item 807.00, Tariff Schedules of the United States (TSUS); that your assembly plant is located in Acuna, Mexico; and that most of the purchasing, receiving inspection, warehousing, production control, design engineering, accounting, and sales functions are located in your corporate headquarters in Illinois.

A number of employees working at the Mexican plant live in the United States, and are paid in U.S. dollars from the corporate headquarters in Illinois. You ask whether the salaries of these people should be added to the transaction price. The positions of the employees are the General Manager, Production Manager, Quality Control Manager, Production Foreman, Production Engineer, Engineer Manager, and New Production Design Engineer.

E4

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

542412

It is apparent from the described facts that the personnel involved are employees of the parent company in the United States. You advise that under the old law, the salary costs were treated as assists and became part of the cost of production of the product assembly in Mexico.

You assume that your merchandise will be appraised on the basis of transaction value. Under transaction value the value of any assist will be added to the price paid or payable for the merchandise.

As "assist" is defined as certain specified items that the buyer of imported merchandise provides directly or indirectly, free of charge or at reduced cost, for use in the production or the sale for exporation to the United States of the imported merchandise. Included among such items are "Engineering, development, art work, design work, and plans and sketches undertaken outside the United States." However, such work will not be treated as an assist if the service or work is (1) performed by a person domiciled within the United States; (2) performed while that person is acting as an employee or agent of the buyer of the imported merchandise; (3) is incidental to other engineering, development, art work, design work, or plans and sketches undertaken within the United States.

We wish to emphasize at this point that if a cost item is not specifically included within the assist definition, it will not be treated as an assist. Thus, unlike its predecessor statutes, the TAA does not permit various costs heretofore known as "assists" to be imputed to the cost of producing imported merchandise. Of course, the question of whether a particular cost item is to be treated as an assist may vary from case to case. However, we can state that the services listed in your inquiry will not be added as an assist cost to the price actually paid or payable.

You also asked whether the cost of "procurement assists" such as purchasing, receiving inspection, warehousing, and transporting component parts from your plant in Illinois to the Mexican facility should be added to the purchase price of such component parts. These parts are purchased in the United States and are either of foreign or United States origin for use in assembling the merchandise in Mexico.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

ES

We assume for these purposes that the components themselves are furnished free of charge or at reduced cost to the Mexican assembler. Under these circumstances, the components are included within the assist definition as "materials, components, parts, and similar items included in the imported merchandise."

In determining the value of an assist, there must be added (1) the cost of acquiring the assist, if acquired by the importer from an unrelated seller; and (2) the cost of transporting the assist to the place of production, including the cost of freight and insurance.

In our opinion, the cost of acquiring an assist is limited to the purchase price if purchased from an unrelated party. Accordingly, the cost of procuring the assist is not to be included in its value. Neither are receiving inspection and warehousing costs. Actual transportation costs are a part of the value of the assist.

Sincerely,

(Signed) Paul G. Giguere

542710

Dear [redacted]

This is in regard to your letter of December 30, 1981, requesting information concerning the dutiability of assists under the Trade Agreements Act of 1979 (TAA), and your telephone conversation of March 29, 1982, with Mr. Dunham of the Value Branch.

Because the questions raised in your letter appear to have been answered in a Headquarters ruling issued to you on February 26, 1982 (542713 MK), we will not address them again here.

For your further reference, the Customs Regulations pertaining to the valuation of merchandise under the TAA are set forth in Part IV, "Customs Valuation Under the Trade Agreements Act of 1979," which you have. In particular, sections 152.102(a), 152.103(d), 152.105(g) and 152.106(d) discuss the dutiability of assists.

Sincerely,

(Signed) Irving W. Smith, Jr.

15 AUG 1983

543125

[redacted]

Dear [redacted]

This refers to your letter of May 14, 1983, forwarded to us from the Area Director, New York Seaport. Your inquiry concerns the dutiable status of adhesive and release paper, manufactured in the United States, shipped to Taiwan, processed, applied to individual vinyl tiles and sent back to the United States. You also ask whether the marking, "The adhesive and release paper are products of the U.S.A., tile is a product of Taiwan," printed in equal size on the release paper is acceptable.

In a telephone conversation with a New York Customs officer you advised that the adhesive is sent to Taiwan in cake form, melted, and then applied to the individual vinyl tiles. The release paper is sent to Taiwan in rolls, cut there to various sizes and then applied to the adhesive on the tiles.

Item 807.00, Tariff Schedules of the United States, provides for an allowance in duties for American components which are returned to the U.S. as parts of articles assembled abroad. However, we conclude that the above-described operations go far beyond a mere assembly, as the adhesive has to be further fabricated (melted), before it can be applied to the individual tiles, and the release paper must be cut to various sizes before being applied to the adhesive on the tiles. Consequently, the articles will be fully dutiable upon importation.

The marking you propose, if printed in equal size, is acceptable. Though the adhesive is transformed it remains adhesive. Similarly, the release paper, though cut to various sizes, remains release paper. In both cases they retain their distinctive name, character and use.

Sincerely,

(Signed) J. T. Ro[illegible]

SUBJECT: Internal Advice Request No. 92-84; Valuation of Assembled Integrated Circuits Imported by [redacted]

This is in response to your memorandum of August 1, 1984, received in this office on August 9, 1984, which forwarded the above-referenced internal advice request initiated by [redacted] representing [redacted]

Two issues are presented for our consideration. The first concerns whether the "price actually paid or payable," as those words are used in section 402(b) of the Tariff Act of 1930, as amended by the Trade Agreements Act of 1979 (TAA), for the imported integrated circuits is properly represented by the invoice price from the foreign assembler, [redacted] to its related firm in the United States [redacted] (hereinafter referred to as "U. S. firm"), or by the invoice price from the U. S. firm to the importer [redacted] the importer is not related to either the assembler or the U. S. firm. The second issue concerns whether the value of certain assists (integrated circuit components furnished free of charge by the importer to the assembler) to be added to the price actually paid or payable for the imported circuits includes the value of rejected, lost or destroyed components.

Counsel for the importer, in a letter of March 22, 1984, to your office, states that prior to late August, 1983, the subject integrated circuits were imported through the San Francisco port of entry but that since that time importations have been through the Denver port of entry. Counsel further states that pursuant to the current arrangement between the parties, the importer forwards component materials directly to the foreign assembler and receives assembled products directly from the assembler. Payment for the assembled products, however, is made by the importer to the U. S. firm pursuant to invoices received by the importer from the U. S. firm.

We understand in regard to the first issue described above that the office of the District Director, San Francisco, takes that position that the price paid or payable is represented by the price from the U. S. firm to the importer. According to a report, dated June 17, 1983, prepared by a San

E9

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Francisco import specialist:

> It has been a long standing practice in San Francisco, based on interviews with importers as well as (the U. S. firm) themselves, to include the mark-up to (the U. S. firm) as dutiable as the non-dutiable elements in the sales price have never been identified or quantified. It is felt that (the foreign assembler) and (the U. S. firm) are essentially the same company with (the U. S. firm) acting as a sales office.

In the opinion of the Denver port of entry, the sale from the U. S. firm to the importer "most directly causes the merchandise to be exported to the United States" and, therefore, this price should be used to establish transaction value, section 402(b) of the TAA.

As you know, section 402(b) defines transaction value as "the price actually paid or payable for the merchandise when sold for exportation to the United States, plus amounts" for certain items not already included in that price (emphasis added). We held in TAA #57 (542928) that:

> ... the transaction to which the phrase 'when sold for exportation to the United States' refers when there are two or more transactions which might give rise to a transaction value, is the transaction which most directly causes the merchandise to be exported to the United States.

That case involved a sale between a United States importer and a middleman located in a foreign country and another sale for the same merchandise between the middleman and a manufacturer located in another foreign country. The merchandise was shipped directly from the manufacturer to the importer. We held that the sale between the middleman and the importer most directly caused the merchandise to be exported to the United States.

Under the circumstances of this case, it is our opinion that the transaction between the foreign assembler and its related United States firm most directly causes the merchandise to be exported from the country of assembly to the United States. Therefore, we believe that the "price actually paid or payable" for the imported integrated circuits is represented by the invoice price between the assembler and the U. S. firm, assuming that the transactions between those two entities are bona fide sales. We should note that there is insufficient information in the record before us to determine whether those sales are bona fide. However, a decision on this issue should be in accord with the holding in J. L. Wood v. United States, 62 CCPA 25, CAD 1139 (1974), which held that, for appraisement purposes, the term "sale" should be given its ordinary meaning; namely, "transfers of property from one party to another for a consideration." The court also held that the fact that the

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

EJD

547307

parties are related will not, of itself, preclude the existence of a sale.

If, as the San Francisco District Director's office contends, the U. S. firm acts merely as the assembler's sales agent in the United States, it appears that transaction value would be represented by the invoice price between the assembler and the U. S. firm plus an amount, pursuant to section 402(b)(1)(B) of the TAA, for the selling commission paid to the U. S. firm. The selling commission would consist of the difference between the assembler's invoice price and the U. S firm's invoice price to the importer. If, however, it is determined that the sales between the assembler and the U. S. firm are bona fide, a determination would then have to be made as to whether the transaction value between those related parties is "acceptable" as that word is used in section 402(b)(2)(B) of the TAA.

In regard to the second issue presented for consideration, it is the opinion of the San Francisco district office that the value of the assists to be added to the price paid or payable for the imported circuits should include the cost or value of all components provided, without charge, to the assembler by the importer, including rejected, lost and destroyed components. The Denver port of entry appears to concur in this view.

This same issue was considered in a ruling, dated April 30, 1984 (543093), issued by this office (copy attached). We held that components which are destroyed, scrapped, or lost, and which are not physically incorporated into the imported articles are not assists under the TAA (see section 402(h)(1)(A)(i) of the TAA). Thus, the value of the component assists to be included in the transaction value of the subject imported integrated circuits is limited to the cost or value of the components which are actually incorporated in the returned imported circuits.

SUBJECT: Appraisement of Frozen Crabmeat; I.A. 75/84

This refers to your memorandum of June 28, 1984 (received from the CIE on August 27), requesting Internal Advice on behalf of Seatech Corp., an importer of frozen crabmeat. The importer purchases Alaska crab frozen in clusters with the shell on, and ships it to an unrelated processor in Korea. There, the crab is removed from the shell, frozen into blocks, and returned to the United States. Approximately three pounds of crab clusters are required to produce one pound of imported crab.

The importer pays the processor $1.18 per pound of crabmeat produced by the processing. The basis of appraisement is transaction value, and there is no dispute as to the inclusion of the processing charge under transaction value. The issue concerns the value of the crab clusters which the importer purchases in the United States. The importer argues, alternatively, for the applicability of item 806.20 or item 807.00, Tariff Schedules of the United States (TSUS), or for an allowance for the discarded crab shells.

As you pointed out, Headquarters Ruling No. 051909 rejected the application of item 806.20, TSUS, to the facts presented. Item 807.00 is inapplicable because the processing abroad does not involve any assembly. We also agree with your position against any allowance for the crab shells.

Please advise the importer of our decision.

SEP 27 1979

District Director of Customs
Mobile, Alabama 36601

Dear Sir:

Your letter of March 27, 1979, forwarded a petition on behalf of [redacted], seeking relief from a penalty of $165,110 equal to the domestic value of merchandise unladen in violation of Section 1433, Title 19, United States Code. The violation was incurred when cargo was unladen from the [redacted] during other than working hours, without a proper customs permit, on Sunday, January 21, 1979.

Petitioner does not deny that the violation occurred but states that they were operating with less than an approved IRS at that time. Furthermore, it is contended that petitioner now has a very capable person responsible for customs work and that this kind of violation will not happen again.

The record shows that neither the vessel nor the illegally unladed cargo, consisting of canned corned beef and bundles of steel pipe, were seized, but the penalty notice advised that the vessel and cargo remained subject to forfeiture. However, it is noted that the same petitioner and same vessel were involved in the same kind of violation in 1977.

After consideration of all factors in the case, and consistent with other cases of this nature, the forfeiture liability and penalty are remitted upon payment of $800. Please notify the petitioner of this decision and furnish a copy of this decision with that notification.

Sincerely,

(Signed) Harvey B. Fox

District Director of Customs
Ogdensburg, New York 13669

Dear Sir:

Your letter of October 9, 1979 (District Case No. 79-0712-00101), forwarded the offer in compromise of counsel on behalf of [redacted]. The offer, in the amount of $53,406, was made to satisfy the forfeiture of a 1977 Lincoln Continental automobile, 82 proof gold coin-like articles known as Canadian Gold Beavers, 10 uncirculated gold coin-like articles known as Canadian Gold Beavers and 22 proof silver coin-like articles known as Canadian Silver Beavers. The coin-like articles were seized under the provisions of title 19, United States Code, section 1460, for violation of title 19, United States Code, section 1459, for failure to manifest merchandise brought into the United States from a contiguous country. The vehicle was seized under the same provisions for transporting the unmanifested merchandise. A penalty in the amount of $47,606, the domestic value of the unmanifested merchandise, also was imposed. Loss of revenue amounts to $7,934.40.

The record indicates that petitioner entered the United States at Champlain, New York, on September 5, 1979. In primary inspection, he claimed that he was employed as a social worker. He also claimed that he had nothing to declare. Inspection of the trunk of his automobile revealed the undeclared coin-like articles. Further, a check of petitioner's background revealed that he is vice-president of [redacted], a firm that exports the coin-like articles to the United States. Petitioner was arrested and charged with a violation of title 18, United States Code, section 545. On October 15, 1979, petitioner pled guilty to this charge.

Pursuant to section 161.5 of the Customs Regulations (19 CFR 161.5), no offer in which a specific sum of money is tendered in compromise of a government claim under the Customs laws will be considered until such sum

F1

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

has been deposited in the name of the person submitting the offer with the Treasurer of the United States or a Federal Reserve bank. No funds have been so deposited, thus the offer in compromise must be rejected.

After review of the file, it is the opinion of this office that a violation clearly occurred. However, the desired deterrent effect would not be diminished by mitigation of the penalty. The forfeiture of all merchandise, including the automobile, is remitted and the penalty is mitigated upon payment of $53,406.

You may notify petitioner of this decision and include a copy of this letter with your notification.

Sincerely,

Donald W. Lewis

District Director of Customs
Seattle, Washington 98714

Dear Sir:

Your memorandum of October 1, 1979 (ENF-4-D:PEH), with attachments, forwarded a request for internal advice as to whether transportation of the spouse of a crewmember between two United States ports by a foreign vessel is a violation of title 46, United States Code, section 289, when no remuneration is involved.

Section 4.50(b), Customs Regulations, defines "passenger" as any person carried on a vessel who is not connected with the operation of such vessel, her navigation, ownership or business. Customs has further ruled that persons connected with the operation, navigation, ownership or business of a vessel, and members of their immediate families traveling with them are not considered passengers within the meaning of the coastwise laws. Accordingly, the transportation of the spouse of a crewmember between two United States ports by a foreign vessel is not a violation of title 46, United States Code, section 289.

Any penalty case established under the facts reported in your transmittal should be canceled forthwith.

Sincerely,

Marilyn G. Morrison

District Director of Customs
Houston, Texas 77002

Dear Sir:

Your memorandum of October 1, 1979 (District Case No. 78-5301-30848), forwarded the petition of [redacted] requesting relief from a penalty assessed against [redacted] in the amount of $770,670 incurred for violation of title 19, United States Code, section 1433, for unlading merchandise without a permit. The penalty amount represents the domestic value of numerous cases of wine, liquor, books, aluminum sheets and foodstuffs, the merchandise so unladen.

The record indicates that the subject merchandise was landed at Houston on October 18, 1978, from the [redacted]. The merchandise was not listed on the manifest thus a permit for its unlading was not procured.

Petitioner states that the merchandise was originally scheduled to be discharged in New Orleans and relayed to the West Coast via rail. However, the vessel had a departure deadline in New Orleans and had to sail without discharging the merchandise. Petitioner does not deny that a violation occurred. It should be noted that when the violation was discovered a CF-5931 to amend the manifest was filed.

It is the opinion of this office that the violation was the result of ordinary negligence. This is the first offense of this type incurred by the Master. The penalty is mitigated upon payment of $100.

You may notify petitioner of this decision and include a copy of this letter with your notification.

Sincerely,

Signed Harvey B. Fox

652506

[redacted]

Dear [redacted]

This is in reference to the offer in compromise submitted pursuant to title 19, United States Code, section 1617, on behalf of [redacted] in connection with New York District Case No. 78-1001-57061 and Boston District Case No. 78-0401-50342.

The liability was incurred because [redacted] falsely invoiced, as American Goods Returned under item 800.00, Tariff Schedules of the United States (TSUS), semiconductor devices of foreign manufacture. The merchandise was entered under cover of 742 consumption entries filed at Boston between July 1974 and September 1977, and 34 consumption entries filed at New York between May and August 1974.

In a decision dated April 4, 1979, the Customs Service determined that the violation was attributable to gross negligence. This determination was affirmed in a decision dated January 22, 1980, in response to a supplemental petition submitted by [redacted] Based on this determination, the claims for forfeiture value were mitigated to $491,859, provided $157,863.94 is deposited as withheld duties (Boston case) and to $80,192 (New York case). The mitigated amounts represent approximately four times the reported loss of revenue.

[redacted] have offered to pay a total of $407,000 in full settlement of the above cases. This figure represents approximately two times the reported loss of revenue plus the payment of $121,000 in withheld duties. According to the terms of the promissory note submitted, the $121,000 will be paid within 30 days of receipt of written acceptance of the offer. No interest would be paid on this amount. The remaining $286,000 would be paid over a period of 5 years commencing 1 year from the date of written acceptance by Customs, payable in equal installments of $57,200 per year. Ten percent interest would be paid on this amount.

We have carefully reviewed the terms of the submitted offer and have concluded that acceptance would not be in the best interest of the Government. First, it is our view that the record supports the two previous determinations that the violations were the result of gross negligence. Second, the terms of the offer are unfavorable from the Government's standpoint. Both the length of time (effectively 6 years

F1

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

from acceptance) in which the penalty amount would be paid plus an interest rate of 10 percent, well below the current rate, lead us to our decision to reject the proposed offer.

In view of our rejection of the settlement offer, our decision of January 22, 1980, 651755 AB, remains in effect. That decision must be complied with by January 30, 1981, or the case will be referred to the United States attorney for appropriate action. Since we have already considered a supplemental petition, in accordance with Chapter IX, Part B, Fines, Penalties and Forfeitures Handbook, March 1978 revision, no further petitions will be considered unless accompanied or preceded by full payment of all penalties and withheld duties.

Sincerely,

(Signed) Salvatore E. Carmagno

Re: Protest No. 0401-1-000616; Application for Further Review

Dear Sir:

The issue involved in the above-captioned matter is whether the protestant is liable for additional duties assessed by the Customs Service in connection with Entry No. 745420. The protestant claims that any liabilities therefor were settled and resolved when the Customs Service accepted its offer to compromise two penalty claims.

BACKGROUND

In 1978, the Customs Service assessed two penalty claims for forfeiture value against protestant 1/ for violations of title 19, United States Code, section 1592 (Boston District Case No. 78-0401-50342 and New York District Case No. 78-1001-57061). The liabilities were incurred because protestant allegedly entered semiconductor devices into the commerce of the United States under cover of 776 consumption entries pursuant to false invoices. One of these entries is the subject on the instant protest. As a result of the violations, the Government suffered an actual loss of revenue 2/ of $157,863.94 and a potential loss of revenue 3/ of $52,402.33.

1/Although both penalty cases involved joint and several claims against protestant and its president, for purposes of this decision, we will refer only to the protestant's liability.

2/The actual loss of revenue is the duties of which the Government has been deprived by reason of the violation in respect of entries on which liquidation had become final. Section 162.71(a)(1) Customs Regulations (19 CFR 162.71(a)(1)).

3/The potential loss of revenue is the duties of which the Government tentatively was deprived by reason of the violation in respect of entries on which liquidation had not become final. Section 162.71(a)(2), Customs Regulations (19 CFR 162.71(a)(2)).

File

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

Upon consideration of the petitions for relief, the Customs Service mitigated the claims for forfeiture value to $491,859, provided the actual loss of revenue of $157,863.94 was deposited as withheld duties 4/ (Boston case) and to $80,192 (New York case).

On July 2, 1980, in lieu of payment, protestant submitted an offer in compromise pursuant to title 19, United States Code, section 1617 (19 U.S.C. 1617).

According to the terms of the offer, protestant would pay the Customs Service $407,055 ($286,026 representing penalties and $121,029 representing duties on liquidated entries) in full settlement of the penalty claims. With regard to the payment of duties on unliquidated entries, the offer specifically states:

> The amounts set forth above do not include any allowance for payment of duties in respect of unliquidated entries in Boston or New York. As such entries are still subject to assessment of duties, petitioners [protestants] understand that the final assessment of duties as to such entries will be established in consultation between petitioners and Customs in Boston and New York. Therefore, the question of how much duty will be paid on unliquidated entries in Boston and New York is not part of this offer to compromise (emphasis added).

The offer further indicated that the parties would later agree upon the terms of payment.

By letter dated August 26, 1980, the Customs Service advised protestant that the offer in compromise would not be considered until a promissory note setting forth the terms of payment was submitted.

In September 1980, protestant submitted an amendment to its offer, reducing the proposed amount from $407,055 to $407,000 along with the requested promissory note. According to the note, the $407,000 was comprised of $286,000, representing penalty, and $121,000, representing "the amount of lost revenues that the petitioners have agreed to pay the Customs Service."

By letter dated December 31, 1980, the Customs Service rejected the offer. The terms of payment were unsatisfactory because the penalty would not be paid until six years after acceptance of the offer, and because the proposed interest rate of 10 percent was well below the then current rate. The amount of penalty was also deemed to be too low. It is significant to note that the rejection letter identified the $121,000 as withheld duties.

After further negotiations, protestant submitted an amended promissory note during a meeting at Customs Headquarters on January 14, 1980. While the sums of $286,000 (penalties) and $121,000 (duties) were left unchanged,

4/The term "withheld duties" is synonymous with actual loss of duties. Payment of withheld duties is generally made a condition of mitigation. Payment of the potential loss of revenue, however, is always collected upon liquidation of the entries.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

652945

F12

payment was to be made in a shorter period of time and at a higher rate of interest. These changes were made directly on a copy of the original promissory note. The remaining language, including the designation of the $121,000 as "lost revenues that the petitioners have agreed to pay to the United States Customs" was left unchanged. The amended promissory note, unlike the original, was not accompanied by an offer of compromise.

By letter dated February 6, 1981, protestant was advised that the Customs Service had accepted its settlement offer. As in the previous decision letter, the $121,000 was characterized as withheld duties.

In accordance with the terms of the settlement, protestant deposited $121,000 in duties on March 10, 1981. The Customs Service issued a cash receipt for this amount stating:

> Withheld duties (actual loss of revenue) on 646 liquidated entries subject of district cases above (78-0401-50342 and 78-1001-57061)... (emphasis added).

Following the settlement, the Customs Service began liquidating the unliquidated entries which were involved in the penalty cases. Consumption Entry 745420, the subject of this protest, was liquidated on October 9, 1981, and protestant was billed for increased duties.

ISSUE:

The issue is whether the $121,000 deposited by protestant satisfied its liability for duties on both liquidated and unliquidated entries. Protestant argues that it does and that it has no further liability for any increased duties. It is our position that the $121,000 covered duties due only on liquidated entries (withheld duties) and that protestant is liable for increased duties on those entries which were unliquidated at the time of the settlement.

ANALYSIS:

As indicated above, protestant's initial offer in compromise plainly provided that it did not cover duties on unliquidated entries but was limited solely to duties on liquidated entries: "the question of how much duty will be paid on unliquidated entries...is not part of this offer to compromise." In the original promissory note submitted with the offer, the duties to be deposited were characterized as "the amount of lost revenue that the petitioners have agreed to pay the United States Customs." Reading these documents together, the "lost revenue" in the quoted phrase can only be interpreted as meaning duties on liquidated entries (withheld duties).

We believe that the first offer, although initially rejected by the Customs Service, formed the basis of protestant's second offer which was later accepted. This conclusion is inescapable in view of the following:

1. The first promissory note makes express reference to the offer with which it was submitted. After Customs rejected that offer, protestant submitted an amended promissory note which also referred to an offer. In view of the fact that no amended offer was submitted therewith, the only inference that

652945

F13

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

could be drawn was that reference was again being made to the original offer. This inference was proper because, in effect, the only differences between the original and the amended note were the terms of payment.

2. The amended promissory note merely sets forth the terms of payment, without any reference to the substance of the proposed settlement. Therefore, unless the amended note is considered in conjunction with the offer itself, there was no offer to compromise at all, just a promise to pay a certain sum to the Customs Service.

652945

Accordingly, we find that the settlement agreement was comprised of protestant's original offer and the amended promissory note. Therefore, according to the settlement terms, the $121,000 deposited by protestant represented duties on liquidated entries only.

We reach the same conclusion even if we were to determine that protestant's second offer consisted solely of the amended promissory note.

As stated above, protestant's amended settlement offer was made by merely changing certain language on the original promissory note. The language identifying the disputed $121,000 as "lost duties the petitioners have agreed to pay the United States Customs Service" was left unchanged. Prior the amendment, Customs issued the rejection letter which clearly reflected its interpretation that the quoted language meant withheld duties.

Since protestant did not dispute Customs interpretation of that phrase, and left that language unaltered in the amended note, it impliedly accepted Customs interpretation of the language as meaning withheld duties.

Under either theory, Customs position that the $121,000 represented withheld duties is supported by the language both in the acceptance letter dated February 6, 1981, ("the $121,000 representing withheld duties is payable within 30 days") and in the cash receipt issued to protestant on March 10, 1981, upon payment of this amount (the $121,000 represents "withheld duties, actual loss of revenue, on 646 liquidated entries").

It is also significant to note that while it has been held that the Customs Service has the authority to compromise duties on unliquidated entries, see Zenith Radio Corporation v. United States, 509 F. Supp. 1282 (CIT 1981), this authority is rarely exercised because the exact amount of such duties is unknown until the entries are liquidated. Thus, it is the policy of the Customs Service not to compromise duties on unliquidated entries. In view of this policy compromise agreements are interpreted to encompass only the actual loss of duties unless express reference is made to the potential loss of duties. In this case, the settlement agreement clearly states that duties on unliquidated entries are not covered. Therefore, protestant's position must be rejected.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

F14

DETERMINATION

Based on the above considerations, we find that the $121,000 deposited by protestant in connection with the settlement of two penalty cases did not satisfy its liability for the additional duties which are the subject of this protest. Accordingly, you are directed to deny the protest in full.

Sincerely,

(Signed) DONALD W. LEWIS

Dear Mr. Cohen:

Re: United States v. Accurate Mould Company, Ltd., et al., CIT No. 82-2-00164

This is in response to your letter dated October 20, 1982, in which you request our views on a settlement offer of $2,500 from defendant Accurate Mould Company, Ltd. In addition, you ask our position relative to alleged violations by Accurate and its customhouse broker. For the reasons discussed below, we believe that Accurate's settlement offer is fair and reasonable, given case circumstances, and that its acceptance would be in the best interests of the Government.

In light of the decision on Accurate's protest by the Classification and Value Division that the mold was originally entitled to duty-free treatment under item 806.20, TSUS, we are constrained to recommend acceptance of Accurate's offer. The Classification and Value Division found from the "overall circumstances and . . . the documentary evidence surrounding the transaction" that Accurate and [redacted] (the American owner of the mold) intended alterations to be made to the mold when it was originally exported, thereby allowing 806.20 treatment. According to the Classification and Value Division's original decision on the protest, dated May 5, 1982, Accurate's customhouse broker, requested a copy of the lease because of a "seemingly misguided assumption that the mold had been exported under a lease agreement and was being returned thereunder." The Classification and Value Division has further stated that the propriety of the lease is immaterial to the determination of whether or not 806.20, TSUS was applicable to the importation.

We do not believe it is practical to amend the complaint, alleging a non-revenue loss violation, in the wake of the Classification and Value Division's determination that the lease was submitted only because of a misunderstanding between the parties. Litigation on the issue of whether the lease constitutes a material false statement for purposes of section 592, where Customs itself has found that it is immaterial to classification, would likely prove very difficult.

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

G2

Notwithstanding the ruling of the Classification and Value Division, we do not believe that the action should be dismissed without the payment of some penalty by Accurate. Therefore, we recommend that Accurate's $2,500.00 offer be accepted. In reviewing Accurate's First Interrogatories, it is obvious that they are not only aware of the Classification and Value Division's original favorable determination but also of the Region's request for reconsideration which was submitted on August 5, 1982. We believe that Accurate will be just as willing to settle on its original terms even when it learns that the Region's request for reconsideration was denied by the Classification and Value Division on October 26, 1982. Faced with the possibility of the Government amending the complaint and protracted litigation, it does not seem practical for Accurate to withdraw their offer. This is particularly true in view of the fact that since Accurate's protest has been granted, they will be entitled to a refund of their $2,255.00 tender of duty; therefore, they will actually be resolving the matter for a mere $245.00 plus interest, attorneys fees and costs.

In view of the above, we recommend that the $500.00 offer received from [redacted] the other defendant in this case, be accepted in settlement of our section 1592 claims against them. Suit was filed against the broker only after it failed to submit an administrative petition for relief under 19 U.S.C. 1618. Acceptance of this offer is compatible with Customs policy to mitigate section 1592 claims against brokers to a flat sum, usually not exceeding $500.00 upon submission of a petition, absent a showing of fraud or that the broker directly profited from the violation. Therefore, as the claim against [redacted] would probably have been resolved upon payment of a nominal amount, there is no legitimate reason for the Government not to accept their offer.

Sincerely,

/s/ David O. Bates

District Director of Customs
Los Angeles, California 90731

Dear Ms. Rigdon:

This is in response to your referral of the petition and offer in compromise submitted by counsel for [redacted] ("petitioner"). Petitioner requests relief and offers to settle the claim for monetary penalty assessed in the amount of $74,722,461, for violations of title 19, United States Code, section 1592 (Los Angeles District Case No. 79-2704-51915). The amount of $189,538.73, has been offered pursuant to title 19, United States Code, section 1617, to settle the above penalty claim.

Liability for the above penalty claim was incurred because petitioner d/b/a, [redacted] and majority stockholder of [redacted] [now defunct], committed the following acts allegedly as a result of fraud:

a) During the period of September 7, 1977, to March 12, 1979, petitioner entered cotton denim jeans into the commerce of the United States by means of false labeling and false statements as to the country of origin.

b) During the period of June 11, 1976, to May 22, 1979, petitioner entered cotton denim jeans into the commerce of the United States by means of false values, in that deductions were made from the invoiced values for false buying commissions and for quota charges falsely claimed to have been included in the invoice prices and paid.

As a result of the above material false statements, cotton denim jeans were admitted into the United States in violation of the textile quota restrictions. Moreover, there also resulted a reported actual loss of duties in the amount of $308,796*, a reported potential loss of duties in the amount of $221,917, for a total loss of duties in the amount of $530,893.

---

*We are advised that petitioner has made voluntary tenders in the amounts of $29,763.87 and $8,748, toward the actual loss of duties. Thus, the net amount of the unpaid duties claimed is $270,284.13 on the liquidated entries.

G4

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

Prior to a consideration of petitioner's offer of settlement, we wish to discuss the substantive claims raised in connection with the petition for relief from the penalty claim. Petitioner's primary claim in this regard is that there has been a prior disclosure under section 1592(c)(4) by virtue of letters to Customs dated April 20, 1979, and July 24, 1979.

Primarily, it should be noted that we do not find that the letter dated April 21, 1979, from petitioner's counsel [redacted] to the District Director, Los Angeles, represented a disclosure of the "circumstances of a violation" of section 1592. The purpose of that letter was, as counsel then stated, i.e., "to give [Customs] notice" of a proposed making of a prior disclosure. The only statement relating to any circumstances of a violation of section 1592, consisted of the following:

> "Based upon our very preliminary view of [its client's importations from Indonesia, Macao, Philippines, South Korea, and India from 1976 to date of letter] it appears that our clients [sic] entries may have been out of compliance with Customs requirements with respect to some or all of the following factors: A. Buying Commissions B. Country of Origin C. Quota Charges D. Sample Shipments E. Design Assists."

It is our opinion that the foregoing represents no more than advice to Customs of petitioner's intent to make a disclosure in the future. Inasmuch as no false statements and/or material omissions constituting violations of section 1592, were described in the above submission, it did not constitute a prior disclosure under section 1592(c)(4).

By letter dated July 24, 1979, counsel for petitioner submitted what was purported to represent a "detailed disclosure" of the circumstances of the alleged violations. With regard to the violations that have been alleged in this case, this letter advised of the following: A) A certain portion of the cost of merchandise had been allocated on the invoices as a buying commission by [redacted] at petitioner's request with such allocations amounting to 5 percent of the total cost of the goods beginning in 1976 increasing to 7.5 percent of the total cost by 1977; a list of entries having a total loss of duties of $288,044.05, resulting from the false buying commissions was attached. B) In a few cases, charges paid for quota allocations were not disclosed at the time of entry. C) While the April 20, 1979, letter from petitioner's counsel expressed an intent to make a disclosure of violations involving country of origin, petitioner through counsel states

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

65

in the July 24, 1979, letter that "there is no indication that we imported merchandise which was not properly marked and declared with the correct country of origin stated."

Of the foregoing only the information relating to the false buying commissions represents a disclosure of the circumstances of one of the types of violations alleged in this case. Although petitioner does not characterize this violation as involving "false" claims of buying commissions, petitioner pleaded guilty to the following count of a violation of title 18, United States Code, section 1001 relating to the the buying commissions:

> "[redacted] knowingly and willfully made and caused to be made, false, fictitious, and fraudulent statements..., that buying commissions in the following amounts [$2,964.84 and $2,625.36] had been paid to [redacted] in connection with the purchase, importation, and entry... of cotton denim jeans,...."

With regard to a formal investigation of the foregoing violations (false buying commissions), the record is clear that such commenced prior to the date of petitioner's disclosure by letter dated July 24, 1979. On April 21, 1978, a referral was made by Senior Customs Inspector Shiroshi for the investigation of false country of origin designations on petitioner's importations of the subject goods. Pursuant to the foregoing referral, the Office of Investigations interviewed Import Specialist Hinkley on October 5, 1978, and discovered the circumstances of the false buying commissions violations. As a result of this discovery, a foreign investigation into whether [redacted] acted as a bona fide buying agent was requested by Report of Investigation dated November 30, 1978. Thus, in accordance with section 162.74(c)(4) of the Customs Regulations in effect at the time of the disclosure, the investigation into the false buying commission claims commenced on October 5, 1978, "the date on which [the investigating agent] discovered facts and circumstances which caused him to believe that the possibility of a violation of 19 U.S.C. 1592 existed with respect to petitioner and the false buying commissions claims."

Moreover, in view of other events reflected in the record, it is our view that petitioner has not sustained its burden of proving that it was not aware of the commencement of the foregoing investigation by the time of its disclosure on July 24, 1979. Although it was not until July 26, 1979, that [redacted] manager of [redacted] company through which the subject importations were

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

66

made] disclosed the fact that this company did not receive a commission, but only a salary from [redacted] the record reflects that as early as June 28, 1979, [redacted] was interviewed by Customs concerning the company's status as a bona fide buying agent of petitioner in connection with the subject shipments.

At the time of the June 28, 1979 interview, [redacted] reportedly was very uncooperative, explicitly declining to answer any questions or give access to any records before discussing the matter in full with petitioner and [redacted] attorney's in Hong Kong. We have no reason to believe that such discussion between [redacted] and petitioner did not take place after [redacted] was served notice of the specific areas under investigation by Customs. Under the foregoing circumstances, we find that petitioner has not sustained his burden of proving that at the time of his disclosure, he was not aware of the commencement of the investigation into the buying commissions violations. Accordingly, we deny petitioner's claim that there was a prior disclosure of the violations relating to the false buying commissions claims within the meaning of section 1592(c)(4).

Concerning the merits of the instant claim, petitioner also has claimed that he had no knowledge of the transshipments and thus, should not be assessed a penalty based upon such acts. Petitioner should be advised that there has been no penalty assessed simply for the transshipment of the merchandise from one country through another country before shipment to the United States, because such action, in and of itself, is not a violation of section 1592. Rather, the transshipments involved in the subject case were made in connection with petitioner's false claim of the countries of origin of the goods on entry documents presented to Customs as well as on the labels of the garments in order to avoid quota restrictions applicable thereto. With regard to the latter, the record reflects that petitioner indeed did have knowledge of the false country of origin and transshipment arrangements.

In a sworn statement taken on May 20, 1981, in connection with the previous related criminal proceeding, [redacted] stated that an offer to have the subject jeans manufactured in Hong Kong and finished in Indonesian so that they could be shipped to the United States without quota restrictions, was made by a [redacted] (a Hong Kong factory), who claimed to have had an Indonesian factory. This offer was relayed to petitioner prior to commencement of the proposed operations. With regard to [redacted] criminal violations in Hong Kong for jeans shipped to the United States via Singapore as products thereof, [redacted] stated that petitioner paid his fines. With respect to

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

65321

the subject garments that were made in Macao, but transshiped through and as products of Indonesia, [redacted] stated that even though petitioner was advised of these facts after the transshipments, petitioner was advised of the true facts and of the false explanation to be presented to Customs concerning this matter. Finally, [redacted] stated that when the decision to end the transshipments was made by him in 1978 because of the risks involved, petitioner agreed with this action. In addition to the above, one [redacted] hired by petitioner to work at [redacted] in Hong Kong also reportedly stated that petitioner participated in meetings wherein he indicated an understanding that by transshiping jeans through Indonesia, the company would save the cost of purchasing quota. Thus, another person confirms that petitioner was aware of the scheme involving the false country of origin and transshipments in order to avoid the quota restrictions.

In view of the foregoing, we find that petitioner's actions with respect to the false claims of countries of origin made in the subject entries resulted from his intent to avoid the quota limitations on textile products imported into the United States from Hong Kong.

With regard to the false claims relating to quota charges, petitioner maintains that the invoiced prices did include quota charges the deductions of which were proper to arrive at the dutiable values. In this regard, by letter dated January 17, 1985, petitioner has forwarded a letter (undated) purported to have been written by [redacted] which states as follows:

> "The quota charges that [redacted] incurred at Hong Kong were paid separately because it was purchased from third parties who were not the manufacturers of the jeans. The cost of purchasing the quota for each shipment of jeans was included on the invoices and they were subtracted together with the buying commissions to arrive at net dutyable (sic) value.
>
> ... The quota charges were never deducted improperly from the cost of the jeans, instead, they were always added to the cost of the jeans on the invoices."

[redacted] however, subsequently stated to Customs Hong Kong Representatives on May 22, 1985, that after careful review, he would not consider the statements made in the aforecited January 17, 1985 letter to be accurate and that, to the best of his recollection, the invoiced values of goods from [redacted] always included quota charges. The foregoing directly contradicts [redacted] purported statement

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

653213

in the above letter that the "cost of purchasing quota for each shipment of jeans was included on the invoices." The record reflects that [redacted] was one among many Hong Kong manufacturers of the goods involved in the subject case. [The records at Headquarters do not verify that some shipments also were made by [redacted].] Moreover, [redacted] further advised that petitioner prepared the January 17, 1985 letter and sent it to him for his signature and that since [redacted] was in a hurry, he authorized one of his employees to sign the statement.

We, however, find more credible, [redacted] statements made during a Customs interview of him on July 26, 1979. At that time, [redacted] reportedly stated that [redacted] always charged [redacted] for quota whether or not such had been obtained free of charge by [redacted] that the invoice unit prices were adjusted for [redacted] "commissions" and for [redacted] quota charges at petitioner's request. [redacted] further stated during the initial Customs interview that quota charges were paid separately and not included in the invoice prices even though quota charges were deducted from the unit prices. In light of the above, we conclude that petitioner's claims for deductions of quota charges from the invoices were false and resulted from an intent to defraud the revenue.

In connection with the offer of settlement, petitioner also has claimed that the actual loss of duties claimed by Customs should be reduced by the following amounts: a) approximately, $44,673.35, representing the loss of duties attributed to the alleged deductions of false quota charges; b) $38,511.87, representing the total payments on the actual loss of duties already made by petitioner; and c) $50,000, representing the amount paid by [redacted] to the United States Attorney, Central District of California as "restitution" pursuant to the United States Attorney's agreement not to prosecute. Since we have found above that the declarations of quota charges were false, petitioner's subsequent deductions therefor, negatively affected the assessment of duties. Thus, we find that Customs claim for the approximate amount of $44,673, in duties attributable to the quota violations, represents a lawful demand for duties under section 1592(d).

With regard to the $50,000, amount paid by [redacted] as "restitution", however, it is our view that this amount is properly deductible from the actual loss of duties remaining unpaid in this case. The letter dated May 19, 1981, from [redacted] to counsel for [redacted] memorialized an agreement by his office to provide use immunity and to defer prosecution with respect to any transactions on

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC _____

which they would be providing information on the condition that inter alia, [redacted] would "make restitution to the United States Government in cash in the amount of $50,000".

The term, "restitution" in the legal context means "the act of restoring; restoration of anything to its rightful owner; the act of making good or giving equivalent for any loss, damage or injury." BLACK'S LAW DICTIONARY, 1180 (5th ed. 1979). In connection with criminal proceedings, it is well-settled that a court may order restitution as a condition of probation "only for actual damages flowing from the specific crime charged in the indictment of which the defendant is convicted either after a trial or a plea of guilty." United States v. Elkin, 731 F.2d 1005, 1011 (2d Cir. 1984), cert. denied, 105 S. Ct. 97 (1984). Moreover, it also has been held that a defendant who agrees to make restitution in amounts that are greater than sums charged in an indictment may be compelled to honor his agreement. United States v. Elkins, supra at 1012. Even in the latter situation, however, restitution has been interpreted to include only those actual damages or loss caused by the offense or conduct relating to the indictment. Phillips v. United States, 679 F.2d 192, 195 (9th Cir. 1982).

It was recognized in United States v. Tiler, 602 F.2d 30 (2d Cir. 1979) that in a Customs criminal proceeding the Government's actual damages represented the total amount of import duties avoided as a result of the offense. Moreover, the court in United States v. Tiler, supra, noted that the upper limit of the amount that could be ordered to be paid as restitution by the defendants was to be reduced by the sum already paid to the Government by [redacted] [which was involved but not charged in the criminal proceeding] in settlement of both civil and criminal liability relating to the charges.*

In this case, [redacted] neither were indicted nor charged in a civil proceeding for their actions relating to the subject case. Moreover, the record does not reflect

*In United States v. Tiler, supra, the amount of restitution ordered as a condition of probation, was limited to $100,000, above the amount that the government had received as a result of the civil/criminal settlement from [redacted] The court, however, recognized that the amount ordered as restitution did not fix an upper limit on the defendants obligations to the government as a result of their violations.

G10

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

that there were negotiations with [redacted] of a settlement of potential civil claims against them for purposes of our considering that the $50,000, paid as "restitution" represented payment of a penalty. Under the foregoing circumstances, the $50,000, amount paid by [redacted] as "restitution" hardly can be recognized as anything other than payment toward the total amount of actual damages, i.e., lost duties, suffered by the government as a result of the material acts and omissions committed by them and petitioner in this case.

While we are aware of no express prohibition against Customs issuing a subsequent claim for duties which includes the above amount, all of the equities would be weighed against our taking such action in this case. Hence, for purposes of the instant section 1592 proceeding, the loss of duties is deemed reduced by the amount of $50,000, in restitution paid to the Government by [redacted] pursuant to one of the conditions for the Government's agreement not to prosecute them.

With regard to petitioner's claims of inability to pay the penalty claim, we have considered petitioner's income tax returns for the years 1983 and 1984, his financial statement dated August 14, 1985, as well as other evidence of record. While petitioner has reported on his 1983 and 1984 federal income tax returns, negative incomes of ($209,236) and ($63,835), he has reported to Customs on his financial statement, a net worth of $123,823. We also have been advised that petitioner's home is listed for sale at $900,000, reduced from the asking price of $1,095,000.

While we feel that petitioner sufficiently has demonstrated an inability to pay, which we have considered with respect to the principal offered amount of $189,538.73, we do not find petitioner's proposed payment plan providing for $5,000, per year for two years, with increased annual payments thereafter depending upon the financial status of petitioner at the end of the two-year period, acceptable. Therefore, petitioner's offer of compromise is rejected.

In consideration of petitioner's claims of inability to pay, the instant claims for penalties and actual loss of duties under section 1592, are mitigated to the amount of $190,000. This amount may be paid by execution of a promissory note by January 1, 1986, which shall provide for the following terms of payment:

Payment Plan A

1. $10,000, to be deposited at the time of execution of the promissory note (which would include this amount);

THIS DOCUMENT MAY BE RELEASED TO THE PUBLIC ____

611

2. $100,000 to be paid upon the closing of the sale on petitioner's house; provided that such takes place within three years of the date of execution of the note; and

3. $80,000, to be paid in equal annual installments with interest, (computed at the prevailing rate at the time of execution of the note) over a period of eight years.

OR

Payment Plan B

1. $10,000, to be deposited at the time of execution of the promissory note; and

2. $180,000, to be paid in equal annual installments over a period of eight years, with interest to be charged on the outstanding balance during the last five years.

Under both payment plans the promissory note may provide for prepayment of the principal amount without interest.

Please advise petitioner, through counsel of this decision and enclose a copy of this letter with your determination. Petitioner also should be advised that unless a promissory note, as prescribed above, is executed by January 1, 1986, the matter will be referred for judicial enforcement of the $74,722,461, penalty claim.

Sincerely,

(S) Donald W. Lewis

31 AUG 1983

ENF 4-02.2 CO:R:E:C
653374 BLS

District Director of Customs
Los Angeles, California 90731

Re: Petition on behalf of [redacted] for relief from a demand for monetary penalty of $168,711, assessed against [redacted] for violation of title 19, United States Code, section 1592. District Case No. 82-2720-01373.

Dear Sir:

This is in reference to the memorandum dated July 13, 1983, from the Acting District Director, involving the above-captioned matter. The monetary penalty was assessed under the statute for attempting to enter gold jewelry into the commerce of the United States by means of false documents and material and false acts, and was based upon a finding of gross negligence. The Immediate Delivery Application filed with the submitted invoices reflected a shipment of gold jewelry valued at $203,015. In fact, petitioners failed to submit additional invoices which reflected that the actual value of the shipment was $629,053. There is a reported potential loss of revenue of $42,178. The shipment was seized to protect the revenue since the petitioners are non-residents.

The record shows that upon their arrival at Los Angeles Airport (LAX), passengers [redacted] furnished the broker, [redacted] with four invoices for gold jewelry, reflecting a total value of $203,015, and a weight of 31,299.5 grams. [redacted] in turn submitted these invoices and appropriate Customs documentation to the Customs inspector for entry. The inspector asked [redacted] if any additional invoice had been presented to him by the importers at the time of entry and he replied in the negative. The inspector then proceeded to weigh the shipment, and a total weight of 98,728 grams was recorded. Six additional invoices, reflecting the balance of the undeclared shipment, were subsequently submitted to the inspector by petitioner [redacted]
